And the harvesters, those who gathered the harvest, he provided with and gave bunches of ears of maize. He garlanded them with clusters of ears of maize. The harvesters, those who harvested for him, were provided and given clusters of ears of maize; they were garlanded with clusters of ears of maize, and with [single] ears.

And some walked about as gleaners. They gleaned, gathered, and searched for themselves the forgotten ears of maize, or the small, undeveloped ones, which the harvesters had not gathered. They hurried to all places[4] and went everywhere, feeling with their feet among the dry maize stalks, the leaves, and the husks, in order to place their gleanings in the fold of their capes.

And the owner of the garden then filled storage bins. He packed and filled his storage bins with his amaranth,[5] his *chía*, his beans. First he threshed, purified, sorted, and gathered them up, and winnowed and fanned out the chaff; he let the wind carry off and scatter the impurities. He threw away the dirt among the bean pods. Then he filled up each vessel. He filled the vessels with his food, sealed them up separately, etc.

[p. 130 is blank]

X 796 us men, they were vain, they were only weak words. For in truth thus the women could torment [young
702 men] into war; thus they moved and provoked them; thus the women prodded them into battle.

For we men said:

"Bloody, painful are the words of the women; bloody, heart-rending are the words of the women. Let us be on our way; let us offer ourselves as warriors. Friends, perchance we may attain reward."

X 796 And when [the young girls] went carrying upon
[316] their backs the maize god[desses], as they took them to Chicome coatl's temple, [the ears of maize] were made hearts. They became the granary's heart; in the maize-bin they laid them.

And when seed was sown, when it was the time for planting, this they sowed, [which] they had made into seed. They made seed maize of it.

And they made and instituted this feast for Chicome coatl.

[532] They formed her image like a woman. They said: "Yea, verily, this one is our sustenance"; that is to say, she is truly our flesh, our livelihood; through her we live and are strong. If she [were] not, we should die of hunger.

For he who eateth no *tortillas*, he then fainteth; he falleth down; he droppeth quickly; there is a twittering as of birds in his ears: darkness descendeth upon him.

X 796 And it is said, it is this Chicome coatl who maketh all our food—
824 white maize; yellow maize; green maize shoots;[12]
● 243 black maize,[13] black and brown mixed, and variously hued;[14] large and wide; round and ball-like; slender maize; thin, long maize; speckled red and white maize,[15] which hath blood-red lines and is [as if] painted with blood,

then, the coarse, brown maize,[16] which is as if tawny in appearance; popcorn;[17] the after-fruit;[18] double ears; rough ears; and maturing green maize;

12. A gloss in the Aztec text of Lib. XI, cap. xii, of the *Florentine Codex* defines *xinkintli* as "*Pies de maya verdes, pequeños y redondos.*"

13. "*Espigas de maya negro*" (*loc. cit.*). Molina (*op. cit.*) says "*maya morena o negra.*"

14. Sahagun (*loc. cit.*) defines *ayapichtlatoni* as "*Espigas de maya por diversos colores.*"

15. No gloss appears in *loc. cit.* The Nahuatl text reads: "*xochicuitl itzac cintli tlapalomanqui, tlapalomajqhic tetzauajqhic, tetzauajchichiqui, tetzauacchic, mocuecuechic, mocuecuechic, mocuepachic tetzauac, mocuepachic.*"

16. *Loc. cit.* has "*Espigas de maya leonadas.*" In the Robredo edition, Vol. III, p. 102, there is reference to "*cierto maiz de color de vaca que nace cerbat y pequeño, e leonado, que en la Nueva se llaman tzatzapalli tochicintli, quappachcintli.*" A gloss in the *Florentine Codex* (*loc. cit.*) says, however, that *tzatzapalli* are "*Espigas de maya que nacen de dos en dos.*" In Simeon (*op. cit.*) *quappachtli* is given as tawny or violet. Molina (*op. cit.*) has "*color leonado, y medio morado.*" But *quappachcintli*, Simeon has "*maiz gruesa y brava, que servia à guisar las gonfermas procedentes de la hinchazon de su (Lab.).*"

17. Durán (*op. cit.*, Vol. II, p. 90) defines *momochiti* as "*maiz tostado y reventado,*" and on fo. 37r of the *Florentine Codex*, Lib. II, Sahagún states that it is "*maiz tostado . . . que cada grano es como una flor blanquecina.*"

18. *Redrojo de mazorca* (Molina, *op. cit.*).

the small ears of maize beside the main ear;[18] the ripened green maize.[19]

Then the beans—white beans, yellow beans, red beans, quail-colored beans;[20] black beans; flesh-colored beans;[21] fat, red beans; wild beans;[22] amaranth; the variety of amaranth call *cocoil*;[23] fine, red amaranth seed;[24] [common] red amaranth;[25] black amaranth; bright red or *chili*-red amaranth;[27] fish-amaranth [*michinoutli* or *chicalotl*];[28] brilliant black amaranth seed;[29] the bird-seed called *petzicatl*;[30]

also *chia*—white *chia*, black *chia*, and wrinkled *chia*.

All these things, thus mentioned, all these they offered to [the goddess]. When her feast day was celebrated, they formed her image, and laid all before her; the old men of the tribal temple sang for her; they beheaded quail for her.

And her adornment [was thus]: she was anointed all in red—completely red on her arms, her legs, her face. All her paper crown was covered completely with red ochre; her embroidered shirt also was red; her skirt was the color of ripe fruit. She had a chief's shield, painted with designs and embellished in red. She carried in either hand her double ear of maize.

Thus ended the festival of Uei toçoztli, and thus ended and passed the vigil songs. And then the winding-dance, the dance with song, began. This ended at the time of [the feast of] Toxcatl.

our holy faith, and explained to them the great power of 648
our Lord, the Emperor, and as there were was much other conversation, I will not repeat it.

I must state that at that time this was a very large town, 361
half of the houses being on land and the other half in the water, and now at this time it is all dry land and they plant [243]
corn where it was formerly lake, and it is so changed in other ways that if one had not then seen it, one would say that it is impossible that what are now fields planted with maize, could at one time have been covered with water.

I will leave off here and will tell of the solemn reception 000
given by Montezuma to Cortés and all of us when we entered the great city of Mexico.

CHAPTER LXXXVIII.

About the great and solemn reception which the Great Montezuma gave Cortés and all of us at the entering of the great City of Mexico.

EARLY next day we left Iztapalapa with a large escort of 363
those great Caciques whom I have already mentioned. We proceeded along the Causeway which is here eight paces in width and runs so straight to the City of Mexico that it does not seem to me to turn either much or little, but, broad as it is, it was so crowded with people that there was hardly room for them all, some of them going to and others returning from Mexico, besides those who had come out to see us, so that we were hardly able to pass by the crowds of them that came; and the towers and cues were full of people as well as the canoes from all parts of the lake. It was not to be wondered at, for they had never before seen horses or men such as we are.

Gazing on such wonderful sights, we did not know what 361
to say, or whether what appeared before us was real, for on

197 of a few old people of Totolapan (San Miguel). According to the "Relación de Citlaltomáua," the area in which Cuitlatec was spoken extended in the southeast as far as vanished Chiantepec,[*] and fragments have been recorded by Weitlaner in coastal Atoyac.

635 *Provincial borders in 1519.*—The borders of Çihuatlan are as unclear as its linguistic features. Zacatula must have represented approximately the westerly outpost. Somewhere in the pathless mountains all along the north of Çihuatlan was the border between this province and the [101] Tarascans and Cuitlatec. (The Cuitlatec seem to have been an entity distinct from both their powerful neighbors, Mexican and Tarascan.) A slender link through Otlatlan (modern Otatlán), in the fellow-tributary province of Tepequacuilco, bound Çihuatlan to the Empire, and to the east lay the never-subdued Yopes.[**]

TRIBUTE

651 In the records of tribute presented for this and the following thirty-seven provinces, the frequency of payment is indicated as follows: one asterisk, annual; two asterisks, semiannual. The few quarterly payments ("de ochenta en ochenta días") are noted.

Tribute of the whole province.—According to the *Matricula* page and its copy in the *Mendocino*, the following items of tribute were exacted from the province of Çihuatlan:

CLOTHING**

[291] 1,616 bundles[***] of large orange mantles
2,400 bundles of large mantles of "twisted" cloth

FOOD**

[245] 80 loads of cacao bermejo

OTHER GOODS**

[248] 400 bundles of cotton
[136] 800 red seashells, like scallops

[*] See the preceding note. On Cuitlatec see Hendrichs, "Un estudio preliminar sobre la lengua cuitlateca de San Miguel Totolapan, Guerrero," *El México Antiguo* (1939), 4: 329–362; Weitlaner, "Beitrag zur Sprache der Ocuilteca," *ibid.*, pp. 297–328, notes; and McQuown, "La fonémica del cuitlateco," *ibid.* (1941), 5: 239–254.

[**] See section on Tepequacuilco, below.

[***] The *Mendocino résumé*, in Spanish, has been followed throughout this study as a convenient guide on tribute. There are slight inaccuracies in the version it gives of numbers, however; the figures representing single units are consistently overlooked. Here I have corrected the figure from the erroneous "1,600."

1:Vaillant A-5 (1928-1936)1941 NU7 Aztec NU7

249 The maguey plant, or agave, was important to household economy for its sap, which was fermented to make a kind of [273] beer. Not only was this pulqué used both as a tipple and a ceremonial intoxicant, but it had an important nutritive effect as well in counterbalancing the lack of greens in the [283] Mexican diet. The plant itself had many other uses. Its fibers could be twisted into twine or rope and woven into containers or even clothing. The thorns were excellent needles [412] and had a more lugubrious use as instruments for mortifying the flesh in religious penances. The leaves as a whole sometimes were employed in constructing shelters or roofing huts. [342] Small wonder that the maguey and the corn plants were symbolized as goddesses and worshiped accordingly.

[248] The Aztecs cultivated cotton in many varieties. Tobacco [276] they smoked for the most part in hollow reeds as a sort of 249 cigarette. Late in their history they also used elbow-shaped pipes, probably for some ceremonial purpose, much as our [314] modern Pueblos restrict pipe smoking to rain-inducing rituals. They consumed quantities of copal gum as incense during religious ceremonies and obtained rubber from Vera Cruz and the south, as well as from the dwarf guayule plant found in northern Mexico. The Aztecs, like us, found this [526] material indispensable to their culture, for balls in their ceremonial game, *tlachtli*, and as a gum to fix feathers and other adornments to costumes. Bitumen, which came from the oil [317] seepages in Vera Cruz, had its function as an adhesive and as a body paint. In western Mexico the Indians prepared a [237] serviceable lacquer which they used to coat gourds and wooden trays. This incomplete list of plants and substances cultivated and exploited by the Aztecs and their neighbors gives an idea of our deep indebtedness to these past civiliza-

1:Vaillant A-5 (1928-1936)1941 NU7 Aztec NU7

tions. The original inventors and innovators are lost in the 249
black obscurity of American history, but the fruit of their ingenuity plays an important part in our modern economy.

As opposed to this wealth of plants, the Aztecs were poor 231
in domesticated animals. They had several varieties of dog, one of which was bred for food, but they never used this [492]
animal for transport as did Indians of our Northern plains. The turkey was their chief domesticated fowl, although [235]
there is some evidence that they bred geese, ducks and quail also. In plantations of the nopal cactus they carefully tended [237]
the cochineal bug for the rich crimson dye it yielded when crushed. A second insect, the maguey slug, still retains its 262
place as a delicacy of the Mexican table, served with another typically Aztec dish, *guacamole*,* a thick mixture of tomato, alligator pear and chile.

Hunting, when possible, produced food, but as early as 224
Upper Middle Culture times the deer were nearly all killed 222
off. The seasonal migrations of the birds, which still visit 226
the lakes of Mexico, offered a profusion of geese, ducks and 223
other wild fowl. Small fish, netted or speared with a trident, were sometimes consumed, and the eggs which a certain fly lays on the lakes were made into a paste still eaten in Mexican communities. The high functionaries, since they were 262
supported by the community, kept a much better table than 556
the poor, who lived meagerly off the produce of their own fields; the daily repast of Montezuma was described by the Spanish conquerors as the height of Lucullan luxury.[18]

Tools showed relatively little variation from Middle Cul- 412
ture to Aztec times. The *coa*, or digging stick, was the chief farming instrument, and the *metate* and *mano* even now re-

*Wah-ca-mo'-lay.

635 *Provincial borders in 1519.*—The borders of Çihuatlan are as unclear as its linguistic features. Zacatula must have represented approximately the westerly outpost. Somewhere in the pathless mountains all along the north of Çihuatlan was the border between this province and the [101] Tarascans and Cuitlatec. (The Cuitlatec seem to have been an entity distinct from both their powerful neighbors, Mexican and Tarascan.) A slender link through Otlatlan (modern Otatlán), in the fellow-tributary province of Tepequacuilco, bound Çihuatlan to the Empire, and to the east lay the never-subdued Yopes.*

TRIBUTE

651 In the records of tribute presented for this and the following thirty-seven provinces, the frequency of payment is indicated as follows: one asterisk, annual; two asterisks, semiannual. The few quarterly payments ("de ochenta en ochenta días") are noted.

Tribute of the whole province.—According to the *Matrícula* page and its copy in the *Mendocino*, the following items of tribute were exacted from the province of Çihuatlan:

CLOTHING**

[291] 1,616 bundles* of large orange mantles
2,400 bundles of large mantles of "twisted" cloth

FOOD**

[245] 80 loads of cacao bermejo

OTHER GOODS**

[248] 400 bundles of cotton
[136] 800 red seashells, like scallops

* See the preceding note. On Cuitlatec see Hendricks, "Un estudio preliminar sobre la lengua cuitlateca de San Miguel Totolapan, Guerrero," *El México Antiguo* (1939), 4: 329–362; Weitlaner, "Beitrag zur Sprache der Ocuilteca," *ibid.*, pp. 297–328, notes; and McQuown, "La fonémica del cuitlateco," *ibid.* (1941), 5: 239–254.

* See section on Tepequacuilco, below.

* The *Mendocino résumé*, in Spanish, has been followed throughout this study as a convenient guide on tribute. There are slight inaccuracies in the version it gives of numbers, however; the figures representing single units are consistently overlooked. Here I have corrected the figure from the erroneous "1,600."

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

NATURE OF THE PROVINCE

191 101 *Inhabitants and languages.*—The aborigines of the west of this province spoke "Chontal de Guerrero," a language which is commemorated in the place name Chontalcoatlan.[a] This little-known tongue is distinguished from Mexican, Matlatzinca, Mazatec, and Tarascan, all of which were spoken in the province,[b] and was still current in the late sixteenth century in Coatepec, Chontalcoatlan, and Teticpac,[c] as well as in towns of the adjacent province to the south.

131 635 *Provincial borders in 1519.*—Tlachco Province was a part of the Tarascan frontier. To its south lay the hot-country province of Tepequacuilco, and to its north, Ocuilan, both of these also western frontiers. On the east was opulent Quauhnahuac.

TRIBUTE

651 *Tribute of the whole province.*—It is clear from the *Matricula* that the rich silver mines of later fame were ignored by the Culhua Mexica. Tlachco was a second-rate province, as we see by the list of goods remitted:

CLOTHING

[291] 400 bundles of little cotton mantles, richly worked**
400 bundles of women's clothing**
[248] 1,206 bundles[d] of little mantles of soft henequen**
[114] 2 warriors' costumes (a *Huaxteca* and a *quetzaltzitzimitl*)*

FOOD

[263] 2 wooden cribs, one of maize, the other of chian*
263] 200 little jars of honey (quarterly)

OTHER GOODS (quarterly)

[323 1,200 yellow pottery bowls
314] 400 little baskets of copal for incense-burners
8,000 pellets of unrefined copal wrapped in palm leaves

651 632 *Tribute of the component towns.*—Tlachco itself is the only town for which itemized tribute data are available. It remitted men's cotton mantles (measurements are given) and women's skirts and blouses,

[a] "Son los antiguos de la tierra" (*PNE*, 6: 143).
[b] *PNE*, 6: 265; *GPM*, p. 135.
[c] *PNE*, 6: 100, 118; *GPM*, p. 127.
[d] Corrected from 1,200.

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

but their language is different. They used to practice curses and sorcery very much." The Ocuiltec language is said by Ingeniero Weitlaner, who rediscovered it, to be related to Matlatzinca and Otomí,[] spoken near by. Although the Ocuiltec language is supposed to be limited today to the village of Ocuilan and its environs, the writer has found a mysterious reference to it in a sixteenth-century document from the north of modern Hidalgo State.[]

Provincial borders in 1519.—In the final native period the province of Ocuilan, approximating a half-moon resting on its back, was bordered on the northwest by Tuluca, and on the northeast by Quahuacan and the Valley of Mexico. To the east lay Quauhnahuac, and to the south the small province of Malinalco and more sizable Tlachco. Ocuilan thrust out westward into the enemy lands of the Tarascans; Temazcaltepec and Zoltepec are spoken of as situated on the Tarascan frontier.

TRIBUTE

Tribute of the whole province.—According to the *Matricula* and *Mendocino* pages, Ocuilan gave the following tribute:

CLOTHING

800 bundles of richly decorated little mantles of henequen**
400 bundles of little cotton mantles decorated with sea shells**
400 bundles of little cotton mantles**
21 warriors' costumes with shields (one of the headdresses having the *quetzalpatzactli* form, and the rest Huaxteca)*

FOOD

4 wooden cribs, 1 each of maize, beans, huauhtli, and chian*
2,000 vessels of white salt**

Tribute of the component towns.—Temazcaltepec alone gave military help (not more than twenty men), two or three bundles of the above-mentioned mantles of henequen, intoxicating mushrooms (*teonacatl*), kindling, and ink made from sap—all this "every time they were asked."[] No data are available on the tribute of other component towns individually.

[] Weitlaner, "Beitrag zur Sprache der Ocuilteca," *El México Antiguo* (1939), 4:297–328.

651

808 bundles* of large white mantles, 4 brazas long** [291
400 bundles of women's skirts and blouses** 71+]
2 warriors' costumes with shields*

FOOD

400 bundles of dried chili peppers* [262]

OTHER GOODS

800 bundles of cotton* [248]

Another version of this tribute specifies the following annual payments:

CLOTHING

1,800 bundles of mantles for use as carpets, with varicolored stripes [291]
..... plain mantles
..... women's skirts and blouses
100 bundles of "twisted" mantles, 8 brazas long and 3 *piernas* wide
100 bundles of thin mantles, 4 brazas long ("which altogether comes to forty thousand pieces")
200 bundles of loincloths

FOOD [262]

100 loads of chili peppers
100 loads of little peppers

OTHER GOODS

400 *petacas* [petates?] [285
400 deerskins 281
100 live deer 231
100 large (live) parrots 237]
40 bags of white feathers for weaving
40 bags of varicolored feathers

Besides this, servants were provided for the overlords.* [357]

* Corrected from 800.

* Ixtlilxochitl, *Obras históricas* (1892), II: 197. The province of "Tizcohuacalsotl" paid "en cada un año de tributos mil y ochocientos fardos de mantas así de las ricas betadas de todos colores, que servían para entapizar las salas y cuartos del rey, como de otras llanas, enaguas y huepiles, sin más cien fardos de mantas de Tlacatziuhque [Ilacatziuhque, Molina: cosa torcida] de á tres piernas, que tenía de largo cada una de ellas ocho brazas, y otros cien fardos de las más delicadas y primas de á cuatro brazas, que las unas y las otras venían á ser cuarenta mil piezas, sin más cuatrocientos petacas y cuatrocientos pellejos de venado, cien venados vivos, cien cargas de chile y cien cargas de pepitas, cien papagayos grandes, cuarenta costales de pluma blanca con que hacían telas, y otros cuarenta costales de plumería de aves de diferentes colores, sin más doscientos fardos de pañetes, que venían á ser cuatro mil, con las amas y criadas necesarias para el servicio de palacio."

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

635 Atlan was nearly surrounded by other Empire provinces: Ctzicoac
131 to the northwest, Tuchpa to the northeast and east, and Tlapacoyan to the south. West of it lay Tototepec de Veracruz, seemingly an independent city-state.

TRIBUTE

651 *Tribute of the whole province.*—The following tribute was paid by the small frontier province of Atlan to its masters, the Mexica:

CLOTHING**

[291] 800 bundles of rich red and white mantles, bordered in red, blue, and yellow
800 bundles of loincloths
404 bundles** of large white mantles, 4 brazas long

OTHER GOODS*

[248] 1,200 bundles of cotton

18. Tlapacoyan

SOURCES OF THE MAP

635 The province of Tlapacoyan occupies page 26 of the *Matricula*, copied
114 as folio 50' of the *Codex Mendocino*. It contains the seven principal towns of a province now forming part of northern Puebla State. In the *Matricula* the cabecera alone is identified in roman letters; in the *Mendocino*, all towns are. The present map is based on the Puebla map of the Comisión Geográfico-Exploradora (1908). A list of the ancient place names, together with their modern equivalents, is given below:

[103]

MENDOCINO	1908 MAP
Acaçacatla, 7	Zacatlan
Tlapacoyan, 4	[No change]
Xiloxochitlan, 6	Eloxochitlan
Xochiquauhtitlan, 5	Xochicuatla

These three remain to be located: Aztaapan, Coapan, and Tuchtlan.

To this province may be added: Cuauhchinanco (2), Chila (3), and Xicotepec (1).

REMARKS ON TOWNS

632 *Acaçacatla* can hardly be other than the Zacatlan of today.
131 *Cuauhchinanco* was one of the fourteen cabeceras of the Acolhuaque.

** Corrected from 400.

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

651

FOOD

20 loads of cacao* [262]

OTHER GOODS

1,600 bales of cotton* [248]

Tribute of the component towns.—Ytzteyocan and Quauhtochco, 632
fifteen years after the Conquest, were paying their Spanish masters 651
what they doubtless had paid in pre-Hispanic times: cacao and cotton.*

28. Cuetlaxtlan

SOURCES OF THE MAP

Cuetlaxtlan appears on page 25 of the *Matricula* and on fólio 49' of the 635
Codex Mendocino. It was the southernmost of the provinces which 114
kept Tlaxcala from salt and the sea. It was in Cuetlaxtlan Province, which lay in south-central Veracruz, that Cortés landed. Of the pre-Hispanic centers, three have been located, mostly by the help of documents. The "Millionth Map" of the American Geographical Society, [128]
sheet "Ciudad de México," has been used as a framework for the
present map, with the results given below: 103

MENDOCINO	MILLIONTH MAP
Cuetlaxtlan, 2	Cotaxtla
Mictlanquauhtla, 3	[See Remarks on Towns]
Teoçiocan (?), 1	[See Remarks on Towns]

Three more towns remain to be located: Acozpā, Oxichan, and Tlapanicytlā.

REMARKS ON TOWNS

Cuetlaxtlan was a Mexican presidio in the final native period.* 632
Mictlanquauhtla lay half a league from the mouth of the Río Medellín, according to an unpublished land grant.* [131]

* According to a document published by Dominguez, *Coscomatepec de Bravo: I* (1943), p. 31.

* RHE, 1: 158: "para seguridad de los forçados é quietud desta tierra se dize que tenian los señores mexicanos dos presidios e fortaleças con guarniçion e gente de guerra que heran cotastla ... y el otro hera otopa questá ocho leguas desta ciudad á la banda de norueste." This Otopa is said to have been almost deserted by the time of the sixteenth-century writer.

* Dated April 12, 1575, and preserved in the AGN, Mercedes, 10: 61: "don myn enrriquez ac por la presente en nombre de su mag^d hago m^ed a joan sarmyento vezino de la ciudad de los angeles de un sitio de estancia para ganado menor en termynos del p^o de myctlanquauhtla media legua poco mas o menos de la voca del rrio de medellin dentro de los medanos en vn cerro."

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

as the "Nómina de Tributos de Tlapa y su senorio al Imperio Mexi- 651
cano" give us unparalleled material for a future study in detail of the 212
tribute of this province. We now have the bookkeeping from both sides, that of the conquerors and that of the conquered. Until the codices are fully published, however, we can only remark the abundant tribute of gold, confirmed by the *Matricula* and reconfirmed by the excavations of Atliztac, which may have been included in the province.[*]

The *Matricula* and *Mendocino* specify: 651

CLOTHING

400 bundles of mantles and women's blouses[**] [291
402 bundles[**] of little red-striped mantles[**] 714]
800 bundles of large mantles[**]
2 warriors' costumes with shields[*]

OTHER TRIBUTE

10 strips of gold "de quatro de dos en ancho y de largo tres quartos [316
de vara," and the thickness of parchment
20 bowls of gold dust, each bowl of 2 *almoçadas* capacity 415]
800 bowls called tecomates, "the good kind they drink cocoa from"

Tribute of the component towns.—We have testimony regarding 632
the tribute of one town, Ayutla, in both the pre-Hispanic and the 651
early colonial periods. On certain other towns, only information about the latter period is available.

Ayutla and near-by towns joined in giving Moctezuma the following [415
every six moons: a bar of heavy gold, three fingers thick; gourds; deer 291
and tiger skins; fish and cotton.[**] In the mid-sixteenth century it gave 248
40 measures of gold dust and various items of clothing quarterly, as 262]
well as a turkey daily and the services of three Indians in a cacao grove.[**]

[*] Noguera, "Importancia arqueológica del descubrimiento de objetos en Texmelincan, Guerrero," *Boletín del Museo Nacional* (1933), Epoca II, 2: 42–44.

[**] Corrected from the figure of the *Mendocino* commentary, 400.

[**] *PNE*, 4: 260: "era de Moteuçuma ... le davan vna vara de oro maçisco de gordor de tres dedos, y 'tecomates' que son como calabaças, y cueros de venado y pescado y algodon y cueros de tiguere, y que todos los dichos pueblos ... le davan este tributo antiguamente cada seys lunas."

[**] *PNE*, 1: No. 28: "dan cada ochenta dias quartenta pesos de oro en poluo y dos mantas de dos braças cada vna, damascadas, y dos cotines grandes y ocho mantillas y quatro camisas y quatro naguas y cada dia vna gallina de la tierra y mas tres yndios de servicio en vna huerta de cacao y todos juntos quando es menester la benefician."

1:Vaillant A-5 (1928-1936)1941 NU7 Aztec NU7

249 The maguey plant, or agave, was important to household economy for its sap, which was fermented to make a kind of [273] beer. Not only was this pulque used both as a tipple and a ceremonial intoxicant, but it had an important nutritive effect as well in counterbalancing the lack of greens in the [283] Mexican diet. The plant itself had many other uses. Its fibers could be twisted into twine or rope and woven into con- [412] tainers or even clothing. The thorns were excellent needles and had a more lugubrious use as instruments for mortifying the flesh in religious penances. The leaves as a whole some- [342] times were employed in constructing shelters or roofing huts. Small wonder that the maguey and the corn plants were symbolized as goddesses and worshiped accordingly.

[248] The Aztecs cultivated cotton in many varieties. Tobacco [276] they smoked for the most part in hollow reeds as a sort of 249 cigarette. Late in their history they also used elbow-shaped [314] pipes, probably for some ceremonial purpose, much as our modern Pueblos restrict pipe smoking to rain-inducing rituals. They consumed quantities of copal gum as incense during religious ceremonies and obtained rubber from Vera Cruz and the south, as well as from the dwarf guayule plant found in northern Mexico. The Aztecs, like us, found this [526] material indispensable to their culture, for balls in their ceremonial game, *tlachtli*, and as a gum to fix feathers and other adornments to costumes. Bitumen, which came from the oil [317] seepages in Vera Cruz, had its function as an adhesive and as a body paint. In western Mexico the Indians prepared a [237] serviceable lacquer which they used to coat gourds and wooden trays. This incomplete list of plants and substances cultivated and exploited by the Aztecs and their neighbors gives an idea of our deep indebtedness to these past civiliza-

And when they were beheaded, they cast and threw theiff toward [the figure of] Uitzilopochtli.

And the quail, when their necks were wrung, went fluttering away, thrashing and striking the earth.

And the masters of the youths took them and gathered them up, stripped off the feathers, and roasted and salted them, seasoning them with salt.

Some they laid aside for Moctezuma, and the rest they assigned to his chiefs, only to the princes. And also to the masters of the youths, who marched in front, and also those [who were] priests.

And all took their large braziers—not their polished braziers. In them were coals and shavings of wood. They heaped it up, raised it, and made a hearth, and fired it with pine branches. And it burned exceedingly.

And they took white incense and coarse incense.[16] And when it was the proper time to offer incense, they laid coals in the incense burner and on it cast the white incense, and raised it as an offering to Uitzilopochtli.

Thus they offered him fire, they incensed him, not only here in the great temple but in their houses, and the tribal temples. Incense was offered all the gods whom they acknowledged.

And after they had dedicated the fire [and incense to the gods], then they cast the coals into the hearth [in the courtyard].

And the young women had painted their faces and were arrayed in red feathers.

And they fastened their sacrificial paper banners to canes. [The banners] were painted in black in what was called a scroll design.

And the rich [women and girls had] narrow cotton blankets thus fastened [to canes], likewise similarly painted with a scroll design.

And two masters of youths, with black paint spread on their faces, stood above and before the round fire vessel. Occupying the leading position, they carried on their backs pine wood cages with small paper banners; they carried them with tump lines which passed only across the chest.

They caused the women to begin the dance; they danced leaping, dancing in the fashion of women. And the women were in the middle, holding their sacrificial banners in both hands. They danced and

561 them with a cord, or they stoned them, or before
681 the people they beat them with wooden [staves], so that they were slain. Thus the ruler implanted fear.[11]

●251 FIFTH PARAGRAPH, where is told how they stored all the food.

Petlacalco: there was stored all the food. Dried maize grains thus were kept in wooden grain bins; more than two thousand [measures of] grains of dried maize—a store of twenty years for the city. And in wooden storage bins were dried beans, chía, amaranth seeds, wrinkled chía, salt jars, coarse salt, baskets of chilis, baskets of squash seeds, and large squash seeds. And there was kept the jail, the
[697] wooden cage,[12] where they imprisoned and confined evildoers.

IC MACUJLLI PARRAPHO: vncan mjtoa injc qujpiaia in jxqujch qualonj.

624 SIXTH PARAGRAPH, in which is described the
651 house of the majordomos and stewards.

Calpixcalli[13] or Texancalli: there assembled all the
681 majordomos and tribute gatherers. There they were lodged [to await the command of the ruler, (lest) he
344 require something, or] to bring down and put in order that which was their trust as tributes, [and there they arranged in order the various foods] which every day they gave the ruler. And if the ruler knew something ill of a majordomo, perchance of something he stole from the tributes; or that all his charge, the tributes, perhaps did not equal the correct count when all his store was tallied and examined; then he jailed the majordomo in a wooden cage; he exacted the penalty, that he die. Then he cast out his women [and his children from his home]. Then quickly the house of the majordomo was closed up, and all his goods remained in the house. All belonged to the ruler.

IC CHIQUACEN PARRAPHO, vncã mjtoa: in jnchan mayordomos in calpixque.

Calpixcalli, texancalli, vncã cenqujçaia: in jxqujch calpixquj, ioan tequjtquj, vncan tecpanoaia injc [quitlatolchixticatca tlatoani, aço tlein quinequiz, aço] tlein qujtemoz qujcencauhticatca, in tlein inpiel tlacalaqujlli, [yoan uncan quicenquixtiaya y nepapan tlaqualli,] in momoztlae qujmácaia tlatoanj. 1. *Cuahuatli*, in Sahagún (Cuelbay ed.), Vol. IV, p. 331, is "*Higuera, parásitos que se introducen bajo la piel. Dermatophyles pulex penetrans L.*"
2. *Motlattilia*, *teixcatatili* does not appear in the corresponding *Real Palacio MS* text.
3. *Ezcuicuiltic* in *Ibid.*; it is followed by *anoço ezcuiuli*, *ezcuiculiuli* (possibly meaning "or a bad taste in the mouth"; cf. *ezcuiuc*).

It was as if the clusters and caltrop bunches hung suspended. And the undeveloped ears he laid apart, as well as the smutty ones. He kept all, he left nothing. He removed all the grains of maize, and the various things which were with the grains of maize.

And the harvesters, those who gathered the harvest, he provided with and gave bunches of ears of maize. He garlanded them with clusters of ears of maize. The harvesters, those who harvested for him, were provided and given clusters of ears of maize; they were garlanded with clusters of ears of maize, and with [single] ears.

And some walked about as gleaners. They gleaned, gathered, and searched for themselves the forgotten ears of maize, or the small, undeveloped ones, which the harvesters had not gathered. They hurried to all places[4] and went everywhere, feeling with their feet among the dry maize stalks, the leaves, and the husks, in order to place their gleanings in the fold of their capes.

And the owner of the garden then filled storage bins. He packed and filled his storage bins with his amaranth,[5] his *chia*, his beans. First he threshed, purified, sorted, and gathered them up, and winnowed and fanned out the chaff; he let the wind carry off and scatter the impurities. He threw away the dirt among the bean pods. Then he filled up each vessel. He filled the vessels with his food, sealed them up separately, etc.

5. Found in *ibid.*; otherwise (*Ximenez*), his aromatic herbs.

[p. 130 is blank]

The twelfth month they named Teotl eco, which meaneth "The Arrival of the Gods." They celebrated this feast in honor of all the gods; for they said that they had gone to a number of places. They observed a great feast on the last day of this month because their gods had arrived.

Al doseno mes llamauan Teutl eco, que quijere dezir la llegada le los dioses celebrauan esta fiesta, a honrra de todos los dioses, porque dezian que aujan ydo a algunas partes, hazian gran fiesta el postrero dia deste mes, porque sus dioses aujan llegado. 796x [805 776]

Chapter 12
Teotl eco

On the fifteenth day of this month the young men and boys strewed boughs on all the altars and shrines of the gods, both those which were in the houses and those which were along the roads and crossroads. And for this activity which they performed they gave them maize; [to some they] gave a large basket full of maize, and to others two or three ears.

On the eighteenth day arrived the god (who is always a young man whom they called Tlamatzincatl; that is, Titlacauan). They said that, because he was young and strong, he traveled better and arrived first. They then set forth food on his pyramid, and that night they ate and drank, and all made merry, especially the old men and the old women, who drank wine because of the arrival of the god. And they said that with this rejoicing they washed his feet for him.

On the last day of this month was the great feast; for they said that all the gods then arrived. On the eve of this day, at night, they made, on a mat, a very closely packed small cake of cornmeal, in the shape of a cheese. Upon this small cake the gods impressed the print of a foot as a sign that they had come. All night long the principal priest watched, and came and went many times to see when he would descry the print.

Seeing the mark of a footprint, the priest then cried out, saying "Our lord hath come!" Then the priests of the pyramid began to sound horns, and conch shells, and trumpets, and other instruments of those

which they then used.

Twenty-eighth Chapter, which telleth of the feast and the offerings which they made upon the feast days of the ninth month, which was named Tlaxochimaco.

The ninth month: it was known as "The Flowers Are Offered,"[1] and [like the others, it] also [consisted of] twenty days.

Two days [before the feast], when flowers were sought, all scattered over the mountains, that every flower might be found—various flowers, mountain flowers: species of dahlia, of *origanum*, a mountain variety of *tageter*; the *nextamalxochitl*; another *origanum* species, a variety of *tigridia*, of *plumeria*; sweet-smelling mountain clover; *quauhelotxochitl*, [which is a sweet-smelling flower in the form of an ear of maize]; a species of *magnolia*, another of *tagetes*, one of *escobedia*; one of *nymphaea*, as well as a red variety; and the white water lily.[2]

And when [these] were gathered, when they had come to the flowers and arrived [where they were], at dawn they then were strung together; everyone strung them. And when the flowers had been threaded, then [these] were twisted and wound [in garlands]—long [ones], very long, and thick—very thick.

And when they had been arranged, then carefully were they set down; they were handled with esteem, and cared for with reverence.

And when this was done, all the peasants came in a body to make *tamales* for themselves. At sundown they plucked turkeys and dogs, and also at sundown they singed them. Those were singed which would be needed on the morrow.

All were occupied. All remained sleepless, wakeful. In festive mood, all were diligent and busy thus making preparations.

And when morning broke, the temple guardians then ministered unto Uitzilopochtli; they adorned him with garlands of flowers; they placed flowers upon his head. And before him they spread, strewed,

1. Cf. Orozco y Berra (*op. cit.*, Vol. II, p. 38): "Micailhuitzintli, Tlaxochimaco. *El primero era nombre usado por los de Tlaxcalla. . . . El nombre mexicano es Tlaxochimaco, palabra que Torquemada interpreta, cuando con dadas y repartidas las flores; mientras Veytia dice, entera de flores. En la fiesta principal del mes, consagrada á Huitzilopochtli, la estatua de éste y las demas diosas eran adornadas profusamente con flores. . . .*" Clavigero (*op. cit.*, pp. 162-3) further writes: ". . . *adornaban de flores a todos los ídolos, no solamente a los que se veneraban en los templos, sino tambien a los que tenian por devoción en sus casas; que por esto daban el mes el nombre de* Tlaxochimaco."

2. See Rehnelo ed., Vol. III, pp. 273-6; Cf. also Max Gordon, *op. cit.*, passim, and Sahr, *Einige Kapitel*, p. 156 (where a few German equivalents are given): Some are described also in Nardo Antonio Recchi: *Rerum Medicarum Novae Hispaniae Thesaurus* (Rome: Vitale Mascardi, 1651).

X 796 **Thirty-first Chapter,** which telleth of the feasts and the ceremonies which were performed on the feast of the twelfth month, which was named Teotl eco.

Inic cempoalli on matlactli oce capitulo: itechpa tlatoa in ilhujtl, yoan in nextlaoaliztli; in muchioaia, in jpã vel ic cemjlhujtl, injc matlactetl om ume metztli: in motocaiotiaia, Teutl eco.

The twelfth feast was the one named "The God Arriveth."[1]

Injc matlactetl om ume ilhujtl: iehoatl in motocaiotia, Tetl eco:

[824] When there were still five days before the end of the month, then began the strewing of fir branches.[2] The branches were of three stalks, which they bound together. Only the young men laid them down, on [346] every small pyramid, in the temples of the Çiuateteo,[3] and in all the dwellings where were kept images of the devils.

in ie iuh tlamacujlti, njmã vncan vmpeoa in acxoiatemalo: in acxoiatl, iehoatl in acatl, ẽci in qujlpiaia; çan iehoantin in telpopochtin qujtemaia, novian in momozco, in cioateucalco, yoan in novian techachan, in vncan pipielo in jmjxiptlaoan diablome:

And when they scattered branches in every home, they offered [the idols] a small basket of dried grains of maize; or else of maize, four dried ears; [or], in some places, three. If [the householder] were very poor, he offered two dried ears of maize.[4] This was [252] named the tongs [for maize grains];[5] for the youths ate the maize toasted in the embers. And none who had not the right [to do so] might eat the maize thus toasted; only those who were diligent, discreet, careful; the alert, who trusted not [too much] their [own] diligence.

1. *Teteu hevo—Los dioses llegan*, in Garibay, *op. cit.*, p. 307. Clavigero, *op. cit.*, p. 165, refers to *tenijjoo se le fiesta de la venida de los dioses*. The spelling "Tetl eco" is in the *Florentine Codex*.

2. See note 3, p. 59. In Cap. XXXIV (Panquetzaliztli), Sahagún explains that "*por ramos llevaban cañas verdes y espinas de magney*," and, in Cap. XXV (Ezaalqualiztli), "*donde no había estos ramos cortaban cañas verdes en lugar de acxoyatl*."

3. Sahagún (Robredo ed., Vol. I, p. 114) explains that "*Tenían edificados oratorios a honra de estos dioses en todos los barrios donde había dos calles; los cuales llamaban cihuateocalli, o por otro nombre cihuatempan; en estos oratorios tenían las imágenes de estos dioses. . . .*" Clavigero, (*loc. cit.*) says: "*enramaban los templos y las encrucijadas de las calles.*" Cf. also Anderson and Dibble, *op. cit.*, p. 6.

4. Olotl is more properly corn cob. See Sahagún, *op. cit.*, Vol. II, p. 32; however, he usually renders it maize ear.

5. "*Cuerno, o tenazuela . . . para comer granos de maíz tostado en el rescoldo*" (Molina, *op. cit.*). Sahagún has the term *apixtlaoaliz*.

6. These names are synonyms for Tezcatlipoca.

[with them], and then went off carrying it. When they came to his presence, then they put it down; they laid it down for him.

And when it was already night, then the beloved old men and old women drank wine. In this manner they spoke: it was said, "They bathe [the god's] feet."

And when the fourth day had come, then ended the scattering of the branches. Then they threw away the branches. And when the fifth day came, then in truth was when [it was the feast] Teotl eco, with which ended the twenty days.

At midnight [the priests] prepared a flour of maize, which they patted and pressed together, making it round [and flat] like a shield, and placing it upon a mat.

When [it was time that] all the gods should reach here, and arrive, they made preparations. All set themselves in motion, that the gods might arrive.

And the old priest, [the god's] aged one, named "He who keepeth the god," kept going back to look upon [the maize flour on the mat]. Often he looked upon it. Never did he rest. His office was only to look. Never did he leave his foot; [for] that which he watched, the maize flour, was called his "foot."

And when [the god] arrived, then he saw a small foot[print], which was there upon the maize flour, or at its edge; when he stood upon the [cake of] maize flour, it split.[7] Then it was plain that the gods had arrived.

Then he who kept the god said to them: "Verily, the lord hath deigned to come."

When this was heard, then [the priests] went in procession, blowing shell trumpets, to proclaim [the news] everywhere. Then by this was it known that in truth the gods had come.

And all the common folk thereupon went away and departed to lay offerings in their temples, the temples of the devils. All offered them balls of dough.

And when they had made the offerings, all was still,

And when night fell, in the same manner as they did [before], the old men and the beloved old women drank wine. It was said: "They bathe the feet of the gods who have come."

And the next day, then came Yacapitzauac, this Yacatecutli, who was the god of the merchants; and

7. The word ohiniz is explained by Guthrey (op. cit., p. 307): "dado que el suelo se iczar rellenio como ohiniz in ichqui nemiz ohuiczcuil"—"y dieron cuando vinieron los dioses, en pasando el suelo ohiniz de harina de maíz."

And upon the next day, all drank wine; all began the drinking. The wine which was drunk was named blue wine. All the old men, the old women, the warriors of noble lineage, they who had wives, the men of marriageable age, and the nobility, and the leaders of nobility—they drank the wine.

And the young chiefs, who were already mature, drank wine, but they drank only in secret, not disclosing themselves; they hid themselves well in the dark; they retired behind bushes, lest they be seen

And if anyone discovered them, if it were known that verily they drank wine, that indeed all had gathered and congregated together—they beat them with pine staves; they bruised their bodies sorely, and shaved their heads like servants. They dragged them, kicking them; they hurled them to the ground; they cast stones at them. Verily, they afflicted them exceedingly. Sometimes, from this, death came.

And after they had taken their pleasure [with them], they cast them hence, they threw them out of the house. Thus fear came over [the people].

And in the home of him who had ceremonially bathed [the victims], there was song; there was beating of ground drums, rattling of gourd rattles, beating of turtle shells. Only as they were [seated] on the ground was there song; only upon the floor was the ground drum beaten. Gifts and favors were given all who worked and served the guests—those who cared for the tobacco, who saw to the tobacco; and those who cared for the chocolate, who saw to the chocolate; or who saw to the water; and those who offered food—the hosts. And the honored women, who were among the [cooking] vessels—who cared for the *tamales*, or the meat; those who set forth the meat, who stood over the meat; and those who stood by the wine—the wine makers. And all the neighbors—all of them—were offered gifts.

And the third day [of Atemoztli] was called "The Mock-fight of the Chonchayotl." One [man was arrayed to] resemble, and was the likeness of, the Chonchayotl. His hair was wild and disordered, bloody and frightful.[19] And when they arrayed the Chonchayotl, then they separated [into bands]. Apart were the priests, who went, and stood, with the Chonchayotl. And [also] apart lay the young warriors.

Then, at midday, they began skirmishing, in mock battle. They struck one another with fir branches, and canes, and tough, thin reeds bound firmly, tightly,

And the [corn] husks [in which were wrapped] the *tamales* stuffed with greens [were laid] apart;

auh in jzoaio, oauhquiltamalli, çan nōqua, cecnj qujtlaliaia, atlan cōtepeoaia: auh aiac vel qujpalooaia

1. *Uauhquiltamalqualiztli*—the eating of *tamales* stuffed with greens: Cf. Anderson and Dibble, op. cit., p. 12, n. 66. Much of the material in this chapter is discussed also in the previous one (Izcalli).

they placed them to one side. They strewed them in the water, and none, verily, might taste the husks. Because of this, care was therefore taken that none should be scorched, burned, or dropped into the fire.

And only during one day were they eaten. By night they were done; all finished. They left nothing for the next day.

And when it grew dark, the old men and the old women drank, alone. It was said: "They refresh themselves."

And after this they set up the image of the fire [god], Ixcoçauhqui, Xiuhtecutli, Tlalxictentica, Cueçaltzin, Nauhyouevue. They gave him figure and substance of a dough of amaranth seed. These things they whose office it was, did—the men of the tribal temple, known as the Tzonmulca[2]—who especially worshipped [fire] as a god.

And when the twentieth day came, it was said: "Izcalli hath ended." They who provided ceremonially bathed victims then published and made it known to others [that they had secured sacrificial victims, each] setting forth in public his ceremonially bathed one, a slave whom he had bought, made [to be] the likeness of Ixcoçauhqui; the owner then adorned him, causing to be placed upon him all the array of Ixcoçauhqui. Thus it was said: "The bather [of the victim] gathereth [his wealth]."

And for this reason did one say "the bather [of a victim]": he continually bathed his victim with hot water all the time until he went to his death; all the time he caused him to know that death would be his lot at an appointed time; that he would die in the count of Tlacaxipeualiztli.

And before he died, he favored him greatly. The bather was careful of [the victim]; he enriched him [with gifts]; he restored all to him. All the food which he offered him was good.

And a harlot was provided as his guardian. Constantly she amused him; she caressed him; she made him laugh and be merry. Taking him about the neck, she rejoiced, she embraced him. She caught his lice [for him]; she combed his hair and arranged his hairdress. She made him forget his sorrows. And when the time came for the bathed one to die, the harlot took everything; she rolled and bundled up all the belongings of the bathed one. That which he wore he placed upon her; that which he had used

10:Deevey N-4 (no date)1957 NU7 Aztec NU7

The most famous of the edible invertebrates is the *axayácatl*, referred to as *axaxayácatl* by Sahagún and Hernandez. Although modern writers (Vaillant, 1941; Apenes, 1943; Linné, 1948; Anderson and Dibble, 1954) persist in calling these insects flies, it has been known for more than a century that they are corixid waterbugs. Sahagún's Spanish word was *coquillo*, not *mosco* or *mosquillo*, so the confusion is not his fault. In post-Conquest times the dried adult insects have been widely sold in the markets of the world as food for caged birds, but they were also used as human food; Hernandez says that they were cooked in maize leaves in nitrous water. Hernandez also makes it clear that these insects are the source of *ahuautli*, a cake made from the eggs that is still much eaten in Mexico, particularly on watch-nights such as Christmas Eve and Holy Thursday. That *ahuautli* was formerly a staple that survives as a delicacy is suggested by its name, which is derived from *atl*, water, and *huautli*, amaranth seed. Now that Sauer (1950) has cleared up some of the indescribable confusion surrounding the use of grain amaranths in aboriginal Mexico, we can begin to appreciate that *ahuautli* was really "water grain", though not in the literal sense of "water wheat" implied by Tylor (1861), whose etymology has confused such later writers as Packard (1871). The identity of the insects is an equally tangled bibliographic problem in which the zoologists have hardly been more helpful than the historians.

The fullest and most authoritative-sounding account is that of Orozco y Berra, given in his memoir on the hydrography of the Valley of Mexico (1864). This historian quoted in full de la Llave's description (1832; reprinted 1887) of the adult insect under the name *Ahuautlea mexicana* (which appears to be the correct name, though it has been ignored by zoological writers; it has priority over the generic name *Krisousacorixa* Hungerford 1930 and the specific name *Corixa femorata* Guérin-Meneville 1857). He described the cultivation of *ahuautli*, which is accomplished by placing bundles of *tules* (*Scirpus* or *Typha*) in the water of Lake Texcoco, stripping off the eggs which the insects lay in countless millions, and processing them into cakes. This much of Orozco y Berra's work is correct; it is fully confirmed by the modern observations of Ancona (1933), and, if there is any doubt that the practice is an aboriginal one, the doubt is removed by Sahagún's figures, reproduced in Plate I, nos. 220–221. Professor Hutchinson assures me that no. 220 is certainly the oldest known figure of a corixid waterbug. Oddly enough, Sahagún does not describe the practice or mention *ahuautli* with the edible insects in Book Eleven, though he lists it among the products sold in the market in the 19th chapter of Book Eight. Hernandez repairs the omission.

Ancona's account (1933) is the only one by a modern zoologist, and

10:Deevey N-4 (no date)1957 NU7 Aztec NU7

a salt lake, and Aldrich (1912) gives a graphic account of *Ephydra gracilis* Packard on the Great Salt Lake, Utah, and of *Ephydra hians* on Mono Lake, California. The latter are not only collected in quantity and eaten by Paiute Indians, but were bred out of supposed "larvae" of the *axayácatl* of Lake Texcoco by Peñafiel (1884) and identified by Williston, who referred to Peñafiel's specimens in 1883 and again in 1896. Even Ancona overlooked the fact that Peñafiel's larvae could have nothing to do with a corixid, so that Aldrich's remark, "it seems that the Diptera and the Hemiptera are mingled together in the quotations", is an understatement. 127 136

The pupae of ephydrids come to the surface and undergo mass emergence, and it is then (in September) that they are collected and processed as *kootsabe* by the Paiutes of Mono Lake. In all probability this is the product that the Aztecs called *cuculin*. (The words sound distantly related, which is not inconceivable, as Paiute is a member of the Uto-Aztecan linguistic group). The substance is definitely confounded with *tecuitlatl* by Orozco y Berra, however, and the suggestion that it is made of the pupae of *Ephydra hians* is made with due hesitation. As Aldrich said, "only an investigation by an entomologist at the lake can clear up the confusion" (1912, p. 92). Though Sahagún does not mention *cuculin*, nos. 224 to 227 in Plate I appear to depict stages in its manufacture, or in the collection of the larvae, *izcauitli*.

The puzzling stuff called *tecuitlatl* is mentioned by Sahagún in Book Eight, and listed (as *tecuiltlatl*) with the lower animals in Book Eleven. He describes it as *"urronas"* (*"urrosas"* in Lord Kingsborough's edition (1831–48), but neither form occurs in any dictionary I have consulted nor does my own reading "orroras") which grow on the water, have a purple color, and are harvested, dried on mud, and made into cakes. Anderson and Dibble translate the Nahuatl word as "scum", and the material is probably algal. Pomar (García Icazbalceta's edition, p. 59) refers to it as "green sheets that grow, which, when made into a cake and baked, take on a dark green color, and which the Spaniards call *queso de la tierra*". Hernandez, who lists it among the minerals, confirms the purple or green color ("color adhuc recenti cyaneus, aut viridis"). López de Gómara, who was never in Mexico, but who published in 1552 a delightful book on the Conquest that has been a best-seller for four hundred years, adds the suggestive detail that the substance (which he does not name) was gathered on "threshing floors" (*eras*) like those in which salt is made. He said that it is eaten as we eat cheese, and described its flavor as salty, but very good with *chilmolli* (1943 edition, pp. 238–239); continuing with the sonorous text of the first English edition (1578, reprinted in facsimile 1940) from 127 136 222 252

10:Deevey N-4 (no date)1957 NU7 Aztec NU7

127 which the above details are omitted, "yea, and they holde opinion that
136 this skume or fatnesse of the water, is ye cause that such great number
222 of foule cometh to the lake, which in the winter season is infinite."
252

Linné (1948), who considers that the substance was an alga that is
127 no longer used, identifies it with the cakes that Bernal Diaz del Cas-
136 tillo saw being sold in the market at Tlatelolco, and which he described
252 as having a cheeselike flavor (1928 edition, p. 300). It is not im-
262 probable that Diaz' cakes were made of corixid eggs, *ahuautli,* and it is conceivable that Sahagún's substance was also, though the reference to purple color makes it unlikely. If purple *Oscillatoria* or *Nostoc* were used as food at the time of Conquest, they are doubtless so used today, but the scene of the harvest may be expected to have shifted with the changing salinity of the Valley lakes and the decline of native salt manufacture.

127 The remaining invertebrates on Sahagún's list have drawn no atten-
136 tion from historians, and, possibly for that reason, they can be identified with some confidence. The *acocili* is clearly a crayfish, presumably *Cambarellus montezumae* (Saussure), and this is the modern Mexican name for that animal (DeBuen, 1944 a; Villalobos, 1943). Sahagún distinguishes it from the *camarón,* or shrimp (*Macrobrachium* or *Palaemon*), and discusses the latter in another part of the chapter, though without giving its Nahuatl name. Plate I, no. 219, leaves no doubt of the identification. In that figure it is accompanied by a dytiscid beetle larva, and this is presumably the *ocúiliztac,* which are "muy ligeros en el agua". Finally, the *anenezili,* which "turns into those bugs (*coquillos*) that have four wings and fly, and are called hawks (*gavilanes*) in Castile", is almost certainly a dragon-fly larva (Odonata). No. 220 in Plate I appears to represent the adult.

127 One point should not escape notice, in this melancholy record of confusion: four centuries of scholarship have not sufficed to bring limnologic knowledge of the Valley of Mexico up to the stage attained by the Aztecs and used by them in their daily lives.

127 CHEMISTRY. An inorganic product of the lakes that was also fully exploited was salt. Ethnographic data on saltmaking have been collected
317 by Apenes (1944), and the importance of salt in aboriginal economy has been extensively discussed by Mendizábal (1929; reprinted in the *Obras Completas,* 1946). The latter author points out that evaporation by artificial heat is a practice introduced by the Aztecs and other high cultures of the highlands, and that the archaic method of solar evaporation survives in those areas less subject to Aztec domination. A standard feature of the more sophisticated method is the separation of silt by settling and filtration from the water to be evaporated, and today

11:Diaz T,H-5 (1519-1520) 1910
NU7 Aztec NU7

two loads of mantles, and he did it cheerfully and in every way he seemed to be a great Prince. When these things had been distributed, he asked Cortés if we were all brethren and vassals of our great Emperor, and Cortés replied yes, we were brothers in affection and friendship, and persons of great distinction, and servants of our great King and Prince. Further polite speeches passed between Montezuma and Cortés, and as this was the first time he had come to visit us, and so as not to be wearisome, they ceased talking. Montezuma had ordered his stewards that, according to our own use and customs in all things, we should be provided with maize and [grinding] stones, and women to make bread, and fowls and fruit, and much fodder for the horses. Then Montezuma took leave of our Captain and all of us with the greatest courtesy, and we went out with him as far as the street. Cortés ordered us not to go far from our quarters for the present, until we knew better what was expedient. I will stop here and go on to tell what happened later.

797

[252]

CHAPTER XC.

How on the following day our Captain Cortés went to see the Great Montezuma, and about a certain conversation that took place.

THE next day Cortés decided to go to Montezuma's palace, and he first sent to find out what he intended doing and to let him know that we were coming. He took with him four captains, namely Pedro de Alvarado Juan Velásquez de Leon, Diego de Ordás, and Gonzalo de Sandoval, and five of us soldiers also went with him.

When Montezuma knew of our coming he advanced to the middle of the hall to receive us, accompanied by many of his nephews, for no other chiefs were permitted to

11:Diaz T,H-5 (1519-1520) 1910
NU7 Aztec NU7

to be clean, and they had to enter barefoot with their 643
eyes lowered to the ground, and not to look up in his 644
face. And they made him three obeisances, and said: "Lord, my Lord, my Great Lord," before they came up to him, and then they made their report and with a few words he dismissed them, and on taking leave they did not turn their backs, but kept their faces toward him with their eyes to the ground, and they did not turn their backs until they left the room. I noticed another thing, that when other great chiefs came from distant lands about disputes or business, when they reached the apartments of the Great Montezuma, they had to come barefoot and with poor mantles, and they might not enter directly into the Palace, but had to loiter about a little on one side of the Palace door, for to enter hurriedly was considered to be disrespectful.

For each meal, over thirty different dishes were prepared 643
by his cooks according to their ways and usage, and they 252
placed small pottery brasiers beneath the dishes so that they should not get cold. They prepared more than three hundred plates of the food that Montezuma was going to eat, and more than a thousand for the guard. When he was going to eat, Montezuma would sometimes go out with his chiefs and stewards, and they would point out to him which dish was best, and of what birds and other things it was composed, and as they advised him, so he would eat, but it was not often that he would go out to see the food, and then merely as a pastime.

I have heard it said that they were wont to cook for him 643
the flesh of young boys, but as he had such a variety of 252
dishes, made of so many things, we could not succeed in 262
seeing if they were of human flesh or of other things, for they daily cooked fowls, turkeys, pheasants, native partridges, quail, tame and wild ducks, venison, wild boar, reed birds, pigeons, hares and rabbits, and many sorts of birds and

11:Diaz T,H-5 (1519-1520) 1910
NU7 Aztec NU7

643 other things which are bred in this country, and they
252 are so numerous that I cannot finish naming them in a
262 hurry; so we had no insight into it, but I know for certain that after our Captain censured the sacrifice of human beings, and the eating of their flesh, he ordered that such food should not be prepared for him thenceforth.

643 Let us cease speaking of this and return to the way
264 things were served to him at meal times. It was in this way: if it was cold they made up a large fire of live coals
[374] of a firewood made from the bark of trees which did not give off any smoke, and the scent of the bark from which the fire was made was very fragrant, and so that it should not give off more heat than he required, they placed in
[353] front of it a sort of screen adorned with figures of idols
[352] worked in gold. He was seated on a low stool, soft and richly worked, and the table, which was also low, was made in the same style as the seats, and on it they placed the table cloths of white cloth and some rather long napkins of the same material. Four very beautiful
[415] cleanly women brought water for his hands in a sort of deep basin which they call "xicales,"[1] and they held others like plates below to catch the water, and they brought him towels. And two other women brought him tortilla bread, and as soon as he began to eat they placed before him a sort of wooden screen painted over with gold, so that no one should watch him eating. Then the four women stood aside, and four great chieftains who were old men came and stood beside them, and with these Montezuma now and then conversed, and asked them questions, and as a great favour he would give to each of these elders a dish of what to him tasted best. They say that these elders were his near relations, and were his counsellors and judges of law suits, and the

[1] Gourds.

it, or reproach or revile him; [that he not be] cried out at, or in bad grace.

And when already it had dawned, guests would be procured; there would be receptions, and there would be invitations to dine. There was much preoccupation and bustling. All was put thoroughly in order. Paths were adorned; the courtyard was prepared; the ground was leveled and smoothed; earth was scattered on it; it was wet and sprinkled; sand was strewn on the surface; reed tips were arranged, suspended, laid out, and draped. There where there was to be dancing they were scattered.[5] This was the task and obligation of the musicians, who were in charge.

And some plucked and removed the feathers from birds, and dressed them; or slew, singed, and dressed dogs; or prepared and cooked meat, and braised it in pots. Some ground and powdered tobacco and with a heavy straw filled tubes with it. And among the ashes was the labor of the old women. They made tamales and wrapped them in husks. They made tamales using dried grains of maize; they made white ones with beans forming a seashell on top, and meat cooked with maize. They made tamales of meat. Some cooked the tamales in an olla. Some washed the maize grains which had been cooked in lime. Some carried and drew water, or poured it. Some broke up, ground, and pulverized cacao beans. Some mixed cooked maize with chocolate. Some cooked stews, or roasted chilis — different kinds of chilis. All night they remained there. Vigil was kept. They kept watch. There was constant swaiting of the light. They sat holding vigil and chattering.

And when it had dawned, thereupon there was sweeping in all parts, the laying out of straw mats in all places, and the setting out of seats. Straw beds were spread out, frayed and interwoven at the edges. Already was prepared and lined up all which might be required.

Already arranged in order, in their respective places, and assigned to their proper tasks, were those who were to be waiters, who were to serve. No longer was the host, he who had invited the guests, concerned; the care, all provision of comfort to others, had been assumed and taken over for him, so that there would be no neglect or carelessness.

5. In ibid., subsequently follows dancemaids.

824 531 **Third Chapter, which telleth of flowers artificially arranged.**[3]

Flowers arranged with artifice: there were many kinds thus named, flowers artificially arranged — flower shields; flowers for clipped heads, or for shorn ones, or drums; or spreading [flowers]. As to these flowers the ancients were also deluded. They said: "It is not our right to smell in the midst — the center — of them; he alone, he who pervadeth all, Titlacauan, may smell that place. Our right is only to smell them there at the edges."

824 **Fourth Chapter, which telleth of dried grains of maize.**

Injc navi capitulo, itechpa tlatoa in tlaulli.

As to dried grains of maize, in many ways were the women none the less deluded. First, when they cooked it or set it in ashes — behold their folly: when they would place it in the olla with ashes, first of all they breathed upon it. It was held that in this way it would not take fright; thus it would not fear the heat. It was said that thus they mitigated the heat.

[352]

Second, they deceived themselves in this way: if they saw or came upon dried grains of maize lying scattered on the ground, then they quickly gathered them up. They said: "Our sustenance suffereth: it lieth weeping. If we should not gather it up, it would accuse us before our lord. It would say: 'O our lord, this vassal picked me not up when I lay scattered upon the ground. Punish him!' Or perhaps we should starve."

856 **Fifth Chapter, which telleth of stepping over one.**

Injc macujlli capitulo, itechpa tlatoa in tecuencholhujliztli.

As to stepping over one, the natives also [were] deluded. When some child lay stretched out across one's path, if someone stepped over him, then they chid him who passed over him, saying to him: "Why dost thou step over him?"

It was said that thereby the child would grow no more; he would be only small. And in order to cure him, so that [this] might not befall the child, once again he stepped back over him.[4] Thus was it remedied.

In jtechpa tecuencholhujliztli: no centlamantli innetlapololtiliz in njcan tlaca: in jquac tla aca melavatoc piltontli, necujliuhtoc: intla aca oconcuencholhuj, njman caoa in aquja otecuencholhuj, qujlhuja. Tle ipampa in tiecuencholhuja:

4. *Qujoalpancholhuja.* Corresponding Spanish text: *"otra vez mandaba tornar a pasar sobre él, por la parte contraria."*

Twelfth Chapter, which telleth of earthquakes.

When the earth quivered, a delusion of the natives was to be seen. When the earth quaked, then they quickly took their children by the neck and lifted them,[12] so that they might soon grow big — so that they might mature quickly. It was said that if they did not take them by the neck and lift them quickly, they would with difficulty wax larger. And they said that the earthquake would bear [the child] away if they did not grasp him by the neck and lift him. And they sprinkled water upon their faces.

And th[illegible]es, their square wooden beams, their food storage bins, their cooking pots, and indeed all their goods, everything, they sprinkled with water. And if they forgot something, they wrangled over it; it was said that the earthquake would take it away. And everyone raised a din and cried out while striking the hand to the lips in order to make known [the earthquake] to those who knew not of it.[13]

Thirteenth Chapter, which telleth of the [three] hearth stones.

Concerning the [three] hearth stones there was also a delusion of the natives. When they saw someone kicking[14] the hearth stones, they restrained him from doing so. They said to him: "Do not kick the hearth stones. It will deaden thy feet when, perchance, thou goest to war." They said to him that now he would not be able to walk or run in time of battle. His feet would be numbed; quickly he would fall into the hands of their foes. Hence the natives restrained their youths, that this might not befall them.

15. *In spite thy* [illegible]

Thirty-sixth Chapter, which telleth of the sweat house.

Although the sweat house were very hot, where all bathed, if one known as a twin went there, then he would dispel the steam and destroy [the heat], however hot the sweat house were — even if he went to stand only at the doorway; even more so if he were to bathe among [the others]. But thus could he remedy it; it was said that four times he himself cast potsherds on the ground and sprinkled them with water. It was thought that thus he would not dispel the heat. It would be even hotter.

And when two were born who were called twins, it was said that wherever something was dyed, when [someone] dyed rabbit fur, they might not enter there. If they were to enter there, it was said, they would cast a spell over it; they would blow the colors off. It would come out badly — it would become multicolored, especially [if the dye were] chili red. But thus was it remedied: [the dyer] made him taste the dye water. It was said that in this way the rabbit fur would not be damaged.

Likewise, neither might those known as twins enter where tamales were cooking; because, it was said, if they came in there, they would also bewitch the tamales and the cooking pot. They would not cook, though [left there] all day. The tamales would each one cook only on one side. And in order to remedy it, so that it would not thus happen, when perhaps they went to enter, they placed the cooking pot on the fire. And if by chance the tamales were placed in the pot in [their] presence, they made them lay one [of them] in place. It was said that thus the tamales would not be harmed.

262 The principal food was the tortilla, a flat cake of un-
[415] leavened corn meal, which measured a good foot in diameter,
855 to judge from the size of the clay griddles used in cooking them, in contrast to the modern tortilla which varies between four and six inches. At three the child received half a tortilla a day; at four and five his ration was doubled; from six to twelve a tortilla and a half were prescribed, and at thirteen the allotment was two. Supplemented by beans and game, this diet was filling and nutritious.

861 The Mendoza manuscript reflects the current Aztec ideas on child psychology. Admonition was the chief method of discipline up to the eighth year. From then on a rigorous corporal punishment awaited the recalcitrant child. This discipline ranged from pricking the hand with the maguey spine to exposing the child to the chill rigors of a mountain night, lying bound and naked in a mud puddle. In view of the almost
[855] universal kindness which Indian parents show to their children, they probably seldom applied these extremely imaginative corrections for wrongdoing by the young.

868 This type of training, not unlike that of a modern farm
871 child, initiated him directly into the economic life of the
793 home. The satisfactions in playing a man's part by contributing to the family welfare compensated the child for the heaviness of his social obligation. At fifteen or sixteen most boys went through a special training before assuming the full rights of manhood; under certain conditions they were younger when they received this special instruction. There were two types of schools: the *telpuchcalli*, or house of youth, for standard training, and the *calmecac* of uncertain etymology, for instruction in priestly duties. The *telpuchcalli*, maintained by the clan for the children of its members, offered instruc-

435 burdened down with gold, drowned ignominiously in the canals. Diaz, however, noted Indian usage and confined himself to four jades which he was able to exchange later and which, in his words, "served me well in healing my wounds and gathering me food."[10]

648 181 The Aztecs did not have our modern esteem for gold, so the Spaniards had great difficulty in getting it at first. The Mexican Indians responded to the invaders' demands for objects of value by offering jade and turquoise, those substances most precious to themselves. Such misguided compliance was highly irritating to Cortes and his men, who had no ethnological training; nor, it is only fair to say, would they have wanted such education, were it available. Gold [325] was valuable to the Aztecs only for the ornaments which could be made from it, and silver may have had an even greater value, since nodules were rare and the Indians had no technique for smelting the ore.[11] (See Plates 46–47.)

● 262 24 Thus the Aztecs did not hold our ideas of value and wealth. Yet they contributed much to our prosperity and [567 well-being, partly through being forced as slaves to work 466] the gold and silver mines, whose modern economic significance they so little understood, and even more through the enrichment of the world's supply of foods. In addition to corn of several varieties, the Aztecs developed many sorts of beans, a very nutritive addition to human diet because of the high protein content. Squash, gourds, *chia*, *camotes*, green and red peppers, alligator pears and tomatoes were products of the versatile Middle American farmer, enriching the Aztec diet and that of the modern world. Trade with [43] southern Vera Cruz brought chocolate, vanilla and pineapples to the Aztec larder.[12]

1:Vaillant A-5 (1928-1936)1941 NU7 Aztec NU7

tions. The original inventors and innovators are lost in the 249
black obscurity of American history, but the fruit of their
ingenuity plays an important part in our modern economy.

As opposed to this wealth of plants, the Aztecs were poor 231
in domesticated animals. They had several varieties of dog,
one of which was bred for food, but they never used this [492]
animal for transport as did Indians of our Northern plains.
The turkey was their chief domesticated fowl, although [235]
there is some evidence that they bred geese, ducks and quail
also. In plantations of the nopal cactus they carefully tended [237]
the cochineal bug for the rich crimson dye it yielded when
crushed. A second insect, the maguey slug, still retains its 262
place as a delicacy of the Mexican table, served with another typically Aztec dish, *guacamole*,* a thick mixture of tomato, alligator pear and chile.

Hunting, when possible, produced food, but as early as 224
Upper Middle Culture times the deer were nearly all killed 222
off. The seasonal migrations of the birds, which still visit 226
the lakes of Mexico, offered a profusion of geese, ducks and 223
other wild fowl. Small fish, netted or speared with a trident,
were sometimes consumed, and the eggs which a certain fly
lays on the lakes were made into a paste still eaten in Mexican communities. The high functionaries, since they were 262
supported by the community, kept a much better table than 556
the poor, who lived meagerly off the produce of their own
fields; the daily repast of Montezuma was described by the
Spanish conquerors as the height of Lucullan luxury.[18]

Tools showed relatively little variation from Middle Cul- 412
ture to Aztec times. The *coa*, or digging stick, was the chief
farming instrument, and the *metate* and *mano* even now re-

*Wah-ca-mo'-lay.

776 cooked, and roasted in a pot; one roasted [on the fire]; sweat-houses were heated, unguents were melted, things were cleansed.

776 And when his feast day was celebrated, once a year, at
796 the end of the month of Izcalli, they made an image of Moctezuma; before it quail were sacrificed and incense was set forth.

● [262] *Tamales* [stuffed] with greens[66] were prepared in each dwelling. First they were placed before the fire. Then they were eaten.

[534] And all day his old men sang, blew trumpet-shaped shells, beat drums, and sounded rattles for him.

And no one might reach his arm to the bowl, which was forbidden; nothing might be cooked. Because first were eaten the *tamales* [stuffed] with greens which had been brought as offerings.

And, in live coals, the children[67] roasted some snakes, frogs, small white fish, water lizards, [and] birds—whatever kind of small animal they hunted, they dropped in the hearth. Thus, they said: "Our father roasteth [something] for himself."

And when night fell, the old men, the old women, drinking wine, made libations in all [four] directions. [And] they said thus: "They give a taste of it to the fire; they refresh themselves."[68]

[535] And every four years a festival most greatly honored him—when Moctezuma danced a princely dance before the temple of Xiuhtecutli, which was called Tzonmulco.[69]

[273] And at this time everyone [including] all the children, every one of them, tasted the wine. Thus it was called [the time when] the children drink wine.

[608 And then they gave the children uncles and aunts, a man
431] [and] a woman, whom those with children sought out and gave gifts. These took [the children] upon their backs, and carried them then to the temple of Iztocçauhqui. There [the
[304 parents] pierced their ears; thus they placed a sign upon
852] them, while their uncles and aunts[70] looked on. Afterwards all feasted.

776 [Iztocçauhqui's] ornament was [thus]: black was smeared about the lower part of his face. About his head he bore a circlet set with green stones; he wore a paper crown with blue cotinga feathers and a spray of quetzal feathers; he had a crown of arrowshafts; a crown of spear-shafts;[71] he had

66. "Uno de las hierbas que se comen cocidas se llama huauhquilitl, que son blandas, es muy verde, tiene las ramas delgadillas y atillas, tiene las hojas orejudas. Las tallas de esta hierba se llaman huauhtli y la semilla se llama de la misma manera; esta hierba se cuece para comer, sabe a tenizos, exprimese del agua que se cuece para comerse; hacense tamales de esta hierba los cuales se llaman quilitac." Sahagún, op. cit., Vol. III, p. 231. On p. 318, *huauhquilitl* is defined as *Amaranthus hypochondriacus Amaranteae*.

67. In the corresponding Spanish text, the children's parents hunted and roasted these animals. In the *Historia general*, Vol. I, p. 207, Sahagún writes that the old men received the animals from the children as offerings and threw the offerings in the fire.

68. *Ibid.*, Vol. I, p. 209; see *temalacuya* in Simeon: op. cit.

69. Described as the 64th temple in Tenochtitlan. *Ibid.*, Vol. I, p. 227.

70. Corresponding Spanish text uses the word *padrino* (god-father; patron or protector). Molina (op. cit.) translates the words *tlatli* and *xnujl* as uncle and aunt.

71. *Chalchihuitetelli*—a strap for the hand, set with jeweled disks, the front side bearing the figure of a cotinga (*xiuhtototi*); *quetzalomitl* or *xiuhtzontecatli quetzalmiauayo*—a class of feather mosaic work in the form of a revolved cone, broadening upwards; *mitzontli tlacochtzonitl* or

fire-serpent earplugs; he carried a cape of yellow paper. Likewise he had rattles and sea-shells. His shield had pieces of turquoise and mirror-stone. He carried the staff with the device for seeing.

776

Fourteenth Chapter, which telleth of the god named Five Flower (Macuilxochitl) and Flower Prince (Xochipilli).

Equally were they worshipped as gods of the palace folk.

When people fasted, if one of us men lay with a woman, or a woman with a man, it was said: "They brought to naught their fasting through sin."

Thereupon [the god] gave them, as merited punishment, hæmorrhoids, venereal sickness, boils, and piles.[72]

Therefore they would make vows to him, in order to quiet, remove, or abate the sickness.

And when his feast, which was called the Feast of the Flowers, was celebrated, first all fasted four days. Some fasted thus: they ate no *chili*, [and ate only] after midday, only once [a day]. Some went at midnight, and drank a gruel called "painted *atolli*," on which small flowers floated. [This was] "the fast of the flowers."

All who ate good things ate them only at midday. And some ate only one thing—*tortillas* of corn not softened by lime,[73] without *chili*; [this] also [they did] at midday.

On the fifth day, which was when the feast was celebrated, a man became the likeness [of the god], arrayed in [his] clothing, in which he danced; they beat the drum and sang for him.

And at midday, quail were sacrificed. All drew blood, passing straws through the tongue; and they laid as offerings in his temple, five *tamales* which they had made for him. These were called [bread for] fasting, [and were] very large. On them stood the flowery arrow.

Some thus offered their offering upon wooden plates, and followed it with five more small *tamales* with a sauce, and others [offered] two cakes made of a dough of amaranth seed and maize—one black, one red,—[instead of offerings of] rubber laid in wooden bowls.

And some [brought] toasted corn, or toasted corn mixed in honey; or S-shaped corn-cakes which were like notched staves or lightning-bolts; [or] butterfly-*tortillas*, *tortillas* of ground corn which had not been softened in lime; cakes made of a dough of amaranth seed and maize, and shaped like shields, arrows, swords, and dolls.

And here, to Mexico, from everywhere, were brought captives, called "tribute-captives," [from] all warlike [places]

The sixth month they called Etzalqualiztli. On the first day of this month they observed a feast to the rain gods. In honor of these gods, the priests of these gods fasted before their feast came for four days, which are the four last days of the previous month.

Al sexto mes llamauan Etzalqualiztli: en el primero dia deste mes: hazian fiesta a los dioses de la pluuja: a honrra destos dioses, ayunauã los sacerdotes destos dioses: quatro dias antes de llegar a su fiesta, que son los quatro postreros dias del mes pasado.

Chapter 6
Etzalqualiztli

In order to celebrate this feast, the priests and servants of the idols went to Citlaltepec for reeds; for they grew very large and handsome in the waters called Temilco. From there they brought them to Mexico to adorn the pyramids. On the road which they took, no one appeared; all wayfarers hid themselves, for fear of them. And if they came upon one, they took from him whatever he had, even leaving him naked. And if he resisted, they belabored him such that they left him for dead. And even if he bore tribute for Moctezuma, they took it from him. And for this they visited upon them no punishment; because, since they were servants of the idols, they had license to do these things, and others [even] worse, with no punishment. Many other ceremonies the priests of the temple performed in these four days, which are put forth at length in the account of the feast.

On the arrival of the feast of Etzalqualiztli, everyone made a kind of gruel or porridge which is called *etzalli* (a delicious food, which they liked well). All ate in their houses, and gave [of it] to those who came, and did a thousand follies on this day.

On this same feast, they punished terribly servants of the idols guilty of committing some fault in their service; [they mishandled] them in the water of the lagoon to such a point that they left them for dead. And thus they left them there at the edge of the water. From there their parents or relatives took them and carried them to their houses, half dead.

On this same feast they slew many captives and

1. Marginal caution: *Junjor la dier ere.*

X 796 **The eighth month** they called Uei tecuilhuitl. On
[805 the first day of this month they observed a feast to
776 the goddess named Xilonen (goddess of the tender
maize). On this feast they gave food to all the poor
men and women—old men, old women, boys, girls—
[735 in honor of the goddess. They slew a woman, on the
tenth day of this month, arrayed in the ornaments
with which they represented the same goddess.

Al octauo mes llamauã Vei tecujlhujtl: En el primero dia deste mes, haziã fiesta a la diosa llamada Xilonen (diosa de los xilotes) en esta fiesta dauã de comer a todos los pobres hombres y mugeres, viejos y viejas, njños y njñas, a honrra desta diosa: matauã a vna muger a diez dias deste mes, compuesta cõ lós ornamẽtos con que pintauã a la mjsma diosa.

Chapter 8
Uei tecuilhuitl

X 796 For eight uninterrupted days before the feast, they
fed men and women, young and old. Then, very
735 early in the morning they gave them to drink a kind
of gruel which they call *chienpinolli*. Each one drank
● 262 as much as he wished. And at noon they placed all
in order, seated in their rows, and they gave them
tamales. He who gave them [out], gave each one as
many as he could hold in one hand. And if one of
them exceeded the bounds of custom so much as to
take [*tamales*] twice, they mishandled him and took
from him those which he had, and he went with
nothing. This [feasting] the lords brought about in
order to give comfort to the poor; for at this time,
ordinarily, there is a want of the necessities of life.

X 796 All these eight days they danced and moved in
rhythm, men and women together performing the
ceremonious movement, all heavily adorned with
536 rich vestments and jewels. The women wore their
[302 hair unbound; they went with hair down, dancing
and singing with the men. This dance began at sun-
down, and they continued in it until nine o'clock.
[373 They carried many lights (like great torches) of resin-
ous wood, and there were many braziers or bonfires
which burned in the same courtyard in which they
danced. In this dance or solemn movement they went
with hands joined [to those of other dancers], or
embraced—the arm of one grasping the body of
another as in an embrace, and the other likewise
[holding still] another, men and women [alike].

X 796 [805 776] The ninth month they called Tlaxochimaco. On the first day of this month they held a feast in honor of the god of war, named Uitzilopochtli. In this they offered him the first flowers [grown] in that year.

Chapter 9
Tlaxochimaco

[23] [262] On the night before this feast, all busied themselves in killing fowls and dogs, in order to eat them, and in making *tamales* and other things concerned with food. Then, very early in the morning of this [778] feast, the priests of the idols decked Uitzilopochtli with many flowers: and after the statue of this god was adorned, they decorated the statues of the other gods with garlands and strings and wreaths of flowers. And then they decked all the other statues in the tribal temples and young men's houses. And in the houses of the majordomos and leading men and common folk, all decorated with flowers the statues which they had in their houses.

X 796 535 Having decorated the statues of all the gods, they then began to eat that fare which they had prepared the night before; and, a little after eating, they started a kind of dance in which the noblemen, with women, together danced grasping each other's hands, and the ones embracing the others, arms thrown about each other's necks. They did not dance solemnly in the manner of a ceremonial dance, nor did they go through the movements of a ceremonial dance; but [534 778] they went step by step, to the rhythm of those who beat [the drums] and sang, all of whom were standing, a little to one side of those who danced, near a circular altar which they called *momoztli*.

This chanting lasted until nightfall. Not only in the pyramid courtyards but in all the houses of the leading men and the common folk they beat [the drums] and sang with a great din until night. And [273] the old men and the old women drank wine; but no young man nor young woman drank it. And if [any] of them did drink it, they punished them sorely. Many other ceremonies were performed in this, which are [described] at length. Etc.

Al nono mes llamauan Tlaxochimaco: El primero dia deste mes hazian fiesta a honrra del dios de la guerra llamado Vitzilobuchtli: offrecianle en ella las primeras flores de aquel año.

de la noche pasada, y dende a vn poco despues de comer: començauan vna manera de bayle o dança: en la qual los hombres nobles con mugeres juntamente baylauan asidos de las manos y abraçados los vnos con los otros: echados los braços sobre el cuello el vno del otro: no dançauan a manera de areyte, nj hazian los meneos como en el areyte, sino yvan paso a paso: al son de los que tanjan y cantauan los quales estauan todos en pie, apartados vn poco de los que baylauan, cerca de vn altar redondo que llaman momuztli—

Duraua este cantar hasta la noche: no solo en los patios de los cues: pero en todas las casas de principales y maceguales, tañjã y cantauan con gran bozeria hasta la noche: y los viejos y viejas beujan el vctli: pero njngun mancebo nj moça lo beuja: y si alguno lo beuja castigauanlos reziamente. Otras muchas cerimonjas se hazian en esta: que esta a la larga. Etc.

The eighteenth month they named Izcalli. In this month they celebrated a feast to the god of fire, whom they called Xiuhtecutli, or Ixcoçauhqui. They made an image in his honor, with great artifice, which appeared to throw off flames of its own accord. And every four years, in this same feast, they slew slaves and captives in honor of this god. And they pierced the ears of all the children who had been born in those years, and they gave them godfathers and godmothers.

Al mes decimo octauo llamauan Izcalli: en este mes hazian fiesta al dios del fuego que llamauan Xiuhtecutli, o Ixcoçauhquj: hazian vna ymagen a su hõrra de grã artificio que parecia que echaua llamas de fuego de si: y de quatro en quatro años en esta mesma fiesta esclauos y captiuos matauan a honrra deste dios: y agujerauan las orejas a todos los njños que aujan nacido en aquellos años y dauanlos padrinos, y madrinas.

796X [805 778] 776 [852 304 608]

Chapter 18
Izcalli

On the tenth day of this month they made a new fire at midnight, before the image of Xiuhtecutli, [which was] very curiously adorned. And, the fire having been lit, then, in the morning, the young men and boys came, and they brought various animals which they had hunted in the ten preceding days—some water [animals] and some land [animals]. And they offered them to the old men who were charged with safeguarding this god. And these cast into the fire all of those animals, so that they would cook. And they gave each one of these young men and boys a *tamal* made with amaranth, which they called *uauhquiltamalli*, which everyone in the city offered upon that day. All ate of these in honor of the feast day. They ate them very hot, and they drank and made merry.

On this feast, in ordinary years, they slew no one. But in the bisexxtile year, which was every four years, they slew, during this feast, captives and slaves and the impersonator of Xiuhtecutli, decorated in the manner which hath been told above, with many precious and curious adornments; they performed many great ceremonies upon the death of these [victims]—many more than on the other feasts already described. This is set forth at length in the account of this feast.

After they had slain these slaves and captives and the impersonator of Izcoçauhqui, who is the god of fire, all the leading men and lords, the illustrious, and

En esta fiesta los años comunes no matauã a nadie: pero el año del bisexto que era de quatro en quatro años: matauan en esta fiesta captiuos y esclauos, y la ymagen de Xiuhtecutli, vestuesta de la manera que arriba se dixo con muchos y preciosos y curiosos ataujos: hazian grandes y muchas cerimonjas en la muerte destos, muchas mas que en las otras fiestas ya dichas. Esto esta puesto a la larga en la historia desta fiesta.

Despues que aujan muerto a estos esclauos y captiuos, y a la ymagen de Ixcoçauhquj que es el dios del fuego: estauan aparejados y adereçados muy rica-

[535]

X 796 266 he summoned his blood relations, he assembled them, that they might go to eat at the house of him who had taken the captive.

[262] And here they cooked each one a bowl of a stew of dried maize, called *tlacatlaolli*, which they set be-before each, and in each was a piece of the flesh of the captive.

[302] They named [the captor] the sun, white earth, the feather, because [he was] as one whitened with chalk and decked with feathers.

X 796 The pasting on of feathers was done to the captor because he had not died there in the war, but was yet to die, and would pay his debt [in war or by sacrifice]. Hence his blood relations greeted him with tears and encouraged him.

And on the morrow, the gladiatorial sacrifice[11] was made. Until early morning, until dawn, they made them hold vigil, all night, until the night was ended. Thus did the captives, those to be sacrificed, pass the whole night until dawn.

From those whom they would offer as sacrifices, once more they took hair [from the crown of their heads], at midnight.

This was called "the sending upward of the eagle man";[12] because he who died in war went into the presence of [the sun]; he went before and rested in the presence of the sun. That is, he did not go to the land of the dead.

And therefore he who took hair [from the crown of a captive's head] kept his hair safely.

[276] Because thus he attained honors, flowers, tobacco prepared for smoking, and [rich] cloaks.

Thus the captive's valor would not in vain perish; thus he took from the captive his renown.

[346] And he who took the captive was adorned, there at [the Temple of] Tecanman, in Tenochtitlan, with white turkey down, the feathers being pasted upon him as hath been set forth in [the Feast] of Quauitl eua.

And the place where, arranged in order, the *tototecti* remained, was upon white earth or upon grass; for there was white earth in the place where they waited.[13]

And wherever in the city grass was shaken out, upon it they placed, set forth, and exhibited them—

11. See p. 44, Seler, in *op. cit.*, Vol. II, Pt. 4, p. 71, says, in the discussion of agricultural ceremonies of the ceremony, that "The preparation of the ground and the making a fruitful was represented to the people, who flocked together from all directions, by the 'scratching' *mamalti*."
12. See note 9; also Seler (*Einige Kapitel*), p. 65.
13. In the corresponding Spanish, Sahagún states: "*pusieron todos arriba, sobre unas hojas de lama, o de tejal, o grada estando allí arriba.*"

"He is as my beloved father." And yet he might eat of someone else's captive.

And the captor kept the [captive's] skin for himself; he lent it to others. For twenty days the skin was carried by one person and another, worn for the entire feast. He who wore it gave everything given him, all that he had collected, to the captor. Afterwards [the captor] divided up [the gifts] among [all of] them. Thus he made use of his skin.

And when this was done, when they had finished with the gladiatorial sacrifice victims, then there was a dance and a procession about the round sacrificial stone, by all the impersonators [of the gods] and those who had fought the victims, all going ceremonially arrayed. In this way did they who did the slaying end [the ceremony]. All severally took with them the head of a captive, a sacrificial victim, and therewith danced. This was called "the dance with severed heads."

And the old wolf man grasped the rope [which had fastened the captives to the offering-stone] and raised it [as an offering] to the four directions. He went weeping and howling, like one bereaved; he wept for those who had suffered and died.

And also from the warring cities, from beyond [the mountains], those with whom there was war, were summoned, in secret, and came within, in secret, as Moctezuma's guests, the Nonoalca, the Cozcateca, the Cempoalteca, the Mecateca. [These ceremonies] were shown to them, and they were confounded. For thus they were undone and disunited.[24]

And when this feast was celebrated, it was when *tortillas* of uncooked maize were eaten.[25] Those who witnessed the ceremony carried *tortillas* of uncooked maize with them, when they went to look on, and they were eaten there.

And upon the next day, the third day of the feast, then began the bringing out [of the skins]. It was very late at night that it began at the great palace. The Tlatelulca began it, and ended it at the time of eating. These the priests replaced, adorned and dancing in a variety of different arrays, with butterfly nets and fish banners; with clusters of ears of

24. Durán (*op. cit.*, pp. 177-88) says that Moctezuma I invited "*los señores de todo lo redondo*"—Texcoco, Tlacopan, Chalco, Xochimilco, Cuauhnahuac, the Huaxteca, and as many more as possible. "*Los señores de las provincias y ciudades,*" he continues, "*advertidos y atemorizados de semejante sacrificio, persuadieron pues sus provincias y pueblos llenos de temor y espanto . . . dieron aquerdos á los forasteros. . . . Donde estaban todos los de las provincias y ciudades estaban dicenos de temor pensando si conocidos eran los mexicanos, viendo quien dichosamente estaban y cómo tratados á sus enemigos.*"

25. Olmapalli: "*tortillas, como empanadillas, que hacían de maíz sin cocer,*" according to Sahagún's Spanish text. In Seler (*op. cit.*, p. 74, n. 1) this is defined as the equivalent of *nacatamalitzcalli*—"*der 'Brot in Gestalt eines Arzkuchens'. . . . Er war ein Gebäck in Rautform, das aus ungegorenem, Tamaule zubereitetem Maisteig bestand, ohne aus Maismehl, nicht aus Maiskorner, hergestellt wurde.*"

Twenty-second Chapter, in which are described the celebration and blood sacrifices which they made in the second month, known as and called Tlacaxipeualiztli.[1]

And this was when the rattle boards were sown[2] there at the Temple of Yopitli. And they, the old men belonging to the Temple of Yopitli,[3] sat singing and rattling their rattle boards until the day was done. Thus they came to spend the day, to celebrate the feast all day, coming to pass the day. Thus the whole day passed.

And [because] flowers were offered, [the feast] was called "The Offering of Flowers"; for all the various flowers which had newly blossomed were first [fruits]. It was the first flowers to appear which were thus given as offerings. None might breathe the scent without first providing an offering. They made or laid offerings of whatever little flowers they saw, which spread out bursting, popping, rustling into bloom—the flowers of spring. Small, little, tiny ones; little stone [flowers], however few, small, and tiny; little wooden ones, they carved and bound together.

And in order to gather the flowers, they all went together to the fields, since some who worked in the fields came there to sell them.

And when this was done, they ate *tamales* made of wild amaranth seed.[4]

Especially the Coateca, they who belonged to the district of Coatlan, esteemed [these *tamales*]. They offered them to their god[dess], called Coatl icue or Coatlan tonan.

[For] they placed trust in her; she was their confidante; they depended upon her; she was their support. To her they lifted their voices.

And also at that time were hidden away the human skins[5]—placed aside, abandoned. There at the Temple of Yopitli they were all buried.

1. Green Vigil (*Gran Velada*), according to Garibay (*op. cit.*, p. 296). Durán (*op. cit.*, Vol. II, p. 278) refers to Uey tepeuilli as *gran pasamala*, and to Tepeilhuitl as "*pasamalaville . . . porque creíllo pasaba con alguna cosa de una parte á otra.*"

2. Sahagún describes these as *espadañas*. Cf. *Historia general de las cosas de Nueva España* (México: Pedro Robredo, 1938), Vol. III, p. 272. Seler, in *Collected Works*, Vol. II, Pt. 4, p. 76, has *Rohrkolben* (*Typha sp.*), and in *Einige Kapitel*, p. 83, n. 1, offers *Rohrkolben* or *Kolbenrohr* as alternatives.

3. Sahagún describes these as *espadañas*. Cf. *Historia general de las cosas de Nueva España* (México: Pedro Robredo, 1938), Vol. III, p. 272. Seler, in *Collected Works*, Vol. II, Pt. 4, p. 76, has *Rosenkiefer* (*Typha sp.*), and in *Einige Kapitel*, p. 83, n. 1, offers *Rohrkolben* or *Kolbenrohr* as alternatives.

3a. *Agave americana* or century plant. The Mexican term *maguey* is used in this translation.

4. Sahagún, in *op. cit.*, Vol. II, p. 306: "*quauhnexatolli, que es hecho con harina muy espesa y muy blanca, hecho con tequesquite.*" In *Einige Kapitel*, p. 84, Seler specifies that the grains of maize were "*mit Pottasche gekochten.*"

5. A cour good, in Seler, *loc. cit.*, Sahagún (*op. cit.*) states that an odd fruit, which he remembers, was used.

X 796 when it was cold, when it thickened and lay in place, it contracted and remained at rest.

And when day broke, the young men and the priests walked everywhere, to all the houses, from one dwelling to another; they went along the roads to all the houses. And also the priests [did likewise].

But when [the householders] made offerings, [the priests] remained quiet. They might not take part when offerings were made, or when they asked alms.

[578] And if [the priests] were met, if they took part, then there was ill-feeling and anger; there was strife.

[43] The youths took [their gifts] to the young bachelors' house and sampled them there.

And the priests carried [theirs] to the priests' house.

Then they departed to their fields, to get the maize god[dess]. In as many places as lay fields, from each field they got a stalk of green maize.[6]

[241] And in the harvested fields, they took only large *magney* roots[7] and carried them hence to their houses.

[778] They decked their maize god[desses] with flowers and set them up in the tribal temples; then they arrayed them and laid offerings for them.

● [262] As fast foods they made, before them, *five tortillas;* they laid them in a basket. And upon it went a hard-baked frog, hard and stiff, its face stained blue, a woman's skirt about its hind-quarters. And they set down a large basket of *pinolli;*[8] and toasted maize [mixed] with beans.

And they cut a section of maize stalk and filled it and crammed it with everything laid out before Cintreotl. They took a very little from every [basket] and let the frog carry it on its back.

And when this was done, it was called *calonooac,* "it resteth in all the houses"; because only in houses, only in the homes, were honors paid to the maize god[desses].

And after sundown, they took [the ears of maize] to Cintreopan, the Temple of Chicome coatl. There they pilfered them and made merry with them; there was skirmishing, blows were struck; all whacked [each other] with them. It was said: "It is scattered."

And furthermore, they bore to Cinteopan, the Temple of Chicome coatl, the maize which was to be seed. Young girls carried it upon their backs.

[302] Some [of the girls] had a long lock of hair on one

6. *Cahuc de maiz* is corresponding Spanish text. Carlino (*op. cit.*, p. 296) translates the term as *mata de maiz;* Molina (*op. cit.*) as "*persona o mata de maiz verde de que siegan.*"

7. "*Otras yerbas, que llamamos, mayney.*" in Sahagún's Spanish text. Orozco y Berra (*op. cit.*, Vol. I, p. 330), referring to the magney, says: "*Las raices gruesas llamadas, yerbas de gabilo.*"

8. Gummed, roasted maize meal with chia seed, cocoa, etc., according to Soler (*op. cit.*, p. 85).

X 796
778

When they had ornamented [the figure of Uitzilopochtli], the young, seasoned warriors, the masters of the youths, and the youths took it up. His breech clout went stretched and spread out before him. They went in procession; they went dancing [and singing].

When they brought it to the foot of the temple, they carried up [the platform]. Cords fastened it to the four [corners], so that they might take it up, that they might carry it. They went stretching [the cords] that [the platform] might not twist.

Then they began to climb up. They went rolling, winding, and reeling [the breech clout] up, coiling it.

As they went rolling up his breech clout, the officials proceeded to take up, gathering and collecting them together, the ceremonial arrows.

And when they had come to the top, when they had raised [the figure of Uitzilopochtli] to the summit, then they placed upon the serpent bench [the paper roll]. They placed it before him; they bound it to [the serpent bench]; they bound it on tightly and firmly.

X 796

When they had come to place it [there], then all came down; and there remained the officials, the priests, the guardians who guarded it.

Then all the people came down.

And this came to pass, that they went up at sundown, when a little sun still shone; and also at sundown an offering was made.

[262]

And the *tamales* which they ate were fruit *tamales*, [which were] red, or *tamales* made of maize softened with lime, or bean and cornmeal cakes,[14] colored *tamales*, *tamales* of coarse, white flour, and [*tamales*] rolled up in amaranth seed dough.

These cylindrical *tamales*, wrapped up in amaranth seed dough—these *tamales* they offered at the temple.

And when it dawned, then offerings were made in their houses; only some made offerings before the devil [Uitzilopochtli].

And quail were beheaded by everyone, women and men.

Moctezuma began [the offering]. He himself, with his own hands, beheaded four quail.

And the priest beheaded other quail, but only by laying his hands upon them.[15]

Then, breaking [loose], the common people followed. All the people beheaded quail—men and women.

And if they noted on one [even] a little dirt, or a cobweb, or a small piece of cotton on either his head or his cape, then they seized him and marked him. Perchance one stumbled, slipped, or fell down. All [such malefactors] were seized.

Four days this was done, and four nights, that all acted with prudence.

[793]

7. Sahagún (Bulmalo ed., Vol. I, p. 299) distinguishes three grades of priests—"tlamacazque (*que es como sacerdote*; . . . tlamacazque, *que es como diácono*; . . . *teopixque, que es como sacristán. De estos nuevecientos los mayores eleyan por sumos pontífices. . . .*"

8. *Iztomatl* ball (Simeón, *op. cit.*), or species of tomato (Simeón, *op. cit.*).

9. In the corresponding Spanish text, Sahagún describes "*cinco viejos, que llamaban quaquacujilti: los quales traeyan los cuernos retorcidos de ciervo, arrepentidos: salian en la cerimonia de la cabeça, que traeyan los cabellos largos, al modo de los clerigos.*"

And if anyone should stumble, if anyone went not there, if he loitered, for this he was detained.

And if there were any who tarried, if they made not haste, if any ceased walking, [if they] did not lay down their reeds with the others, for this they seized [such an one]; for this all [such] were then made captive.

And this was done for four days.

And in these four days, whosoever had been seized might well be freed, might well ransom himself; he might yet escape [in return for] perhaps a turkey, perchance a breech clout, mayhap a cape, or a *magney* fiber cape, or a small cotton *mantle*.

And the poor, these ransomed themselves with a wooden plate with balls of dough.[18]

And all which was paid, all this, the captor, he who detained them, the accuser, took.

And upon the fifth day, on the day of the feast, one might no longer ransom himself; even though it were something very great [as a gift] that [one offered] to excuse oneself, no longer might he try.

And when the feast day [came], then all the common folk made cooked maize and beans for themselves—*etzalli* was made; everyone did so; [for] none did not prepare maize and beans for himself.

And when they were cooked, then they were eaten; they presented it to one another. Some thus feasted others.

And some who took their pleasure and some of the warriors danced; and they did thus only to divert themselves.

Thus were they adorned—they had circles about their eyes and carried their sheaves of dried maize. They kept going from house to house, singing and dancing the *etzalli* song. They went about bearing a handled jar, the *etzalli* jar, in their hands.

And thus they danced, sang, and chanted: "I do it; I do it. [Give me] a little of thy *etzalli*. If thou givest me none, I shall break a hole into thy house."

And the householders then offered them a measure of *etzalli*, and went to place it in the *etzalli* jar.

In fives, in sixes, in sevens gathered those who danced.

This *etzalli* dance began at midnight, and only at daybreak all dispersed, and it became quiet.

And when the sun arose, then was adorned the fire priest. He put on his sleeveless jacket; over it he placed his [thin, transparent, netted] cape, called the

"Ueberlieferungen und Sprachen Mexikos of Sahagún, p. 118, n. 2).

an offering, was richly arrayed and adorned. He bore an eagle claw device upon his back, which was surrounded by quetzal feathers. His holder was of eagle down in which were quetzal feathers. His flint knife was of gold. He carried a rosette on his back, which was made of paper, etc.

A man [priest] carried the mist rattle board upon his shoulder; he rattled it in three places. And when they had come to the place where Xilonen was to die, then the fire priest came to receive her. Before her he set up the rattle board, and rattled it, and with incense went forth to receive her, and cast it toward her.

And then they took her up to the Temple of Cintéotl. First they laid her upon the back [of a priest] —not upon the offering stone, but rather she died upon [a priest's] back. And those who died upon [a priest's] back, they called "those who have backs."

Thereupon she met her fate and [the sacrificing priest] severed her head. When she had [thus] suffered, when he had slain her, then he grasped her heart and planted it in the blue vessel. They who were well experienced knew where they cast it, where they required it.

And then all ate, for the first time, *tortillas* of green maize. For the first time the cane of green corn was offered and for the first time chewed, and likewise amaranth greens were newly cooked and once more the sweetness of flowers—the *Carophyllus mexicanus* and tobacco flowers [—was smelled].

And at the Feast of the Great Lords, there was a dance which was the particular function of the women—old women, young women, mature women, little girls. The maidens, who had looked upon no man, were adorned with feathers and their faces were stained with paint.

Everyone made plain *tamales* and fruit *tamales* for themselves; they offered them as gifts to their gods.

And of the old men and the old women it was the exclusive privilege that they should drink wine. Never did a youth, a maiden, or a priest drink wine.

And if anyone was noted, great pains were taken that he be seized and put in jail, in the granary.[11] They all held council what might be done about it, and whether, perchance, they would punish him. [Evidence] was weighed; all discussed [his crime]. They determined whether [they would] show mercy; and if [they would] not show mercy, he was

8. The corresponding Spanish text reads, besides: *"La cabeça de cada vna vnsaua tenja dos cuernos, vna de persona, y otra de culebra. . . ."*
9. Cf. Anderson and Dibble, *op. cit.*, p. 2, n. 15.
10. According to Sahagún (*loc. cit.*), *"vsauan a vnsaua hechos de heno, atados con cuyas de sauce."*
11. Cf. Anderson and Dibble, *op. cit.*, p. 22, n. 118.
12. In the Robredo ed. of Sahagún, Vol. III, p. 235, *ocalli* is explained: *"Hay otra que se llama tzanquilitl, es muy seiida y tiene vnos cañitos huecos como aquella hierba que se llama ocalli y criase cerca del agua, y cuando se vnsaua vsauan entre las diosses cuando la vnsauan."*

And of them who aided the Uitznaua, if one were taken, he met his end. In truth, the bathed ones slew [their opponents]; using a two-toned drum [as an offering stone], upon it they cut open their breasts.

And the onlooker, he who oversaw [the battle], when he noted that [he who bore the likeness of] Paynal already approached, then cried out, saying: "Mexicans! Now he cometh! Now already is brought the lord! Enough!"

And when they heard this, then the bathed ones took after [the others]. Then dispersed, melted away, and departed those who had aided [the Uitznaua], who had rolled up the paper.

Thereupon came [he who bore] Paynal. First arrived the standards, two devices for seeing, made of [sprays of] feathers, with a hole in their midst. Two mere boys bore them hence, hastening greatly. Then [from the boys] two warriors took [the standards] quickly—[warriors] who could hasten and run fast.

And when they had run a certain distance, two other [warriors] took it briskly from them. So they carried it in relays.

And when they reached the eagle portal[13] [of the courtyard of the Temple of Uitzilopochtli], none took these from them; they took the devices up [to the Temple of] Uitzilopochtli. These who came ahead, when they had brought up the devices for seeing, cast them upon the image of Uitzilopochtli, which [was made of a dough of] amaranth seed. [There] they fell to the ground, faint, and lay panting.

And the fire priest thereupon came forth and cut their ears with a flint knife, whereupon they came to themselves; thus they revived.

And when they had revived, then they climbed down, taking the amaranth seed dough [image] which they had captured.[14] They took it to their homes, [for] it was in truth their captive, and ate it. They offered it to their kin and to their neighbors, who all ate of it.[15]

13. Cf. Sahagún (Robredo ed., Vol. IV, p. 88): "*y luego se juntaron los capitanes y entraron dentro del un patio que se llamaba quauhquiaoac. . . . En este lugar estaba una figura de piedra grande y alta como un estado de hombre, y por eso llamaban a aquel patio quauhquiaoac; de la una parte del figurado estaba un tigre de piedra, y de la otra un aze también de piedra.*"

14. Clavigero (*op. cit.*, p. 168) says such images had been made of both Uitzilopochtli and Paynal: ". . . *fabricaban . . . dos estatuas de aquellas dioses, de la pasta de varias semillas con sangre de niños sacrificados, y la ponían por huesos algunos leños de acacia.*"

15. In *op. cit.*, pp. 149-70, Clavigero writes: "*aquella noche que era la última del mes, celebran también los sacerdotes y a la mañana siguiente llamaban a la estatua de masa de Huitzilopochtli a una sala que había en el recinto del templo, y en presencia solemnísima del rey, de cuatro dignidades del templo y de cuatro superiores de los seminarios, el sacerdote Quetzalcoatl, que era jefe de los tlamacazques o penitentes arrojaba un dardo a la estatua con que la atravesaba de parte a parte. Con este dardo que ya había consagrado en Dios; uno de los sacerdotes le sacaba el corazón y lo presentaba al rey para que lo comiese; el cuerpo se dividía por medio y la una mitad se daba a los tlaxcaltecas y la otra quedaba para los mexicanos; de esta se hacían cuatro partes para los cuatro cuarteles de la ciudad, y cada parte se dividía en muchas porciones que se distribuían entre todos los individuos del otro mazacalmac. Esta ceremonia explicaban con la palabra teocualo, comer a Dios. Los mujeres no probaban de esta sagrada masa por creerlas, como se puede creer de su perseverar a su sexo al empleo de la guerra.*"

Thirty-seventh Chapter, which telleth of the feasts and ceremonies performed in the days of the eighteenth month, which was called Izcalli.[1]

The eighteenth feast was the one named Izcalli.

Upon the tenth day of Izcalli *tamales* stuffed with greens were eaten. [On this day] it was maintained and said, "Our father, the fire, roasteth [food] for himself." They set up his image—only a framework of wood which they made.[2] They gave it a mask, his face, made of precious green stone, horizontally striped with turquoise. It was very awesome; it gleamed as if it shone exceedingly; it cast much brilliance.

And they fitted upon it its quetzal feather crown, quite narrow at the bottom [but] large enough to fit around the head. The quetzal feathers spread out [above]. And two plumages stood ohe on each side, made like his horns. And the plumages both had quetzal feather vases. And to the base of the quetzal feather crown was sewn yellow hair, very carefully trimmed. And his lordly hair hung to his shoulders; and it was very evenly cut.

And when they put it on him, [it was] verily as if [it were] his own hair.

And they laid over him a cape of quetzal feathers, made entirely of quetzal feathers, which hung long, trailing upon the ground. The wind penetrated it, [making it, as it were,] stir upward, [so that it] glittered and gleamed.

And his mat was made of the skin of an ocelot—an ocelot skin laid flat [with] paws extended and also its head lying flat. And this [image of] Xiuhtecutli was before a brazier. At midnight [the priest] used the fire drill [to make the new fire]. And when a flame burst forth, then he blew upon it, and then made the fire.

And when the fire had been lit, when it was dawn, and the morning had reddened, then ranged them-

1. "Growth," or "the growing," according to Guthrey, op. cit., p. 316. Torquemada knows the meaning "solstice" (op. cit., p. 308): "quiere decir; Remedado, ó el de la renovacion; porque por aquel tiempo, el querio menor el tiempo, y pasar de frio á calor, y comenzar la Primavera." In Clavigero (op. cit., p. 172, n. 94) it is suggested that the literal meaning of izcalli is "born in the house."

2. Sahagún's corresponding Spanish text says: "hacian la estatua del dios, del fuego de arcipiste, y ponían encima, como una cerca, que olia Ramos colorados, que quiere decir muchos, o muchos."

X 796 selves in line and came up the youths and small boys, who offered the old men serpents which they had captured. The old men took these from them and cast them into the fire—everything, whatever they had captured; all the birds—the thrush, the precious [136] thrush, small birds found among the reeds—all the varied kinds of birds; and the water dogs, scorpions, striped lizards, trout, the white fish, the sand fish, crabs, frogs, gulls[3]—all these they cast into the fire.

[262] Then appeared [the boys], and [the priests] offered each one a *tamal* stuffed with greens. And all the common folk made themselves *tamales* stuffed with greens. They laid them before [the image of] Xiuhtecutli. As many as offered to Xiuhtecutli did so purely voluntarily. And some laid them as offerings only in the tribal temples.

And the *tamales* stuffed with greens they also named precious green stone *tamales*. And all the common folk presented among themselves their *tamales* stuffed with greens; they were presented among themselves. Whoever first cooked her *tamal* of greens then went to offer it to her kin. Thus she showed her self-esteem.

[262] And the sauce of the *tamales* stuffed with greens was a sauce of crabs.[4] And the sauce was called *chamolmolli*. And when the good common folk ate, they stood sweating and burning themselves. And the *tamales* stuffed with greens were very hot and gleaming; and they ate them hot, [so that even] their noses steamed. And the husks they set apart; no one let them reach the fire. They strewed all of them in the water.

[273] And when this was done, when all was eaten, thereupon wine was drunk. It was said: "They are refreshed; the old men refresh [themselves] there in the Temple of Xiuhtecutli." And thus they refreshed [themselves] with wine; they sat drinking and singing until it was dark. Here ended and concluded [the time when] *tamales* stuffed with greens were eaten; the eating of *tamales* stuffed with greens.

X 796 And when Izcalli came, when twenty days were 778 counted, [this was] when Milintoc roasted something for himself—[he who] likewise [was god of] fire. They also set up his image, which was only a frame-

work which they made.[5] They put upon it a mask made of [a mosaic of bits of] shell. The lower part of the face was blackened, made black with black stones called *teotetl*. And they striped the face horizontally with black mirror stones.

And upon his head they fitted a ball of yellow parrot feathers; the device for the back of his head, made of precious feathers, served as the lock of hair of the back of his head. And they set upon him his flame headdress, made of feathers from the neck of an eagle.[6] This glowed, and [it had] plucked [single] arara feathers set in order.[7] When he put it on, it appeared in truth to flare up. And his vestments were made only of arara feathers—a red arara feather cape, which trailed long.

And they laid before him *tortillas* made of uncooked, ground maize,[8] or small *tortillas*. They ground the maize. And when it was [ground to a] flour, then they mixed hot water with it, and afterwards it was sweetened. Then, they offered the *tortillas*, some [of which] had shelled beans, cooked, not raw.

And when they had set Milintoc in place, then severally all the common folk made offerings before him, coming together each with five [*tortillas*]. A great quantity of small *tortillas* were heaped up before him.

Similarly the youths and small boys were ranged in order; they hung on sticks the serpents and all the small animals, as hath been said. They offered them to the old men, and the old men cast them into the fire. And the quite small serpents and the other quite small animals burned up and charred. And the well-grown serpents, when they had been roasted, they went to take out, casting them forth upon the hearth. There they were piled up. Later, the old men of the tribal temple ate them.

And the youths and small boys then came forth, and they offered each of them a small *tortilla*. Then they departed. And after this the small *tortillas* were eaten.

Thereupon [all] were refreshed [with wine]; the old men refreshed themselves there at the Temple, the tribal shrine, of Milintoc. And the wine makers, those whose office it was to make wine, left with

X 796 **Thirty-eighth Chapter, which telleth of the feast which was named Uauhquiltamalqualiztli,**[1] **which was celebrated after the days of the month named above; and when [it was this feast], they celebrated it to honor him who was their god, whose name was Ixcoçauhqui.**

Injc cempoalli on caxtolli omei capitulo: itechpa tlatoa in jlhujtl, in moteneoaia: Oauhquiltamalqualiztli, in muchioaia in jpan ic tlamatlacti in metztli in tlacpac omjto: auh in jquac y, qujlhujqujxtiliaia, in inteouh catca, in jtoca Ixoçauhquj.

Izcalli and the end of Izcalli are placed verily in the month of January, after eight days, when it was already the eighth day. By custom, it was upon the eighth day. When this [day came], *tamales* stuffed with greens were eaten. In all places they observed [the custom]; everywhere. Nowhere was this not done. In every house, in every village, two [*tamales*] were eaten, when it was the feast of the *tamales* stuffed with greens; all made *tamales* thus stuffed. And all offered [this] food, one to another. In this wise were they given; they were given among themselves—to their companions, to those whom they knew. They were offered not in ill will but in gladness.

[262]

Izcalli, yoan Izcalli tlamj: inin vel ipan motlalia in metztli henero, ie iuh chicueilhujtl manj, ie ichicueilhujoc, ie iuh chicueilhujtica: in jquac in, oauhquiltamalli qualoia: novian qujtzacutimăca, ipanoca, acă cavia: in cecencalpan, yoan in cecemaltepetl ipan, vel ontetlamja in neoauhquiltamalhujlo, in neoauhquiltamaltilo: auh nepanotl nemacoia, nepanotl nemamacoia, ic netlatlamacoia, necepămacoia, nenetech macoia, necnjuhmacoia, neiximatcamacoia, amo netlavelmacoia, nepaccamacoi.

Whoever first cooked her *tamales* stuffed with greens then went to offer it in her tribal temple, to her neighbor, to those who lived in nearby houses. And if her kin lived in distant parts, first she made an offering for them.

1. *Uauhquiltamalqualiztli*—the eating of *tamales* stuffed with greens. Cf. Anderson and Dibble, *op. cit.*, p. 12, n. 66. Much of the material in this chapter is discussed also in the previous one (Izcalli).

Here is described a feast which was observed every eight years.

For Atamalqualiztli (the eating of water *tamales*) came to be observed every eight years. At times it was observed [in the month of] Quecholli; or at times it was observed [in the month of] Tepeilhuitl.

For seven days all fasted. Only water *tamales*, soaked in water, were eaten, without *chili*, without salt, with neither saltpeter nor lime. And they were eaten [only] at midday.

And he who fasted not at this time, if he were noted, was then punished. And much was this, the eating of water *tamales*, hallowed. And he who did not this, if he were not seen nor noted, it was said,—he was visited with the itch.

And when the feast arrived, it was said: "Ashes are put on faces," and "They are [bedight with] sea shells."[6] And it was when indeed all the gods danced. Thus, it was named the dance of the gods.

And all came forth [as] humming birds, butterflies, honeybees, flies, birds, giant horned beetles, black beetles—those forms men took; in these guises they came dancing.

And still others were in the guise of sleep. [Some had] garlands of fruit *tamales*; birds' flesh [*tamales* formed yet others'] garlands. And before them was the maize bin, filled with fruit *tamales*.

And also all [these] appeared—those who played the rôles of the poor, those who sold vegetables, those who sold wood. Also appeared one in the guise of a leper. And still more took the forms of birds, large owls, screech owls.[7] And even other [birds] they counterfeited.

And [an image of] Tlaloc was set in place. Before him was [a vessel of] water. It was full of serpents and frogs. And they who were called *Maçateca* swallowed the serpents [while still] full alive. Each one severally held them only in their mouths, not with their hands. They took them only in their teeth, when they seized them in the water, there before

therefore pledged the land, they made him leave it; they made him abandon it.

And when their fasting came to an end, much did they make merry. They bathed with water; they washed [their heads] with *amolli* soap.[23] And fruit was eaten—they made fruit *tamales*, and sauces. Or they slew and ate a dog, and they drank wine. Thus they showed that verily they were through with [their tribute]; that their works had fallen behind them.

For no longer a burden upon their backs was their fasting. [It was] as if [now] they could move briskly and with security; now they awoke [from their sleep] with joy and peace; they awoke tranquil. They had no offerings to make. In peace they might make their livings and find the means by which they might subsist either by fishing or in the *maguey* fields; or perchance they might frequent the market places in one town or another. No more did they live in bondage.

Enough.

821
787

The Shooting Star

It was said that the passing of a shooting star rose and fell neither without purpose nor in vain. It brought a worm to something. And of [the animal] wounded by a shooting star, they said: "It hath been wounded by a shooting star; it hath received a worm." [Such] was not to be eaten. It was looked at with fear, abhorred, and shunned. It turned one's stomach.

S: Sahagún M-5 (1529-1590) 1953 NU7 Aztec NU7

The Eighth Chapter telleth how they held in dread hunger and famine when One Rabbit ruled the year count, and what they first did when the year count of One Rabbit had not yet begun.

And [even] when [the year] One Rabbit had not yet set in, first provision was made; our food was hidden away, stored, saved up, and placed in bins. Nothing was thrown away; all then was saved—wild seeds not commonly eaten; musty maize; corn silk; corn tassels; pulp scraped from maguey tappings, tuna cactus flowers; cooked maguey leaves; heated maguey sap.

Everything was taken into account: [with] amaranth, even the weeds[13] were threshed; [as for] the beans, likewise were stored and put away unripened ones and the dried, withered ends of the green beans. And when they had used all, they satisfied and quickened themselves [with] bird seed, bitter amaranth or bright red amaranth, and *yacacolli* maize.[13]

This was the time when they bought people;[14] they purchased men for themselves. The merchants were those who had plenty, who prospered; the greedy, the well-fed man, the covetous, the niggardly, the miser, who controlled wealth and family, guardians, the mean, the stingy, the selfish. In the homes of [such men] they crowded, going into bondage, entering house after house—the orphan, the poor, the indigent, the needy, the pauper, the beggar, who were starved and famished; who just as they went to sleep, just so awoke; who found nothing and got nowhere; who in no place found their rest, relief or remedy. At this time one sold oneself. One ate oneself; one swallowed oneself. Or else one sold and delivered into bondage his beloved son, his dear child.

Inic chicuey capitulo, itechpa tlatoa: inic quimacacia apiztli, in maianaliztli, in icoac tlauicaia, in xiuhtlapoalli in ce tochtli: yoan in tlein achtopa quichioaia, in aiamo vmpeoa xiuhtlapoalli, ce tochtli.

Auh inic muchi temachiloia, in ouhtii çan yoã moconoa in ipolocaio: in etl çan yoan motlatiaia, mocalaquiaia in iaxaoacaio, yoan in jexococoloio in opatzaoac. Auh icoac, muchi thaiecoa, thaacotlaça tlaihiiocuitia in petzicatl, in chichic ouhtli, anoço teuouhtli, iacacolli:

ie icoac tecoa, motlacacouia, in vnca quicoani, in mocuiltonoa, in motlacamati, in tlãtlameti, tlaixotiani, atle quiscaoa, tlaistamachiuhqui, tlaçaloani, tlapachoani, tlamalhuiani, teuie, tzotzoca, motzol: ichan maaquia, mihitoa, mocacalaquia in icnotlacatl, in motolinja, in quiciaui, in quihiiouia: in aoneootinemi, in aonmacitinemi, in apizmicqui, in teuciuhque: in iuhqui cochi, in iuhqui meoa, in aualnecini, in aoccan vitz, in aoccan quiita ihiiocuiia, iceuhca, ipatica: ie vncan in monamaca, in moqua, in motoloa: anoço quinamaca, quimonamaquilia in ipiltzin, in iconetzin: 805 567 565 735

13. *Ie ueuhtli* can yoã in ipolocaio: cf. Bernardino de Sahagún: *Historia general de las cosas de Nueva España* (México: Editorial Pedro Robredo, 1938), II, p. 265: "*Iueuhtli* pulcayya, *or la semilla de los cenizos sin limpiar, con todas sus inmundicias.*" Jean, *op. cit.*, p. 69. Ixo "*hierba que nace cuando die Bernardino ess.*"

13. Some of these terms are identified in Anderson and Dibble, *op. cit.*, p. 63. *Yacacolli* is described in Bernardino de Sahagún: *Historia de las cosas de la Nueva-España* (D. Jourdanet and Rémi Simeon, eds.; Paris: G. Masson, Editeur, 1880), p. 118, n. 2, as "*cogollos de maíz.*" See also the Robredo edition, Vol. I, p. 159.

14. The translation of this passage differs in some details from that of Jean (*op. cit.*, pp. 69-71), q. v.

Quiciaui appears in the *Real Palacio MS* as *quiqueui*. The term could be translated, "those who are people." Cf. *ie ueuqui* (*ueue* an oneself), toward the end of the paragraph.

821

esten. For this reason these people took pains to cover themselves at night, so that the tail of the comet might not fall upon them.

albrigarse de noche porque la inflamacion de la cometa no cayese sobrellos.

The stars which are in the Little Bear these people call Citlalxonecuilli. They represent them in the shape of an *s*, backwards, [of] seven stars. They say they are by themselves, apart from the others, and that they are brilliant. They call them Citlalxonecuilli because they resemble a certain kind of bread which they make like an *s*, which they call *xonecuilli*, which bread was esten in all the houses each year on the day named Xochilhuitl.

[262]

A las estrellas que estan en la boca de la bozina llama este gente citlalxonecuilli. pintanlas a manera de ese reboelta siete estrellas, dizen q̃ estan por si aptadas de las otras y que son resplandecientes. llamanles citlalxonecuilli porq̃ tienẽ semejãça con cierta manera de pan que hazen a manera de ese al qual llaman xonecuilli, el qual pan se comia en todas las casas vn dia el año q̃ se llama xuchilhuitl.

Those stars which, in some places, are called the Great Bear these people called the Scorpion, because they make the outline of a scorpion[23] or *alacrán*.

Aquellas estrellas q̃ en algunas ptes se llama el carro. esta gente las llama esculpiõ porque tienen figura de esculpion o alacran.

23. *Escolpion*. In the original, the *l* may have been changed to *r*.

Thirteenth Chapter. Here are told the foods which the lords ate.[1]

Ic matlactli vnnej capítulo: vncan mjtoa, in jntlaqual in qujquaia, in tlatoque.

565
262

Hot, white, doubled tortillas;[2] large tortillas; large, thick, coarse tortillas; folded tortillas[3] of maize treated with lime, pleasing [to the taste]; tortillas formed in rolls; leaf-shaped tortillas;

Iztac totonquj tlaxcalli, tlacuelpacholli, vei tlaxcalli quauhtlaqualli, tlaxcalpacholli iztac, nexiopapaio, tlaxcalmjmjlli, tlacepoalli tlaxcalli,

White tamales with beans forming a sea shell on top;[4] white tamales with maize grains thrown in;[4] hard, white tamales with grains of maize thrown in; red tamales with beans forming a sea shell on top; tamales made of a dough of maize softened in lime, with beans forming a sea shell on top; tamales of maize softened in wood ashes; turkey pasty cooked in a pot, or sprinkled with seeds; tamales of meat cooked with maize and yellow chili; roast turkey hen; roast quail.

quatecujcujlli tamalli, iztac tlatzincujtl, iztac tetamalli tlatzincujtl, chichiltic quatecujcujlli tamalli, nexiotamalli quatecujcujlli, tamalatl quauhnextli, totolnacaquimjlli xocco tlapaoaxtli, anoço tlatentli, nacatlaoio tamalli chilcozio: cihoatotoli tlatleoztralli, çolin tlatleoztralli,

Market food: white tortillas with a flour of uncooked beans; turkey with a sauce of small chilis, tomatoes, and ground squash seeds; turkey with red chilis; turkey with yellow chilis; turkey with green chilis; venison sprinkled with seeds; hare with sauce; rabbit with sauce; meat stewed with maize, red chili, tomatoes, and ground squash seeds; venison with red chili, tomatoes, and ground squash seeds; birds with toasted maize; small birds; dried duck; duck stewed in a pot; the *atzitzicuilotl* bird stewed in a pot; roast of meat; fried meat in a sauce of red chili, tomatoes, and ground squash seeds; potage of yellow chili; sauces of ordinary tomatoes and small tomatoes and yellow chili, or of tomatoes and green chili; diluted [sauces] with tomatoes; white fish with yellow chili; grey fish with red chili, tomatoes, and ground squash seeds; frog with green chilis; newt with yellow chili; tadpoles with small chilis; small fish with small chilis; winged ants with savory

tiançujztlaqualli, iztac tlaxcalli etica tlasio, totolin patzcalmolli, chiltecpiio, totolin, chilcozio totolin, chilchoio totolin, maçanacatl tlatentli, citli molli, tochtli molli, nacatlaolli patzcallo, maçanacatl patzcallo, totoizquijtl tepitoton tozome, canauhtlaoaxtzalli, canauhtlapaoaxtli, atzitzicujlotlapaoaxtli, nacatlaocctli, tlatezioiojlli nacamolli patzcallo, chilcoztlatoçjlli, chiltecpinmolli xitomaio, chilcozmolli xitolinio, chilchomolli xitomaio, tlamamollalli xitomaio, iztac amjlotl chilcozio, tomaoac xoujli, patzcallo, cujatl chilchoio, azolotl chilcozio, atepocatl chiltecpiio, mjchpili chiltecpijo, tuicatanatli inamjc papaloquijtl, chapolin chichiaoa, mecocujli chiltecpinmollo, chacali patzcallo, topotlimjchi patzcallo, tlacamjchin patzcallo, maçanocomolli iztac mjchio

1. Sahagún's Spanish translations varies somewhat from dictionary and other definitions of the foods named in the Aztec text. In the notes, our translations follow Sahagún's; footnotes take account of the most noticeable variations.

2. *Tlaxcalpacholli, tlacuelpacholli*: hot, white tortillas, doubled, arranged in a large basket, according to the corresponding Spanish text. In Molina, op. cit., the word means "*cosa doblada, o plegada*."—If the root of *-pacholli* is *pachoa*, the term could indicate that the tortillas were smoked, or could refer to the way they were heated out. See also note 3, *infra*.

3. In Sahagún, op. cit., III, p. 307, Dr. Ignacio Alcaraz translates *quauhtlaxcalli tamali patzcalcoli tlacuelo* as "*Tamales de cuerpo cuadrado y cada esquinado fuertes*. Alcaraz Tamayoshi, in *Histoire des Mexicains* (tr. Terrien-Compans; Paris: P. Jamet, 1853), I, p. 240, has this explanation: "*Les mets appelés quauhtlaxcalli-tamalli, bouts-doubles [bouts doubles?], durcis-pachelli, grands gâteaux de farine de frêne et de farine de maïs qui sont donc pulmes d'épaisseur, ainsi que tous ceux cuits d'abaisse et de gâtée.*"

4. Cf. Molina, op. cit.

565
262

herbs;[6] locusts with chía; maguey grubs with a sauce of small chilis; lobster with red chili, tomatoes, and ground squash seeds; sardines[9] with red chili, tomatoes, and ground squash seeds; large fish with the same; a sauce of unripened plums with white fish;

Red, rough sapotas;[7] red plums; yellow or vermillion plums; ashen sapotas;[8] small sapotas;[9] manioc;[10] sweet potato; avocado; yellow sapotas;[11] tuna cactus fruit of many hues—white, yellow, bright red, green, orange; anonas;[12] *guanábiles;*[13] American cherries; tender maize;[14] green maize; string beans;

Tamales made of maize flowers with ground amaranth seed and cherries added; tortillas of green maize or of tender maize; tamales stuffed with amaranth greens;[15] tortillas made with honey, or with tuna cactus fruit; tamales made with honey; tortillas shaped like hip guards; tamales made of amaranth seed dough; [cakes made of] amaranth seed dough; rabbit with toasted maize; squash cut in pieces; *elchicalli;* green maize cooked in a pot and dried; amaranth greens cooked with dry land chili; sauce of purslain with dry land chili; green amaranth seeds with dry land chili;

Water greens; onions;[16] the evil-smelling herb; the *eloquilite* herb;[17] the *mosser* herb;[18] rabbit-ear greens; *achochoquilit;*[19] thistle; sow thistle; sorrel of various kinds; a water-edge plant called *acuitlacpalli;* squash flowers; tender, young squash; small squash; garden cress; *raphanus;* small tuna cactus fruit with fish eggs;

tlatlauhquj teçontzapotl izochiqual maçazocotl chichiltic, coztic, tlazaleoaltic, cheiotzapotl, xicotzapotl, quauhcamotli, camotli, aoacatl, atzitzapotl, nochtli, tlatlatlapalpoalli, iztac, coztic, chichiltic, zozoctic, camopaltic, matzatli, quammochil, capoli, xilotl, elotl, ezotl,

25. Tiltic and iztac are as they appear in the Codex; chilli and iztac are probably correct.

643
443
656

Nineteenth Chapter, in which is described the ordering of the market place, and [how] the ruler took great care of it.

The ruler took care of the directing of the market place and all things sold, for the good of the common folk, the vassals, and all dwellers in the city, the poor, the unfortunate, so that [these] might not be abused, nor suffer harm, nor be deceived nor disdained. Thus were things bought, or sold: they arranged them in order so that each thing sold would be placed separately—in its own place or station. They were not spread about in confusion.

Market place directors were appointed to office. They cared for, and attended to, the market place and all and each of the things sold—the merchandise which was there. Each of the directors took care, and was charged, that no one might deceive another, and how [articles] might be priced and sold.

[306] Separate were those who sold gold and silver, and green stone, and turquoise, and emeralds, and quetzal feathers, and [those of] the blue cotinga, and the red spoonbill, and all the various precious feathers of birds, which were needed for devices and shields.

[291 278] Separate were those who sold chocolate, aromatic herbs,[1] and vanilla. Apart were those who sold great capes, costly capes, embroidered capes, costly breech cloths, embroidered skirts and shifts, large common capes, maguey fiber capes, and thin maguey fiber capes.

● [262] And all food necessary to them also was sold separately: dried grains of maize, white, black, red, and yellow; yellow beans, white ones, black, red; pinto beans; large beans; gray amaranth seed, red amaranth seed, and fish amaranth; white chía,[2] black chía, and the wrinkled variety;[3] salt; fowl; turkey cocks and hens; quail; rabbits, hares, and deer; ducks

4. *Atzacuadtli*: "son redondillas, tienen los pies largos, y agudos y negros; tienen los pies largos; son crecientes y tienen el pecho blanco; dicen que nacen en la provincia de Anáhuac; corren a esta Laguna de México entre las aguas o lluvia; son muy buenas de comer. Dicen que duran, y los tordos del agua, por tiempo se cuelgan en parte, dicen que las van entrar a hondar en la mar, desaire del agua, y que nunca más parecen" (ibid., p. 170). Cf. also Seler, *Einige Kapitel*, p. 125, n. 1; Cecilio A. Robelo: *Diccionario de Anteqpiomos* (Cuernavaca: Imprenta del autor, 1904), pp. 542-543. Santamaría, *op. cit.*, I, p. 487 (*chichicuilote*) says there are two species—*Phalacrocorax orinomi* BP and *Lobipes lobatus* L.

5. *Tipiscaca*: "son blancas y del grandor de palomas, tienen alas anchas, crianse tierra la mar, y al tiempo de coger el maíz vienen así desaire a la tierra; cuando están aquí comen, cambiadas que es tiempo de coger el maíz" (Sahagún, *op. cit.*, p. 183). In Santamaría, *op. cit.*, II, p. 485, these are *Larus franklinii* SW & Bish, currently called *apipiscca*.

6. *Tlalalacatl*: "*Anaares metalicas* . . . . grandes como las de España: tienen los pies colorados y el pico, son pardillas; tienen buenas carnes; tienen debajo plumas blancas y blandas, (y) de estas plumas se aprovechan para hacer mantas; las plumas de encima son recias, tienen buenas carnes para comerlas" (Sahagún, *op. cit.*, p. 169). These (*tlalalacatl*), according to Santamaría, *op. cit.*, III, p. 184, are *Anser albifrons* Gld.

7. Cf. Chap. 13, n. 22, *supra*—"Cierto género de chile llamado chilitecpin, muy tostado y metalado con sal" (Sahagún, *op. cit.*, p. 182)

8. Cf. Chap. 13, n. 20, *sup.n.*

9. Cf. Chap. 13, n. 10, *supra*.

10. Cf. Chap. 13, n. 7, *supra*.

11. Cf. Chap. 13, n. 8, *supra*.

12. Simões, *op. cit.*, note also, however, Chap. 13, n. 7, *supra*.

13. Tejocote: *tejocote*—*Crataegus mexicana* Moc. (Santamaría, *op. cit.*, III, p. 150).

14. Cacomite: *cacomite*—*Tigridia pavonia* Ker; *ocelocacahtl*, of edible root (*ibid.*, I, p. 254). Also Hernández, *op. cit.*, II, p. 657.

15. Cimate: *cimate*, a condiment (Santamaría, *op. cit.*, I, p. 357). In Hernández, *op. cit.*, II, it is identified as *Dermodium amplifolium* Hemsl. (p. 659) or *D. parviflorum* Mart. y Gal (p. 661).

16. Chaiotl: *chayote*—*Sicyos edulis*; *Sicyos edulis*; *Cucumis acutangulus* (Santamaría, *op. cit.*, I, p. 477). In Hernández, *op. cit.*, I, p. 149, *Sicyos edulis* Sw.

17. In Hernández, *op. cit.*, I, pp. 171ff., various kinds of *quauhayacachtli* are identified as *Jacropha curcas* Linn., *Manihot utilissima* (?) Pohl, *Cassia* sp., *Cassia fistula* Linn.

18. Metlhuatl: *metl* (maguey), *ouilhuatl* (*principio, comienzo*, in Molina, *op. cit.*).

19. Remsen, *op. cit.*, p. 213, notes that translator must be in error in translating *atzopalli* as cardoon, since the latter is not native to Mexico; the *Bulbinus* MS (Pls. 19, 73) illustrates a thistle (*Cirsium* sp.). Santamaría, *op. cit.*, II, p. 82, describes it (*ghizpadin*) as, "*Es Méjico especie de alcachofa*" (artichoke).

19a. See Simões, *op. cit.*, pp. 549-4, 549. Simões suggests that "*huauhtzontli* may be a corruption of . . . *cuauhtlatzoli*," a chenopodium: *C. Nuttaliae* and *C. pumilum* are mentioned.

20. *Xocoxocoli*: *xocoqui*—*Oxalis corniculata* H. B. K.; *O. corniculata* L.; *O. tetraphylla* Cav.; *O. corniculata* Dc. (Santamaría, *op. cit.*, II, p. 354). Remsen (*op. cit.*, p. 236) mentions other varieties of *Oxalis*, but on p. 213 notes that the term *xocoxocoli* is used also for *Rumex* (*sabrosa Acetosa*), and that contemporary libraries identified two species of *Begonia*.

some; bean greens[21] and green beans; green maize, tender maize, tender maize stalks; tamales of maize blossoms, tortillas of green maize, and all edible things—tortillas, tamales, tamales and tortillas with honey, large tortillas, and rolled tortillas.

And also there were proprietors among whom were spread out smoking tubes, pipes, and cigars, [some] quite resinous and aromatic; and tobacco bowls; and large pottery braziers and hearths, and earthen basins, and pots, and jars for storing water, and settling jars, and flat cooking plates, and sauce vessels, and earthen cups, and everything [made of] earthenware.

And those who were directors of the market place, if they did not show concern over their office, were driven forth and made to abandon their office. And if someone sold stolen goods—perchance a costly cape, or a green stone,—if it were made known and he did not declare from whom he had bought that which had been stolen, they went to exact the penalty, and he died. Such was the sentence of the lords and judges, so that [men] would be fearful of that which was stolen and no one would buy it.

It was the duty of the market place folk to make the war provisions—biscuits, and finely ground, dried maize and chía seeds, and dried maize dough, and dried, lime-treated maize dough. With these was the market place charged, and the market place directors, the men and women thus appointed, were charged with assigning the tribute.

[p. 70 is blank]

And after the sacrifice was offered, thereupon those who had made the sacrifice, who had slain [the victim], the priests, each one danced with the heads [of the captives], carrying them with them. And Old Wolf wept at this; he wept for his sons who had died.

And the captive[s] they then flayed; when it was dawn they were already flayed. [They] stood wearing [their] skins. Of each captive who died, their skins were all worn. Then they assembled at Yopico, in the courtyard of the devil. They had their shields, their war clubs, and their rattle sticks. And also came together the great chieftains, the battle-drunk, all important personages. With them were their staves; the pine staves lay in their hands, and they went carrying them.

And when deep night was overspread, they did not take upon their wrists their shields, but took only their staves, as they awaited the time that the sun would burst forth. And when he came forth, thereupon the *tototecti* placed themselves in order—verily, all of them. And the chieftains, upon this, also placed themselves in order and contended against the *tototecti*. Perhaps they faced each other in the four directions. And then the chieftains started forth and fell upon the *tototecti;* they tickled their navels. Very swiftly they tickled them, and then they took after them and went skirmishing with them there in the place where they were, a place called Totectzontecontirlan. There the chieftains turned back; their only task had been to leave them there.

And when this had taken place, thereupon the *tototecti* visited house after house. Nowhere did they omit a house or one's home. Indeed everywhere they entered; and the common folk, seasoned to this, awaited them in order to offer them the things with which they expected them—bunches of ears of maize, tortillas made of uncooked maize, and tamales of maize, amaranth seed, and honey mixed together. For the whole day they went from house to house, [thus treated with] esteem.

And the next day, or [during the next] twenty days, wherever [one of them] went, perhaps in the market place, he begged, and that which he begged he gave to the owner of [the dead] captive. He gave him his share, perchance, of chili, salt, or staves, or pine wood, or grains of maize—all which lay in the market place. Each day [he did] the same.

5. This phrase is almost illegible in the original. We have reproduced what the words appear to be.

Eighth Chapter, in which is told how Moctezuma sent the magicians,[1] wizards,[2] and soothsayers[3] so that they might do something to the Spaniards.

Then Moctezuma sent emissaries. He dispatched various evil men — soothsayers and magicians. And he sent the constables, hardy [warriors], chieftains, to purvey [to the Spaniards] all they might need of food: turkeys, eggs, white tortillas, and all they might ask for as well as whatsoever might satisfy their hearts' desire. They were to watch them well. He sent captives, so that they might be prepared if perchance [the Spaniards] would drink their blood. And just so did the messengers do.

And when [the Spaniards] beheld this, their stomachs turned. They spat; they blinked; they shut their eyes and shook their heads. For the food, which they had sprinkled and spattered with blood, sickened and revolted them. For strongly did it reek of blood.

And thus had Moctezuma provided, for he thought them gods; he took them for gods; he paid them reverence as gods. For they were called and named "gods come from the heavens." And the black ones were said to be black gods.

Later they ate white tortillas, grains of maize, eggs, turkeys, and all manner of fruit — sapotas,[4] red sapotas,[5] yellow sapotas,[6] black sapotas,[7] sweet pota-

1. Godbey, in "Parafiguiteuan de Sahagún," *Tlalocan*, II, 2 (1946), p. 170, refers to the "'*Amphitrión de la personal*' o el '*Amphitrionismo*'" in regard to nanaoalti. The term may be related etymologically to *naui* (4) — a quadruple personality, an archaic verb nanaoli, nanaolo (to lead or direct, as in magic rites), or Maya-Quiché *na, nao, naua* (wisdom, science, magic). Godbey favors the second possibility (nanaoli, nanaolo).

2. *Tlachiuhque*: concerning the term *tlacatecolotlatoa*, Godbey refers to an *arte de hombre parecidoso*, and quotes Sahagún's phrase in Vol. III (Bulnes ed.), p. 23 — "*tiene pacto con el demonio*" (*Tlalocan*, I, 4 (1944), p. 170). In *op. cit.*, *Tlalocan*, I, 4 (1944), p. 389, he refers to *tlacatecolotl* as "*brujo*," "*mago*," "*hombre que participa o le gusta, hombre parecido*"; "*participación y parecidos lo nuevo*." There is a discussion of the etymology of the term.

3. *Tlatlacateculo*: we have previously used the term "soothsayer." In *op. cit.*, *Tlalocan*, II, 2 (1946), Godbey, noting that Molina translates the term as *cartílago, cuero*: "*La cola cuda, parece decaer fundamento sobre-religioso*," and notes the relationship of the term to *tetlachiuhque*, one who prevents bad from falling. He cites *La publicidad del culto de Tezcatlipoca*, II, p. 404.

4. *Quauhtzapotl*: sapota (*Lucuma chrysomelas* Mill.) in Francisco Hernández: *Historia de las plantas de Nueva España* (México: Imprenta Universitaria, 1946), I, p. 274; zapote *no comestible* (genuine name), according to Francisco J. Santamarina: *Diccionario general de americanismos* (México: Editorial Pedro Robredo, 1942), III, p. 314 — Lucuma zapotillo, *L. hemphilli*, *Achras zapotillo*, *A. zapota*. Cf. also Sahagún (Bulnes ed.), III, p. 225.

5. *Teçontzapotl*: mamey (Lucuma mamosum Gaertn.), zapotaceáceas (Santamarina, *op. cit.*, pp. 314-316). In Hernández de Sahagún (*Nuevo glosario de voces de la Nueva-España*: D. Jourdanet and Rémi Simeon, trs.; Paris: G. Masson, 1889), p. 733, n. 2, this explanation appears: "*Les premiers Espagnoles d'Amérique confondirent* [with various sapotas] *le fruit beaucoup plus gros du* [*teçontzapotl*] *au* [*tozcujtlatzapotl*] *de la famille des sapots, qu'ils appelèrent* [*zapotl*] *bas*." *C'est probablement le même fruit que les Antiques considérèrent comme le vrai de teçontzapotl.*" See also Sahagún (Bulnes ed.), III, p. 225.

6. *Atztzapotl*: probably the same as *zapotl*. In Hernández, *op. cit.*, I, pp. 267-268, this is Lucuma salicifolia Kunth. It is also identified by Santamarina, *loc. cit.*, as Lucuma salicifolia — *zapote blanco* or *zapotillo*. In Sahagún (Bulnes ed.), III, p. 224, it is identified as *zapote amarillo* — *Sapotula grandi* (*vulgare*). The *atztzapotl* (yellow sapota) is now generally known as *zapote Amarillo* (*general americanismo*, called Garcia Gonzalez).

7. *Tozcujtlatzapotl*: *zapote prieto* (*Diospyros ebenaster* Ruiz — *ebenaceae*), in Sahagún, *loc. cit.*

262 toes,[8] manihot,[9] white[10] and yellow[11] sweet potatoes, colored sweet potatoes, *jicamas*,[12] plums,[13] *jobos*,[14] guavas,[15] *guajilotes*,[16] avocadoes,[17] carob fruit,[18] *tejocotes*,[19] American cherries,[20] tuna cactus fruit,[21] mulberries,[22] white[23], yellow,[24] and whitish-red cactus fruit,[25] *pitahayas*,[26] water *pitahayas*.[27] And the food for the deer [was] *pipillo*[28] and *tlachicaztli*.

754 648 And it is told why Moctezuma sent magicians and soothsayers — that they might behold what kind [of men] they were, and that perchance they might bewitch and cast a spell over them. Perhaps they might blow them away, or enchant them. Mayhap they might cast something at them, or they might, with some words of the Evil One, utter an incantation over them, so that they might sicken and die, or else because of it turn back.

But these, when they performed their charge and commission upon the Spaniards, were at once powerless. Nothing could they do.

Then they quickly returned and came to tell Moctezuma what they were like and how strong they were: "We cannot contend against them; we are as nothing."

—*After Pazo y Troncoso*

44. Marina interprets for the Spaniards when Moctezuma meets Cortés (Chapter 16). 45, 46. Spaniards take Moctezuma with them as they enter the great palace (Chapter 17). 47. Supplies demanded by the Spaniards (Chapter 17). 48. Moctezuma leads Cortés to the treasure (Chapter 17). 49, 50. Spaniards and allies loot the treasure house (Chapter 17). 51. Marina addresses Mexican noblemen (Chapter 15). 52. Mexicans leave supplies for the Spaniards (Chapter 18).

[p. 44(H)]

648 **Twenty-fifth Chapter, in which is related how the people of Teocalhueyacan quietly and peacefully came to meet the Spaniards and offered them food when they fled from Mexico.**

Tlacatecutli was the name, and Otoncoatl the lordly title, of the one who led them away. There he came to leave food. White tortillas; birds, baked [262] and boiled; eggs; and some live birds; and some tuna cactus fruit he spread out before the Captain.

He said: "You have suffered fatigue. Our lords the gods have tired themselves. Let them rest. Let them find a resting place. Let them recover their breath."

Then Marina answered them and said: "My master, the Captain, saith: 'Whence have they come? Where [is] their home?'" Then they said to him: "May our lord hear: we have come from his home at Teocalhueyacan; we are the people of Teocalhueyacan." Then Marina answered: "It is well. They have shown us kindness. We shall go there tomorrow; there we shall sleep."

727 And meanwhile, just as dawn broke, when the earth was visible, then [the Mexicans] carried away — there were carried out — all the men of Tlaxcalla and of Cempoalla, and the Spaniards, who had plunged into the Tolteca canal and [at] Petlacalco or Mictlantonco. In boats they carried them all away. In patches of rushes, among the rushes; in patches of reeds, among the reeds, they went to cast each one and lay them out. They went to throw out each one. And they went to cast out each woman; [302] naked, yellow[-skinned], anointed with yellow, painted yellow, were the women. All and each of them they stripped and despoiled. They removed all from them and left them bare.

And the Spaniards they placed, each one, apart, in rows; [like] white reed shoots, or white maguey shoots, or white maize ears, or white reed shoots were their bodies. And they removed each of the deer which bore men on their backs, called horses.

And all the goods [of the Spaniards and their allies], carried in their back packs — all was stolen,

Corresponding Spanish text: "y ellos traían los atavíos de chamelotes que se compraron de la gente amistosa con los de Tlaxcala; porque eran todos parientes y deudos, pues los de Teocalhueyacan salían pues a poblar a Tlaxcala." The statement is shown in Pedro Carrasco Pizana: *Los otomíes* (México: Instituto de Historia, 1950), p. 208, fig. 29.

[redacted]

Twenty-seventh Chapter, in which is told how the Mexicans came to and reached the Spaniards as they followed them at the rear.

Also this very time was when the Mexicans advanced and arrived in order that they might cut off [the Spaniards'] progress. The Mexicans went to and established themselves at the foot of a mountain called Tonan. And when dawn broke, the Spaniards[1] arrayed themselves and ate. Likewise the Mexicans bedight themselves and ate and drank. They drank a mixture of *pinole* and water.[2] Some climbed to the top [of the mountain], as scouts and sentinels, to watch for when the Spaniards would depart and move on. In truth, standing guard was their very charge, their concern.

And after this, when the Spaniards[3] already proceeded and followed the road, then the scouts cried out and said: "O Mexicans, your foes are already going! Let us array ourselves! Let us arm ourselves, each one! Let us all proceed! Let us all go together! Let none remain behind!" And when they heard this, there was running; all ran hither and thither and went in pursuit.

And when the Spaniards saw them, they waited for them. They then closed ranks in order to encounter them. They studied them carefully in order to consider how to fare well against them. And after this, [the Mexicans] then ran at them; they hurled themselves at them, so that all were enclosed within [the Spaniards' ranks]. Then they were speared and pierced; indeed, then died in great numbers those of Mexico and Tlatilulco. They went to deliver themselves, cast themselves into [the Spaniards'] hands, and came upon death. But few fled from their hands and so did not die. And those who remained at a distance, who remained following from afar, did not die. And when the Spaniards had dealt death among the people, and had spent their rage, they forthwith departed. All who bore burdens went following them. No one knew of them where they

3. Corresponding Spanish text: "*los capitanes eran ahora . . . los otros indios eran hasta . . . los caballos eran hasta.*"

4. Soler, *op. cit.*, p. 550, reads this passage.

5. *Elopsuel*: leaves, or straw, of maize, which Mexican cattle eat, green or dry; in other words, the plant itself after the maize grains have been harvested (personal communication, Rafael García Granados). — In Sahagún (Rubrido ed.), III, pp. 271-272, it is described as "*hierba . . . or many cards y tiene parecer como el trigo, y es blanca, alimenta las conejos y otros animales.*" Ramírez, *op. cit.*, p. 259, describing it as a diuretic and purgative, suggests "maize straw" as a name.

6. *Tequixquiyauel*: probably pasture on saline lands, of the variety called "grama," creeps over the ground, putting forth small roots (personal communication, Rafael García Granados). — For this, Sahagún, *op. cit.*, p. 271, has "*hierba muy dañosa y espinosa, que se hace en tierra salitrosa . . . es buena para quemar.*" Ramírez, *op. cit.*, p. 223, citing Simeón (*op. cit.*), calls it nitre grass or conch grass, possibly *Distichlis spicata* (L.) Greene. *Grama* (*tequixquiyauel* in Molina, *op. cit.*), Santamaría (*op. cit.*, II, p. 31) identifies as *Panicum repens* L., very abundant in the Americas.

7. *Tzumpanquauitl*. According to Sahagún (*op. cit.*, III, p. 275), "*es árbol mediano, tiene ramas acopadas, tiene la corteza colorada y de buen parecer, tiene unas flores que se llaman xochiocuitlachi; con muy colorados y de buen parecer y no tienen olor ninguno; las hojas de este árbol se llaman xoxoloti*"; p. 348: "*Xoxoloti. Árbol, flor y fruto del Colorín.* Erythrina corallodes. *DIC.* Legumínosas." Santamaría, *op. cit.*, III, p. 321, giving the same botanical identification and *E. americana* Mill., adds the current common name (*zompanda*), and observes of the bark (*colorin*) that it is "*especie de frijolillo rojo, dicen que contiene un alcaloide muy venenoso.*"

8. *Tzacuxuchitl*. Ramírez, *op. cit.*, p. 300, calling it a "glue flower," identifies it as *Mexia ceanopodes* La Llave and Lex (?), *Epidendrum parviflorum* La Llave and Lex (?), *Gomphocarpus mexicanus* Kunth (?) — all orchids. Hernández, *op. cit.*, II, pp. 375-376: *Tzacuxuchitl o tzacuchil florido: Mexia ceanopodes* La Llave y Lex, or *B. coccinea* La Llave y Lex.

9. *Tlaquilli*. In Molina, *op. cit.*, tlaquilli is plaster or stucco. *Tlaquilli*, however, is given by Ramírez, *op. cit.*, p. 226, as "frilled flower" — probably *Mirabilis jalapa* L., known as marvella. It is medicinal. Santamaría, *op. cit.*, III, p. 186, adds these common names: *San Diego de la noche, arrebolera, and trompetilla.*

10. *Tetexoa*. Sahagún, *op. cit.*, p. 249, says it is like serpentin: "*hacen muy verdes y corrosivas y redondillas, y también crecen leche, y tiene las ramas coloradas. . . . calor . . . dura, y esprime y lacrpulla . . . lo lameber de esta raíz mediado*" (medicinal). Ramírez identifies it as *Sedum dendroideum* Moziño and Sessé — commonly, *siempreviva* (*op. cit.*, p. 223). Santamaría, *op. cit.*, III, p. 85, adds *S. quitense* H. B. K. and *S. reusense* Saw.

11. Cf., however, Soler, *op. cit.*, p. 550: "*and Stock and Leder and Hirschhaut, die brinnen, backen, rösten, braunen, sowie es ist, und Tzacuelpur and Lehmziegel und auch Tezcuil.*" Of *tezcuil* or *tecuil*, Sahagún (*op. cit.*, p. 269) says it is a hot country plant used for coloring. Santamaría, *op. cit.*, III, p. 143 (*tequesquite*), says it is "*nombre vulgar de varias plantas halorrendoras, como el equisetillo o tigre (Conocoupia salsoperula), el tamarindo (Adenoia hordigera, y otras.*"

100 -

such suffering. It was terrifying how they were besieged; truly, in great numbers they starved. And quite calmly [the enemy] hemmed us in and contained us.

635 and its fellow Cuitlatec of the west, but we have seen that "eran de
632 Moteçuma," being, indeed, a link with the uttermost western hinter-
131 land, the provice of Çihuatlan.

Tlacotepec warred with southern neighbors on the coast,[68] among them Tecpan—this latter, presumably, ceasing to be an enemy when it was subjugated to form part of the province of Çihuatlan.

Zompanco and Chilapan were strong-points on the Yope frontier.[69] Just south of Chilapa lies Quecholtenanco, a garrison town whose
[712] glyph is in both the *Matricula* and the *Mendocino* (fol. 17') accompanied by the head of one "Mixcoatl, tlacatectli governador."

Regional names.—The whole eastern part of this former province was known as Coixcatlalpan,[70] "que quiere decir Tierra de Lagartijas porque ay muchas."[71]

651

TRIBUTE

Tribute of the whole province.—The original *Matricula* and the *Mendocino* copy specify the following tribute:

CLOTHING

[291] 402 bundles[72] of mantles *colchadas***
402 bundles of mantles striped black and white**
400 bundles of rich mantles (the drawing is of a Tlaloc-head decoration)**
400 bundles of women's skirts and blouses**
400 bundles of little white mantles**
1,600 bundles of large mantles**
[714] 22 warriors' costumes (20 of the common "Huaxteca" armor and 2 special pieces: one Tiger Knight and one with *quetzalpatzactli* headdress)*

FOOD

[262] 4 *troxes* (wooden cribs), 1 each of maize, beans, *huauhtli*, and *chian**
[263] 200 little jars of honey (quarterly)

[68] *PNE*, 6: 124: "trayan gerra con los de la costa, que era los pueblos de Tequepa, Acamalutla, Temazcaltepec y otros pueblos." Tequepa (*PNE*, 1: No. 904) "parte terminos con Nuzco," hence is the present Tecpan.

[69] *PNE*, 6: 318 and 5: 178. On the Yope, see Ortega, "Extensión y límites de la Provincia de los Yopes ...," *El México Antiguo* (1940), 5: 48–53.

[70] *PNE*, 5: 249.

[71] *Relación de Iguala* (1931), p. 221.

[72] The figures for this and the following item are corrected from the erroneous 400 of the *Mendocino* annotation.

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

NATURE OF THE PROVINCE

191 101 *Inhabitants and languages.*—The aborigines of the west of this province spoke "Chontal de Guerrero," a language which is commemorated in the place name Chontalcoatlan.[*] This little-known tongue is distinguished from Mexican, Matlatzinca, Mazatec, and Tarascan, all of which were spoken in the province,[*] and was still current in the late sixteenth century in Coatepec, Chontalcoatlan, and Teticpac,[*] as well as in towns of the adjacent province to the south.

131 635 *Provincial borders in 1519.*—Tlachco Province was a part of the Tarascan frontier. To its south lay the hot-country province of Tepequacuilco, and to its north, Ocuilan, both of these also western frontiers. On the east was opulent Quauhnahuac.

TRIBUTE

651 *Tribute of the whole province.*—It is clear from the *Matricula* that the rich silver mines of later fame were ignored by the Culhua Mexica. Tlachco was a second-rate province, as we see by the list of goods remitted:

CLOTHING

[291] 400 bundles of little cotton mantles, richly worked[**]
400 bundles of women's clothing[**]
[248] 1,206 bundles[*] of little mantles of soft henequen[**]
[114] 2 warriors' costumes (a *Huaxteca* and a *quetzaltzitzimitl*)[*]

FOOD

[263] 2 wooden cribs, one of maize, the other of chian[*]
263 200 little jars of honey (quarterly)

OTHER GOODS (quarterly)

[323] 1,200 yellow pottery bowls
314 400 little baskets of copal for incense-burners
8,000 pellets of unrefined copal wrapped in palm leaves

651 632 *Tribute of the component towns.*—Tlachco itself is the only town for which itemized tribute data are available. It remitted men's cotton mantles (measurements are given) and women's skirts and blouses,

[*] "Son los antiguos de la tierra" (*PNE*, 6: 143).
[*] *PNE*, 6: 265; *GPM*, p. 135.
[*] *PNE*, 6: 100, 118; *GPM*, p. 127.
[*] Corrected from 1,200.

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

197 but their language is different. They used to practice curses and sorcery
[780] very much." The Ocuiltec language is said by Ingeniero Weitlaner,
101 who rediscovered it, to be related to Matlatzinca and Otomí,[*] spoken near by. Although the Ocuiltec language is supposed to be limited today to the village of Ocuilan and its environs, the writer has found a mysterious reference to it in a sixteenth-century document from the north of modern Hidalgo State.[*]

635 *Provincial borders in 1519.*—In the final native period the province
131 of Ocuilan, approximating a half moon resting on its back, was bordered on the northwest by Tuluca, and on the northeast by Quahuacan and the Valley of Mexico. To the east lay Quauhnahuac, and to the south the small province of Malinalco and more sizable Tlachco. Ocuilan thrust out westward into the enemy lands of the Tarascans; Temazcaltepec and Zoltepec are spoken of as situated on the Tarascan frontier.

TRIBUTE

651 *Tribute of the whole province.*—According to the *Matricula* and *Mendocino* pages, Ocuilan gave the following tribute:

CLOTHING

[291] 800 bundles of richly decorated little mantles of henequen**
248] 400 bundles of little cotton mantles decorated with sea shells**
400 bundles of little cotton mantles**
[714] 21 warriors' costumes with shields (one of the headdresses having the *quetzalpatzactli* form, and the rest Huaxteca)*

FOOD

● [262 4 wooden cribs, 1 each of maize, beans, huauhtli, and chian*
263] 2,000 vessels of white salt**

632 *Tribute of the component towns.*—Temazcaltepec alone gave mili-
651 tary help (not more than twenty men), two or three bundles of the
[291 above-mentioned mantles of henequen, intoxicating mushrooms (*teo-*
276] *nacatl*), kindling, and ink made from sap—all this "every time they
212] were asked."[*] No data are available on the tribute of other component
137] towns individually.

[*] Weitlaner, "Beitrag zur Sprache der Ocuilteca," *El México Antiguo* (1939), 4: 297–328.

[*] In Tlachinolticpac, *PNE*, 3: 130.

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

Provincial borders in 1519.—The province of Tuluca was a frontier 635
against Michoacan all along its western side. It was during their expan- 131
sion into this region that the Mexica met one of their few outstanding defeats, being thrown back after penetrating to the shores of Lake Cuitzeo. To the north lay the province of Xocotitlan (a single town and its tributaries); to the east, that of Quahuacan, long Mexicanized; and to the south, Ocuilan, which was separated from Tuluca by the mountain of the icy and sacred lake, the Zinantecatl, now called Nevado de Toluca.

Regional names.—The province of Tuluca was called the Matlat- 635
zinca[n] as far west as Temazcaltepec.[**] Since this term is a rather familiar one, the exact boundaries which it includes have not been investigated here.

TRIBUTE 651

Tribute of the whole province.—The province of Tuluca gave the following tribute, according to the *Matricula* and its *Mendocino* copy:

CLOTHING [291]

400 bundles of little white cotton mantles with decorated border**
400 bundles of henequen mantles, with designs in red, black, and white**
1,200 bundles of white henequen mantles** [714]
22 warriors' costumes and shields, 2 of them of fine quality*

FOOD

6 wooden cribs, 2 of maize, 2 of chian, 1 of beans, 1 of huauhtli* [262]

Tribute of the component towns.—Tzinacantepec's special milpa has been noted. No other information is available on this point. [632]

6. Malinalco

SOURCES OF THE MAP

Two provinces are shown on the thirteenth page of the *Matricula*, 635
which is copied as folio 35' of the *Codex Mendocino*. The two sections 114
are separated by a strong line in the original, but in the copy this is so weak as to be scarcely visible, and it apparently was not visible to the annotator. There is no question, however, that we are dealing with

[**] PNE 7: 16.

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

is attributed to the Matlatzinca,[108] although in 1791 the Matlatzinca language is not mentioned in a "Descripción" of the place.[109] The religious importance of Malinalco is probably linked with an episode of the migration story of the Mexican tribe. This is given in several variants, the gist of it being that Malinalxochitl, sister of the tribal god Huitzilopochtli, being a great sorceress, was such a plague to the migrating tribesmen that they abandoned her en route, while she slept. She settled then at Malinalco, and bore a son, whose later attempt to avenge the family honor is a part of the story of the foundation of Tenochtitlan. The ramifications of the name Malinalco lead also into a maze of calendaric ritual, for the sacred grass Malinali was the twelfth day-sign.

It has been noted[110] that Malinalco joined the northern Cohuixca in attacking Quauhnahuac after the latter's surrender to the Spaniards.

Provincial borders in 1519.—Malinalco lay well embedded in the Empire, with Ocuilan to the north and west, Quauhnahuac to the east and south, and Tlachco to the south and west.

TRIBUTE

Tribute of the whole province.—The annotations of the *Mendocino*, which we are following for our summary of tribute, do not distinguish between what Malinalco paid and what its fellow, represented on the same page, paid. However, the pictures do show this distinction, and from them we gather that Malinalco Province paid the following:

CLOTHING

1,200 bundles of large mantles of soft henequen**

FOOD

4 large bins (1 each of maize, beans, huauhtli, and chian)*[111]

[108] Cf. Gante, "The Recently Discovered Malinalco Ruins," *Mexican Art and Life*, No. 2 (April, 1938), and Larsen, "The Monolithic Rock Temple of Malinalco, Mexico," *Ethnos* (1938), 3: 59–63. García Payón's more complete report appeared recently ("Los monumentos arqueológicos de Malinalco ...," *RMEA* [1946], 8: 5–63).

[109] "Descripción topográfica de la jurisdicción Malinalco," dated July 13, 1791, at Tenazingo: "Los Yndios de toda esta jurisdiccion hablan el Ydioma Mexicano, á excepcion de el Pueblo de San Juan Azingo, que para su govierno interior, conserban el Ocuiteca, de difícil comprehencion para los estraños."

[110] In the section on Tepequacuilco.

[111] To get this figure I have followed the *Mendocino* annotations, which specify 8 bins for Malinalco and the other province together. This I have divided equally, in view of the equal division of the bins as drawn in the picture.

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

TRIBUTE

651 *Tribute of the whole province.*—The following tribute was paid in pre-Conquest days by Quahuacan Province:

CLOTHING

[241] 800 bundles of rich mantles**
714 800 bundles of little mantles of henequen**
41 warriors' costumes with shields*

FOOD

[262] 4 wooden cribs (1 each of maize, beans, chian, and huauhtli)*

OTHER GOODS: TIMBER (quarterly)

[313] 1,200 large planks
1,200 large boards
1,200 poles (*quaumimilli*, morillos)

8. Xocotitlan

SOURCES OF THE MAP

635 Page 13 of the *Matrícula* is divided into two sections, as has been
114 mentioned. The left-hand section contains the province of Malinalco,
175 the right-hand section that of Xocotitlan, with but a single town. The material concerning this one-town province is copied on the lower part of folio 35' of the *Codex Mendocino*. In both manuscripts, in addition to the glyph, its name appears in roman letters. Xocotitlan
[128] (1) is located on the authority of the American Geographical Society's "Millionth Map," sheet "Ciudad de México," where it is spelled Jocotitlán. It lies in the modern State of Mexico, at the foot of the peak also called Jocotitlán. With Xocotitlan has been placed the town of Xiquipilco (2), a vaunted conquest of the Mexicans.[*] Five estancias were subject to Xocotitlan in the mid-sixteenth century,[**] which probably were under its jurisdiction pre-Hispanically. If these estancias could be located, they would define the frontier a little more precisely.

[*] Xocotitlan and Xiquipilco were conquered at the beginning of Axayacatl's reign, before the invasion of the Matlatzinca country, as the writer's forthcoming chronological study will show.

[**] *PNE*, 1: No. 799. These are Almolonga, Tlalchichilco, Tlamacuelpa, Tlalcuzpan, and Tlaxomulco.

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

NATURE OF THE PROVINCE

Inhabitants and languages.—The inhabitants of present-day Xocotitlan 197
and Xiquipilco speak Mazahua and Otomí[28]—a fact in harmony with 101
Ixtlilxochitl's remarks concerning these people at the time of their incorporation into the Empire.[29]

Provincial borders in 1519.—Xocotitlan was a prolongation of the 635
Empire frontier towards Michoacan, exposed to attack from the west 131
and north. East of it lay the province of Quahuacan.

TRIBUTE 651

Tribute of the whole province.—The tribute of Xocotitlan is given as follows:

CLOTHING

400 little mantles of embroidered henequen** [291]

FOOD

4 large bins (1 each of maize, beans, huauhtli, and chian)** [262]

Tribute of the component towns.—Xocotitlan (like the other diminutive province of Malinalco) gives us figures—lacking from most of 651
the relaciones—for the tribute derived by the Mexicans from a single 632
town, and these figures suggest that life under Mexican rule was arduous.

9. Atotonilco de Pedraza

SOURCES OF THE MAP

The province of Atotonilco de Pedraza (not to be confused with that 635
of Atotonilco el Grande) occupied with its list of towns the verso side 114
of a lost page of the *Matrícula*, as we may ascertain by the copy which forms folio 28v of the *Mendocino*.[30] It consisted of seven pueblos, of which only the cabecera survives with its original name. Despite the plethora of Atotonilcos, we may be sure of the location of this particular town and of its corresponding province because references to one other pueblo listed, Otlazpan, have been found in old documents. The

[28] Soustelle, *La Famille Otomi-Pame du Mexique Central* (1937), *passim*.
[29] He puts them among Otomí, Mazahua, and Matlatzinca peoples. *Obras históricas* (1892), II: 256.
[30] See n. 111, p. 31.
[31] The lost original might be called p. 6B.

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

635 *Regional names.*—Atitlaquia and Apaxco lay in the margin of the ancient Teotlalpan, on which we have commented elsewhere.[29]

TRIBUTE

651 *Tribute of the whole province.*—This obliterated province gave the following items of tribute:

CLOTHING

[29] 714 400 bundles of rich mantles**
400 bundles of mantles with black-and-white border**
800 bundles of large mantles of "twisted" cloth**
62 warriors' costumes, together with shields*

FOOD

[262] 4 wooden bins (1 each of maize, beans, huauhtli, and chian)*

OTHER GOODS

[317] 400 loads of lime**

651 632 *Tribute of the component towns.*—Atotonilco de Pedraza itself seems to have figured in the lime manufacture noted above.[30]

317 Otlazpan, in 1549, paid tribute of lime, "mantas labradas con tochomitl," and many other articles, as we see in the *Codex Mariano Jiménez*. These must be the "mantillas de ricas labores ... ropa que bestian los S[eñore]s y caciques." *Tochomitl* is defined in the "Relaciones históricas estadísticas" (1:228) as "lana teñida de colores la qual dicha lana era conejos y liebres." (Compare with Tepechpa, p. 72.)

10. Quauhtitlan

SOURCES OF THE MAP

635 114 Page 6 of the *Matricula* represents the once great province of Quauhtitlan, whose annals are so precious to the investigator of ancient Mexican history and ethnology. This page is copied as folio 26' of the *Codex Mendocino*. The province lay in the modern State of Mexico, north [128] of the Federal District. Seven towns are listed in this province, the present map of which is based on that of the Secretaría de Agricultura

[29] Barlow, "Las provincias septentrionales del Imperio de los Mexicanos," in *Tercera Reunión de Mesa Redonda sobre Problemas Antropológicos de México y Centro América, ... 1943: El Norte de México y el sur de Estados Unidos* (1944), pp. 119–121.

[30] *PNE*, 1: No. 1 [ca. 1550]: "Ay muchos magueyes y tunas y piedra para hazer cal y destas cosas tienen mucha grangeria los yndios." The whole region was abundant in lime.

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

651

TRIBUTE

Tribute of the whole province.—Rush mats and seats were a distinctive tribute of the province of Quauhtitlan, which paid the following items:

CLOTHING

[291 714]

400 bundles of rich little mantles**
400 bundles of little mantles with black-and-white border**
400 bundles of little white mantles**
62 warriors' costumes with shields (2 fine pieces)*

FOOD

[262]

4 wooden bins (1 each of maize, beans, chian, and huauhtli)*

OTHER TRIBUTE

[285]

4,000 *petates*
4,000 rush seats

11. Xilotepec

SOURCES OF THE MAP

635 114

The province of Xilotepec, which kept its name into the late sixteenth century, contained seven towns, according to page 9 of the *Matricula* and folio 31' of the *Mendocino.* It lay in the southwest part of Hidalgo and in the northwest part of the State of Mexico. In the *Matricula,* the towns of Xilotepec and Michmaloyan are identified in roman letters; in the *Mendocino,* all are. The present map is based on the "Millionth Map" of the American Geographical Society, sheets "San Luis Potosí" and "Ciudad de México." Below are the *Mendocino* names which have been identified with those of the modern map:

[128]

103

MENDOCINO	MILLIONTH MAP
Acaxochitla, 7	[Missing]
Michmaloyan, 5	Michimaloyan
Tecoçauhtla, 11	Tecozautla
Tepetitlan, 6	Tepetitlán
Tzayanalquilpan, 3	Soyaniquilpan
Xilotepec, 2	Jilotepec

There remains a seventh town to identify in this province: Tlachco. It is possible that this may be the modern Querétaro, for the Mexican version of Querétaro (more properly "Querendaro" in Tarascan) is

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

212 their Náhua masters. These unique historical annals for the years 1403–1528 were discovered by Lic. Alfonso Caso.[30] They come from the town of Hueichiapan, on the verv Chichimec frontier, and should afford important ethnographic and historical data when published.

632 Three of the seven towns listed on the *Matricula* page are definitely
635 stated to be old Tepanec domain. These are Michmaloyan, Tecoçauhtla, and Xilotepec. Two others, which fell within the province but are not on the *Matricula* page, were also Tepanec: Tula (4) and the unlocated frontier town of Acaualtzinco.

635 *Provincial borders in 1519.*—To the west and north of the province
131 of Xilotepec lay the "tierra de guerra" of the Chichimec nomads.[31] Traders ventured into this region, however, as did Conin, the Otomí *pochtecatl* who founded Querétaro. East of Xilotepec lay the Empire province of Axocopan, and to the south that of Atotonilco.

Regional names.—The ancient Teotlalpan began immediately on the borders of Xilotepec, with the town of Atitlaquia,[32] but apparently did not overlap with it.

TRIBUTE

651 *Tribute of the whole province.*—According to the *Matricula* and the *Mendocino,* the following tribute was extracted from the province of Xilotepec:

CLOTHING

[291 714] 400 bundles of women's skirts and blouses, richly decorated**
408 bundles[33] of men's mantles**
400 bundles of embroidered skirts**
800 bundles of mantles with a spotted design**
408 bundles[34] of rich little mantles**
400 bundles of mantles with a red stripe in the middle**
2 warriors' costumes with shields*

FOOD

[262] 4 wood cribs (1 each of maize, beans, chian, and huauhtli)*

OTHER GOODS

[231] 1–4 live eagles, "according to what they found"[35]

[30] Alfonso Caso, "Un Codice en Otomí," in *Proceedings of Twenty-third Congress of Americanists, . . . 1928* (1930), pp. 130–135.
[31] Cf. n. 35 above.
[32] *PNE*, 6: 201.
[33] Corrected from 400 of *Mendocino* commentary.
[34] Corrected from 400.
[35] The only other live-eagle tribute specified in the *Matricula* came from the province of Oxitipan, also in the north of the Empire.

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

Provincial borders in 1519.—To the north lay the republic of Metztitlan, whose soldiers fought with Yzmiquilpan. To the east was Hueypuchtla, to the south Atotonilco, and to the west Xilotepec—all Empire provinces.

Regional names.—Many of the towns of the province of Axocopan lay in a region called the Teotlalpan.[*] This term is defined as "tierra de los dioses." The Teotlalpan is a term used far into the sixteenth century, by Alonso de Santa Cruz in his *Geography*, and by others. It does not seem to have been coterminous with the province of Axocopan in the north: Yzmiquilpan is nowhere stated to be inside the Teotlalpan, for example. But documentation is scarce.

TRIBUTE

Tribute of the whole province.—The tribute of Axocopan and the other subjects of this province was as follows:

CLOTHING

800 bundles of rich little mantles**
400 bundles of little mantles with black-and-white border**
800 bundles of little white mantles**
400 bundles of women's skirts and blouses**
42 warriors' costumes with shields*

FOOD**

4 wooden cribs (1 each of maize, beans, chian, and huauhtli)
400 large jars of thick maguey honey

Tribute of the component towns.—Some indication of the way in which this burden was divided among the tributaries appears below.

Atenco is grouped with Mizquiyahuala (*q.v.*).

Axocopan gave shields and spears, henequen mantles, and made nine special milpas for its overlords.[*]

Mizquiyahuala, together with Atenco, paid one turkey every twenty days, as well as henequen mantles: "... estavan sujetos al p[uebl]o de

[*] Axocopan, *PNE*, 6: 14; Mizquiyahuala, *PNE*, 1: No. 347; Tecpatepec, *PNE*, 6: 34; Texcatepec, *PNE*, 6: 32 and 1: No. 546; Tlaahuelilpa, on the other hand, "está ya casi fuera de la comarca que dizen de la Teotlalpan" (*PNE*, 3: 73).

[*] *PNE*, 6: 14 and *passim*.

[*] To the ruler in México, "dauanle de tributo: rrodelas de nequen [*sic*] y varillas tostadas, mantas de nequen de diferentes labores; hazianle nueve sementeras de mahiz" (*PNE*, 6: 15).

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

635 *Regional names.*—The cabacera of Hueypuchtla lay within the region known as the Teotlalpan,[47] as did Tequixquiac[48] and the Tezcatepec we have identified as the pre-Hispanic Tezcatepectonco.[49]

TRIBUTE

651 *Tribute of the whole province.*—Hueypuchtla and its subject towns paid the following tribute to the Empire:

CLOTHING

[291 714] 400 little decorated mantles**
400 henequen mantles with black-and-white border**
800 white henequen mantles**
62 warriors' costumes, with shields*

FOOD*

[262 263] 4 wooden cribs (1 each of maize, beans, chian, and huauhtli)
400 jars of thick maguey honey

651 632 *Tribute of the component towns.*—Some of the elements of the tribute listed above may be traced in the relaciones of the sixteenth century.

[286] Hueypuchtla gave game and mantles and weapons, as well as making a special milpa for purposes of tribute. Nets are also mentioned—an unusual item.[50]

Tezcatepec[tonco] provided weapons and game.[51]

[231] Tolnacuchtla gave tribute of game, among which figured live eagles.[52]

---

[47] *PNE*, 3: 48, 6: 26. See discussion of regional names, Axocopan (p. 47) for a definition.

[48] *PNE*, 3: 51.

[49] *PNE*, 6: 32.

[50] *PNE*, 6: 28: "rreconoçian a ... Moctezuma y a sus antecesores, dauanle por tributo, venados, conejos, rredes y vnas mantillas de nequen que son como anjeo de Castilla, y codornyses y cutalas, arcos y flechas, y le hazian vnas sementeras, mahiz, frisoles, calabaças y otras semyllas menudas de esta tierra."

[51] *PNE*, 6: 32: "davanle de tributo venados, conejos, liebres, culebras, arcos, flechas, pellejos de venados."

[52] Live eagles were depicted in the *Matrícula* from two other provinces of the north: Oxitipan and Xilotepec. *PNE*, 6: 25: "davanle de tributo aguilas, codornyces, venados, liebres y conejos."

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

Chilton later fell into the hands of Indians near Santiago de los Valles (Ciudad Valles), and was threatened with cannibalism, but they feared his leanness to be due to the pox, and spared him. Scalp-taking here is noted by Chilton: 635 105 [726]

> ... they take a great pride in killing a Christian; and to wear any part of him where he hath any haire growing, hanging it about their necks, and so are accounted for valiant men.

Native trade connections between the Valles area and distant Xalapa of Veracruz are also noted by Chilton. [139]

In early pre-Hispanic times, Oxitipan was claimed, along with Tulancinco and other towns of the north, as part of the old domain of Xaltocan.* 635 175

Provincial borders in 1519.—In 1519, the province of Ctzicoac lay to the south; on all other sides, the province of Oxitipan lay open to Chichimec attack. 635 131

TRIBUTE

The town of Oxitipan, which probably included various subjects, gave the following tribute in the native period: 651

CLOTHING** [291]

2,010 bundles' of large mantles, each 2 varas long
806 bundles* of large mantles, striped red, blue, and yellow

FOOD* [262]

400 loads of dried *axi*

OTHER TRIBUTE* [231]

1 or more live eagles, as many as were caught

It is noteworthy that the same items of tribute, though in lesser quantities, were given annually in early colonial days to the Spanish masters of Oxitipan. 177 651

CLOTHING

9 "SAVANAS"

FOOD

30 loads of axi
9 jars of honey
... maize

* *ENE*, 10: 126. ' Corrected from 2,000. * Corrected from 800.

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

651

808 bundles* of large white mantles, 4 brazas long** [291
400 bundles of women's skirts and blouses** 71+]
2 warriors' costumes with shields*

FOOD

400 bundles of dried chili peppers* [262]

OTHER GOODS

800 bundles of cotton* [248]

Another version of this tribute specifies the following annual payments:

CLOTHING

1,800 bundles of mantles for use as carpets, with varicolored stripes [291]
..... plain mantles
..... women's skirts and blouses
100 bundles of "twisted" mantles, 8 brazas long and 3 *piernas* wide
100 bundles of thin mantles, 4 brazas long ("which altogether comes to forty thousand pieces")
200 bundles of loincloths

FOOD [262]

100 loads of chili peppers
100 loads of little peppers

OTHER GOODS

400 *petacas* [petates?] [285
400 deerskins 281
100 live deer 231
100 large (live) parrots 237]
40 bags of white feathers for weaving
40 bags of varicolored feathers

Besides this, servants were provided for the overlords.* [357]

* Corrected from 800.

* Ixtlilxochitl, *Obras históricas* (1892), II: 197. The province of "Tiscohuscalaotl" paid "en cada un año de tributos mil y ochocientos fardos de mantas así de las ricas betadas de todos colores, que servían para entapizar las salas y cuartos del rey, como de otras llanas, enaguas y huepiles, sin más cien fardos de mantas de Tlacatziuhque [Ilacatziuhque, Molina: cosa torcida] de á tres piernas, que tenía de largo cada una de ellas ocho brazas, y otros cien fardos de las más delicadas y primas de á cuatro brazas, que las unas y las otras venían á ser cuarenta mil piezas, sin más cuatrocientos petacas y cuatrocientos pellejos de venado, cien venados vivos, cien cargas de chile y cien cargas de pepitas, cien papagayos grandes, cuarenta costales de pluma blanca con que hacían telas, y otros cuarenta costales de plumería de aves de diferentes colores, sin más doscientos fardos de pañetes, que venían á ser cuatro mil, con las amas y criadas necesarias para el servicio de palacio."

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

[65] 816 bundles[a] of orange-striped mantles, 8 brazas long[b]
[291] 408 bundles[a] of large white mantles, 8 brazas long[b]
402 bundles[a] of mantles striped red and yellow[b]
400 bundles of women's skirts and blouses[b]
240 bundles of rich mantles in three styles[b]
[714] 2 warriors' costumes with shields[b]

FOOD[b]

[26] 800 loads of dried chili peppers

OTHER GOODS[b]

[23] 20 bags of small white feathers for decorating mantles
301 2 strings of chalchiuites
1 string of turquoises
2 disks of turquoise mosaic

Another source, which magnifies the seven towns into seven prov-
[114] inces in the "gran provincia de Tochpan"[c] (seventy-eight pueblos in all), gives the following version:

CLOTHING

[291] 1,580 bundles of mantles
25 mantles and *huipiles*
400½ bundles of "twisted" mantles, 8 brazas long
400½ bundles of thin "twisted" mantles, 4 brazas long

This is summed up as 47,645 articles of clothing, a smaller figure
[357] than that given by the *Mendocino*.[d] Perhaps we have here the tribute of the cabecera alone. Servants were also supplied, we are told.[e]

Still other sources give more details concerning items included in the opulent tribute of Tuchpa Province, among them a kind of mantle called "Tuchpanecayotl."[f]

---

[a] Corrected from 800.
[b] Corrected from 400.
[c] Corrected from 400.
[d] Ixtlilxochitl, *Obras históricas* (1892), II: 197. It is interesting that the number seven is given, which corresponds to the number of towns known to us from the *Mendocino*.
[e] The total number of pieces of clothing from Tuchpa Province specified in the *Mendocino* is 85,480.
[f] Ixtlilxochitl, *Obras históricas* (1892), II: 197: "En la gran provincia de Tochpan puso por su mayordomo á Huchutli, que cobraba en cada un año de las mantas del género atrás referido, mil quinientos y ochenta fardos, y mas veinticinco mantas y huepiles, sin más cuatrocientos fardos, y más diez mantas de ilacatziuhqui [Molina: cosa torcida] de a ocho brazas, y otros tantos fardos de mantas de ilacatziuhqui delgado de a cuatro brazas, que por todo venían á ser cuarenta y siete mil seiscientos cuarenta y cinco mantas, enaguas y huepiles, piezas de ilacatziuhqui y pañetes sin más las amas de palacio y criadas que eran necesarias para el servicio. La gran provincia de Tochpan se dividía en siete provincias, que contenían todas ellas sesenta y ocho pueblos a ellas sujetos."

8: Barlow E-4 (no date) 1949 NU7 Aztec NU7

651
[262]

FOOD

4 wooden bins (1 each of maize, beans, chian, and huauhtli)*

632
651

Tribute of the component towns.—Atotonilco el Grande, in the mid-sixteenth century, gave six hundred *hanegas* of maize annually and twenty-six hanegas of wheat. Quarterly it paid twenty-five women's skirts and twenty-five blouses, as well as fish, quail, chicken eggs, kindling, personal services, and a host of minor items.*

20. Acolhuacan

SOURCES OF THE MAP

635
114

The province which is represented on page 3 of the *Matricula* is depicted on folios 21' and 22' of the *Codex Mendocino* copy. It contained twenty-six pueblos worth enumerating. Several of the glyphs are almost obliterated in the *Matricula*, which identifies four towns in roman letters. Three of these identifications—Ixquemaca, Ahuatepec, and Cempoala—agree well enough with the *Mendocino*, which identifies all the towns, but the name of the cabecera is quite different in the two manuscripts. The *Matricula* calls it "Acolman"; the *Mendocino* calls it "Acolhuacan." In the ensuing discussion, Remarks on Towns, the problem is considered. This province lay mostly within the territory now included in the State of Mexico, northeast of Lake Texcoco,
[128] but projected a short distance into Hidalgo. With the 1937 map, "Valle de México" (Secretaría de Agricultura y Fomento), used as base, more than half the towns of this province have been identified:

103

MENDOCINO	1937 MAP
Acolhuacã, 23	[See Remarks on Towns]
Aztaquemeca	[See Remarks on Towns]
Cenpoalan, 5	Zempoala
Ecatepec, 15	[No change]

Tepechpa, 16	Tepexpan

* *PNE*, 1: No. 21: "Y da mas seyçientas hanegas de maiz cada año y siembran veinte y siete hanegas de trigo, y dan veinte e cinco naguas y otras tantas camisas cada ochenta dias."

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

TRIBUTE 651

Tribute of the whole province.—Acolhuacan Province is said to have given the following tribute:

CLOTHING [291]

2,000 bundles of large white "twisted" mantles**
1,200 bundles of rich thin mantles, in three styles**
400 bundles of loincloths** [714]
400 bundles of women's skirts and blouses**
121 warriors' costumes with shields ("one fine piece")**

FOOD [262]

4 wooden bins (1 each of maize, beans, chian, and huauhtli)

Tribute of the component towns.—Acolman (a) rendered tribute 632 of henequen garments, in bundles of twenty, every quarter, and 651 maguey leaves for fuel, but, to judge from a statement in the *Papeles de Nueva España* (6:213), this seems to have been destined for the local cacique.

Cenpoalan at first gave obsidian knives for war clubs to Texcoco. [412] After passing into Mexican hands it gave a canoe annually, and then, in the time of Moctezuma's predecessor, fowl and other things.[a]

Epaçoyucan and adjacent towns paid only obsidian knives until [412] Ahuizotl enlarged the temple of Huitzilopochtli and increased tribute demands generally. Thereafter they paid mantles and maize and domestic fowl.[b]

** Corrected from the *Mendocino* version: 103 pieces, 3 fine.

[a] RHE, 1: 131: "estos quatro pueblos y sus sujetos eran en tiempo de su gentilidad del señor de tetzcuco netzavvalcoyotzin andando el tiempo y siendo señor en mexico ytzcohuatzin pasaron los pueblos de senpuala y tlaquilpa y tecpilpa al señor de mexico solamente tzaquala se quedo en el senorio que sobre ellos tenia y reconocian siempre el Reyno de tetzcuco Reyno de aculhuaca tributaban nabajas con que hazian macanas y despues andando el tiempo y siendo señor en mexico ytzcohuatzin mucho tiempo no tributaron nada sino solamente cada año llebaban vna canoa a mexico hasta que en tiempo de ahuitzotzin antesesor de monteçuma fue el primero que mando tributasen mantas gallinas y todo genero de bolsteria [this for a new temple] como sucedio Monteçuma en su lugar no quiso personarlos tributos."

[b] RHE, 1: 142: "eran del señorio de tezcuco ... no tributauan nada solamente nabajas con que hazian macanas y siendo senor en mexico ytzcohuatzin pidiole al señor de tezcuco que no tenia muchas tierras que le diese algunos pueblos de la comarca de mexico entonces se dividió este pueblo porque gozase tambien el señor de mexico las nabajas la mitad llevó el de tetzcuco y otra mitad el de mexico y entró tambien otros pueblos debaxo del señorio de mexico como cenpohuala tlaquilpa pachuca teçontepec y temazcalapa todos estos pueblos pasaron a mexico y estos pueblos ayudauan a sacar nabajas y no tenian otro tributo hasta que vino a señorear el antecesor de moteçoma que

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

632 Teotihuacan gave quarterly tribute of thick henequen mantles called
651 "ichtilmatl" and maguey leaves for fuel.[88] However, the *Tratado del principado ... de San Juan Teotihuacan*[89] gives much ampler detail.

Tepechpa preserved the memory, in 1580, of various stages in its evolution as a tributary. At first its people paid their cacique products of the chase, then mantles of various sorts, and finally, *circa* 1450, a quarterly tribute of cotton mantles (fifty mantles, four *piernas* wide and eight *braças* long; thirty-four *braças* long and four *piernas* wide; and forty more of *tochomitl* style) as well as twenty loads of cacao
● [262] of Xoconochco (2,400 beans to the load), twenty loads of chile, and twenty of little peppers.[90]

[326] Tepetlaoztoc, as we see from the handsome *Codex Kingsborough*, gave rich articles of goldwork to its first colonial overlords—obviously a continuation of a long tradition.

Tetlyztaca paid henequen mantles "because they are poor people."[91]

---

se llamava ahuitzotzin quiere decir nutria este fue el que mandó que tributasen mantas y mahiz y gallinas para hacer una fiesta quando acabó el templo del ydolo que llamauan huitzilopochtli desde entonces començaron los tributos deste pueblo y toda la comarca." Cf. n. 81 above for a similar case.

[88] *PNE*, 6: 221: "cada ochenta dias: algunas mantas de nequen gruesas que llaman ichtilmates y algunas cargas de pencas de maguey de esas que llaman metloni."

[89] Guzmán, "Un manuscrito de la colección Boturini ...," *Ethnos* (Stockholm, 1938), 3: 94.

[90] *PNE*, 6: 234: "cinquenta años antes del rreynado de Montezuma cada ochenta dias le tributauan cinquenta mantas de algodon de quatro piernas en ancho y ocho braças en largo, y otras treinta mantas de algodon de quatro braças en largo y quatro piernas de ancho, y otras quarenta mantas labrados de tochomytl para bestirse (cf. Atotonilco de Pedraza, p. 40), y beinte cargas de cacao de a beinte e quatro myll cacaos carga, de zoconosco, y quarenta naguas y otros tantos guipiles y beinte cargas de chile y otras tantas de pepitas."

[91] RHE, 1: 152.

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

frontier. To the south was Huaxtepec, to the southwest Quauhnahuac, 635
and to the north the jigsaw-puzzle provinces of the heart of the Empire. 131

TRIBUTE

Tribute of the whole province.—The province of Chalco gave the 651
richest food tribute of the whole Empire:

CLOTHING

800 large mantles**
2 warriors' costumes with shields* [291 714]

FOOD*

6 wooden bins of maize
2 wooden bins of beans
2 wooden bins of chian
2 wooden bins of huauhtli [262]

22. Quauhnahuac

SOURCES OF THE MAP

The fourth page of the *Matricula* shows us a series of towns headed by 635
Quauhnahuac, a name the Spaniards, in an unfortunate jest, changed 114
to Cuernavaca.[1] This province now forms the western half of the State of Morelos, with a very minor prolongation south into Guerrero. There are sixteen of these town glyphs, all of which are copied in the *Mendocino* on folio 23', with the tribute lists running over onto folio 23". The *Mendocino* annotator seems to have made one of his rare slips, identifying one of the glyphs wrongly, as shown below. The map of this province is based on the 1910 "Carta General del Estado de [128]
Morelos" (Comisión Geográfico-Exploradora), on which the following towns have been located: 103

MENDOCINO	1910 MAP	MENDOCINO	1910 MAP
Acatlycpac, 4	Acatlipa	Quauhnahuac, 2	Cuernavaca
Amacoztitla, 14	Amacuzac	Teocalçinco, 17	Teocalzingo (Gro.)
Atlicholoayan, 9	Atlacholoaya	Xiuhtepec, 3	Xiutepec
Coatlan, 7	Coatlán del Río	Xochitepec, 6	[No change]
Chimalco, 16	Panchimalco	Xoxoutla, 15	Jojutla de Juárez
Huiçilapã, 1	Huitzilac	Yztla, 11	Puente de Ixtla
Miacatla, 5	[No change]		

Three towns remain to be located: Molotla, Ocpayucã, and Yztepec.

[1] Bernal Díaz (*Historia verdadera de la conquista de la Nueva España* [1904], II: 40) speaks of the "pueblo que se dize Coadlabaca [!] e comundmente corronpemos agora aquel bocable y le llamamos Cuernavaca."

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

651

FOOD

[262] 4 wooden bins, 1 each of maize, beans, chian, and huauhtli*

OTHER GOODS

[323 2,000 pottery bowls**
289] 8,000 reams of native paper**

651 *Tribute of the component towns.*—Coatlan [del Río], not many
632 decades after the Spanish Conquest, gave its new masters goods which were probably similar to its former tribute. This was still paid by the old calendar system on four of the fiestas, or "cada ochenta dias," as it is expressed. They gave the following:

76 pesos of unrefined gold (*tepuzque*)
2 jars of honey
6 women's skirts
6 women's blouses

and made four "sementeras" of maize."

23. Huaxtepec

SOURCES OF THE MAP

635 The province of Huaxtepec, with twenty-six towns, is represented on
114 the fifth page of the *Matricula* and on folio 24' and 25' of the *Mendocino*. The glyph in the lower right-hand corner of the *Matricula* page has been worn away, but the corresponding one in the *Mendocino* may be seen as "Huiçilan." Every town is identified in roman letters in both manuscripts, and the two versions agree except in details of spelling. This province formed the eastern part of modern Morelos State, and
[128] the present map is based on the "Carta General del Estado de Morelos," of the Comisión Geográfico-Exploradora (1910). Former and present
103 place names are compared below:

MENDOCINO	1910 MAP
Ahuehuepan	[See Remarks on Towns]
Amilçinco, 19	Amilcingo
Anenecuilco, 16	[No change]
Atlatlauca, 5	Atlatlahucan
Ayozochapã, 24	Axochiapan
Coacalco, 4	Oacalco
Huaxtepec, 7	Oaxtepec

* *FNE*, 1: No. 163.

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

Only in the northeast was there any contact with enemy terrain. 635
There Tetela and Hueyapan are described as frontier towns,[a] while 131
memory of conflict with the dwellers of the plateau also persisted in Totolapan and adjacent towns well within the province.[b]

Regional names.—The zone of the towns specified as Xochimilca, together with near-by Atlatlauca, was called Quauhtengo.[c] South of Yacapichtla lay another district referred to as the Tlalnahuac, in which Tlayacac and Tecpaçinco were prominent centers.[d]

TRIBUTE

Tribute of the whole province.—In the *Matricula* we see, and in the 651
Mendocino we read of, the following opulent tribute which flowed to the Triple Alliance from the province of Huaxtepec:

CLOTHING [291]

400 bundles of loincloths**
400 bundles of women's clothing**
1,400 bundles of large mantles of "twisted" cloth**
8,000 bundles of rich little mantles**
46 warriors' costumes with shields (6 being fine pieces)* [714]

FOOD*

4 large wooden cribs (1 each of maize, beans, chian, and huauhtli) [262]

OTHER GOODS**

2,000 polished pottery dishes of various colors 323
8,000 reams of native paper 289

Tribute of the component towns.—Rather curiously, no details are 632
available on the origins of the foregoing tribute, military aid and 651
prisoners alone being mentioned. 727

[a] *PNE*, 6: 286.

[b] Atlatlauca, Totolapan, and Tlayacapan "trayan guerras" with "Chalco, Guexoçingo, Tascala, Cholula; las quales heran sobre sus tierras" (*PNE*, 6: 9). We read in Lehmann, *Die Geschichte der Königreiche von Colhuacan und Mexico* (1938), §§ 1202–1203, how the people of Totolapan accompanied Nezahualpilli in a successful campaign against Huexotzinco in 11. Tochtli, 1490.

[c] "Estan las dichas tres cabezeras asentadas en tierra llana, çercadas de montes y sierras no muy altos: llamase la Probincia Quahutengo, y dixose asi porque los mas de sus subjetos estan poblados en montes, y en la dicha lengua se dize el monte quahutla o quahutengo" (*PNE*, 6: 10).

[d] RHE, 1: 224: "Los pueblos de la tlalnahuac son catorze cabeçeras caen casi todas desta villa [Yacapichtla] á la parte del sur dizen llamarse asi porque es tierra llana y mas caliente questa la una cabeçera dizen que antiguamante no abia mas de dos cabeçeras que heran tequepaçinco y tlayalaque y que los demas heran estançias y asi agora se nombran catorze cabeçeras."

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

651

FOOD

20 loads of cacao* [262]

OTHER GOODS

1,600 bales of cotton* [248]

Tribute of the component towns.—Ytzteyocan and Quauhtochco, 632
fifteen years after the Conquest, were paying their Spanish masters 651
what they doubtless had paid in pre-Hispanic times: cacao and cotton.*

28. Cuetlaxtlan

SOURCES OF THE MAP

Cuetlaxtlan appears on page 25 of the *Matricula* and on folio 49r of the 635
Codex Mendocino. It was the southernmost of the provinces which 114
kept Tlaxcala from salt and the sea. It was in Cuetlaxtlan Province, which lay in south-central Veracruz, that Cortés landed. Of the pre-Hispanic centers, three have been located, mostly by the help of documents. The "Millionth Map" of the American Geographical Society, [128]
sheet "Ciudad de México," has been used as a framework for the present map, with the results given below: 103

MENDOCINO	MILLIONTH MAP
Cuetlaxtlan, 2	Cotaxtla
Mictlanquauhtla, 3	[See Remarks on Towns]
Teoçiocan (?), 1	[See Remarks on Towns]

Three more towns remain to be located: Acozpā, Oxichan, and Tlapanicytlā.

REMARKS ON TOWNS

Cuetlaxtlan was a Mexican presidio in the final native period.* 632

Mictlanquauhtla lay half a league from the mouth of the Río Medellín, according to an unpublished land grant.* [131]

* According to a document published by Dominguez, *Coscomatepec de Bravo: I* (1943), p. 31.

* RHE, 1: 158: "para seguridad de los forçados é quietud desta tierra se dize que tenian los señores mexicanos dos presidios e fortaleças con guarniçion e gente de guerra que heran cotastla ... y el otro hera otopa questá ocho leguas desta ciudad á la banda de norueste." This Otopa is said to have been almost deserted by the time of the sixteenth-century writer.

* Dated April 12, 1575, and preserved in the AGN, Mercedes, 10: 61: "don myn enrriquez &c por la presente en nombre de su mag^d hago m^ced a joan sarmyento vezino de la ciudad de los angeles de un sitio de estancia para ganado menor en termynos del p° de myctlanquautla media legua poco mas o menos de la voca del rrio de medellin dentro de los medanos en vn cerro."

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

632 *Teoçiocan* is called "Teocinyocan" by another native source.[26] It is perhaps an estancia of Zongolica (a), "en tierra fria," called San Juan de Teoyxuacan, two leagues from the cabecera.[27]

NATURE OF THE PROVINCE

175 *Inhabitants and languages.*—Cuetlaxtlan, we are told by a Texcocan
197 chronicler, was conquered by that power,[28] a statement confirmed by the "Relación de Cempoalla."[29] The pre-Hispanic language was Náhuatl.

635 *Provincial borders in 1519.*—Cuetlaxtlan lay between Quauhtochco
131 and Tochtepec, which were on the northwest and on the southeast respectively. Northeastward was the sea, and to the southwest was a doubtful region embracing at least one free city-state of the Mazateca.

TRIBUTE

651 *Tribute of the whole province.*—The tribute of Cuetlaxtlan, in contrast with that of adjacent Quauhtochco, was variegated:

CLOTHING

[291] 400 women's blouses and skirts**
400 small mantles, borders black and white**
400 half-quilted mantles**
400 mantles of 4 brazas each**
400 large white mantles, 4 brazas each**
160 very rich mantles for lords and caciques**
1,200 black-and-white striped mantles**
[714] 2 warriors' costumes with shields*
[317] 1 string of chalchiuites*
400 bunches of quetzal feathers*
[237] 2 lip plugs of crystal, with blue and gold mountings*
[301] 20 lip plugs, light amber, mounted in gold*
1 hair adornment of quetzal feathers*

FOOD

[262] 200 loads of cacao*

Cuetlaxtlan paid cacao and cotton mantles, both white and decorated.[30]

[26] Sahagún, *Historia general de las cosas de Nueva España* (1938), IV: 134.
[27] *PNE*, 5: 230.
[28] Ixtlilxochitl, *Obras históricas* (1892), I: 320 and II: 196.
[29] RHE, 1: 131.
[30] *PNE*, 5: 91 "tributavanle cacao y mantas de algodón blancas e pintadas."

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

province was Náhuatl, but along the southwest both Chinantec and Mazatec were spoken.

Provincial borders in 1519.—To the northwest of Tochtepec Province lay Cuetlaxtlan and its fortress; to the southwest was the doubtful zone of the independent Mazatec. Southward, Coayxtlahuacan and Coyolapan provided another strong link with the Empire, but somewhere along the southeast the province of Tochtepec gave on enemy regions, through which a thin line of fortresses must have led to Xoconochco.

TRIBUTE

Tribute of the whole province.—The wealth of Tochtepec was phenomenal. Of the several lists of tribute which we have, the *Matricula* shows the following items:

CLOTHING

1,600 rich mantles, of the kind the lords and caciques wore**
800 red-and-white striped mantles**
400 women's blouses and skirts**
1 warrior's costume and shield, with a birdlike standard*
1 gold shield*
1 feather standard like a bird's wing—yellow feathers*
1 gold diadem*
1 gold headband, a hand's width and thick as vellum*
2 strings of gold beads*
3 large chalchiuites*
4 strings of chalchiuites*
20 lip plugs of light amber mounted in gold*
20 lip plugs of crystal with blue smalt and gold setting*

FOOD

20 loads of cacao

la mar del Norte hasta otra provincia que se dice Teochtepec [*sic*] que asimismo la ganó y sojuzgó, y puso en ella por su mayordomo y cobrador de tributos (de más de la gente de guarnición que en cada una de ellas dejaba) á Toyectxin, que cobraba en cada un año cuarenta fardos de mantas ricas y viente de unas camisetas asimismo ricamente tejidas de finos colores, que montan ciento y viente piezas: igualmente le sembraban y cultivaban en cada un año una sementera de cacao, que tenía de longitud cuatrocientas medidas y de latitud doscientas, sin más treinta y tres cargas de cacao que se cobraban de tributo, dos mil pelotas de hule y cuatrocientos paños de grana, sin más muchas piezas de plumería, como eran rodelas, penachos y otras divisas que los reyes usaban cuando salían a las guerras, hechas de la plumería rica que llaman quetzali. Esta provincia contenía doce pueblos, asimismo sujetos, y daban de tributo cierta cantidad de amas y criadas para el servicio de palacio."

* Contributed by Ucila. See Tribute of the Component Towns, below.

** Also from Ucila.

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

OTHER GOODS

651 16,000 rubber balls
[314 100 pots of liquidambar
237] 24,000 little bunches of blue, red, and green feathers
4 tufts of green feathers trimmed with yellow ones
80 handfuls of quetzal feathers

[114] Ixtlilxochitl gives another list for the whole province: what it paid to Acolhuacan when it was first subjugated:[40]

CLOTHING

[291] 40 bundles of rich mantles
20 bundles of rich blouses
. . . shields, panaches, etc., of quetzal plumes

FOOD

[262] 33 loads of cacao

OTHER GOODS

[314 2,000 rubber balls
237] 400 measures of cochineal

[357] Personal services were also exacted, he relates.

651 The same chronicler says that twelve pueblos were subject in this
114 province. In a little list inserted without explanation in the annals of Quauhtitlan, Tochtepec and eleven other towns of the province are named, along with these items:

[314] 20 + 10 + 1 (31) loads of cacao
400 [measures] of *achiote*
5 *centzontli* [2,000?] rubber balls[41]

The agreement between the Ixtlilxochitl and Quauhtitlan lists suggests that Ixtlilxochitl had the latter at his disposal.

632 *Tribute of the component towns.*—Even more detailed information
651 may be secured on the tribute of Tochtepec Province.

Chinantlan and its subjects paid gold and cacao.[42]

Tlacotlalpan paid cotton mantles (some bearing painted pictures of

[40] Quoted in n. 36 above.

[41] Lehmann, *Die Geschichte der Königreiche von Colhuacan und Mexico* (1938), p. 311. The twelve towns are Quechollan, Tlacoapan, Chiltepec, Poctlan, Oxitlan, Ichcatlan, Tlequauhtla, Coyatepec, Tzinacanoztoc, Xallapan, Otlatitlan, and Tuchtepec.

[42] *PNE*, 4: 60: "este señor ... rreconoçia a Moteçuma, y el y todos sus pueblos le tributaban oro e cacao."

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

REMARKS ON TOWNS

632 *Xoconochco* has now become Soconusco San Benito.[a] It appears as one
712 of the garrison towns (*Mendocino*, fol. 18′) with two governors, named "2. Quauhtli Tezcacouacatl" and "Atzin Tlilancalqui," according to their glyphs (cf. chap. viii, no. 37).

NATURE OF THE PROVINCE

197 *Inhabitants and languages.*—The Mayence language Mame and Náhuatl were the native languages of Xoconochco Province.

635 *Provincial borders in 1519.*—The province of Xoconochco was one
131 of the terminals of the Empire, and doubtless warred constantly on the east and west. The links which bound Xoconochco Province to the Empire and to remote Tochtepec are not clearly known, but it seems likely that they consisted in isolated fortresses.

TRIBUTE

651 *Tribute of the whole province.*—The tribute of Xoconochco Province comprised the following:

CLOTHING**

[301] 2 lip plugs of light amber, gold setting
2 long strings of chalchiuites

FOOD**

● [262] 200 loads of cacao

OTHER GOODS**

[237] 1,400 bunches of feathers, blue, red, and green
160 whole skins of birds[a]
800 handfuls of yellow parrot feathers
800 handfuls of quetzal feathers
[415] 40 ocelot skins
800 rich tecomates for drinking cacao
[317] 2 brick-sized chunks of clear amber

632 *Tribute of the component towns.*—Xoconochco gave, in the early
651 colonial period, three annual tributes of goldpieces, each tribute being comprised of eight gold disks worth twenty-five pesos apiece.[a]

[a] Nuttall, "Chalchihuitl in Ancient Mexico," *American Anthropologist* (1901), 3: 232.

[a] *PNE*, 1: No. 501: "Dan tres tributos cada año y en cada vno ocho tejuelos de oro de a veynte e cinco pesos cada vno, de ocho quilates: pagando en tostones al Rey."

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

635 Teonochtitlan,[7] Teopantlan,[8] and Ytzucan.[9] Tezozomoc speaks of
175 Coatlalpan as being situated near the Marquesado.[10]

TRIBUTE

651 *Tribute of the whole province.*—Tepeacac and her subject towns paid the following tribute to the Empire:

FOOD

[262] 4 wooden cribs (2 of maize and 2 of beans)[11]

OTHER GOODS

[317] 4,000 loads of lime
[314] 4,000 loads of thick canes
[281] 8,000 loads of canes for arrow shafts
482 800 deerskins
8,000 loads of *acayetl* "performes que usan para la boca"
200 *cacaxtles*[12]

632 *Tribute of the component towns.*—Ahuatlan (a) paid a tribute of
651 cane.[13]

Coatzinco supplied cane, shields made of the same material, spearheads, bows and arrows, and white lime.[14]

[701] Texalucan (b) claimed to have given military service only—the enemies including the distant Coixca.[15]

Çoyatitlanapa (c) paid a tribute of canes, spearheads, white lime, shields made of cane, and wild cotton for padding armor.[16]

[12] *PNE*, 5: 82–83: "Dicen que en tiempo de su ynfidelidad fueron vasallos de Motecçoma y sus pasados, y que le seruian y tributauan rrodelas de canas maçiças que en lengua mexicana llaman otlatl."

[13] *PNE*, 5: 95: "Dicen fueron vasallos de Motecçoma y de los Señores de Mexico, y le seruian con rrodelas de cana maçiça, con canas fuertes, y nauajas para lanças, cal blanca, flecha y arco para pelear."

[14] *PNE*, 5: 86: "Dizen que fueron vasallos de Motecçuma y sus pasados," making war against the "prouinçia de Coyxco y captiuauan gente que lleuavan a Mexico a Motecçuma para que se sacrificasse." For Coixca, see section on Tepequacuilco, p. 17, n. 41.

[15] *PNE*, 5: 90: "En tiempo de su ynfidelidad eran de Motecçuma, señor de Mexico, y sus pasados dauanle de tributo cal blanca, canas maçiças grandes, y nauajas para poner en las lanças, y rrodelas de cana maçiça para pelear, y algodon: algodon siluestre para jacos y coseletes que vestian los hombres de guerra, que todo lo rreferido lleuauan a Mexico."

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

as the "Nómina de Tributos de Tlapa y su senorio al Imperio Mexi- 651
cano" give us unparalleled material for a future study in detail of the 212
tribute of this province. We now have the bookkeeping from both sides, that of the conquerors and that of the conquered. Until the codices are fully published, however, we can only remark the abundant tribute of gold, confirmed by the *Matricula* and reconfirmed by the excavations of Atliztac, which may have been included in the province.[*]

The *Matricula* and *Mendocino* specify: 651

CLOTHING

400 bundles of mantles and women's blouses** [291
402 bundles[*] of little red-striped mantles** 714]
800 bundles of large mantles**
2 warriors' costumes with shields*

OTHER TRIBUTE

10 strips of gold "de quatro de dos en ancho y de largo tres quartos [316
de vara," and the thickness of parchment
20 bowls of gold dust, each bowl of 2 *almoçadas* capacity 415]
800 bowls called tecomates, "the good kind they drink cocoa from"

Tribute of the component towns.—We have testimony regarding 632
the tribute of one town, Ayutla, in both the pre-Hispanic and the 651
early colonial periods. On certain other towns, only information about the latter period is available.

Ayutla and near-by towns joined in giving Moctezuma the following [415
every six moons: a bar of heavy gold, three fingers thick; gourds; deer 291
and tiger skins; fish and cotton.[*] In the mid-sixteenth century it gave 248
40 measures of gold dust and various items of clothing quarterly, as 262]
well as a turkey daily and the services of three Indians in a cacao grove.[*]

[*] Noguera, "Importancia arqueológica del descubrimiento de objetos en Texmelincan, Guerrero," *Boletín del Museo Nacional* (1933), Epoca II, 2: 42–44.

[*] Corrected from the figure of the *Mendocino* commentary, 400.

[*] *PNE*, 4: 260: "era de Motecçuma ... le davan vna vara de oro maçiso de gordor de tres dedos, y 'tecomates' que son como calabaças, y cueros de venado y pescado y algodon y cueros de tiguere, y que todos los dichos pueblos ... le davan este tributo antiguamente cada seys lunas."

[*] *PNE*, 1: No. 28: "dan cada ochenta dias quarenta pesos de oro en polvo y dos mantas de dos braças cada vna, damascadas, y dos cotines grandes y ocho manillas y quatro camisas y quatro naguas y cada dia vna gallina de la tierra y mas tres yndios de servicio en vna huerta de cacao y todos juntos quando es menester la benefician."

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

NATURE OF THE PROVINCE

Inhabitants and languages.—At the time of the Spanish Conquest the 197
predominant language of the province of Coyolapan was Zapotec, though the Zapoteca had lost their political power. Two other groups also inhabited the province.[128] If we draw a line from north to south through Malinaltepec, Etla, Huaxolotitlan, Oaxaca, and Teozapotlan, then west to Totomachapa and Xilotepec, we delineate the western limits of Zapotec. The region beyond this line is Mixtec. In the northern panhandle, the fringe of the area in which Chinantec was spoken was a little south of Coaxomulco (1).[129]

The advanced and dissimilar cultures of the Zapotec and Mixtec, 174
especially in the frontier zone of Oaxaca City, have become known in recent years through the investigations of Dr. Alfonso Caso.[130]

Provincial borders in 1519.—The province of Coyolapan was one 635
of the far corners of the Empire. To the west and south it faced un- 131
friendly Mixtec city-states, chiefly the huge realm dominated by Tototepec de Oaxaca. Eastward lay the Mixe and the "unprotected" Zapoteca. Both of these were uneasy frontiers. In the west and north, [712]
however, lay the strong Empire garrison of Coayxtlahuacan, in the province of the same name.

TRIBUTE

Tribute of the whole province.—Coyolapan and its subject towns paid 651
the following tribute to the Triple Alliance:

CLOTHING**

400 bundles of richly worked mantles [291]
800 bundles of large mantles

FOOD*

4 wooden cribs (2 of maize, 1 of beans, and 1 of chian) [562]

OTHER GOODS*

20 gold disks, the size of an average plate and as thick as one's forefinger [316]
20 bags of cochineal [257]

[128] Chatino, the tongue of the Zenzontepec region, may be classified with Zapotec.

[129] García Granados, "Contribución para la geografía etnográfica y lingüística de Oaxaca," *Boletín de la Sociedad Mexicana de Geografía y Estadística* (1934).

[130] In addition to various monographs, Dr. Caso has also written a good summary in his *Las culturas mixteca y zapoteca* (1939).

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

651

CLOTHING

80 Huaxtec warriors' costumes, together with shields* [291]
800 bundles of wide mantles (quarterly) 714

FOOD (quarterly)

40 baskets of cacao ground with maize [262]
40 baskets of chian pinolli

OTHER TRIBUTE

Perpetual repair of the *teocalli* of Huitznahuac' [358]

38. PETLACALCO

SOURCES OF THE MAP

On the verso side of the American Philosophical Society leaf (2A) of 635
the *Matricula* and on folio 20' and 20' of the *Codex Mendocino* the 114
tributary province of Petlacalco is represented. Just as Çitlaltepec 131
and Tlatelolco included the northern lakes, so this province included
the Lake of Chalco and its southern shore—the Pedregal. The tribute-
gathering center lay in the zone of once powerful Azcapotzalco. On [128]
the 1: 100,000 map "Valle de México" of the Secretaría de Agricultura 103
y Fomento (1937) we find a number of the towns of this province:

MENDOCINO	1937 MAP
Auchpanco	Ayapango
Cocotlan, 15	[No change]
Colhuacacinco	[See Remarks on Towns]
Cuitlahuac, 11	Tlahuac
Huiçilopochco, 9	Churubusco
Mizquic, 14	[No change]
Olac, 12	[See Remarks on Towns]
Petlacalcatl, 8	[See Remarks on Towns]
Tecalco	[No change]
Tecoloapan, 7	
Tepopulan, 16	[No change]
Tezcacoac	[See Remarks on Towns]
Tzapotitlan, 10	Zapotitlan
Xico, 13	[No change]

The list of missing towns, however, is extensive:

Acapan	Tlaçoxiuhco
Nextitlan	Toyac
Tepechpan	Xazalpan
Tequemecan	Yopico

* San Juan Huitznahuac, jurisdiction of Azcapotzalco, D.F. (?).

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

NATURE OF THE PROVINCE

Inhabitants and languages.—The northern part of this province was 101
the heart of the Tepanec zone. The Tepanec tribe is assumed—with 197
little proof—to have been Náhuatl-speaking. To the south were two other conquered tribes of better-known affiliation, the Chalca and Xochimilca, mutually related.

Provincial borders in 1519.—South of Petlacalco lay the sterile lava 635
flows which separated it from the province of Chalco (Chalco-Tlal- 131
manalco, not Chalco-Atenco), a province curving down through the mountain passes to Tepoztlan. To the west was the province of Quahuacan, and to the north Quauhtitlan, both at one time Tepanec strongholds. Eastward lay the lake provinces of Çitlaltepec and Tlatelolco.

Regional names.—At least the zone around Petlacalco itself be- 635
longed to the former Tepanecapan—the Tepanec area subject (until 1428) to Azcapotzalco.

TRIBUTE

Tribute of the whole province.—The following materials were col 651
lected by the tribute gatherers to Petlacalco:

CLOTHING*

65 warriors' costumes with shields
2,400 loads of mantles of "twisted" cloth [291
800 loads of colored mantles 714]
400 loads of loincloths
400 loads of women's clothing

FOOD*

1 bin of beans
1 bin of chian [262]
2 bins of huauhtli

[p. 134 is blank]

10:Deevey N-4 (no date)1957 NU7 Aztec NU7

127 226 and spearing. It is not certain that the rod-and-line method involved fishhooks, for these are not known archaeologically from the Valley, but the line may have carried a gorge instead of a hook, and in any case *golden* fishhooks were found in use in 1518 by Grijalva on the island of Cozumel. The types of nets used are the gill net, the pole net, and possibly the throw-net; the latter was used for rabbits but may not have been used for fish. Spearing is of particular interest to ethnologists, because Mexico is one of the few places in the world where the atlatl is still in use. This fact was discovered on Lake Pátzcuaro by Seler in 1892 and on Texcoco by Beyer in 1925.

127 223 Water birds are mainly hunted in the fall and winter, when migrants swell their numbers. On Pátzcuaro the Tarascans surround them with canoes and kill them with tridentiform atlatls, as described by León (1934) and Foster (1948), but in the shallower lakes of the Valley the birds are caught in long nets stretched just above the water. This practice is fully depicted in the two 16th-century pictorial sources, and survives today (Linné, 1940).

127 262 Exploitation of the Valley lakes for animal food was not restricted to fishing and fowling. If it had been, we should have no reason to impute any special limnologic knowledge to the Aztecs, but the use they made of their lacustrine environment goes far beyond that of the usual "primitive" society. In addition to tadpoles and frogs, and the axolotl, of which Sahagún says "es muy bueno de comer; es comida de los señores", the historian lists a number of invertebrate foods in Chapter 3. These items of diet have bewildered most subsequent writers, and without a thorough ethnographic survey it is impossible to be sure that the following remarks are not compounding the confusion. However, there are certain points that a limnologist finds obvious and that have been missed by all the authorities. In discussing the invertebrates we rely not only on Sahagún and the relevant illustrations in Plate I, but on Hernandez' *Historiae animalium et mineralium Novae Hispaniae liber unicus,* written in the 1570's and appended to the 1651 Rome edition of the great work on Mexican medical botany.[2]

127 [2] Mrs. Emmart, in her edition of the de la Cruz-Badianus herbal (1940), remarked that the five copies of Hernandez' work that she was able to collate are all of different editions, though all bear the year 1651. Presumably these all have the title *Rerum medicarum Novae Hispaniae Thesaurus,* but the copy in the Yale University Library, also imprinted 1651, is entitled *Nova plantarum, animalium et mineralium Mexicanorum Historia.* In any case this is a very incomplete version of what must be the greatest work on Mexican natural history ever written. Hernandez' Latin work ran to 15 or 17 volumes, and is believed to have been destroyed in the fire at the Escorial in 1671. George Kubler informs me, however, that a Nahuatl translation was made by 1576, and this or a copy of the original may yet come to light.

10:Deevey N-4 (no date)1957 NU7 Aztec NU7

The most famous of the edible invertebrates is the *axayácatl,* referred to as *axaxayácatl* by Sahagún and Hernandez. Although modern writers (Vaillant, 1941; Apenes, 1943; Linné, 1948; Anderson and Dibble, 1954) persist in calling these insects flies, it has been known for more than a century that they are corixid waterbugs. Sahagún's Spanish word was *coquillo,* not *mosco* or *mosquillo,* so the confusion is not his fault. In post-Conquest times the dried adult insects have been widely sold in the markets of the world as food for caged birds, but they were also used as human food; Hernandez says that they were cooked in maize leaves in nitrous water. Hernandez also makes it clear that these insects are the source of *ahuautli,* a cake made from the eggs that is still much eaten in Mexico, particularly on watch-nights such as Christmas Eve and Holy Thursday. That *ahuautli* was formerly a staple that survives as a delicacy is suggested by its name, which is derived from *atl,* water, and *huautli,* amaranth seed. Now that Sauer (1950) has cleared up some of the indescribable confusion surrounding the use of grain amaranths in aboriginal Mexico, we can begin to appreciate that *ahuautli* was really "water grain", though not in the literal sense of "water wheat" implied by Tylor (1861), whose etymology has confused such later writers as Packard (1871). The identity of the insects is an equally tangled bibliographic problem in which the zoologists have hardly been more helpful than the historians. 127 136 252 262

The fullest and most authoritative-sounding account is that of Orozco y Berra, given in his memoir on the hydrography of the Valley of Mexico (1864). This historian quoted in full de la Llave's description (1832; reprinted 1887) of the adult insect under the name *Ahuautlea mexicana* (which appears to be the correct name, though it has been ignored by zoological writers; it has priority over the generic name *Krisousacorixa* Hungerford 1930 and the specific name *Corixa femorata* Guérin-Meneville 1857). He described the cultivation of *ahuautli,* which is accomplished by placing bundles of *tules* (*Scirpus* or *Typha*) in the water of Lake Texcoco, stripping off the eggs which the insects lay in countless millions, and processing them into cakes. This much of Orozco y Berra's work is correct; it is fully confirmed by the modern observations of Ancona (1933), and, if there is any doubt that the practice is an aboriginal one, the doubt is removed by Sahagún's figures, reproduced in Plate I, nos. 220–221. Professor Hutchinson assures me that no. 220 is certainly the oldest known figure of a corixid waterbug. Oddly enough, Sahagún does not describe the practice or mention *ahuautli* with the edible insects in Book Eleven, though he lists it among the products sold in the market in the 19th chapter of Book Eight. Hernandez repairs the omission. [222]

Ancona's account (1933) is the only one by a modern zoologist, and 127 136

10:Deevey N-4 (no date)1957 NU7 Aztec NU7

127 which the above details are omitted, "yea, and they holde opinion that
136 this skume or fatnesse of the water, is ye cause that such great number
222 of foule cometh to the lake, which in the winter season is infinite."
252

Linné (1948), who considers that the substance was an alga that is
127 no longer used, identifies it with the cakes that Bernal Diaz del Cas-
136 tillo saw being sold in the market at Tlatelolco, and which he described
252 as having a cheeselike flavor (1928 edition, p. 300). It is not im-
● 262 probable that Diaz' cakes were made of corixid eggs, *ahuautli*, and it is conceivable that Sahagún's substance was also, though the reference to purple color makes it unlikely. If purple *Oscillatoria* or *Nostoc* were used as food at the time of Conquest, they are doubtless so used today, but the scene of the harvest may be expected to have shifted with the changing salinity of the Valley lakes and the decline of native salt manufacture.

127 The remaining invertebrates on Sahagún's list have drawn no atten-
tion from historians, and, possibly for that reason, they can be identi-
136 fied with some confidence. The *acocili* is clearly a crayfish, presumably *Cambarellus montezumae* (Saussure), and this is the modern Mexican name for that animal (DeBuen, 1944 a; Villalobos, 1943). Sahagún distinguishes it from the *camarón*, or shrimp (*Macrobrachium* or *Palaemon*), and discusses the latter in another part of the chapter, though without giving its Nahuatl name. Plate I, no. 219, leaves no doubt of the identification. In that figure it is accompanied by a dytiscid beetle larva, and this is presumably the *ocuiliztac*, which are "muy ligeros en el agua". Finally, the *aneneztli*, which "turns into those bugs (*coquillos*) that have four wings and fly, and are called hawks (*gavilanes*) in Castile", is almost certainly a dragon-fly larva (Odonata). No. 222 in Plate I appears to represent the adult.

127 One point should not escape notice, in this melancholy record of confusion: four centuries of scholarship have not sufficed to bring limnologic knowledge of the Valley of Mexico up to the stage attained by the Aztecs and used by them in their daily lives.

127 CHEMISTRY. An inorganic product of the lakes that was also fully
exploited was salt. Ethnographic data on saltmaking have been collected
317 by Apenes (1944), and the importance of salt in aboriginal economy has been extensively discussed by Mendizábal (1929; reprinted in the *Obras Completas*, 1946). The latter author points out that evaporation by artificial heat is a practice introduced by the Aztecs and other high cultures of the highlands, and that the archaic method of solar evaporation survives in those areas less subject to Aztec domination. A standard feature of the more sophisticated method is the separation of silt by settling and filtration from the water to be evaporated, and today

BOOK V.

THE MARCH TO MEXICO.

CHAPTER LXXXII.

How we went to the City of Cholula,[1] and of the great reception which they gave us there.

ONE morning we started on our march to the city of Cholula and we took the greatest possible precautions, for, as I have often said, where we expected to encounter tumults or wars we were much more on the alert.

That day we went on to sleep at a river which runs within a short league of Cholula, where there is now a stone bridge, and there they put up for us some huts and ranchos. This same night the Caciques of Cholula sent some chieftains to bid us welcome to their country, and they brought supplies of poultry and maize bread, and said that in the morning all the Caciques and priests would come out to receive us, and they asked us to forgive their not having come sooner. Cortés told them

[1] Blotted out in the original "On the twelfth day of October in the year fifteen hundred and nineteen."—G. G.

11:Diaz T,H-5 (1519-1520) 1910
NU7 Aztec NU7

721 ever, that they had wished to kill us on the previous night? and why should they turn traitors against us, when all we had said or done was to warn them against certain things of which we had already warned all the towns that we had passed through, namely, that they should not be wicked and sacrifice human beings, nor worship Idols, nor eat the flesh of their neighbours, nor commit unnatural crimes, but that they should live good lives; and to tell them about matters concerning our holy faith, and this without compulsion of any kind. To what purpose then had they quite recently prepared many long and strong poles with collars and cords and placed them in a house near to the Great Temple, and why for the last three days had they been building barricades and digging holes in the streets and raising breastworks on the roofs of the houses, and why had they removed their children and wives and property from the city? Their ill will however had been plainly shown, and they had not been able to hide their treason. They had not even given us food to eat, and as a mockery had brought us firewood and water, and said that there was no maize. He knew well that in the barrancas near by, there were many companies of warriors and many other men ready for war who had joined the companies that night, laying in wait for us, ready to carry out their treacherous plans, thinking that we should pass along that road towards Mexico. So in return for our having come to treat them like brothers and to tell them what Our Lord God and the King have ordained, they wished to kill us and eat our flesh, and had already prepared the pots with salt and peppers and tomatoes. If this was what they wanted it would have been better for them to make war on us in the open field like good and valiant warriors, as did their neighbours the Tlaxcalans. He knew for certain all that had been planned in the city and that they had even promised to their Idol, the patron of warfare, that twenty of

263 262 266

11:Diaz T,H-5 (1519-1520) 1910
NU7 Aztec NU7

to be clean, and they had to enter barefoot with their 643
eyes lowered to the ground, and not to look up in his 644
face. And they made him three obeisances, and said: "Lord, my Lord, my Great Lord," before they came up to him, and then they made their report and with a few words he dismissed them, and on taking leave they did not turn their backs, but kept their faces toward him with their eyes to the ground, and they did not turn their backs until they left the room. I noticed another thing, that when other great chiefs came from distant lands about disputes or business, when they reached the apartments of the Great Montezuma, they had to come barefoot and with poor mantles, and they might not enter directly into the Palace, but had to loiter about a little on one side of the Palace door, for to enter hurriedly was considered to be disrespectful.

For each meal, over thirty different dishes were prepared 643
by his cooks according to their ways and usage, and they 252
placed small pottery brasiers beneath the dishes so that they should not get cold. They prepared more than three hundred plates of the food that Montezuma was going to eat, and more than a thousand for the guard. When he was going to eat, Montezuma would sometimes go out with his chiefs and stewards, and they would point out to him which dish was best, and of what birds and other things it was composed, and as they advised him, so he would eat, but it was not often that he would go out to see the food, and then merely as a pastime.

I have heard it said that they were wont to cook for him 643
the flesh of young boys, but as he had such a variety of 252
dishes, made of so many things, we could not succeed in 262
seeing if they were of human flesh or of other things, for they daily cooked fowls, turkeys, pheasants, native partridges, quail, tame and wild ducks, venison, wild boar, reed birds, pigeons, hares and rabbits, and many sorts of birds and

11:Diaz T,H-5 (1519-1520) 1910
NU7 Aztec NU7

643 other things which are bred in this country, and they
252 are so numerous that I cannot finish naming them in a
●262 hurry; so we had no insight into it, but I know for certain that after our Captain censured the sacrifice of human beings, and the eating of their flesh, he ordered that such food should not be prepared for him thenceforth.

643 Let us cease speaking of this and return to the way
264 things were served to him at meal times. It was in this
[374] way: if it was cold they made up a large fire of live coals of a firewood made from the bark of trees which did not give off any smoke, and the scent of the bark from which the fire was made was very fragrant, and so that it should not give off more heat than he required, they placed in
[353] front of it a sort of screen adorned with figures of idols worked in gold. He was seated on a low stool, soft and
[352] richly worked, and the table, which was also low, was made in the same style as the seats, and on it they placed the table cloths of white cloth and some rather long napkins of the same material. Four very beautiful
[415] cleanly women brought water for his hands in a sort of deep basin which they call "xicales,"[1] and they held others like plates below to catch the water, and they brought him towels. And two other women brought him tortilla bread, and as soon as he began to eat they placed before him a sort of wooden screen painted over with gold, so that no one should watch him eating. Then the four women stood aside, and four great chieftains who were old men came and stood beside them, and with these Montezuma now and then conversed, and asked them questions, and as a great favour he would give to each of these elders a dish of what to him tasted best. They say that these elders were his near relations, and were his counsellors and judges of law suits, and the

[1] Gourds.

11:Diaz T,H-5 (1519-1520) 1910
NU7 Aztec NU7

643 servants and bread makers and cacao makers his expenses must have been very great.

644 Let us cease talking about the expenses and the food for his household and let us speak of the Stewards and the Treasurers and the stores and pantries and of those who had charge of the houses where the maize was stored. I say that there would be so much to write about, each thing by itself, that I should not know where to begin, but we stood astonished at the excellent arrangements and the great abundance of provisions that he had in all, but I must add what I had forgotten, for it is as well to go back and relate it, and that is, that while Montezuma was at 262 643 table eating as I have described, there were waiting on him two other graceful women to bring him tortillas, kneaded with eggs and other sustaining ingredients, and these tortillas were very white, and they were brought on plates covered with clean napkins, and they also brought him another kind of bread, like long balls kneaded with other kinds of sustaining food, and "pan pachol" for so they call it in this country, which is a sort of wafer. There [276 314] were also placed on the table three tubes much painted and gilded, which held *liquidambar* mixed with certain herbs which they call *tabaco*, and when he had finished eating, after they had danced before him and sung and the table was removed, he inhaled the smoke from one of those tubes, but he took very little of it and with that he fell asleep.

644 Let us cease speaking about the service of his table and go back to our story. I remember that at that time his steward was a great Cacique to whom we gave the name of [651 212 289] Tápia, and he kept the accounts of all the revenue that was brought to Montezuma, in his books which were made of paper which they call *Amal*, and he had a great house full of these books. Now we must leave the books and the 344 441 accounts for it is outside our story, and say how Monte-

11:Diaz T,H-5 (1519-1520) 1910
NU7 Aztec NU7

that it contained, and at the good order and control that was maintained, for we had never seen such a thing before. The chieftains who accompanied us acted as guides. Each kind of merchandise was kept by itself and had its fixed place marked out. Let us begin with the dealers in gold, silver, and precious stones, feathers, mantles, and embroidered goods. Then there were other wares consisting of Indian slaves both men and women; and I say that they bring as many of them to that great market for sale as the Portuguese bring negroes from Guinea; and they brought them along tied to long poles, with collars round their necks so that they could not escape, and others they left free. Next there were other traders who sold great pieces of cloth and cotton, and articles of twisted thread, and there were *cacahuateros* who sold cacao. In this way one could see every sort of merchandise that is to be found in the whole of New Spain, placed in arrangement in the same manner as they do in my own country, which is Medina del Campo, where they hold the fairs, where each line of booths has its particular kind of merchandise, and so it is in this great market. There were those who sold cloths of henequen and ropes and the *cotaras*[1] with which they are shod, which are made from the same plant, and sweet cooked roots, and other tubers which they get from this plant, all were kept in one part of the market in the place assigned to them. In another part there were skins of tigers and lions, of otters and jackals, deer and other animals and badgers and mountain cats, some tanned and others untanned, and other classes of merchandise.

Let us go on and speak of those who sold beans and sage and other vegetables and herbs in another part, and to those who sold fowls, cocks with wattles, rabbits, hares,

[1] Sandals.

11:Diaz T,H-5 (1519-1520) 1910
NU7 Aztec NU7

443 deer, mallards, young dogs and other things of that sort
262 in their part of the market, and let us also mention the fruiterers, and the women who sold cooked food, dough
[445] and tripe in their own part of the market; then every sort of pottery made in a thousand different forms from great water jars to little jugs, these also had a place to themselves; then those who sold honey and honey paste and other dainties like nut paste, and those who sold
443 lumber, boards, cradles, beams, blocks and benches, each
[322 854 373] article by itself, and the vendors of *ocote*[1] firewood, and other things of a similar nature. I must furthermore mention, asking your pardon, that they also sold many
[281 364] canoes full of human excrement, and these were kept in the creeks near the market, and this they use to make salt or for tanning skins, for without it they say that they cannot be well prepared. I know well that some gentlemen
[364 514] laugh at this, but I say that it is so, and I may add that on all the roads it is a usual thing to have places made of reeds or straw or grass, so that they may be screened from the passers by, into these they retire when they wish to purge their bowels so that even that filth should not be lost. But why do I waste so many words in recounting what they sell in that great market, for I shall never finish if I tell it all in detail. Paper, which in this country is
[314 289 386 276] called *Amal*, and reeds scented with *liquidambar*, and full of tobacco, and yellow ointments and things of that sort are sold by themselves, and much cochineal is sold under the arcades which are in that great market place, and there are many vendors of herbs and other sorts of trades. There
[693 344] are also buildings where three magistrates sit in judgment, and there are executive officers like *Alguacils* who inspect
[324] the merchandise. I am forgetting those who sell salt, and those who make the stone knives, and how they split them

[1] Pitch-pine for torches

11:Diaz T,H-5 (1519-1520) 1910
NU7 Aztec NU7

 443

off the stone itself; and the fisherwomen and others who [324 sell some small cakes made from a sort of ooze which they 262] get out of the great lake, which curdles, and from this they make a bread having a flavour something like cheese. There are for sale axes of brass and copper and tin, and [325 gourds and gaily painted jars made of wood. I could 415] wish that I had finished telling of all the things which are sold there, but they are so numerous and of such different quality and the great market place with its surrounding arcades was so crowded with people, that one would not have been able to see and inquire about it all in two days.

Then we went to the great Cue, and when we were 436 already approaching its great courts, before leaving the [443] market place itself, there were many more merchants, who, as I was told, brought gold for sale in grains, just as it is taken from the mines. The gold is placed in thin quills of the geese of the country, white quills, so that the gold can be seen through, and according to the length and thickness of the quills they arrange their accounts with one another, how much so many mantles or so many gourds full of cacao were worth, or how many slaves, or whatever other thing they were exchanging.

Now let us leave the great market place, and not look 346 at it again, and arrive at the great courts and walls where the great Cue stands. Before reaching the great Cue there is a great enclosure of courts, it seems to me larger than the plaza of Salamanca, with two walls of masonry surrounding it and the court itself all paved with very smooth great white flagstones. And where there were not these [364] stones it was cemented and burnished and all very clean, so that one could not find any dust or a straw in the whole place.

When we arrived near the great Cue and before we had ascended a single step of it, the Great Montezuma sent

14:Bandelier E-4 (no date)1880 NU7 Aztec NU7

armament.[140] Thus the largest bodies were assembled, furnished 726
with weapons, and organized under their respective leaders of all grades on very short notice, awaiting the signal from the chief commander to sally forth, either by canoes across the lake,[141] or along the causeways, to the mainland. Each warrior carried 726
mostly his own frugal provisions[142] which the women of each 724
household had prepared; "corn-bread, meal-cakes, ground beans, "corn-meal seasoned with pepper;"[143] but special carriers also accompanied the force, loaded with a surplus of food, with robes for tents, reeds for huts and bowers, and with cooking utensils like kettles, pans, baskets; also with mats.[144] Sometimes these

[140] It also happened that an interval of twenty days (a Mexican month) elapsed between the proclamation of war and the final departure. At least, in most cases, a few days were spent in preparations, since the Mexicans had to give time to their outside allies or subjects to prepare, also. Tezozomoc (Cap. XXXVI): "The Mexicans in "the interval prepared the arms in all the quarters,—shields, swords, and made and "finished many rods ('tlatzontectli'), also slings, and pebbles to be thrown with "cords." (Id., Cap. LVII) "Within twenty days they prepared and fitted out all kinds "of arms, first in the five quarters of Mexico-Tenuchtitlan: Moyotlan, Teopan, Ytza-"cualco, Cuepopan, and Tlatilulco, now called Santiago." In many cases, however, an instantaneous mobilization of the whole force became necessary. Mexico, in times of peace, had to be always ready for war. See, also, Tezozomoc (Cap. XXXII, pp. 49 and 50).

[141] Canoes, "acalli" (water-houses, from "ati," water, and "calli," house), were used 505
for the traffic with the main land, but also largely for the carrying of warriors. It is well known what important part they played against the Spaniards during the siege. For the movements of the Mexicans against a hostile tribe, both on land and water, see Durán (Cap. XIV, p. 121), wherein he describes the attack upon Cuitlahuac, both by canoes and on dry land.

[142] Durán (Cap. XLVI, p. 369): "porque demas de lo que los reyes proueyan de sus "grandes trojos y graneros, cada soldado llevaua á questas su particular comida, "todo lo que podia llevar, atada á la carga el espada y la rodela, etc., etc."

[143] The women *prepared* the food, but it also occurred that the *stewards dispensed* it. Tezozomoc (Cap. XXXII, p. 49): "With this the stewards and calpixques of the tribes 262
"gave to their quarters maize for to make biscuit, tlacactutopochtli, pinole, ground "pepper, chian, beans, and all what pertained to it, providing themselves with every-"thing necessary for certain day stated." The "tlaxcaltotopochtli" (from "tlaxcalli," corn-bread, and "totopochtli," burnt-bread) would be biscuit of maize-meal, and it is therefore called "vizcocho." The pinolli, or pinole, corn-meal mixed with pepper, was an important victual. The food of the Mexicans, in general, outside of the meats (exclusively fowl and some game) and aquatic animals, consisted of maize in various forms, and of pepper, "chilli," as seasoning. Cacao furnished their main beverage, and stores of it were taken along. See, also, Durán (Cap. XLVI, p. 369: "maiz tostado "y otro molido y hecho harina, frijol molido, pan bisocochado, tamales mobosos y cura-"dos al sol, grandes fardos de chile, cacao molido hecho en pellas"). They also used maize to compose a beverage called "yolati," which possessed particularly vivifying 272
qualities (See note of Sr. Ramirez to p. 290 of Durán), and which they dispensed even on the battlefield (Durán, Cap. XXXVII; Tezozomoc, Cap. LII).

[144] These carriers are called "tamemes," and are generally regarded as having been 554
slaves. But they probably were outcasts from the bond of kinship, or the men of 558
newly conquered tribes (like Tlatilulco for a time after its capture), upon whom this *degrading* work (*because woman-like!!*) was imposed as a penalty. Slaves were not nu-

527 the Tenime;[9] or those of Tepetlan; or the Chichi-
533 meca; or those of Metztitlan; or the Otomí warriors or of the Quaquata; or the rabbit songs; or songs with two-toned drums, etc.; or women's songs; or those of the girls with the lock of hair at the side of the head. Or perchance only songs of debauchery, or of bragging; or of the sick, or of the cripples; or of the shorn ones; or of vice, etc.

cujcatl, tochcujcatl, teponazcujcatl. Etc. çioacujcatl, atzotzocolcujcatl, auh in anoço çan aujlcujcatl, ixcuecuechcujcatl, cococujcatl, quappitzcujcatl, quatepoquijcujcatl, aujlcujcatl. Etc.

So it was said that verily the [day sign of the]
535 flower was in place.

yc mjtoaia ca nel onjcac in xuchitl.

And then the majordomos gathered together all
292 the ruler's dancing array which he requested, and
527 which he might exhibit; whatever he might desire
643 to dance in, in which he would show himself to the people.

Ioan vncã qujcenquiztiaia, in cacalpixque in jxquich imãcoollatquj tlatoanj, qujtlanenectia, quj-tlãtlattitia, in catle coneleujz, ipan onmjtoriz, ipan ontetlattitiz:

And then he gave devices to the chieftains, the
527 insignia-bearers, the Otomí, the shorn ones, the com-
643 manding generals, the generals, those who struck,
431 encircled, overtook, hemmed in, and spied on the people.

574 as] the vessels to carry, keep, and transport the leavings.[4]

851 Then, for a short time, all sat relaxed, watching; all sat content in the place of lingering, in the banqueting place. But if some were not well satisfied, nor happy, nor content, with the chocolate, the food, the flowers, and the tobacco, etc., they only ran away angry. They quickly arose and sprang to their feet, leaped up, glared in rage at the drink and food, and went about chattering, babbling, jabbering, multiplying it and shouting, doing it in crescendo.[5] Thus oppressed and troubled, they went to seat themselves at their homes and in their houses. And those who had left in such a manner, those who had only become enraged, if they were noted, later, next day, once more they received them[6] and brought them in, consoled them, when it was the time of finishing the food.[7] In their behalf it was celebrated; they were consoled and made joyous.

184. Cf. Tezozómoc (op. cit., p. 77): Yiacatecuhtzin "[illegible] ixtlaxcalan [illegible], que tiene [illegible], é hechiciled, para [illegible] [illegible], y se [illegible], y [illegible] [illegible] de Mexicalzinco" . . .

185. Cf. Sahagún (Libro Kapital, p. 222) citing Mot. Rom. Coll. Mex. B. II [illegible].

186. Book IX of the Historia general deals almost entirely with the activities of the merchants. Chapter VI, entitled De los [illegible] que se hacía a los mercaderes cuando fallaban [illegible] de paz, [illegible] working metals and hands.

187. Sahagún defines calpulli as "[illegible] del barrio, é parentela" (Spanish version).

188. Sahagún defines the tlamanitiani in this manner: "Estos diceban que mantenían a otros mercaderes"—Historia general, Vol. I, p. 218.

189. According to the Spanish version, they were four brothers and a sister of Yiacatecutli. Sahagún (Collected Works, Vol. II, pp. 4, p. 90) recognizes Cuchimatl and Yiacatecutzin as synonyms for Yiacatecutli. "Chicomequitl or Chalmecatzinl is the name of a goddess of water and the earth"; Acxoxouitl is Tezcatlipoca; Nacatl is Quetzalcoatl.

And when they were beheaded, they cast and threw them toward [the figure of] Uitzilopochtli.

And the quail, when their necks were wrung, went fluttering away, thrashing and striking the earth.

And the masters of the youths took them and gathered them up, stripped off the feathers, and roasted and salted them, seasoning them with salt.

Some they laid aside for Moctezuma, and the rest they assigned to his chiefs, only to the princes. And also to the masters of the youths, who marched in front, and also those [who were] priests.

And all took their large braziers—not their polished braziers. In them were coals and shavings of wood. They heaped it up, raised it, and made a hearth, and fired it with pine branches. And it burned exceedingly.

And they took white incense and coarse incense.[16] And when it was the proper time to offer incense, they laid coals in the incense burner and on it cast the white incense, and raised it as an offering to Uitzilopochtli.

Thus they offered him fire, they incensed him, not only here in the great temple but in their houses, and the tribal temples. Incense was offered all the gods whom they acknowledged.

And after they had dedicated the fire [and incense to the gods], then they cast the coals into the hearth [in the courtyard].

And the young women had painted their faces and were arrayed in red feathers.

And they fastened their sacrificial paper banners to canes. [The banners] were painted in black in what was called a scroll design.

And the rich [women and girls had] narrow cotton blankets thus fastened [to canes], likewise similarly painted with a scroll design.

And two masters of youths, with black paint spread on their faces, stood above and before the round fire vessel. Occupying the leading position, they carried on their backs pine wood cages with small paper banners; they carried them with tump lines which passed only across the chest.

They caused the women to begin the dance; they danced leaping, dancing in the fashion of women. And the women were in the middle, holding their sacrificial banners in both hands. They danced and

635 and its fellow Cuitlatec of the west, but we have seen that "eran de
632 Moteçuma," being, indeed, a link with the uttermost western hinter-
131 land, the provice of Çihuatlan.

Tlacotepec warred with southern neighbors on the coast,[*] among them Tecpan—this latter, presumably, ceasing to be an enemy when it was subjugated to form part of the province of Çihuatlan.

Zompanco and Chilapan were strong-points on the Yope frontier.[*]

Just south of Chilapa lies Quecholtenanco, a garrison town whose
[712] glyph is in both the *Matricula* and the *Mendocino* (fol. 17') accompanied by the head of one "Mixcoatl, tlacatectli governador."

Regional names.—The whole eastern part of this former province was known as Coixcatlalpan,[*] "que quiere decir Tierra de Lagartijas porque ay muchas."[*]

651 TRIBUTE

Tribute of the whole province.—The original *Matricula* and the *Mendocino* copy specify the following tribute:

CLOTHING

[291] 402 bundles[*] of mantles *colchadas*[**]
402 bundles of mantles striped black and white[**]
400 bundles of rich mantles (the drawing is of a Tlaloc-head decoration)[**]
400 bundles of women's skirts and blouses[**]
400 bundles of little white mantles[**]
1,600 bundles of large mantles[**]
[714] 22 warriors' costumes (20 of the common "Huaxteca" armor and 2 special pieces: one Tiger Knight and one with *quetzalpatzactli* headdress)[*]

FOOD

[262] 4 *troxes* (wooden cribs), 1 each of maize, beans, *huauhtli*, and *chian*[*]
[263] 200 little jars of honey (quarterly)

[*] *PNE*, 6: 124: "usyan gerri con los de la costa, que era los pueblos de Tequepa, Acamalutla, Temazcaltepec y otros pueblos." Tequepa (*PNE*, 1: No. 904) "parte terminos con Nuzco," hence is the present Tecpan.

[*] *PNE*, 6: 318 and 5: 178. On the Yope, see Ortega, "Extensión y límites de la Provincia de los Yopes ...," *El México Antiguo* (1940), 5: 48–53.

[*] *PNE*, 5: 249.

[*] *Relación de Iguala* (1931), p. 221.

[**] The figures for this and the following item are corrected from the erroneous 400 of the *Mendocino* annotation.

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

NATURE OF THE PROVINCE

191 101 *Inhabitants and languages.*—The aborigines of the west of this province spoke "Chontal de Guerrero,"[a] a language which is commemorated in the place name Chontalcoatlan.[b] This little-known tongue is distinguished from Mexican, Matlatzinca, Mazatec, and Tarascan, all of which were spoken in the province,[c] and was still current in the late sixteenth century in Coatepec, Chontalcoatlan, and Teticpac,[d] as well as in towns of the adjacent province to the south.

131 635 *Provincial borders in 1519.*—Tlachco Province was a part of the Tarascan frontier. To its south lay the hot-country province of Tepequacuilco, and to its north, Ocuilan, both of these also western frontiers. On the east was opulent Quauhnahuac.

TRIBUTE

651 *Tribute of the whole province.*—It is clear from the *Matrícula* that the rich silver mines of later fame were ignored by the Culhua Mexica. Tlachco was a second-rate province, as we see by the list of goods remitted:

CLOTHING

[291] 400 bundles of little cotton mantles, richly worked**
400 bundles of women's clothing**
[248] 1,206 bundles* of little mantles of soft henequen**
[114] 2 warriors' costumes (a *Huasteca* and a *quetzaltzitzimitl*)*

FOOD

[263] 2 wooden cribs, one of maize, the other of chian*
[263] 200 little jars of honey (quarterly)

OTHER GOODS (quarterly)

[323] 1,200 yellow pottery bowls
[319] 400 little baskets of copal for incense-burners
8,000 pellets of unrefined copal wrapped in palm leaves

651 632 *Tribute of the component towns.*—Tlachco itself is the only town for which itemized tribute data are available. It remitted men's cotton mantles (measurements are given) and women's skirts and blouses,

197 but their language is different. They used to practice curses and sorcery
[708] very much." The Ocuiltec language is said by Ingeniero Weitlaner,
101 who rediscovered it, to be related to Matlatzinca and Otomí,[m] spoken near by. Although the Ocuiltec language is supposed to be limited today to the village of Ocuilan and its environs, the writer has found a mysterious reference to it in a sixteenth-century document from the north of modern Hidalgo State.[n]

635 *Provincial borders in 1519.*—In the final native period the province
131 of Ocuilan, approximating a half-moon resting on its back, was bordered on the northwest by Tuluca, and on the northeast by Quahuacan and the Valley of Mexico. To the east lay Quauhnahuac, and to the south the small province of Malinalco and more sizable Tlachco. Ocuilan thrust out westward into the enemy lands of the Tarascans; Temazcaltepec and Zoltepec are spoken of as situated on the Tarascan frontier.

TRIBUTE

651 *Tribute of the whole province.*—According to the *Matricula* and *Mendocino* pages, Ocuilan gave the following tribute:

CLOTHING

[291] 800 bundles of richly decorated little mantles of henequen**
[248] 400 bundles of little cotton mantles decorated with sea shells**
400 bundles of little cotton mantles**
[714] 21 warriors' costumes with shields (one of the headdresses having the *quetzalpatzactli* form, and the rest Huaxteca)*

FOOD

[262] 4 wooden cribs, 1 each of maize, beans, huauhtli, and chian*
[263] 2,000 vessels of white salt**

632 *Tribute of the component towns.*—Temazcaltepec alone gave mili-
651 tary help (not more than twenty men), two or three bundles of the
[291] above-mentioned mantles of henequen, intoxicating mushrooms (*teo-*
[276] *nacatl*), kindling, and ink made from sap—all this "every time they
[212] were asked."[o] No data are available on the tribute of other component
[137] towns individually.

[m] Weitlaner, "Beitrag zur Sprache der Ocuiltecs," *El México Antiguo* (1939), 4: 297–328.

[n] In Tlachinoltícpac, *FNE*, 3: 130.

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

Provincial borders in 1519.—To the north lay the republic of Metztitlan, whose soldiers fought with Yzmiquilpan. To the east was Hueypuchtla, to the south Atotonilco, and to the west Xilotepec—all Empire provinces.

Regional names.—Many of the towns of the province of Axocopan lay in a region called the Teotlalpan.[a] This term is defined as "tierra de los dioses." The Teotlalpan is a term used far into the sixteenth century, by Alonso de Santa Cruz in his *Geography*, and by others. It does not seem to have been coterminous with the province of Axocopan in the north: Yzmiquilpan is nowhere stated to be inside the Teotlalpan, for example. But documentation is scarce.

TRIBUTE

Tribute of the whole province.—The tribute of Axocopan and the other subjects of this province was as follows:

CLOTHING

800 bundles of rich little mantles**
400 bundles of little mantles with black-and-white border**
800 bundles of little white mantles**
400 bundles of women's skirts and blouses**
42 warriors' costumes with shields*

FOOD**

4 wooden cribs (1 each of maize, beans, chian, and huauhtli)
400 large jars of thick maguey honey

Tribute of the component towns.—Some indication of the way in which this burden was divided among the tributaries appears below.

Atenco is grouped with Mizquiyahuala (*q.v.*).

Axocopan gave shields and spears, henequen mantles, and made nine special milpas for its overlords.[b]

Mizquiyahuala, together with Atenco, paid one turkey every twenty days, as well as henequen mantles: "... estavan sujetos al p[uebl]o de

[a] Axocopan, *PNE*, 6: 14; Mizquiyahuala, *PNE*, 1: No. 347; Tecpatepec, *PNE*, 6: 34; Tencatepec, *PNE*, 6: 32 and 1: No. 546; Tlaxuelilpa, on the other hand, "está ya cosi fuera de la comarca que dizen de la Teotlalpan" (*PNE*, 3: 73).

[b] *PNE*, 6: 14 and *passim*.

[c] To the ruler in México, "dassanle de tributo: rrodelas de nequen [*sic*] y varillas tostadas, mantas de nequen de diferentes laberes; hazianle nueve sementeras de mahiz" (*PNE*, 6: 15).

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

635 *Regional names.*—The cabacera of Hueypuchtla lay within the region known as the Teotlalpan,[*] as did Tequixquiac[**] and the Tezcatepec we have identified as the pre-Hispanic Tezcatepectonco.[**]

TRIBUTE

651 *Tribute of the whole province.*—Hueypuchtla and its subject towns paid the following tribute to the Empire:

CLOTHING

[291 714] 400 little decorated mantles**
400 henequen mantles with black-and-white border**
800 white henequen mantles**
62 warriors' costumes, with shields*

FOOD*

[262 268] 4 wooden cribs (1 each of maize, beans, chian, and huauhtli)
400 jars of thick maguey honey

651 632 *Tribute of the component towns.*—Some of the elements of the tribute listed above may be traced in the relaciones of the sixteenth century.

[286] Hueypuchtla gave game and mantles and weapons, as well as making a special milpa for purposes of tribute. Nets are also mentioned—an unusual item.[*]

Tezcatepec[tonco] provided weapons and game.[**]

[231] Tolnacuchtla gave tribute of game, among which figured live eagles.[**]

---

[*] *PNE*, 3: 48, 6: 26. See discussion of regional names, Axocopan (p. 47) for a definition.

[**] *PNE*, 3: 51.

[**] *PNE*, 6: 32.

[*] *PNE*, 6: 28: "rreconoçian a ... Moctezuma y a sus antecesores, dauanle por tributo, venados, conejos, rredes y vnas mantillas de nequen que son como anjeo de Castilla, y codornyses y cutalas, arcos y flechas, y le hazian vnas sementeras, mahiz, frisoles, calabaças y otras semyllas menudas de esta tierra."

[**] *PNE*, 6: 32: "davanle de tributo venados, conejos, liebres, culebras, arcos, flechas, pellejos de venados."

[**] Live eagles were depicted in the *Matrícula* from two other provinces of the north: Oxitipan and Xilotepec. *PNE*, 6: 25: "davanle de tributo aguilas, codornyces, venados, liebres y conejos."

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

NATURE OF THE PROVINCE

Inhabitants and languages.—According to the Mendizabal-Jiménez Moreno linguistic map, Tlalcoçauhtitlan embraced a diversity of languages. Apart from the predominant Náhuatl, areas of Tlapanec, Matlame, and the unclassified Tuxteca are noted. The province of Tlalcoçauhtitlan was brought into the Empire by Nezahualcoyotl, who placed a governor over it.[**]

Provincial borders in 1519.—West of Tlalcoçauhtitlan lay the province of Tepequacuilco; east of it Quiauhteopan, and to the north Quauhnahuac and Huaxtepec. These were Empire provinces. On the south, however, it gave on obscure and bellicose Yopitzinco.

TRIBUTE

Tribute of the whole province.—The yellow earth which gave its name to the province of Tlalcoçauhtitlan naturally figured in its tribute, which was as follows:

CLOTHING

400 bundles of large mantles**
1 warrior's costume with shield*

FOOD

100 pots of bee honey**

OTHER GOODS

20 dishes of *tecoçahuitl,* "ques un barnyz amarillo con que se enbixavan"[***]

[**] Ixtlilxochitl, *Obras históricas* (1892), II: 198: Nezahualcoyotl "... fué sobre la [provincia] de Tlauhcocauhtitlan y la ganó, en donde puso por su mayordomo á Huitzaltecuh, en donde se le daban de tributo y reconocimiento en cada un año diez y seis bateas de color y veinte cargas de copal, doscientas sesenta y ocho jícaras y tecomates finos, y veinte cargas de varas de tlacuilol quahuitle." The last item is clarified by Sahagún (*Historia general de las cosas de Nueva España* [1938], III: 222): "Hay unos árboles silvestres que se llaman tacuiloquauitl, que quiere decir que tiene madera pintada, porque ellos son bermejos, y tienen las vetas negras que parecen pinturas sobre el bermejo; es árbol muy preciado, porque de él se hacen teponaztles, tamboriles y vihuelas, y suenan mucho estos instrumentos cuando son de esta madera; y por ser muy pintada y de buen parecer es muy preciada."

[*] Tezozomoc (*Crónica mexicana* [1878], p. 315) includes among the tribute from the Huaxteca "betun amarillo que llaman Tecuezalin y tecozahuitl con que untan y tiñen jicaras, y ablandan manos y piés."

Editorial note (C. O. Sauer): This Náhua word may possibly also signify the yellowish lacquer base, prepared from Coccus insects. The intermediate slopes between the volcanic highlands and the Balsas lowland were and are the chief source of this substance, prized in the aboriginal crafts of central and southern Mexico.

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

NATURE OF THE PROVINCE

Inhabitants and languages.—The Mendizabal-Jiménez Moreno lin- 101
guistic map indicates great linguistic complexity for this province: 197
Náhuatl, Mixtec, Tlapenec, and Matlame.

Olinalan, celebrated for its lacquer-work, probably carried on that [531]
activity in pre-Hispanic times. From adjacent Tlalcoçauhtitlan Province, perhaps only a few kilometers away, "bateas" went as tribute to Texcoco.[a]

Provincial borders in 1519.—Because half the towns of the province 635
cannot be identified on the maps of unexplored Guerrero, the north 131
of this province is a great blank. It bordered, probably, on Huaxtepec Province in that direction, as on the west with Tlalcoçauhtitlan, on the east with Yoaltepec, and on the south with Tlapan, all of them fellow tributaries.

Regional names.—Somewhere in the dubious northeast began the region known as Totollan.[b]

TRIBUTE

Tribute of the whole province.—Quiauhteopan was a rich mining 651
region, as is shown by the following list of its tribute to the highlands:

CLOTHING

400 large mantles** [291]
1 warrior's costume with shield* 714

FOOD

100 jars of bee honey* [263]

OTHER GOODS

40 large copper bells** [326]
80 copper axeheads** 317
1 dish of little turquoises*

Tribute of the component towns.—Olinalan, in the mid-sixteenth 632
century, rendered a sizable quarterly tribute of base gold, cacao, money 651
resulting from the sale of cacao, and sixty little jars of honey (over

[a] See the section on Tlalcoçauhtitlan, above.

[b] *PNE*, 5: 57: "Piaztla ... está en la provincia de los Totoltecas de lengua mexicana diferente de los de la Misteca sujetos a la dotrina de la cabecera de Acatlan." Of the same town, it is said farther on (5: 77): "En este pueblo se habla la lengua mexicana corrupta, porque es de la provincia de Totola."

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

635 131 *Provincial borders in 1519.*—North of Yoaltepec Province lay the Empire province of Tepeacac, and to the east that of Tlachquiauco, but to the south were other Mixtec peoples never subjugated by the Triple Alliance: Tototepec of Oaxaca and her allies. Ayoxochiquilazala was an outpost against these. To the west Tlapan and Quiauhteopan were Empire territory again.

TRIBUTE

651 *Tribute of the whole province.*—The tribute rendered by Yoaltepec was small but choice; it included gold and turquoises. It is listed as follows:

CLOTHING

[291 714] 400 large mantles**
1 warrior's costume with shield*

FOOD

[263] 40 jars of honey**

OTHER TRIBUTE

[316 533] 40 little gold disks, "the size of a Host" and as thick as one's finger*[41]
10 middle-sized turquoise masks (mosaic)*[42]

632 651 *Tribute of the component towns.*—Acatlan gave military supplies and food to the Imperial armies which passed through it and from time to time sent gifts of mantles and rabbitskins to its overlord in Mexico, as well as providing personal services. Certain gifts were received in return.[43]

[712] Ayoxochiquilazala, though a garrison town giving military service, also paid tribute of gold dust.[44]

---

[41] Cooper Clark, in his edition of the *Códice Mendocino* (1: 75), remarks that "it is reasonable to suppose that these gold disks . . . measured about three inches in diameter."

[42] The *Mendocino* commentary considers the turquoise symbol appearing with the masks to represent a separate tribute of turquoises, but this conclusion does not seem justified.

[43] As in Ocelotepec, in the province of Coyolapan, *q.v.*, *PNE*, 5: 55, says that Acatlan "solamente ... daua ... a la jente de guerra que por el pasaba" food and arms from an arsenal there, and " ... enbiauan de quando en quando vn presente al Rey de Mexico, de mantas y pellejos de liebres y de conejos." In the same source are mentioned the services rendered by various lords and their wives in the Imperial court, in eighty-day shifts.

[44] *RMEH*, T. 2, Appendix, pp. 147–148: "acudian con el tributo á monteçuma y le davan oro en polvo y no le acudian con otra cosa porque en este dicho pueblo tenia monteçuma jente de guarniçion aperçebida para las guerras y esta gente mexicana comian y gastavan las gallinas venados conejos y maiz que eran obligados á dar á monteçuma."

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

Piaztla gave salt and wax annually, and aided the Imperial troops passing through the town by supplying them with war clubs, shields, arrows, and food.[a]

Tecomaixtlahuacan was under the rein lightly. It had its own lord and none other, we are told in the sixteenth-century relación, but it chose none the less to send Moctezuma gifts now and again, and tribute is the criterion of the present map.[b]

Ycpatepec acquired certain articles by trade with peoples thirty leagues away and then delivered them to the Mexican tax collectors in Teutla (or Tentla). These articles were green feathers, gold, and chalchiuites.[c]

Yxicayan gave a combination of dwarf peppers and mantles "and nothing else."[d]

33. Tlapan

SOURCES OF THE MAP

The province of Tlapan contained fourteen towns, according to the glyphs of the *Matricula* (p. 17) and the *Mendocino* (fol. 39'). In the *Matricula* only "Tlauhpā" is identified in a later hand; in the *Mendocino*, all towns are. Tlapan Province lay in the eastern extreme of modern Guerrero. Of its fourteen towns, seven have been located on the modern map. The following correspondence between ancient and modern place names has been established, the "Millionth Map" of the American Geographical Society, sheet "Ciudad de México," having served as base.

[a] *PNE*, 5: 78: Piaztla was " ... sujeto al Real Imperio de Mexico y ... en su sujecion llebauan cada año cantidad de sal y sera, de que daban a los Exercitos de Mexico espadas de pedernal, rodelas y flechas y comida quando pasaban por su pueblo a la conquista de lexos [*sic*] provincias, y no le davan en señal de sujecion otro tributo alguno."

[b] *RMEH*, T. 2, Appendix, p. 137: "algunas vezes contribuyan con algunos presentes de piedras etc. desque llaman chalchihuites á montecuma." The codex of this town (published by Schmieder) claims that the people of the town "nunca ... tributaron ni contribuyeron en cosa alguna para los dichos tributos de Mexico, y de todos eran libres y exentos" (Schmieder, *The Settlements of the Tzapotec and Mije Indians* [1930], p. 79).

[c] *PNE*, 4: 161: "solian ser en tiempo de su xentilidad suxetos a Munteçuma ... le davan de tributo cada tantos meses plumas verdes y oro en polvo y algunas piedras verdes de poco momento: estas cosas iban a rrescatar a otras partes fuera deste dicho pueblo, mas de treynta leguas, lo qual entregaban a los capitanes de Munteçuma que tenia puestos para el dicho efeto en Tentla" (or Teutla).

[d] *RMEH*, T. 2, Appendix, p. 152: "acudian con el tributo á monteçuma al cual acudian oño mantas y agi y no con otra cosa."

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

651 Tlapan in the mid-sixteenth century gave 62 pesos, 3 tomines of
632 gold quarterly, 3 loads of honey, 5 pots, and 3 loads of wax in pellets.[71]

[316] Tototepec, likewise about a generation after the Conquest, gave 50
[263] measures of gold dust and certain articles of clothing quarterly, and
[233] daily gave the services of seven Indians, and a chicken to the Calpix-
[146] que.[72] A

34. Tlachquiauco

SOURCES OF THE MAP

635 The province of Tlachquiauco was not large. It contained three
114 principal towns, according to folio 45' of the *Mendocino Codex*, the folio copied from the recto side of a lost leaf (page "22A") which followed Coyolapan and preceded Xoconochco in the original manuscript. Of the three towns of Tlachquiauco Province, one has not
[28] been located, but the other two (lying in northwestern Oaxaca) have been identified as follows on the "Millionth Map" of the American Geographical Society, sheet "Ciudad de México":

[103]

MENDOCINO	MILLIONTH MAP
Achiotlan, 4	S. Miguel Achiutla
Tlachquiauco, 3	Tlaxiaco

The town which has eluded identification is Çapotlan.

Mixtepec (2) and Tlacotepec (1) are added from other sources.

REMARKS ON TOWNS

632 *Mixtepec* was subject to Tlachquiauco in the days when the latter still held out against the Mexica, and presumably fell with it.[73]

Tlacotepec appears in some of the younger Moctezuma's conquests jointly with Ycpatepec (in the province of Yoaltepec).

Tlachquiauco is a name which has suffered considerable corruption, but there is no novelty in the identification of the town.

Çapotlan appears vaguely linked with Etla and Macuilxochic in one source.[74]

---

[71] *PNE*, 1: No. 725: "dan cada ochenta dias sesenta y dos pesos y tres tomines de oro en poluo y tres cargas de miel y çinco xarros y tres cargas de çera en pellas." The statement also includes similar data from near-by towns.

[72] *PNE*, 1: No. 28: "dan cada ochenta dias çinquenta pesos de oro en poluo y çinco naguas y ocho mantillas, y cinco mantas grandes; mas dan siete yndias de seruicio cada dia y una gallina al Calpizque."

[73] *PNE*, 4: 142: "el caçique de tlaxiaco que era a quien estos de mistepeque reconocian por señor tenia guerra con montecuma."

NU7 Aztec NU7

721 ever, that they had wished to kill us on the previous night? and why should they turn traitors against us, when all we had said or done was to warn them against certain things of which we had already warned all the towns that we had passed through, namely, that they should not be wicked and sacrifice human beings, nor worship Idols, nor eat the flesh of their neighbours, nor commit unnatural crimes, but that they should live good lives; and to tell them about matters concerning our holy faith, and this without compulsion of any kind. To what purpose then had they quite recently prepared many long and strong poles with collars and cords and placed them in a house near to the Great Temple, and why for the last three days had they been building barricades and digging holes in the streets and raising breastworks on the roofs of the houses, and why had they removed their children and wives and property from the city? Their ill will however had been plainly shown, and they had not been able to hide their treason. They had not even given us food to eat, and as a mockery had brought us firewood and water, and said that there was no maize. He knew well that in the barrancas near by, there were many companies of warriors and many other men ready for war who had joined the companies that night, laying in wait for us, ready to carry out their treacherous plans, thinking that we should pass along that road towards Mexico. So in return for our having come to treat them like brothers and to tell them what Our Lord God and the King have ordained, they wished to kill us and eat our flesh, and had already prepared the pots with salt and peppers and tomatoes. If this was what they wanted it would have been better for them to make war on us in the open field like good and valiant warriors, as did their neighbours the Tlaxcalans. He knew for certain all that had been planned in the city and that they had even promised to their Idol, the patron of warfare, that twenty of

263 262 266

574 as] the vessels to carry, keep, and transport the leavings.[4]

851 Then, for a short time, all sat relaxed, watching; all sat content in the place of lingering, in the banqueting place. But if some were not well satisfied, nor happy, nor content, with the chocolate, the food, the flowers, and the tobacco, etc., they only ran away angry. They quickly arose and sprang to their feet, leaped up, glared in rage at the drink and food, and went about chattering, babbling, jabbering, multiplying it and shouting, doing it in crescendo.[5] Thus oppressed and troubled, they went to seat themselves at their homes and in their houses. And those who had left in such a manner, those who had only become enraged, if they were noted, later, next day, once more they received them[6] and brought them in, consoled them, when it was the time of finishing the food.[7] In their behalf it was celebrated; they were consoled and made joyous.

fire-serpent earplugs; he carried a cape of yellow paper. Likewise he had conchs and sea-shells. His shield had pieces of turquoise and mirror-stones. He carried the staff with the device for seeing.

Fourteenth Chapter, which talketh of the god named Five Flower (Macuilxochitl) and Flower Prince (Xochipilli).

Equally were they worshipped as gods of the palace folk. When people feasted, if one of us men lay with a woman, or a woman with a man, it was said: "They brought to naught their fasting through sin."

Thereupon [the god] gave them, as merited punishment, hemorrhoids, venereal sickness, boils, and piles.[72]

Therefore they would make vows to him, in order to quiet, remove, or abate the sickness.

And when his feast, which was called the Feast of the Flowers, was celebrated, fast all feasted four days. Some fasted thus: they ate no *chili*, [and ate only] after midday, only once [a day]. Some went at midnight, and drank a gruel called "painted *atoli*," on which small flowers floated. (This was) "the feast of the flowers."

All who ate good things ate them only at midday. And some ate only one thing—*tortillas* of corn not softened by lime,[73] without *chili*; [this] also [they did] at midday.

On the fifth day, which was when the feast was celebrated, a man became the likeness [of the god], arrayed in [his] clothing, in which he danced; they beat the drum and sang for him.

And at midday, quail were sacrificed. All drew blood, passing straws through the tongue; and they laid as offerings in his temple, five *tamales* which they had made for him. These were called [bread for] fasting, [and were] very large. On them stood the flowery arrow.

Some thus offered their offering upon wooden plates, and followed it with five more small *tamales* with a sauce, and others [offered] two cakes made of a dough of amaranth seed and maize—one black, one red,—(instead of offerings of) rubber laid in wooden bowls.

And some [brought] toasted corn, or toasted corn mixed in honey; or S-shaped corn-cakes which were like notched straws or lightning-bolts; [or] butterfly-*tortillas*, *tortillas* of ground corn which had not been softened in lime; cakes made of a dough of amaranth seed and maize, and shaped like shields, arrows, swords, and dolls.

And here, to Mexico, from everywhere, were brought captives, called "tribute-captives," [from] all warlike [places]

73. In corresponding Spanish text: "*pasas asinas.*"

X 796 poles.[13] For four days this was done. Thereupon they came out of the water and all took up their array. Then all returned and went back whence they came, in the same manner in which they had come, sounding shell trumpets and naked, unclothed.

And when they had reached [home] and had gone into their houses, thereupon were thrown down [352] and spread out the white [and green] reed mats throughout the priests' houses.

Thereupon all wrapped and covered themselves [513] with their capes. Then all threw themselves upon the white [and green] reed mats. Cold, they lay frozen, as if dead—sleeping open-eyed, crouched, hunched up. Some just slept open-eyed; some fell into a stupor; some slept only lightly; some dreamed; some cried out in their sleep; some started up, snored, grunted, groaned, whimpered. They lay twisted in their sleep.

After midday they all arose. And when they had risen, then was adorned the fire priest, that he might offer and burn incense. He went everywhere, among all the temples; the old priests went ahead of him.

X 796 And when they had come to offer incense in all ● 264 [the accustomed] places, then food was eaten; food was eaten by each one. All were gathered in a circle, grouped in a ring. Severally, they were offered food, all kinds of sauce. For four days they only dipped into the sauce.

And if anyone mistook his sauce [for another's], then they detained him, they seized him so that he was taken. And when [the food] was eaten, none let fall a drop of the sauce on to the ground. [If] sauce was dropped on the ground, if anyone spilt [even] a little of the sauce, for all this he was detained and was punished.

X 796 And when this was done, when they had eaten, then all went to gather fir branches,[14] or canes—green maize stalks.

And when they had gone forth, when they had gone to pluck them, [the branches or canes] were bound together; they were tied in small bundles. And when they had made bundles of them, when it was time to strew them about, then they dispersed; all ran, hastening, carrying the reeds upon their shoulders.

Quickly they placed them in all the demons' temples.

13. "Pseudo-Alexandre," in Sahagún's Spanish text.
14. Sahagún says: "pues que en ofrenda fueron todo aquello dicho y [illegible] que ellos llamaban [illegible], que es cosa usada por aquel tiempo" (Bustamante ed., Vol. I, p. 211). See also supra, p. 78, n. 3.

Twenty-seventh Chapter, which telleth of the feast and the sacrifices which they made upon the days of the eighth month, which was called Uei tecuilhuitl.[1]

Eighth feast: this [was] the Great Feast of the Lords.

And before the celebration had yet begun, first all fasted. A multitude came together—the poor of Mexico. And those who tilled the fields, at dawn all drank only this [drink of] lime-leaved sage powdered and mixed with water, [which] was mixed in a canoe and sweetened with honey. And it was drunk from a vessel called *tiçapanqui*. Each had a vessel for drinking, from which he drank. Each used his vessel, and some filled their vessels twice. All came and consumed [the drink]; none refrained—children, old women, small boys, small girls, everyone.

And of those who could no longer taste or put mouth and lips to it, some placed it in their [own] vessels and gourds; here they kept what remained to them. And any who came unprovided with a vessel, a plate, or a jar, just carried the maize gruel in their aprons; they carried it away in their aprons. None took [any] without leave; none returned again [to take] *atolli*.

And if any returned again [to take] *atolli* dishonestly, if once more [any] tried to approach [the canoe with *atolli*], then they set upon him with green canes; they whacked him sorely.

And thereafter, when all had drunk, all rested a while, all lay down, forming a circle together. All talked, with much murmuring and rustling, like birds twittering. And others who had saved *atolli* for themselves, later drank it; little by little, they kept giving it to their small children to drink.

And when noon came, when it was time to eat, then once more all sat spread out, in order, arranged in order, all with capes outspread. The small children were taken by the hand; they were borne upon their backs.

And when all sat about, then those girded their loins and bound their hair with reed blades who

1. "Fiesta grande de los Señores," according to Guillay ("Relación breve," p. 301); "der grosse Herrenfest," according to Seler (*Einige Kapitel*, p. 135).

X 796 264 bore [food], who carried [food] in their cloaks, who served at table; [and] the pages. Beginning with the first-comers, he who served at table thus served them X 796 as many *tamales* as they could take in one hand. He 262 gave them perchance *tamales* made of maize treated with lime; or else made with fruit; some [he gave] *tamales* of maize blossoms; or with twisted ends, or sweetened with honey. Of the *tamales*, some had twisted ends and were filled with grains of maize; some took the twisting forms of green beans and were filled with grains of maize.[2]

X 796 264 And they who served [food] looked to the small children, serving them well, with much concern. And some of the table-servers offered *tamales* only to those whom they knew. They offered them to such familiars as their kin or their friends. Twice or thrice they offered them [food].

And none might deceive in taking *tamales*. And any whom they saw trying to take *tamales* dishonestly, such, when they saw him, they punished, strik- [68/ ing him, leaving bloody welts, with a cord made of 283] reeds. What had been given him, they took from him all; they took all his *tamales*, his own which he had set aside, those which had fallen his lot.

And some they did not come to—[those] with whom [the line] broke off, those who came last, at the end, at the tail [of the line], even though they crowded their way forward, going up among the throng. Nothing at all was offered them, for at first there was much crowding and violent forcing, because they feared that with them [the line] might break.

And those with whom [the food supply] ended all wept. They said:

"What shall we do, we who are ill-fated? Evilly hath the feast day come! To what vain end is our ill fortune? Unhappy are our little ones!"

And if they saw that, apart, perchance, [*tamales*] were still being eaten, then they hurried over there. All ran; there they betook themselves; there they jostled them, like clamoring [beggars]. Although [those who ate] came against them and beat and struck their heads, yet they went on breaking in among [the eaters], crowding among them roughly.

X 796 736 And this feasting went on for seven days. And for this reason was this done—purely that the chief might show benevolence to others by giving his bounty to

2. "Ces tamalli *tamaxu* faits avec . . . *tamalli, chaux; tamal, fruit; tamamali, fleur de maïs; yamamalli, copies de maïs, et tamalli, maïs. Les deux autres étaient composés, le premier avec le maïs appelé yamamalli, et le second avec des fleurs (tamali) sèches (amalia).* "Quetzalcoatl and Tlemilcan translation of Sahagún, p. 118, n. 2).

an offering, was richly arrayed and adorned. He bore an eagle claw device upon his back, which was surrounded by quetzal feathers. His holder was of eagle down in which were quetzal feathers. His flint knife was of gold. He carried a rosette on his back, which was made of paper, etc.

A man [priest] carried the mist rattle board upon his shoulder; he rattled it in three places. And when they had come to the place where Xilonen was to die, then the fire priest came to receive her. Before her he set up the rattle board, and rattled it, and with incense went forth to receive her, and cast it toward her.

And then they took her up to the Temple of Cinteotl. First they laid her upon the back [of a priest] —not upon the offering stone, but rather she died upon [a priest's] back. And those who died upon [a priest's] back, they called "those who have backs."

Thereupon she met her fate and [the sacrificing priest] severed her head. When she had [thus] suffered, when he had slain her, then he grasped her heart and planted it in the blue vessel. They who were well experienced knew where they cast it, where they required it.

And then all ate, for the first time, *tortillas* of green maize. For the first time the cane of green corn was o"ered and for the first time chewed, and likewise amaranth greens were newly cooked and once more the sweetness of flowers—the *Caropbyllus* mexicanus and tobacco flowers [—was smelled].

And at the Feast of the Great Lords, there was a dance which was the particular function of the women—old women, young women, mature women, little girls. The maidens, who had looked upon no man, were adorned with feathers and their faces were stained with paint.

Everyone made plain *tamales* and fruit *tamales* for themselves; they offered them as gifts to their gods.

And of the old men and the old women it was the exclusive privilege that they should drink wine. Never did a youth, a maiden, or a priest drink wine.

And if anyone was noted, great pains were taken that he be seized and put in jail, in the granary.[11] They all held council what might be done about it, and whether, perchance, they would punish him. [Evidence] was weighed; all discussed [his crime]. They determined whether [they would] show mercy; and if [they would] not show mercy, he was

11. See Plate 27.

And [the women] who carried [litters] were well and proudly bedight, all in new shirts and skirts, which they had put on them. And their faces were painted and they were arrayed in feathers.

And when the time was favorable that [the victims] should die, thereupon they set down the litters. Then they were brought up [to the top of the pyramid]; they proceeded to leave them there at the [Temple of] Tlaloc. And when they had brought them there and stretched them out upon the offering stone, then the officiating priests and the slayer came to take their places, and thereupon cut open their breasts.

And when [the victims] had suffered, when they had died, then they brought [their bodies] down. And thus they lowered them: they only went rolling them down [the steps], with great care turning them over and over.

And when they had come down with them, then they carried them to the skull rack. And when they had brought them there, then they cut off and severed their heads. There they inserted into their heads [the cross pieces of the rack].

And when they had severed the heads from the bodies, then they took [the bodies] to the tribal temples [whence the victims had been sent]. And next day, at dawn, [took place the ceremony] called "They are dismembered." Thereupon they dismembered the [figures made of] amaranth seed dough. And when [the bodies] were dismembered, then they took them up to the roof tops, there to dry in the sun—to dry stiff and hard. Little by little they kept taking some of it and eating it, and gradually they finished it.

And with the paper array which had been [theirs] they covered the circular mats which they had [used]. And when they had covered them, they hung them from the rafters of the tribal temples. For one year they cared for them; then they threw them down, scattered, in the Mist House. Only the paper vestments they [then] scattered; the circular mats they returned to their homes.

Here ended the feast which was called Tepeilhuitl.

house, going around the fireplace. Then they came out. Then in the lead were those carrying [the gifts] in their arms, quietly going to the tribal temple—the barbed ones following, coming after [the others].

And when they had come to the tribal temple, thereupon the barbed ones danced in the courtyard. And they placed the gifts in the tribal temple. And they placed aside the capes, the breech clouts, the skirts, the shifts. Then first came the hidden guests. [The owners] offered gifts to each of them. And the women stood apart, in line. They also offered gifts to them.

And this was the office of only the merchants, who barbed and purchased [the slaves].

And when those had been completely arrayed who had come together and been given gifts, then they took the victims [that] they might go into the sand.[8] When they reached the [pyramid] temple of the demon, then all climbed up to the temple. When they had come to the top, then they circled about the sacrificial stone, and climbed down [the other] side.

And when they had come down to the ground, when they had reached the earth, then all ran to their tribal temples. And some went slowly. When they entered [the tribal temples], then [the merchants] took from them their paper vestments, and then they were placed upon mats. They served food, or wine, to whoever might wish it. All night they had them keep vigil.

And when midnight arrived, then they ranged them in a row, and cut hair from the crowns of their heads. When they had cut the hair from their heads, then they put it away for themselves (as hath been told in [the account of] Quecholli).

And when this was done, then were eaten [*tamales* of a dough of] amaranth seed; all at the same time, everywhere in the houses of the common folk. None failed to eat the amaranth seed [*tamales*]. And no one broke the amaranth seed [*tamales*] with his hand; they sliced it with [a length of] maguey fiber. And when the amaranth seed [*tamales*] had been eaten, thereupon were taken up the straw mats; they rolled them up and set them, in order, outside the door. Thereupon they lay upon the earth, the cold ground, [on] old capes, or old pieces of maguey fiber cloth, of which they made couches for themselves.

And upon the morrow, when it was still a little dark, then [he who carried the figure of] Paynal

X 796 **Thirty-eighth Chapter, which telleth of the feast which was named Uauhquiltamalqualiztli,[1] which was celebrated after the days of the month named above; and when [it was this feast], they celebrated it to honor him who was their god, whose name was Iztocçauhqui.**

Iscalli and the end of Iscalli are placed verily in the month of January, after eight days, when it was already the eighth day. By custom, it was upon the eighth day. When this [day came], *tamales* stuffed with greens were eaten. In all places they observed [the custom]; everywhere. Nowhere was this not done. In every house, in every village, two [*tamales*] were eaten, when it was the feast of the *tamales* stuffed with greens; all made *tamales* thus stuffed. And all offered [this] food, one to another. In this wise were they given; they were given among themselves—to their companions, to those whom they knew. They were offered not in ill will but in gladness.

[262]

Whoever first cooked her *tamales* stuffed with greens then went to offer it in her tribal temple, to her neighbor, to those who lived in nearby houses. And if her kin lived in distant parts, first she made an offering for them.

X 796 264

And when this was done, when she had offered it everywhere to others, then they [all] sat down to eat their *tamales* stuffed with greens. They were arranged in a circle; they brought—assembled and gathered together—their children, forming family groups.

And first they made an offering to the fire; they offered five *tamales* stuffed with greens before the hearth. These were in a wooden vessel. Then they each set in place and made an offering for their dead, where they lay buried.

And as they ate, they sat burning themselves, sweating with heat. Steam arose [from the *tamales*]. As they ate, they ate with relish, sucking upon it and gulping, sitting panting, and smearing it upon their lips.

X 796 282

And the [corn] husks [in which were wrapped] the *tamales* stuffed with greens [were laid] apart;

1. Huauhquiltamalqualiztli—the eating of *tamales* stuffed with greens. Cf. Anderson and Dibble, op. cit., p. 12, n. 68. Much of the material in this chapter is discussed also in the previous one (Iscalli).

X 796 782 they might not become slothful was this done in the houses.

The Casting of Copal [Incense].

And the casting of *copal* [incense] was thus done, when any weighty words were yet to be said, or a judgment was yet to be uttered: first one cast *copal* [incense] into the fire. [For] whoever was to speak [weighty words], here lay the *copal* in a gourd vessel. Or else the singer, before he was to sing, thus did: first he cast *copal* into the brazier, and then the singer began [to sing].

The Eating [Kissing] of the Earth.

[201 576] The eating [kissing] of the earth was thus done, when men came into any place: everyone kissed the earth, with one finger [touched to the ground and then to the mouth], either before the devil or else in front of the hearth.

[626] And thus was protested, thus was avouched one's word. When one put not much faith in [another's] word, thus he said unto him:

"If what thou sayest is true, do thou kiss the earth."

Whosoever it was then thus kissed the earth, and thus he bore witness to [the truth of] his words.

The [Ceremonial] Casting [of a Libation].

X 796 782 264 And thus was done the casting [of a libation]: When anything was to be eaten, and was not yet eaten, perchance of the food first a very small morsel was cut and cast in front of the hearth. When they had cast it, then they began to eat. No one first cast [before], indeed, libations had been cast in front of the hearth.

The [Ceremonial] Pouring [of a Libation].

X 796 782 273 Thus was done the [ceremonial] pouring [of a libation], when an offering was made [to the god], perchance at the feast of the wine gods: When anyone made new wine, when it [began to] increase, when thus it [began to] sound, they laid it as an offering in a bowl, in front of the hearth; and [they laid it] in small drinking vessels.

643 other things which are bred in this country, and they
252 are so numerous that I cannot finish naming them in a
262 hurry; so we had no insight into it, but I know for certain that after our Captain censured the sacrifice of human beings, and the eating of their flesh, he ordered that such food should not be prepared for him thenceforth.

643 Let us cease speaking of this and return to the way
264 things were served to him at meal times. It was in this
[374] way: if it was cold they made up a large fire of live coals of a firewood made from the bark of trees which did not give off any smoke, and the scent of the bark from which the fire was made was very fragrant, and so that it should not give off more heat than he required, they placed in
[353] front of it a sort of screen adorned with figures of idols
[352] worked in gold. He was seated on a low stool, soft and richly worked, and the table, which was also low, was made in the same style as the seats, and on it they placed the table cloths of white cloth and some rather long napkins of the same material. Four very beautiful
[415] cleanly women brought water for his hands in a sort of deep basin which they call "xicales,"[1] and they held others like plates below to catch the water, and they brought him towels. And two other women brought him tortilla bread, and as soon as he began to eat they placed before him a sort of wooden screen painted over with gold, so that no one should watch him eating. Then the four women stood aside, and four great chieftains who were old men came and stood beside them, and with these Montezuma now and then conversed, and asked them questions, and as a great favour he would give to each of these elders a dish of what to him tasted best. They say that these elders were his near relations, and were his counsellors and judges of law suits, and the

[1] Gourds.

11:Diaz T,H-5 (1519-1520) 1910
NU7 Aztec NU7

dishes and food which Montezuma gave them they ate standing up with much reverence and without looking at his face. He was served on Cholula earthenware either red or black. While he was at his meal the men of his guard who were in the rooms near to that of Montezuma, never dreamed of making any noise or speaking aloud. They brought him fruit of all the different kinds that the land produced, but he ate very little of it. From time to time they brought him, in cup-shaped vessels of pure gold, a certain drink made from cacao which they said he took when he was going to visit his wives, and at the time he took no heed of it, but what I did see was that they brought over fifty great jugs of good cacao frothed up, and he drank of that, and the women served this drink to him with great reverence.

Sometimes at meal-times there were present some very ugly humpbacks, very small of stature and their bodies almost broken in half, who are their jesters, and other Indians, who must have been buffoons, who told him witty sayings, and others who sang and danced, for Montezuma was fond of pleasure and song, and to these he ordered to be given what was left of the food and the jugs of cacao. Then the same four women removed the table cloths, and with much ceremony they brought water for his hands. And Montezuma talked with those four old chieftains about things that interested him, and they took leave of him with the great reverence in which they held him, and he remained to repose.

As soon as the Great Montezuma had dined, all the men of the Guard had their meal and as many more of the other house servants, and it seems to me that they brought out over a thousand dishes of the food of which I have spoken, and then over two thousand jugs of cacao all frothed up, as they make it in Mexico, and a limitless quantity of fruit, so that with his women and female

11:Diaz T,H-5 (1519-1520) 1910
NU7 Aztec NU7

constant guard over him." Montezuma heard the expression, and weighed it in his mind, and when Cortés came to pay his court to him, he heard of it, and was so angry about it, that he had Pedro López, good soldier as he was, flogged in our quarters, and from that time on all the soldiers who came on guard, went through their watch in silence and good manners. However it was not necessary to give orders to many of us who stood guard over him about the civility that we ought to show to this great cacique; he knew each one of us and even knew our names and our characters and he was so kind that to all of us he gave jewels and to some mantles, and handsome Indian women. As I was a young man in those days, whenever I was on guard, or passed in front of him, I doffed my headpiece with the greatest respect, and the page Orteguilla had told him that I had been on two expeditions to discover New Spain before the time of Cortés, so I asked Orteguilla to beg Montezuma to do me the favour of giving me a very pretty Indian woman, and when Montezuma heard this he told them to call me, and he said to me: "Bernal Díaz del Castillo, they tell me that you have quantities of cloth and gold, and I will order them to give you to-day a pretty maid. Treat her very well for she is the daughter of a chieftain, and they will also give you gold and mantles," and I answered him with much reverence, that I kissed his hands for his great favour, and might God our Lord prosper him, and it seems that he asked the page what I had replied to him, and he told him; and Montezuma said to him, "Bernal Díaz seems to me to be a gentleman," for as I have said, he knew all our names, and he told them to give me three small slabs of gold and two loads of mantles.

Let us stop talking of this and tell how of a morning after saying his prayers and making sacrifices to his idols, he took his breakfast, which was a small matter, for he ate

[Sig. Montezuma. — Analysis]

11:Diaz T,H-5 (1519-1520) 1910
NU7 Aztec NU7

512 [264] no meat, only chili peppers,[1] then he was occupied for an hour in hearing suits from many parts brought by Caciques who came to him from distant lands. I have already stated in the chapter that tells about it, the manner in which they came in to do their business and the reverence that they showed to Montezuma, and that at such times he always [693] had in his company twenty elderly men who were his judges to decide cases, and as this has been already noted I will not repeat it. It was then that we found out that from among the many women whom he had as his mistresses, he gave wives to his Captains and to very favourite chieftains, and he even gave some of them to our soldiers, and the one he gave to me was a lady from among them, and her bearing clearly showed it, and she was called Doña Francisca. So Montezuma passed his life, sometimes laughing and sometimes thinking about his imprisonment.

I wish to state here, although it has nothing to do with our story, as some inquisitive persons have asked me just why the soldier mentioned by me, who called Montezuma a dog, and even that not in his presence, was flogged by order of Cortés, (there being so few of us soldiers), so that the Indians should hear about it. I say so [again], that at that time all of us and even Cortés himself, when we appeared before the great Montezuma, paid respect to him by always doffing our headpieces and besides being King of New Spain, his person and his rank entitled him to it, and he was so kind and well mannered that he did honour to us all. In addition to all this, one may well remember that our lives were at stake, and at a word to his vassals, they would have removed him from his prison and made war on us. Observing his bearing and royal generosity, and seeing that he always had with him

16:Bandelier E-4 (no date) 1880 NU7 Aztec NU7

871 These houses of education were under the
868 special direction of experienced men, called therefore "Speakers
875 of the Youth" ("telpuchtlatoca") and "elder brothers" ("teachcanhtin,") in another capacity. They had not only to provide for the physical training of their pupils, but also for their intellectual development, as far as the state of knowledge permitted.[99] Such places of training were called also "the place where I grow" ("nezcaltiloyan"), or "the place where I learn" ("nemachtiloyan.")[100] It is not true that the youth were constrained
871
868 to a permanent, almost monastic residence in such houses; but while there they improved in common certain special plots of land, in all likelihood the so-called "temple-tracts," out of which the daily wants of worship were supplied.[101] In connection with this mode of education, we have to consider here an objection which cannot fail to be raised against our views.

565 It is frequently given out as a fact, that besides the "Houses
871 of the Youth" mentioned, there was a *special* place of education for the children of "*noblemen*" and this is adduced as a proof of

mada (Lib. IX, cap. XII, pp. 185 and 186; Lib. XIII, cap. XXVIII, XXIX and XXX) and others.

[99] "*Art of War*" (pp. 101, 119 and 120). *Mendieta* (Lib. II, cap. XXIV, pp. 124 and 125): "Los otros se criaban como en capitanias, porque en cada barrio, habia un capitan de ellos, llamado telpuchtlato, que quiere decir, guarda ó capitan de los mancebos." *Torquemada* (Lib. IX, cap. XII, p. 185): "y tenian un Rector, que los regia, y governaba, que se llamaba Telpochtlato, que quiere decir, Guarda, ó Caudillo de los Mancebos, el qual Telpochtlato tenia gran cuidado de doctrinarlos, y enseñarles, en buenas costumbres." *Sahagun* (Lib. III, cap. V, p. 289): "y si era ya hombre valiente y diestro, elegianle para regir á todos los mancebos, y para castigarlos, y entonces se llamba Telpuchtlato." (Lib. VIII, cap. XIII, p. 301): "Tambien daban de comer á los que criaban los mancebos que se llaman telpuchtlatoa, . . ." (Cap. XVII, p. 305): "en este lugar se juntaban los maestros de los mancebos que se llamaban tiachcaoan, y telpuchtlatoques . . ." (Also Cap. XXXVIII, p. 331). *Velancurt* (Part II, Trat. III, cap. VI, p. 451): "y un rector que llamaban Telpochtlato, el que habia y gobierna á los mancebos." *Codex Mendoza* (Vol. I of Kingsborough plates 62 and 63).

Sahagun usually calls the "achcauhtli," "alguaziles," or executors of justice. But above we see that he calls the "tiachcaoan," also "masters of the youth." Both names are corruptions of "teachcauhtlin." *Tezozomoc* (Cap. XXXVIII, p. 60) calls the "Achcacauhtin, mayorales de armas y de doctrina y de ejemplo." (Cap. LVII, p. 95): "Tras ellos vinieron los que llaman Achcauhtin, señores de los varrios, y maestros de mancebos." (Cap. LXXI, p. 121): "mayorales y ministros, y los hicieron juntar como escuelas en cada un varrio que llamaban telpochcalli." (Cap. LXXXVIII, p. 134): "Los mancebos iban cada dia á los varrios al egercicio de las armas á la escuela de armas telpochcalco, adonde los enseñaban con valerosos ánimos, y las maneras de combatir." Finally *Clavigero* (Lib. VII, cap. II, p. 492) refers also to the 53d picture of the Mendoza Codex, representing a boy of fifteen years, who is turned over to an "achcauhtli, or officer," to be instructed in the art of war.

[100] *Molina* (*Vocabularia* II, pp. 66 and 73). *P. Ignacio de Paredes* ("*Doctrina Breve sacada del Catecismo Mexicano*," Reprint of 1800).

[101] *Sahagun* (Lib. III, cap. V, p. 289) says that, whereas they slept at home, that is, at the "house of youth," they ate with their families ("aunque comian en sus casas propias").

Sixth Chapter, which telleth of drinking.[5]

As to drinking, there, also was a delusion of the ancients, somewhat like the account of stepping over one.

And in this wise was the account of it: when, perchance, one drank; if one yet a small child drank first, and afterwards one drank who was a little older, already grown, then [the elder] restrained and took the water from the small child. He said to him: "Why dost thou wish to drink first? Thou wilt not grow large, but remain small. Now let thy elder brother drink, for he is already bigger."[6]

Seventh Chapter, which telleth of him who dipped into the cooking pot.

Of this there was also a delusion of the natives, known especially of the men. And in this wise was it known: when, perhaps, men ate, and one only dipped into the cooking pot — not into a sauce dish — then also the mothers and fathers restrained him. They said to him: "Do not dip into the cooking pot; there [in war] thou wilt leave thy captives. If thou goest to war, none wilt thou seize; no one will become thy captive."

Eighth Chapter, which telleth of tamales stuck [to the cooking pot].

Concerning tamales stuck [to the cooking pot] as another deception of the natives, it was said that the men and women would not eat them. It was stated that if the men were to eat them, when they would shoot arrows in warfare, the arrow which was shot would not find its mark. Or perchance therefore they might die, or one's wife would with difficulty bear children.

And just so was it as to a woman. If she were to eat tamales which had stuck [to the cooking pot], she could not bear children. Her child would only adhere to and thus die in her womb. Therefore the mothers sternly forbade them to eat tamales which had stuck [to the cooking pot].

growth in plants by the powers of sympathetic magic. Cere-
[266] monial cannibalism was sometimes practiced, in the belief that the eater can absorb the virtues of the eaten, but this rite cannot be considered a vice. The letting of one's own blood
[785 was another way to ensure divine favor, and people did hor-
304] rible self-penances such as mutilating themselves with knives or drawing through their tongues a string on which were threaded maguey spines. The higher the social position of the individual and the more he consequently knew of ritualistic observance, the more arduously he performed the fasts, penances and tortures imposed by the religion. The priests, therefore, were strongly cognizant of their social responsibility and by the rigor of their own lives strove to ensure the well-being of the tribe.[17] (See Plate 61, bottom right.)

212 The picture writings of the Aztecs take human sacrifice
782 and penance as a matter of course but seldom indicate the quantity of victims. Indeed, only one such manuscript records the monthly ceremonies, and a post-Conquest copy of another reveals a sacrifice of twenty thousand people at the dedication of the enlarged great temple of Mexico.[17] The Spanish accounts and those of the educated Indians agree, but whether Christian piety induced exaggeration, and how much, it is difficult to ascertain at this time and age. The Conquistador who counted thousands of skulls on the skull rack in Tenochtitlan apparently confirms these other statements, which the great humanitarian and Indian lover, Las Casas, discounted in his special pleading for decent treatment of the indigenous population of New Spain.[18]

793 The priesthood, beside performing these bloodcurdling
212 acts, had other more pacific duties; they also instructed youth
[871] in the mysteries of writing and keeping records. Aztec writ-

"And [they brought] vessels, and incense-burners, and jars made of calabashes, spoons for stirring cacao, and stoppers for jars.

When they entered lands with which they were at war, and were among people who were far distant, they became like their enemies in their garments, their hair-dress, their speech,[106] [that they might] mimic the natives.

And if they came to an evil pass, if they were discovered, then they were slain in ambush and served up with chili sauce.[107] [But if] any—even one, even two—escaped alive, [such an one] informed Moctezuma.

This one then gave him a gift, and decked him with his amber lip-plug. He did him honor, singling him out as a valiant warrior, thus making him a man of consequence.

And when those who returned arrived home, when they had come back, when they had reached and had commenced in their land, they feasted all, [especially] the merchants and the principal men, that they might make themselves celebrated.

It was called "the washing of the feet."[108] They paid great honor to the cane, to the walking staff, of Yacatecuti.

In the tribal temple[109] they set it upright. They offered it an offering fire, when they laid a feast. And when they summoned people to a banquet, they always offered it an offering when they ate.

And when they ceremonially bathed and slew a man as a sacrifice,[110] he whom they offered was the likeness of their god, Yacatecuti; or else one of [the following gods], or all of them, whom they worshipped—Chicomquiauitl, or Chalmecacicuel, Acxomocuil, and Nacxitl, Cochimetl, Yacapitzinac.[109] No one determined, [for] it was of their own free will, whether they should offer up one or two men.

They bought them there at the slave market at Azcapotzalco; they served and arranged them, turning them around many times, examining them, buying the good ones—those of good bodies, without blemish, the best men, in good health, sick in no degree, who were marked by no marks on the body.

Such as these they slew on the feast-day, Panquetzaliztli, when the feast of Uitzilopochtli was celebrated.

Thereupon they garbed them in trappings like those of Yacatecuti, which were assigned to them.

And before they slew them, first they let them be seen by the people. It was said: "They now them up [like

104. Cf. Torquemada (op. cit., p. 57): Yxcuahchqui "*proporcionaba vestimentas parecidas, que tenia enemigo, á hablidad, para mejor guarecerse, ó engañar, y lo sabia, y supia (que es propio condicion de Mercaderes) . . .*"

105. Cf. Sahagún (Bierige Español, p. 22) citing *Hist. Rerum. Coth. Mex.* B. II §§1.

106. Book IX of the *Historia general* deals almost entirely with the activities of the merchants. Chapter VI, entitled *De las ceremonias que se hacia a los mercaderes cuando llegaban a su casa, que se tenian tenencias de paz, cuentanos vendiendo cuando and hacia.*

107. Sahagún defines *calpulli* as "*iglesia del barrio, ó parroquia*" (Spanish version).

108. Sahagún defines the ceremony in this manner: "*Estas dichas que mataban a estos cautivos.*"—*Historia general*, Vol. I, p. 213.

109. According to the Spanish version, they worshiped Huitzilopochtli and a stick of Yacatecuti. Sahagún (*Collected Works*, Vol. II, pt. 4, p. 92) recognizes Cuetlaxcoa and Yacapitzinac as synonyms for Yacatecuti, "Chicomquiauitl or Chalmecacicuel is the name of a goddess of water and the earth"; Acxomocuil is Tezcatlipoca; Nacxitl is Quetzalcoatl.

The second month they named Tlacaxipeualiztli. On the first day of this month they celebrated a feast in honor of the god called Totec—[or], as another name, called Xipe—when they slew and flayed many slaves and captives.

Chapter 2
Tlacaxipeualiztli

From the captives whom they were to slay the owners themselves tore off the hair of the crowns of their heads and kept it as a relic. This they did in the tribal temple before the fire.

When the masters of the captives took their slaves to the temple where they were to slay them, they took them by the hair. And when they took them up the steps of the pyramid, some of the captives swooned, and their masters pulled them up and dragged them by the hair to the sacrificial stone where they were to die.

Having brought them to the sacrificial stone, which was a stone of three hands in height, or a little more, and two in width,* or almost, they threw them upon it, on their backs, and five [priests] seized them—two by the legs, two by the arms, and one by the head; and then came the priest who was to kill him. And he struck him with a flint [knife], held in both hands and made in the manner of a large lance head, between the breasts. And into the gash which he made, he thrust his hand and tore from [the victim] his heart; and then he offered it to the sun and cast it into a gourd vessel.

After having torn their hearts from them and poured the blood into a gourd vessel, which the master of the slain man himself received, they started the body rolling down the pyramid steps. It came to rest upon a small square below. There some old men, whom they called Quaquacuiltiz, laid hold of it and carried it to their tribal temple, where they dismembered it and divided it up in order to eat it.

*Actually a palmo is defined as the span between thumb and end of little finger, hand outstretched. In Webster's Dictionary, the Portuguese palmo is 9.64 in.; in the Encyclopædia Britannica (14th ed.), the Spanish palmo is 0.229 m. A handbreadth is estimated as 3-4 in.

20 b los braços, y vno por la cabeça: y venja b 13[3]
luego el sacerdote, que le auja de matar, y dauale con ambas manos, con vna piedra de pedernal: hecha a manera de hierro de lançon por los pechos, y por el agujero que hazia: metia la mano, y arrancauale el coraçon, y luego le ofrecia al sol, echauale en vna xicara.

Despues de auerles sacado el coraçon, y despues de auer echado la sangre en vna xicara: la qual recebia el señor del mjsmo muerto: echauan el cuerpo a rrodar por las gradas abaxo del cu, yua a parar, en vna placeta abaxo: de alli le tomauan, vnos viejos, que llamavan quaquacujlti, y le lleuauã a su calpul: donde le despedaçauan, y le repartian pa comer.

X 796

After they had slain them and torn out their hearts, they took them away gently, rolling them down the steps. When they had reached the bottom, they cut off their heads and inserted a rod through them, and they carried the bodies to the houses which they called *calpulli*, where they divided them up in order to eat them. The papers with which they arrayed the images of the mountains, after they had broken them to pieces in order to eat them, they hung in the tribal temple. Many other ceremonies were performed in this feast, which are set down at length in its account.

[266]

[299]

Despues que las oujeron muerto, y sacados los coraçones: lleuauanlas passito rodando por las gradas abaxo: llegadas abaxo cortauanlas las cabeças, y espetauanlas en vn palo, y los cuerpos lleuauanlos a las casas que llamauan Calpul: donde los repartian para comer: los papeles con que adereçauan las ymagenes de los montes despues de averlas desbaratado para comer, colgauanlos en el Calpul. Otras muchas cerimonjas se hazian en esta fiesta, que estan a la larga puestas en su historia.

like a woman, he went with a man's fortitude; he bore himself like a man; he went speaking in manly fashion; he went exerting himself; he went strong of heart and shouting, not without courage nor stumbling, but honoring and praising his city.

He went with firm heart, speaking as he went: "Already here I come! You will speak of me there in my home land!"

And so they were brought up [the pyramid temple steps] before [the sanctuary of] Uitzilopochtli.

Thereupon they stretched them, one at a time, down on the sacrificial stone; then they delivered them into the hands of six priests, who threw them upon their backs, and cut open their breasts with a wide-bladed flint knife.[8]

And they named the hearts of the captives "precious eagle-cactus fruit." They lifted them up to the sun, the turquoise prince, the soaring eagle.[9] They offered it to him; they nourished him with it.

And when it had been offered, they placed it in the eagle-vessel.[9] And these captives who had died they called "eagle men."[9]

Afterwards they rolled them over; they bounced them down; they came tumbling down head over heels, and end over end, rolling over and over; thus they reached the terrace at the base of the pyramid.[10]

And here they took them up.

And the old men, the *quaquacuilti*, the old men of the tribal temples, carried them there to their tribal temples, where the captor had promised, undertaken, and vowed [to take a captive].

There they took [the slain captive] up, in order to carry him to the house [of the captor], so that they might eat him. There they portioned him out, cutting him to pieces and dividing him up. First of all they reserved for Moctezuma a thigh, and set forth to take it to him.

And [as for] the captor, they there applied the down of birds to his head and gave him gifts. And

6. In *op. cit.*, p. 63, Seler specifies a "*dicker breiter Feuersteinmesser.*" Simeon (*op. cit.*) defines *itzpanaxi* as "*Cuchillo para los sacrificios humanos, hecho como de dos en de l'cabalbrear. . . .*" Fray Toribio de Benavente Motolinía's "Historia de los indios de Nueva España," in *Colección de documentos para la historia de México* (Joaquín García Icazbalceta, ed.; Mexico: Librería de J. M. Andrade, 1858), Vol. I, p. 48, definitely states that the knife was of flint, not obsidian. Motolinía describes it as "*un navajon como hueso de buey, no muchos agudo porque . . . no se puede hacer muy agudo. . . .*"

7. *Quauhtemoqui*: probably *quauhtlemoqui* is meant. This term, and its synonym, *quauhtlemoal*, Seler (*Collected Works*, Vol. II, Pt. 3, p. 142) considers as meaning the sun.

8. Seler consistently renders the term *quauhxicalli* as *Adlerschale* (cf. *Einige Kapitel*, p. 64). In *Collected Works*, Vol. II, Pt. 3, p. 155, he breaks the word down into *quauhtl* and *xicalli* (wooden vessel), and argues that the syllable *quauh* was always understood to mean eagle. The vessels were actually to have been made of stone, and were used not only for the hearts but for the blood as well. Sahagún, on his commonly close labor, uses the term *xicara de madera*.

9. In Lib. II of the *Florentine Codex*, fo. 18 *v.*, Sahagún writes: "*Despues mandaba los compañeros, los llamaban quauhtemoqui*." In *loc. cit.*, Seler translates *quauhtemoqui* as "the one from the eagle-land," the body of the sacrificed victim. The soul went to the house of the sun, the eastern sky, as the sun's image and representative (p. 157).

10. *Apetlac* (cf. Seler, *op. cit.*, Vol. V, p. 9) is a small terrace projecting at the foot of the pyramid stairway. Seler here cites Sahagún, Lib. IX, cap. 14, and Lib. II, caps. 29 and 33.

X 796 he summoned his blood relations, he assembled them, that they might go to eat at the house of him who
● 266 had taken the captive.

[262] And here they cooked each one a bowl of a stew of dried maize, called *tlacatlaolli*, which they set before each, and in each was a piece of the flesh of the captive.

[302] They named [the captor] the sun, white earth, the feather, because [he was] as one whitened with chalk and decked with feathers.

X 796 The pasting on of feathers was done to the captor because he had not died there in the war, but was yet to die, and would pay his debt [in war or by sacrifice]. Hence his blood relations greeted him with tears and encouraged him.

And on the morrow, the gladiatorial sacrifice[11] was made. Until early morning, until dawn, they made them hold vigil, all night, until the night was ended. Thus did the captives, those to be sacrificed, pass the whole night until dawn.

From those whom they would offer as sacrifices, once more they took hair [from the crown of their heads], at midnight.

This was called "the sending upward of the eagle man";[12] because he who died in war went into the presence of [the sun]; he went before and rested in the presence of the sun. That is, he did not go to the land of the dead.

And therefore he who took hair [from the crown of a captive's head] kept his hair safely.

[276] Because thus he attained honors, flowers, tobacco prepared for smoking, and [rich] cloaks.

Thus the captive's valor would not in vain perish; thus he took from the captive his renown.

[340] And he who took the captive was adorned, there at [the Temple of] Tecanman, in Tenochtitlan, with white turkey down, the feathers being pasted upon him, as hath been set forth in [the Feast] of Quauitl eua.

And the place where, arranged in order, the *tototecti* remained, was upon white earth or upon grass; for there was white earth in the place where they waited.[13]

And wherever in the city grass was shaken out, upon it they placed, set forth, and exhibited them—

11. See p. 44, Seler, *in op. cit.*, Vol. II, Pt. 4, p. 71, says, in the discussion of agricultural ceremonies of the ceremony, that "The preparation of the ground and the making it fruitful was represented to the people, who flocked together from all directions, by the 'stretching' ceremonial."
12. See note 9; also Seler (*Einige Kapitel*), p. 65.
13. In the corresponding Spanish, Sahagún states: "*pusieron todos arriadas, sobre unas hojas de heno, o de tipal, o grada ensuelo allí estaban.*"

X 796 no more could he use his hands; no longer defend himself; no longer make himself do anything. No longer did he move; he did not speak. Then, faltering and fainting, he fell upon the surface, tumbling as if dead. He wished that he might stop breathing, that he might suffer [no longer], that he might perish, that he might cast off his burden of death.

And thereupon they quickly took and seized him, pushed him, and dragged him, and raised and stretched him out upon the edge of the round sacrificial stone.

And then, when the Youallauan went [forth], in the guise of Totec, he gashed [the captive's] breast, seized his heart, and raised it as an offering to the sun; and the priests placed it in the eagle vessel. And [413] another man, a priest, carried the [hollow] eagle cane[21] and set it in the breast of the captive, there where the heart had been; he stained it with blood; he submerged it well into the blood. Thereupon he offered [the blood] to the sun. It was said: "Thus he giveth [the sun] to drink."

[415] And the captor thereupon took the blood of his captive into a green bowl with a feathered rim. The sacrificing priests came to pour it there. In it went the hollow cane, which also had feathers. And then the captor departed with it so that he might nourish the demons. He went into and came out of all [shrines]; he omitted none; he forgot not the priests' dwellings in the tribal temples. On the lips of the stone images he placed the blood of his captive, giving them nourishment with the hollow cane. He went in festive attire.[22]

X 796 ● 266 And when he had gone to and reached all the places, then he took the insignia to the palace, and he caused his captive to be taken to the tribal quarters, where they had passed the night in vigil; here he flayed him. Afterwards he had [the flayed body] taken to his house, where they cut it up, that it might be eaten and shared, and, as was said, to bestow as a favor to others.[23] It hath been told elsewhere how this was done.

And the captor might not eat the flesh of his captive. He said: "Shall I, then, eat my own flesh?" For when he took [the captive], he had said: "He is as my beloved son." And the captive had said:

aoctle conmochichioaltia, aocmo oalmocuetzoa, aocmo oalnaoati, çan njman iolmjqui, çotlaoa, chapantiuetzi, momiccatlaça: qujnequj, macuelieh yhiiotl onqujça, macuelieh conjhiiouj, macuelieh ompoliuj, macuelieh conmotlaxili, yn jmjquiztequjuh.

21. "*Va preñado, de cuka hueca*" (corresponding Spanish text).
22. "*Vna compuesto con sus plumages, y cõ todos sus ornat*" (*ibid.*).
23. *Tenenkalos*: Seler (*Ewige Kapitel*, p. 72, n. 1) holds, of *tenkaloloz*, that it is derived from *tenti*, equivalent to *tenalia*; and is equivalent to *tenamitl* or *tenalli*. Hence the meaning, to apportion as a favor.

"He is as my beloved father." And yet he might eat of someone else's captive.

And the captor kept the [captive's] skin for himself; he lent it to others. For twenty days the skin was carried by one person and another, worn for the entire feast. He who wore it gave everything given him, all that he had collected, to the captor. Afterwards [the captor] divided up [the gifts] among [all of] them. Thus he made use of his skin.

And when this was done, when they had finished with the gladiatorial sacrifice victims, then there was a dance and a procession about the round sacrificial stone, by all the impersonators [of the gods] and those who had fought the victims, all going ceremonially arrayed. In this way did they who did the slaying end [the ceremony]. All severally took with them the head of a captive, a sacrificial victim, and therewith danced. This was called "the dance with severed heads."

And the old wolf man grasped the rope [which had fastened the captives to the offering-stone] and raised it [as an offering] to the four directions. He went weeping and howling, like one bereaved; he wept for those who had suffered and died.

And also from the warring cities, from beyond [the mountains], those with whom there was war, were summoned, in secret, and came within, in secret, as Moctezumà's guests, the Nonoalca, the Cozcateca, the Cempoalteca, the Mecateca. [These ceremonies] were shown to them, and they were confounded. For thus they were undone and disunited.[24]

And when this feast was celebrated, it was when *tortillas* of uncooked maize were eaten.[25] Those who witnessed the ceremony carried *tortillas* of uncooked maize with them, when they went to look on, and they were eaten there.

And upon the next day, the third day of the feast, then began the bringing out [of the skins]. It was very late at night that it began at the great palace. The Tlatelulca began it, and ended it at the time of eating. These the priests replaced, adorned and dancing in a variety of different arrays, with butterfly nets and fish banners; with clusters of ears of

us around him, and three chieftains and two priests came at once, and they said—" Malinche, forgive us for not coming to Tlaxcala to see you and to bring food, it was not for want of good will but because Mase Escasi and Xicotenga and all Tlaxcala are our enemies, and have said many evil things of us and of the Great Montezuma our Prince, and as though what they said were not enough, they now have the boldness, under your protection, to come armed into our city, and we beg you as a favour to order them to return to their own country, or at least to stay outside in the fields and not to enter our city in such a manner." But as for us they said that we were very welcome. 648

As our Captain saw that what they said was reasonable, he at once sent Pedro de Alvarado and Cristóbal de Olid, the Quartermaster, to ask the Tlaxcalans to put up their huts and ranchos there in the fields, and not to enter the city with us, excepting those who were carrying the cannon, and our friends from Cempoala, and he told them to explain to the Tlaxcalans that the reason why he asked them to do so was that all the Caciques and priests were afraid of them, and that when we left Cholula on our way to Mexico we would send to summon them, and that they were not to be annoyed at what he was doing. When the people of Cholula knew what Cortés had done, they appeared to be much more at ease.

Then Cortés began to make a speech to them, saying that our Lord and King, whose vassals we were, had very great power and held beneath his sway many great princes and Caciques, and that he had sent us to these countries to give them warning, and command them not to worship Idols, nor sacrifice human beings, or eat their flesh, or practice sodomy or other uncleanness, and as the road to Mexico, whither we were going to speak with the Great Montezuma, passed by there, and there was no other shorter road, we had come to visit their city and to treat 648 797 [782 266] [838]

721 ever, that they had wished to kill us on the previous night? and why should they turn traitors against us, when all we had said or done was to warn them against certain things of which we had already warned all the towns that we had passed through, namely, that they should not be wicked and sacrifice human beings, nor worship Idols, nor eat the flesh of their neighbours, nor commit unnatural crimes, but that they should live good lives; and to tell them about matters concerning our holy faith, and this without compulsion of any kind. To what purpose then had they quite recently prepared many long and strong poles with collars and cords and placed them in a house near to the Great Temple, and why for the last three days had they been building barricades and digging holes in the streets and raising breastworks on the roofs of the houses, and why had they removed their children and wives and property from the city? Their ill will however had been plainly shown, and they had not been able to hide their treason. They had not even given us food to eat, and as a mockery had brought us firewood and water, and said that there was no maize. He knew well that in the barrancas near by, there were many companies of warriors and many other men ready for war who had joined the companies that night, laying in wait for us, ready to carry out their treacherous plans, thinking that we should pass along that road towards Mexico. So in return for our having come to treat them like brothers and to tell them what Our Lord God and the King have ordained, they wished to kill us and eat our flesh, and had already prepared the pots with salt and peppers and tomatoes. If this was what they wanted it would have been better for them to make war on us in the open field like good and valiant warriors, as did their neighbours the Tlaxcalans. He knew for certain all that had been planned in the city and that they had even promised to their Idol, the patron of warfare, that twenty of

648 reputation for valour before, (for they had heard of the wars at Potonchan and Tabasco, of Cingapacinga and Tlaxcala, and they called us Teules, which is to call us gods or evil things), from now on they took us for sorcerers, and said that no evil that was planned against us could be so hidden from us that it did not come to our knowledge, and on this account they showed us good will.

346 782 266 I think that the curious reader must be already satiated hearing this story about Cholula and I wish that I had finished writing about it, but I cannot avoid calling to mind the prisons of thick wooden beams which we found in the city, which were full of Indians and boys being fattened so that they could be sacrificed and their flesh eaten. We broke open all these prisons, and Cortés ordered all the Indian prisoners that were confined within them to return to their native countries, and with threats he ordered the Caciques and captains and priests of the city not to imprison any more Indians in that way, and not to eat human flesh. They promised not to do so, but what use were such promises? as they never kept them.

797 Let us anticipate and say that these were the great cruelties that the Bishop of Chiapas, Fray Bartolomé de las [114] Casas, wrote about and never ceased talking about, asserting that for no reason whatever, or only for our pastime and because we wanted to, we inflicted that punishment, and he even says it so artfully in his book that he would make those believe, who neither saw it themselves, nor know about it, that these and other cruelties about which he writes were true (as he states them) while it is altogether the reverse of true.[1] It did not happen as he describes it. Let the monks of the order of Santo Domingo see what they can read in the book in which he has written it, and

231 136 *Quezales*, and there are other birds which have feathers of five colours—green, red, white, yellow and blue; I don't remember what they are called; then there were parrots of many different colours, and there are so many of them that I forget their names, not to mention the beautifully marked ducks and other larger ones like them. From all these birds they plucked the feathers when the time was right to do so, and the feathers grew again. All the birds that I have spoken about breed in these houses, and in the setting season certain Indian men and women who look after the birds, place the eggs under them and clean the nests and feed them, so that each kind of bird has its proper food. In this house that I have spoken of there is a great tank of fresh water and in it there are other sorts of birds with long stilted legs, with body, wings and tail all red; I don't know their names, but in the Island of Cuba they are called *Ypiris*, and there are others something like them, and there are also in that tank many other kinds of birds which always live in the water.

[346] Let us leave this and go on to another great house, where they keep many Idols, and they say that they are their fierce gods, and with them many kinds of carnivorous beasts of prey, tigers and two kinds of lions, and animals something like wolves which in this country they call jackals and foxes, and other smaller carnivorous animals, and all these carnivores they feed with flesh, and the greater number of them breed in the house. They give 782 them as food deer and fowls, dogs and other things which they are used to hunt, and I have heard it said that they feed them on the bodies of the Indians who have been sacrificed. It is in this way: you have already heard me say that when they sacrifice a wretched Indian they saw open the chest with stone knives and hasten to tear out the palpitating heart and blood, and offer it to their Idols 782 in whose name the sacrifice is made. Then they cut off 266

11:Diaz T,H-5 (1519-1520) 1910
NU7 Aztec NU7

the thighs, arms and head and eat the former at feasts and banquets, and the head they hang up on some beams, and the body of the man sacrificed is not eaten but given to these fierce animals. They also have in that cursed house many vipers and poisonous snakes which carry on their tails things that sound like bells. These are the worst vipers of all, and they keep them in jars and great pottery vessels with many feathers, and there they lay their eggs and rear their young, and they give them to eat the bodies of the Indians who have been sacrificed, and the flesh of dogs which they are in the habit of breeding. We even knew for certain that when they drove us out of Mexico and killed over eight hundred of our soldiers that they fed those fierce animals and snakes for many days on their bodies, as I will relate at the proper time and season. And those snakes and wild beasts were dedicated to those savage Idols, so that they might keep them company.

Let me speak now of the infernal noise when the lions and tigers roared and the jackals and the foxes howled and the serpents hissed, it was horrible to listen to and it seemed like a hell. Let us go on and speak of the skilled workmen he [Montezuma] employed in every craft that was practised among them. We will begin with lapidaries and workers in gold and silver and all the hollow work, which even the great goldsmiths in Spain were forced to admire, and of these there were a great number of the best in a town named Atzcapotzalco,[1] a league from Mexico. Then for working precious stones and chalchihuites, which are like emeralds, there were other great artists. Let us go on to the great craftsmen in feather work, and painters and sculptors who were most refined; from what we see of their work to-day we can form a

[1] Escapuçalco in the text.

11:Diaz T,H-5 (1519-1520) 1910
NU7 Aztec NU7

apart from the great Cue there was another small tower 346
which was also an Idol house, or a true hell, for it had at the opening of one gate a most terrible mouth such as they depict, saying that such there are in hell. The mouth was open with great fangs to devour souls, and here too were some groups of devils and bodies of serpents close to the door, and a little way off was a place of sacrifice all blood-stained and black with smoke, and encrusted with [415]
blood, and there were many great ollas and cántaros and tinajas[1] of water inside the house, for it was here that they [782
cooked the flesh of the unfortunate Indians who were 266]
sacrificed, which was eaten by the priests. There were also near the place of sacrifice many large knives and [412]
chopping blocks, such as those on which they cut up meat in the slaughter houses. Then behind that cursed house, some distance away from it, were some great piles of firewood, and not far from them a large tank of water [312]
which rises and falls, the water coming through a tube from the covered channel which enters the city from Chapultepec. I always called that house "the Infernal Regions."

Let us go on beyond the court to another Cue where the [766]
great Mexican princes were buried, where also there were many Idols, and all was full of blood and smoke, and it had other doorways with hellish figures, and then near that Cue was another full of skulls and large bones arranged in perfect order, which one could look at but could not count, for there were too many of them. The skulls were by themselves and the bones in separate piles. In that place there were other Idols, and in every house or Cue or oratory 793
that I have mentioned there were priests with long robes of black cloth and long hoods like those of the Dominicans, [292]
and slightly resembling those of the Canons. The hair

Sixth Chapter, which telleth of drinking.[5]

As to drinking, there, also was a delusion of the ancients, somewhat like the account of stepping over one.

And in this wise was the account of it: when, perchance, one drank; if one yet a small child drank first, and afterwards one drank who was a little older, already grown, then [the elder] restrained and took the water from the small child. He said to him: "Why dost thou wish to drink first? Thou wilt not grow large, but remain small. Now let thy elder brother drink, for he is already bigger."[6]

Seventh Chapter, which telleth of him who dipped into the cooking pot.

Of this there was also a delusion of the natives, known especially of the men. And in this wise was it known: when, perhaps, men ate, and one only dipped into the cooking pot — not into a sauce dish — then also the mothers and fathers restrained him. They said to him: "Do not dip into the cooking pot; there [in war] thou wilt leave thy captives. If thou goest to war, none wilt thou seize; no one will become thy captive."

Eighth Chapter, which telleth of tamales stuck [to the cooking pot].

Concerning tamales stuck [to the cooking pot] as another deception of the natives, it was said that the men and women would not eat them. It was stated that if the men were to eat them, when they would shoot arrows in warfare, the arrow which was shot would not find its mark. Or perchance therefore they might die, or one's wife would with difficulty bear children.

And just so was it as to a woman. If she were to eat tamales which had stuck [to the cooking pot], she could not bear children. Her child would only adhere to and thus die in her womb. Therefore the mothers sternly forbade them to eat tamales which had stuck [to the cooking pot].

Twenty-seventh Chapter, which telleth of the feast and the sacrifices which they made upon the days of the eighth month, which was called Uei tecuilhuitl.[1]

Eighth feast: this [was] the Great Feast of the Lords.

And before the celebration had yet begun, first all feasted. A multitude came together—the poor of Mexico. And those who tilled the fields, at dawn all drank only this [drink of] lime-leaved sage powdered and mixed with water, [which] was mixed in a canoe and sweetened with honey. And it was drunk from a vessel called *tiçapanqui*. Each had a vessel for drinking, from which he drank. Each used his vessel, and some filled their vessels twice. All came and consumed [the drink]; none refrained—children, old women, small boys, small girls, everyone.

And of those who could no longer taste or put mouth and lips to it, some placed it in their [own] vessels and gourds; here they kept what remained to them. And any who came unprovided with a vessel, a plate, or a jar, just carried the maize gruel in their aprons; they carried it away in their aprons. None took [any] without leave; none returned again [to take] *atolli*.

And if any returned again [to take] *atolli* dishonestly, if once more [any] tried to approach [the canoe with *atolli*], then they set upon him with green canes; they whacked him sorely.

And thereafter, when all had drunk, all rested a while, all lay down, forming a circle together. All talked, with much murmuring and rustling, like birds twittering. And others who had saved *atolli* for themselves, later drank it; little by little, they kept giving it to their small children to drink.

And when noon came, when it was time to eat, then once more all sat spread out, in order, arranged in order, all with capes outspread. The small children were taken by the hand; they were borne upon their backs.

And when all sat about, then those girded their loins and bound their hair with reed blades who

1. "Fiesta grande de los Señores," according to Garibay ("Relación breve," p. 301); "der 'grosse Herrenfest,'" according to Seler (*Einige Kapitel*, p. 138).

And upon the next day, all drank wine; all began the drinking. The wine which was drunk was named blue wine. All the old men, the old women, the warriors of noble lineage, they who had wives, the men of marriageable age, and the nobility, and the leaders of nobility—they drank the wine.

And the young chiefs, who were already mature, drank wine, but they drank only in secret, not disclosing themselves; they hid themselves well in the dark; they retired behind bushes, lest they be seen

And if anyone discovered them, if it were known that verily they drank wine, that indeed all had gathered and congregated together—they beat them with pine staves; they bruised their bodies sorely, and shaved their heads like servants. They dragged them, kicking them; they hurled them to the ground; they cast stones at them. Verily, they afflicted them exceedingly. Sometimes, from this, death came.

And after they had taken their pleasure [with them], they cast them hence, they threw them out of the house. Thus fear came over [the people].

And in the home of him who had ceremonially bathed [the victims], there was song; there was beating of ground drums, rattling of gourd rattles, beating of turtle shells. Only as they were [seated] on the ground was there song; only upon the floor was the ground drum beaten. Gifts and favors were given all who worked and served the guests—those who cared for the tobacco, who saw to the tobacco; and those who cared for the chocolate, who saw to the chocolate; or who saw to the water; and those who offered food—the hosts. And the honored women, who were among the [cooking] vessels—who cared for the *tamales*, or the meat; those who set forth the meat, who stood over the meat; and those who stood by the wine—the wine makers. And all the neighbors—all of them—were offered gifts.

And the third day [of Atemoztli] was called "The Mock-fight of the Chonchayotl." One [man was arrayed to] resemble, and was the likeness of, the Chonchayotl. His hair was wild and disordered, bloody and frightful.[19] And when they arrayed the Chonchayotl, then they separated [into bands]. Apart were the priests, who went, and stood, with the Chonchayotl. And [also] apart lay the young warriors.

Then, at midday, they began skirmishing, in mock battle. They struck one another with fir branches, and canes, and tough, thin reeds bound firmly, tightly,

Twenty-seventh Chapter, in which is told how the Mexicans came to and reached the Spaniards as they followed them at the rear.

Injc omppoalli on chicuase capitulo vncan mjtoa in quenjn Mexica intech acito in Españoles injc quijtepuztzocaia. 726

Also this very time was when the Mexicans advanced and arrived in order that they might cut off [the Spaniards'] progress. The Mexicans went to and established themselves at the foot of a mountain called Tonan. And when dawn broke, the Spaniards[1] arrayed themselves and ate. Likewise the Mexicans delight themselves and ate and drank. They drank a mixture of *pinole* and water.[2] Some climbed to the top [of the mountain], as scouts and sentinels, to watch for when the Spaniards would depart and move on. In truth, standing guard was their very charge, their concern.

[262 272]

And after this, when the Spaniards[3] already proceeded and followed the road, then the scouts cried out and said: "O Mexicans, your foes are already going! Let us array ourselves! Let us arm ourselves, each one! Let us all proceed! Let us all go together! Let none remain behind!" And when they heard this, there was running; all ran hither and thither and went in pursuit.

And when the Spaniards saw them, they waited for them. They then closed ranks in order to encounter them. They studied them carefully in order to consider how to fare well against them. And after this, [the Mexicans] then ran at them; they hurled themselves at them, so that all were enclosed within [the Spaniards' ranks]. Then they were speared and lanced; indeed, then died in great numbers those of Mexico and Tlatilulco. They went to deliver themselves, cast themselves into [the Spaniards'] hands, and came upon death. But few fled from their hands and so did not die. And those who remained at a distance, who remained following from afar, did not die. And when the Spaniards had dealt death among the people, and had spent their rage, they thereupon departed. All who bore burdens went following them. No one knew of them where they

2. Bernardo (*op. cit.*, II, p. 179) says that it is now a drink of ground toasted maize mixed in water with cocoa, sugar, cinnamon, and chiote (*achiote* — *Bixa orellana* L.).

3. See footnote 1 *supra*.

726 **Thirty-third Chapter, in which is told how the people of the floating gardens, those of Xochimilco and Cuitlauac, and of Itztapalapan, and still others, came to help the Mexicans.**

726 And once it came to pass that the people of Xochi-
648 milco, Minquic, Collhuacan, Mexicatzinco, and Itz-tapalapan sent emissaries who came to confer with Quauhtemoc and still other noblemen and chieftains. They came, saying to them: "O my beloved prince, with a little we have come to give aid to the city. Perchance it may be that thus the debt is paid [you]. These are the words of the rulers who yet guard there. In truth here dwell the rulers; so have come and assembled the eagle and ocelot [warriors] in boats, in order, they say, now to drive off our foes."

And upon this, when they had said their say, when they had spoken, thereupon [Quauhtemoc] replied to them: "It is well. Ye have shown favor [to us]; ye have suffered trials and tribulations. Help the city. Let there be battle!"

[415 After this, he gave them gifts; he gave them
431 devices and shields, and they gave them each choco-
● 272 late. To each one they gave a shallow gourd vessel of chocolate. Thereupon he said to them: "Onward! Let there be battle, O chieftains! For our foes already are come!" Thereafter went the emissaries there to where lived those of Cuitlauac; they escorted them there. And as they went, then grew the crying of war cries everywhere along the road. Thereafter there was fighting.

726 But these people of Xochimilco then also raised a war cry and fell upon the boats. In no wise did they help us, but only, then, robbed the people. They despoiled the beloved women and the small children, and the beloved old women. Then some they there slew; there these breathed their last. And still others they did not slay, but carefully lowered them into the boats.

And when already they were doing this, when already they were spiriting the people away, then chieftains raised an outcry. They said: "O Mexicans, what now are the fools doing? Let all pursue them!" Thereupon there were war cries. They gave them chase in boats.

dishes and food which Montezuma gave them they ate standing up with much reverence and without looking at his face. He was served on Cholula earthenware either red or black. While he was at his meal the men of his guard who were in the rooms near to that of Montezuma, never dreamed of making any noise or speaking aloud. They brought him fruit of all the different kinds that the land produced, but he ate very little of it. From time to time they brought him, in cup-shaped vessels of pure gold, a certain drink made from cacao which they said he took when he was going to visit his wives, and at the time he took no heed of it, but what I did see was that they brought over fifty great jugs of good cacao frothed up, and he drank of that, and the women served this drink to him with great reverence.

Sometimes at meal-times there were present some very ugly humpbacks, very small of stature and their bodies almost broken in half, who are their jesters, and other Indians, who must have been buffoons, who told him witty sayings, and others who sang and danced, for Montezuma was fond of pleasure and song, and to these he ordered to be given what was left of the food and the jugs of cacao. Then the same four women removed the table cloths, and with much ceremony they brought water for his hands. And Montezuma talked with those four old chieftains about things that interested him, and they took leave of him with the great reverence in which they held him, and he remained to repose.

As soon as the Great Montezuma had dined, all the men of the Guard had their meal and as many more of the other house servants, and it seems to me that they brought out over a thousand dishes of the food of which I have spoken, and then over two thousand jugs of cacao all frothed up, as they make it in Mexico, and a limitless quantity of fruit, so that with his women and female

armament.[140] Thus the largest bodies were assembled, furnished 726
with weapons, and organized under their respective leaders of all grades on very short notice, awaiting the signal from the chief commander to sally forth, either by canoes across the lake,[141] or along the causeways, to the mainland. Each warrior carried 726
mostly his own frugal provisions[142] which the women of each 724
household had prepared; "corn-bread, meal-cakes, ground beans, "corn-meal seasoned with pepper;"[143] but special carriers also accompanied the force, loaded with a surplus of food, with robes for tents, reeds for huts and bowers, and with cooking utensils like kettles, pans, baskets; also with mats.[144] Sometimes these

[140] It also happened that an interval of twenty days (a Mexican month) elapsed between the proclamation of war and the final departure. At least, in most cases, a few days were spent in preparations, since the Mexicans had to give time to their outside allies or subjects to prepare, also. Tezozomoc (Cap. XXXVI): "The Mexicans in "the interval prepared the arms in all the quarters,—shields, swords, and made and "finished many rods ('tlatzontectli'), also slings, and pebbles to be thrown with "cords." (Id., Cap. LVII) "Within twenty days they prepared and fitted out all kinds "of arms, first in the five quarters of Mexico-Tenuchtitlan: Moyotlan, Teopan, Yttz-"cualco, Cuepopan, and Tlatilulco, now called Santiago." In many cases, however, an instantaneous mobilization of the whole force became necessary. Mexico, in times of peace, had to be always ready for war. See, also, Tezozomoc (Cap. XXXII, pp. 49 and 50).

[141] Canoes, "acalli" (water-houses, from "atl," water, and "calli," house), were used 505
for the traffic with the main land, but also largely for the carrying of warriors. It is well known what important part they played against the Spaniards during the siege. For the movements of the Mexicans against a hostile tribe, both on land and water, see Durán (Cap. XIV, p. 121), wherein he describes the attack upon Cuitlahuac, both by canoes and on dry land.

[142] Durán (Cap. XLVI, p. 369): "porque demas de lo que los reyes proueyan de sus "grandes trojes y graneros, cada soldado llevaua á questas su particular comida, "todo lo que podia llevar, atada á la carga el espada y la rodela, etc., etc."

[143] The women *prepared* the food, but it also occurred that the *stewards dispensed* it. 267
Tezozomoc (Cap. XXXII, p. 49): "With this the stewards and calpixques of the tribes "gave to their quarters maize for to make biscuit, tlacactutopochtli, pinole, ground "pepper, chian, beans, and all what pertained to it, providing themselves with every-"thing necessary for certain day stated." The "tlaxcaltotopochtli" (from "tlaxcalli," corn-bread, and "totopochtli," burnt-bread) would be biscuit of maize-meal, and it is therefore called "viscocho." The pinolli, or pinole, corn-meal mixed with pepper, was an important victual. The food of the Mexicans, in general, outside of the meats (exclusively fowl and some game) and aquatic animals, consisted of maize in various forms, and of pepper, "chilli," as seasoning. Cacao furnished their main beverage, and stores of it were taken along. See, also, Durán (Cap. XLVI, p. 369): "maiz tostado "y otro molido y hecho harina, frijol molido, pan biscochado, tamales mohosos y cura-"dos al sol, grandes fardos de chile, cacao molido hecho en pellas"). They also used maize to compose a beverage called "yolatl," which possessed particularly, vivifying 272
qualities (See note of Sr. Ramirez to p. 290 of Durán), and which they dispensed even on the battlefield (Durán, Cap. XXXVII; Tezozomoc, Cap. LII).

[144] These carriers are called "tamemes," and are generally regarded as having been 554
slaves. But they probably were outcasts from the bond of kinship, or the men of newly conquered tribes (like Tlatilulco for a time after its capture), upon whom this 558
degrading work (*because woman-like!!*) was imposed as a penalty. Slaves were not nu-

249 The maguey plant, or agave, was important to household economy for its sap, which was fermented to make a kind of [273] beer. Not only was this pulque used both as a tipple and a ceremonial intoxicant, but it had an important nutritive effect as well in counterbalancing the lack of greens in the [283] Mexican diet. The plant itself had many other uses. Its fibers could be twisted into twine or rope and woven into con- [412] tainers or even clothing. The thorns were excellent needles and had a more lugubrious use as instruments for mortifying the flesh in religious penances. The leaves as a whole some- [342] times were employed in constructing shelters or roofing huts. Small wonder that the maguey and the corn plants were symbolized as goddesses and worshiped accordingly.

[248] The Aztecs cultivated cotton in many varieties. Tobacco [276] they smoked for the most part in hollow reeds as a sort of 249 cigarette. Late in their history they also used elbow-shaped [314] pipes, probably for some ceremonial purpose, much as our modern Pueblos restrict pipe smoking to rain-inducing rituals. They consumed quantities of copal gum as incense during religious ceremonies and obtained rubber from Vera Cruz and the south, as well as from the dwarf guayule plant found in northern Mexico. The Aztecs, like us, found this [526] material indispensable to their culture, for balls in their cere- monial game, *tlachtli*, and as a gum to fix feathers and other adornments to costumes. Bitumen, which came from the oil [317] seepages in Vera Cruz, had its function as an adhesive and as a body paint. In western Mexico the Indians prepared a [237] serviceable lacquer which they used to coat gourds and wooden trays. This incomplete list of plants and substances cultivated and exploited by the Aztecs and their neighbors gives an idea of our deep indebtedness to these past civiliza-

1:Vaillant A-5 (1928-1936)1941 NU7 Aztec NU7

Bird," were the embodied spirits of young growth and, by 776
analogy, youth and the games. These had as male counterparts such gods as Cinteotl, "Maize God," Xochipilli,* "Flower Prince" and Macuilxochitl, "Four Flower," whose functions, identified with growth, youth and games, are almost synonymous. (See Plates 31; 56, top left; 57, bottom left.)

About the maguey plant revolved another cult embracing 776
the goddess Mayauel, who represented the plant and whose 802
four hundred sons were associated with pulque. According 273
to some accounts, the various styles of drunkenness were recorded in terms of these gods or their associated animal, the rabbit. Four hundred rabbits stood for complete drunkenness, while fifteen or twenty suggested mere conviviality. The chief of these pulque gods was called "Two Rabbit," after his day in the almanac, and another, Tepoztecatl, was the tribal god of Tepoztlan, honored by a temple placed high in the mountains of Morelos.

The gods of the earth and death were highly important, 776
since growth takes place in the earth and the dead are received there. The sun on rising seems to be born in the earth and at its setting to be hidden by it, thus passing apparently to the world of the dead. The gods and goddesses associated with the earth had significance for the solar cults as well as for growth and fertility.

Tlaltecuhtli, "Lord of the Earth," was depicted as a male monster of horrifying aspect, partaking of the attributes of a toad and an alligator. His open mouth could consume even [821]
the sun, since the setting sun passed into the earth, according to Aztec astronomical ideas. The goddesses, however, seem

*Sho-chee-pe'e-ly.

776 cooked, and roasted in a pot; one roasted [on the fire]; sweat-houses were heated, unguents were melted, things were cleansed.

776 And when his feast day was celebrated, once a year, at
796 the end of the month of Ieçilli, they made an image of Moctezuma; before it quail were sacrificed and incense was set forth.

[262] *Tamales* [stuffed] with greens[68] were prepared in each dwelling. First they were placed before the fire. Then they were eaten.

[534] And all day his old men sang, blew trumpet-shaped shells, beat drums, and sounded rattles for him.

And no one might reach his arm to the bowl, which was forbidden; nothing might be cooked. Because first were eaten the *tamales* [stuffed] with greens which had been brought as offerings.

And, in live coals, the children[67] roasted some snakes, frogs, small white fish, water lizards, [and] birds—whatever kind of small animal they hunted, they dropped in the hearth. Thus, they said: "Our father roasteth [something] for himself."

And when night fell, the old men, the old women, drinking wine, made libations in all [four] directions. [And] they said thus: "They give a taste of it to the fire; they refresh themselves."[68]

[535] And every four years a festival most greatly honored him—when Moctezuma danced a princely dance before the temple of Xiuhtecutli, which was called Tozzumulco.[69]

●[273] And at this time everyone [including] all the children, every one of them, tasted the wine. Thus it was called [the time when] the children drink wine.

[608 And then they gave the children uncles and aunts, a man
431] [and] a woman, whom those with children sought out and gave gifts. These took [the children] upon their backs, and carried them then to the temple of Iscoçauhqui. There [the
[304 parents] pierced their ears; thus they placed a sign upon
852] them, while their uncles and aunts[70] looked on. Afterwards all feasted.

776 [Iscoçauhqui's] ornament was [thus]: black was smeared about the lower part of his face. About his head he bore a circlet set with green stones; he wore a paper crown with blue counga feathers and a spray of quetzal feathers; he had a crown of arrowshafts; a crown of spear-shafts;[71] he had

Seventeenth Chapter, which telleth of the god whose name was Left (Opochtli), whom anciently men here worshipped as a god.

This Opochtli was one of the Tlalocs. He was the god of those who lived on the water, who worshipped him.

[773] They said that he made and revealed his creations and inventions—the net, the dart-thrower, the three-pronged harpoon,[81] the pole for propelling boats,[82] [and] the bird-snare.

776 And when his feast was celebrated, offerings of water,

796 food, [and] wine were made; and the cane of corn plants, acented smoke, incense, and sweet-smelling herbs. These they

● [213] spread before him, thus welcoming him. They shook their rattle-boards at him. They strewed toasted [pop-]corn grains like hailstones, or like scattered dice. And also his old men, his old women, and the city elders made music for him.

776 As his garb, he wore a paper crown; he was covered with black unguent—a liquid rubber covering; he had a heron-feather spray with single quetzal feathers. He wore a paper breech-clout [and] had a paper vestment [over his shoulders] with the sun-emblem.

well-natured, the gray-headed, the white haired; and the old women.

Of these it was the exclusive privilege that they should drink wine.

And when they had drunk their fill, thereupon all went to their houses, dispersed and scattered.

Some went off weeping; some danced the warriors' dance; they danced the ceremonial dance; some walked weak-kneed; some went shouting.

And first the wine-makers were entertained; they rested from their office.

It was explained that for four days they should fast and abstain during their work, lest [the wine] *sour*.

They *should* look to their strict abstinence; no man might lie with a woman, nor a woman with a man.

[And] none might taste the wine, nor the syrup [from which it was made], while it was being prepared.

One might not even dip one's finger into it; one paid it reverence and treated it delicately, until the wine was tapped.[120]

And of him who secretly tasted it, who in secret drank some, even tasting only a little, it was said that his mouth would become twisted, it would stretch to one side;[121] to one side his mouth would shift; it would be drawn over.

And if one were lame in one hand, or if his arm or leg quivered, or a hand or foot became misshapen, or the foot shook, or his eyes trembled, or his lips quivered, or if one were possessed by a devil, it was said that the green mountain gods had been angered by him.

And when the day broke, thereupon took place the disposal of the remains. At the distribution, only the relatives, the people of the household—his family, they of the same parentage, of the same womb, those of the same clan [took part].

They called it the distribution of the leftovers; then all the food and drink were consumed, used up—all finished.

And they left nothing of what still remained of the drugs in the vessel, of the wine, of watered wine,[122] of fruit wine,[123] of white wine, of sleep-producing wine.

And he who had the images made, if he had the gout, as was said above, he was thus cured. And he who was to have drowned but did not die, when he caused the images to be made thus paid his debt and thus fulfilled his vow.

And all their adornments—their paper garlands worn over one shoulder [as a sign of death or of one to be slain before the gods], their staves of round thick reeds, and their flame-sticks,[124] their cloud-bundles;

and the turquoise cups and their little sauce bowls with

120. *Cf. Sahag., op. cit.*, p. 29, citing marginal gloss in *MS Bibliotheca del Palacio*. Cf. also explanation in Sahagún, *op. cit.*, Vol. I, p. 38.

121. Probably *tempatlilia* is meant. It does appear in *MS Bibliotheca del Palacio* (*Cf. Sahag., loc. cit.*)

122. Possibly *octli*.

123. See Molina (*Vocabulario*).

124. Alexis Tremaux, *Histoire de Musique* (H. Tremaux-Compans, ed.; Paris: P. Jamet, 1853), Vol. I, p. 300, describes this as a light flame-colored cloth: ". . . *on ait dit qu'il en sortait des flammes et des étincelles.*" Sahag. (*op. cit.*, p. 30) calls it a lightning stick (*Blitzholz*).

The seventh month they named Tecuilhuitontli. On the first day of this month they celebrated a feast to the goddess of salt, whom they called Uixtociuatl. They said that she was elder sister of the Tlaloc gods. In honor of this goddess they slew a woman decked in the ornaments with which they represented the same goddess.

Al septimo mes llamauan Tecuilhujtontli: En el primero dia deste mes: hazian fiesta a la diosa de la sal que llamauan Vixtocioatl: deziã que era hermana mayor, de los dioses tlaloques: matauan a honrra desta diosa vna muger compuesta con los ornamẽtos que pintauã a la mjsma diosa.

Chapter 7
Tecuilhuitontli

On the eve of this feast, all the old women sang and danced, as well as the young women and girls. They went held by some short cords which they carried in their hands, one [taking] one end, another the other [end]. These cords they named *xochimecatl*. They all wore garlands of wormwood [flowers] of this land, which are called *ixtauhiatl*. A number of old men led them and ordered the singing. Among them went the woman who was the likeness of this goddess and who was to die arrayed in rich ornaments.

On the night before the feast, the women, with the same one who was to die, kept vigil; and they sang and danced all night long. At break of day, all the priests arrayed themselves and performed a very solemn dance. And all who were present at the dance held in their hands those flowers which are called *cempoalxochitl*. Thus dancing, they took many captives to the Pyramid of Tlaloc, and, with them, the woman who was to die, who was the likeness of the goddess Uixtociuatl. There they slew first the captives and then her.

Many other ceremonies were performed during this feast; and also [there was] great drunkenness, all of which is set forth at length in the account of this feast, *fol.* 76.

X 796 [805 776] The ninth month they called Tlaxochimaco. On the first day of this month they held a feast in honor of the god of war, named Uitzilopochtli. In this they offered him the first flowers [grown] in that year.

Chapter 9
Tlaxochimaco

[23 262] On the night before this feast, all busied themselves in killing fowls and dogs, in order to eat them, and in making *tamales* and other things concerned with food. Then, very early in the morning of this [778] feast, the priests of the idols decked Uitzilopochtli with many flowers; and after the statue of this god was adorned, they decorated the statues of the other gods with garlands and strings and wreaths of flowers. And then they decked all the other statues in the tribal temples and young men's houses. And in the houses of the majordomos and leading men and common folk, all decorated with flowers the statues which they had in their houses.

X 796 Having decorated the statues of all the gods, they then began to eat that fare which they had prepared 535 the night before; and, a little after eating, they started a kind of dance in which the noblemen, with women, together danced grasping each other's hands, and the ones embracing the others, arms thrown about each other's necks. They did not dance solemnly in the manner of a ceremonial dance, nor did they go through the movements of a ceremonial dance; but [534 they went step by step, to the rhythm of those who 778] beat [the drums] and sang, all of whom were standing, a little to one side of those who danced, near a circular altar which they called *momoztli*.

This chanting lasted until nightfall. Not only in the pyramid courtyards but in all the houses of the leading men and the common folk they beat [the drums] and sang with a great din until night. And ● [273] the old men and the old women drank wine; but no young man nor young woman drank it. And if [any] of them did drink it, they punished them sorely. Many other ceremonies were performed in this, which are [described] at length. Etc.

Al nono mes llamauan Tlaxochimaco: El primero dia deste mes hazian fiesta a honrra del dios de la guerra llamado Vitzilobuchtli: offrecianle en ella las primeras flores de aquel año.

The twelfth month they named Teotl eco, which meaneth "The Arrival of the Gods." They celebrated this feast in honor of all the gods; for they said that they had gone to a number of places. They observed a great feast on the last day of this month because their gods had arrived.

Al doseno mes llamauan Teutl eco, que quijere dezir la llegada le los dioses celebrauan esta fiesta, a honrra de todos los dioses, porque dezian que aujan ydo a algunas partes, hazian gran fiesta el postrero dia deste mes, porque sus dioses aujan llegado. 796x [805 776]

Chapter 12
Teotl eco

On the fifteenth day of this month the young men and boys strewed boughs on all the altars and shrines of the gods, both those which were in the houses and those which were along the roads and crossroads. And for this activity which they performed they gave them maize; [to some they] gave a large basket full of maize, and to others two or three ears.

On the eighteenth day arrived the god (who is always a young man whom they called Tlamatzincatl; that is, Titlacauan). They said that, because he was young and strong, he traveled better and arrived first. They then set forth food on his pyramid, and that night they ate and drank, and all made merry, especially the old men and the old women, who drank wine because of the arrival of the god. And they said that with this rejoicing they washed his feet for him.

On the last day of this month was the great feast; for they said that all the gods then arrived. On the eve of this day, at night, they made, on a mat, a very closely packed small cake of cornmeal, in the shape of a cheese. Upon this small cake the gods impressed the print of a foot as a sign that they had come. All night long the principal priest watched, and came and went many times to see when he would descry the print.

Seeing the mark of a footprint, the priest then cried out, saying "Our lord hath come!" Then the priests of the pyramid began to sound horns, and conch shells, and trumpets, and other instruments of those

El postrero dia deste mes era la gran fiesta: porque dizen que todos los dioses llegauan entonce: la vigilia deste dia, a la noche hazian encima de vn petate de harina de mahiz vn mõtonzillo muy tupido de la forma de vn queso: en este montonzillo imprimjan los dioses la pisada de vn pie en señal que avian llegado: toda la noche el principal satrapa velaua y yva y venja muchas vezes a mjrar quando veria la pisada. [252]

En vinjendo el satrapa la señal de la pisada luego daua bozes diziendo, llegado a nuestro señor: luego comenzauan los mjnjstros del cu, a tañer cornetas, y caracoles, y trompetas y otros instrumentos de los [534]

1. Marginal notation: *Dedicatio anni Michael.*

which they then used.

The thirteenth month they named Tepeilhuitl. In this month they celebrated a feast in honor of the high mountains, which are in all these lands of this New Spain, where large clouds pile up. They made the images of each one of them in human form, from the dough which is called *tzoalli*, and they laid offerings before these images in veneration of these same mountains.

Al tercio decimo mes llamauan Tepeilhujtl: En este tiẽs hazian fiesta a honrra de lo montes emjnẽtes, que estan por todas estas comarcas desta nueua españa: donde se armã fiublados: hazian las ymagenes en figura humana a cada vno dellos de la masa que se llama tzoal, y ofrecian delante destas ymagenes, en respecto destos mismos montes. 796 [805 798]

Chapter 13
Tepeilhuitl

In honor of the mountains they made a number of serpents, of wood or of the roots of trees, and they fashioned them heads like [those of] serpents. They made also some lengths of wood, as thick as the wrist, and long. They called them *ecatotonti*. These, as well as the serpents, they overlaid with that dough which they call *tzoalli*. These pieces they provided a covering in the manner of mountains. Above, they placed the head, like the head of a person. Likewise they made these images in memory of those who had drowned in the water, or had died such a death that they did not burn them, but rather buried them.

After, with many ceremonies, they had placed upon their altars the aforementioned images, they also offered them *tamales* and other food; and also they uttered canticles of their praises, and they drank wine in their honor.

Upon arrival of the feast in honor of the mountains, they slew four women and one man. The first of these [women] they called Tepexoch. The second they called Matlalcueie. The third they named Xochtecatl. The fourth they called Mayauel. And the man they named Milnaoatl. They decked these women and the man in many papers covered with rubber. And they carried them in some litters upon the shoulders of women highly adorned, to the place where they were to slay them.

Llegada la fiesta a honrra de los montes, matauan quatro mugeres y vn hombre: la vna dellas llamauã tepexoch: la segũda llamauã Matlalcueie: la tercera llamauan Sochtecatl: la quarta llamauã Mayauel, y al hombre llamauã Milnaoatl: adereçauan a estas mugeres y al hombre cõ muchos papeles llenos de vlli: y lleuauanlas en vnas literas en hombros de mugeres muy atauiadas, hasta donde las aujã de matar. 796 [289 314 293 493 482]

The fourteenth month they named Quecholli. They observed a feast to the god name Mixcoatl. And in this month they made arrows and darts for war. They slew many slaves in honor of this god.

Al quarto decimo mes llamauan Quecholli: hazian fiesta al dios llamado Miacoatl: y en este mes hazian saetas y dardos para la guerra: matauã a honrra deste dios muchos esclauos.

411 796x [805 776]

Chapter 14
Quecholli

When they made the arrows, for a space of five days all took blood from the ears, and [with] the blood which they pressed out of them they anointed their own temples. They said that they did penances in order to go to hunt deer. From those who did not bleed themselves, they took their capes as punishment. No man lay with his wife on those days; neither did the old men nor the old women drink wine; because they did penance.

At the end of the four days during which they made the arrows and darts, they made a number of very small arrows, and bound them in four's with each [bundle of] four torches. And, a small bundle of the four torches and the four arrows being made, they offered them upon the graves of the dead. They placed also, along with the arrows and torches, two *tamales*. All this remained for a whole day upon the grave, and at night they burned it and performed many other ceremonies for the dead on this same feast.

On the tenth day of this month, all the Mexicans and Tlatelulcans went to those mountains which they call Çacatepec. And they say that this mountain is their mother. On the day that they arrived, they made huts or cabins of grass, and they lit fires, and nothing else did they do that day.

Next day, at dawn, all forthwith broke fast and set out for the country and formed a great wing, wherewith they surrounded many animals—deer, rabbit, and other animals—and little by little they kept coming together until they rounded up all of them. Then they attacked and hunted, each one what he could.

785 fasted, [some] for forty days, others for twenty, in
X 796 order to prevail over chance, in order to paint well
and to weave textiles well. For this purpose they
463 offered quail and incense, and performed other cere-
monies—the men to the god Chicome xochitl, and
the women to the goddess Xochiquetzal.

The Third Movable Feast

X 796 In the third sign, which is called ce maçatl, in the
[776] first house, they celebrated a feast to the goddesses
who are named Cioapipilti, because they said that
[289] then they came down to the earth. They adorned
their images with papers and offered them offerings.

The Fourth Movable Feast

X 796 In the sign which is called ce maçatl, in the second
house, which is called ome tochtli, they celebrated a
● 273 great feast to the god named Izquitecatl, who is the
second god of wine: and not alone to him but to all
[776] the gods of wine, who were many. On this day they
adorned his image very well on his pyramid, and of-
fered him things to eat, and they sang and played
[musical instruments] before him. And in the court-
[463] yard of his pyramid they set a large open jar of wine,
and those who were wine merchants filled it to over-
flowing, and all who wished went to drink. They had
[415] some canes through which they drank. The wine
sellers kept feeding the large jar, so that it was al-
ways full. Mostly, those who had newly cut the
maguey did this. The first syrup which they took out
they took to the house of this god as first fruits.

The Fifth Movable Feast

X 796 In the sign called ce xochitl, in the first house, they
celebrated a great feast. The leading men and the
lords danced and sang in honor of this sign, and they
[309] otherwise made merry. And then they brought forth
the richest feathers, with which they adorned them-
[438] selves for the dance. In this feast the lord gave gifts
to the warriors and to the singers and to the palace
folk.

The Sixth Movable Feast

In the sign named ce acatl, in the first house, the
lords and the leading men celebrated a great festival
[346] to Quetzalcoatl, god of the winds. This feast they
observed in the house called *calmecac*, which was the
house where dwelt the priests of the idols, and where
were trained the boys. In this house, which was like

dias, otros veinte por alcançar ventura para pintar bien y para tezer bien labores, offrecian a este proposito codornizes y encienso, y haziã otras cerimonjas los hombres al dios Chicome xochitl y las mugeres a la diosa Xochiquetzal.

La tercera fiesta mouible.

En el tercero signo que se llama ce maçatl: en la primera casa hazian fiesta a las diosas que se llaman cioapipilti porque dezian que entonce decendian a la tierra, ataujauã a sus ymagines con papeles, y ofrecianlas ofrendas.

La quarta fiesta mouible

En el signo que se llama ce maçatl: en la segunda casa que se llama vme tochtli: hazian gran fiesta al dios llamado Yzquitecatl, que es el segundo dios del vino, y no solamente a el: pero a todos los dioses del vino que eran muchos: adereçavan este dia muy bien su ymagen en su cu, y ofrecianle cosas de comida, y cantauan, y tañjan delante del: y en el patio de su cu, ponjan vn tinajon de pulcre, y hinchianle los que eran taberneros hasta reberter, y yuan a beuer todos los que querian: tenjan vnas cañas con que beujã: los taberneros yuan ceuando el tinajon: de manera que siempre estaua lleno: principalmente hazian esto los q̃ de nueuo aujan cortado el maguey, la primera agua mjel que sacauan la lleuauan a la casa deste dios como primjcias.

La quinta fiesta mouible

En el signo llamado ce xochitl: en la primera casa, hazian gran fiesta, los principales, y señores, baylauan, y cantauan a honrra deste signo, y hazian otros regozijos: y sacauan entonce los mas ricos plumajes, con que se adereçauan para el areyto: y en esta fiesta, el señor hazia mercedes a los hombres de guerra, y a los cantores y a los del palacio.

La sexta fiesta mouible

En el signo llamado ce acatl: en la primera casa, hazian gran fiesta a quetzalcoatl dios de los vientos: los señores y principales: esta fiesta hazian en la casa llamada calmecac, que era la casa donde morauan los satrapas de los ydolos: y donde se criauan los muchachos, en esta casa que era como vn mones-

they placed before all the *xipeme*, they who had put on the skins of men.

And others, who had become drunk, unruly [like] warriors, daring, foolhardy, full of spirit, lively, proud of their valor, playing the part of men, started brawls, forced them to join issue, and battled as if in war, and fought.

And to arouse their wrath, verily to move them, that they might become enraged and angry, they snatched at and pinched their navels.

Whereupon the *xipeme* made them run. Behind them stood a *toter*, named the Youallauan; he followed them and went skirmishing with all the *tototecti*.

Then [the *tototecti*] set upon [the warriors] and took after them; they went on fighting them, seeking to seize and lay hands upon them, like holding those who had detained them by the leg.

And [the warriors] went whirling around, circling back, fighting the others with pine staves.

And if some were taken who had detained [the *xipeme*], these *xipeme* beat them; they struck [such an one] with their rattle sticks, showing their anger.

And they carried him to the Temple of Iopitli; and not for nothing did he come out, not for nothing was he let free. Something was given as ransom; something was taken—perchance a turkey-hen, mayhap a great cotton mantle he offered, etc.

As hath been told in the description of Xipe, just so was it done. Afterwards visits were made and entertainments provided for the *tototecti* and *xipeme*.

Thereupon began the gladiatorial sacrifice. The captives were spread out in order; the captors stood arranging and accompanying them. Then also the striped ones came forth; swiftly the ocelot[-costumed warrior] led and guided them; he came quickly to meet [the captives], displaying his shield and war club and lifting them up toward the sun [in dedication].[14]

Then he turned back, retreated, turned to the rear; once again he went back.

In the same manner there then followed him, coming around, the eagle[-costumed warrior], who similarly lifted up [as an offering] to the sun his shield and his war club.

Once again emerged another ocelot[-costumed warrior], who came out as third, doing the same as he quickly came out.

14. Sahagún's Spanish here: "Levantaban la rodela, y la espada hacia el sol, como demandando esfuerzo al sol." Cf. also Pl. 3.

X 796 Yet again an eagle[-costumed warrior] came out, doing just as had been done. All four [acted as if] fighting. They raised their shields and war clubs [as offerings] to the sun.

Now no longer did they delay, by turning back. When they came out, they came out dancing, they went in order. As if lying down on the ground, as if crawling along, flat on the ground, they went looking from side to side; they went up leaping and fighting.

And thereafter the Youallauan came forth, garbed like Totec; only he came last, after the others, behind the four great eagle and ocelot [warriors]; they lifted up their shields and war clubs, offering them and dedicating them to the sun.

Oc no cepa centel oalquiça, in quauhtli, çan ic muchiuj in quichioaia, oallechecoaia in nauijxti: conjaujlizia yn iochimal, yn jumacquauh iõ tonatiuh:

[as an offering], and afterwards drank it with a long hollow gourd.

Then still another man, [a priest,] came out and cut the throat of a quail for the captive, him who was to be offered as a sacrifice; and when he had beheaded the quail, he raised [to the sun] the captive's shield, and cast the quail away, behind him.

Having done this, then they made [the captive] climb upon the round sacrificial stone; and when they had lifted him on the offering-stone, the wolf [priest] came to him, representing [a wolf], and known as "Old Wolf."[18] [He came forth] as the uncle of the captive destined for the sacrifice.

Then he took the rope holding the captive, which reached and was attached to the center [of the stone]; then he tied it about the waist[19] of the captive. And he gave him a war club, decked with feathers and not set with obsidian blades.

And he placed before him four pine cudgels, his missiles,[20] with which to lay about him, with which to defend himself. And the captor, when he had left his prisoner on the offering-stone, thereupon went away [to the place where] he had stood [before]. He stood dancing, looking upon, and studying, his captive.

Then [the fight] was begun; the contest [was started]. Carefully they studied where they would smite him in a dangerous place, and cut him—perchance the calf of the leg, or the thigh, or his head, or his middle.

And if some captive was valiant and courageous, with great difficulty he surpassed [his adversary]. He met and fought all four of the ocelot and eagle [warriors]. And if they could not weaken him, then came one who was left-handed. He then wounded his arm and threw him flat upon the surface. This one appeared as [the god] Opochtli. And although the captive might falter and faint, yet he acquitted himself as a man.

And when one went faltering, sinking down on all fours, reeling and overcome in the fray, uselessly and vainly holding the war club, which they snatched from him, thus his adversaries contended with him. And this useless one could now no longer do more;

7. In *Gesammelte Abhandlungen zur Amerikanischen Sprach- und Alterthumskunde* (Berlin: A. Asher & Co., 1902-23), Vol. II, p. 525, Seler translates *camopalli* as *kastanienbraun* or as *orange-farbene Decke*. In *Einige Kapitel*, p. 79, he has "*kastanienbraun* (*von der Brauen Farbe der Knollen der Batata edulis*)." Molina (*op. cit.*) has *color castaño oscuro*.

For *nochpalli*, Seler (*loc. cit.*) writes "*carmoisinfarben* (*von der Farbe des Nochtli, der Kaktus-Schildlaus*)."

8. Cf. Seler: *Gesammelte Abhandlungen*, *loc. cit.*, and *Einige*, p. 531.

X796 [273] And when he had hung it up, he summoned [his friends and his kin] to a feast. All ate and drank; the old men and the old women drank wine.

And another man was then decked in the captor's attire, and, in jest, leapt about. [And] the old men of the tribal temple sang for him.

[273 415] And he offered white wine in a round gourd, and he threatened it.

Afterwards, in like manner, he shot it with an arrow, and then drank it.

And when he had thus drunk, he had it taken elsewhere, and did similarly; then he did likewise in a third place, and in a fourth place.

Here they finished, when he had done similarly in all places. This was done all in one day.

But song did not cease in the song house[15] until it came to end in [the feast of] Uey toçoztli.

Auh yn aioni, in tzatzililonj, in pinauhtilonj, njman moiolceuja ynica vetli, motlapopolhuja, amo qujmolnamiqujlia, yn inneaoaliz, yn innemictiliz etc.

Here ended and concluded the feast of Tecuilhuitontli.

Nican tlamj, nican tzonquiça in Tecujlhujtontli.

an offering, was richly arrayed and adorned. He bore an eagle claw device upon his back, which was surrounded by quetzal feathers. His holder was of eagle down in which were quetzal feathers. His flint knife was of gold. He carried a rosette on his back, which was made of paper, etc.

A man [priest] carried the mist rattle board upon his shoulder; he rattled it in three places. And when they had come to the place where Xilonen was to die, then the fire priest came to receive her. Before her he set up the rattle board, and rattled it, and with incense went forth to receive her, and cast it toward her.

And then they took her up to the Temple of Cintetl. First they laid her upon the back [of a priest] —not upon the offering stone, but rather she died upon [a priest's] back. And those who died upon [a priest's] back, they called "those who have backs."

Thereupon she met her fate and [the sacrificing priest] severed her head. When she had [thus] suffered, when he had slain her, then he grasped her heart and planted it in the blue vessel. They who were well experienced knew where they cast it, where they required it.

And then all ate, for the first time, *tortillas* of green maize. For the first time the cane of green corn was offered and for the first time chewed, and likewise amaranth greens were newly cooked and once more the sweetness of flowers—the *Carophyllus mexicanus* and tobacco flowers [—was smelled].

And at the Feast of the Great Lords, there was a dance which was the particular function of the women—old women, young women, mature women, little girls. The maidens, who had looked upon no man, were adorned with feathers and their faces were stained with paint.

Everyone made plain *tamales* and fruit *tamales* for themselves; they offered them as gifts to their gods.

And of the old men and the old women it was the exclusive privilege that they should drink wine. Never did a youth, a maiden, or a priest drink wine.

And if anyone was noted, great pains were taken that he be seized and put in jail, in the granary.[11] They all held council what might be done about it, and whether, perchance, they would punish him. [Evidence] was weighed; all discussed [his crime]. They determined whether [they would] show mercy; and if [they would] not show mercy, he was

condemned to die. Not now might he leave; no longer was there help for him nor [now] a second judgment; no longer had he hope.

When whosoever [had been tried] had been condemned, all were summoned at sundown, assembled, and set apart, that the words [of the judge] might be published everywhere.

It was said: "On the morrow they will die. All of the common folk will be moved. Some of those who drank we shall leave alone, that, verily, they may fall into fear."

They came with wrists bound together. They placed them in the midst [of the market place]. Thereupon the judges spoke, warning all, speaking of wine, which no youth might drink. Only when they matured, when they had become old, [might they drink]. And those who had youths, who already had maidens [as grown children], verily their privilege it was that they might drink wine.

[681] And thereupon, when [the judge] had delivered his judgment, then Moctezuma's executioners, his slayers, struck the backs of [the criminals'] heads. [The executioners were] the Quauhnochtli, Ezuauacatl, Tiçociauacatl, Tezcacoacatl, Maçatecatl, and

[644] Atenpanecatl.[12] These men were not noblemen, but only lesser officials,[13] who were under command, who were chosen and approved for their office [because of their] strength, vigor, and ingenuity, and because they spoke pleasingly.

And when [the drinkers] had been slain, then all who were reasonable were struck with terror and fright, so that they verily changed their ways. And those who were foolhardy and undisciplined, who could not be spoken to, the effeminate, the stupid—they only laughed; they only jested at the warning. They only listened to it lightly and ill. Not then did they note the words; not thus were they frightened of death.

And thereupon, when all had been slain, then all dispersed in disorder, raising a great dust, shaking out their cloaks—scattering, breaking up, dispersing, all going off to their homes. Then the place where they were became calm.

Here ended the celebration of the feast day called Uei tecuilhuitl.

bodies nor whirling, nor wander from side to side, nor fall back.

Quite quietly, calmly, evenly, they kept going as they danced. Like a moving serpent was the dance. None disturbed, none intruded, none went out of place nor broke in.

And the women danced with arms about only the great,[5] brave warriors. And those who were only masters of the youths, not with [the women] did they dance, embracing them [about the waist].

And when all ceased dancing, only a little sun remained. When the sun was about to set, all dispersed and departed, each to his place.

And in all the houses there was singing. They sang to their gods—either Omacatl, or Chicome coatl, or Ehecatl, or Coatl Xoxouhqui. Everywhere there was song; song was widespread; war cries resounded; there were battle cries as song was sung; a great din of singing re-echoed.

[273] And only the revered old men and old women drank wine. And those who became drunk cried out at people or boasted of their manly deeds.[6]

5. Or old (enemy).
6. Of this phase of Tlaxcalteca, Clavigero (op. cit., p. 163) says: "Estas danzas que duraba hasta la noche, terminaba con el sacrificio de varios cautivos. Hacían también en este mes con muchos sacrificios la fiesta de Huitzilopochtli Dios del comercio."

X 796 **Thirtieth Chapter: here are related the feasts and the ceremonies which were performed on the days of the eleventh month, which was named and known as Ochpaniztli.**

The eleventh feast was known as "The Sweeping of the Way."[1] At this time the actual feast had not yet arrived. For another five days nothing was done; there was then no activity. And when five days had passed, then began the hand-waving dance—when there were fifteen days before Ochpaniztli. It was carried on for eight days.

X 796 535

And thus they danced the hand-waving dance: All were arranged in order; four rows were formed; all formed four lines. Thus they danced: They went marching only in circles; their hands were filled with Tagetes flowers and branches, which they went grasping in either hand.

They did not sing; none called out; they went in complete silence.

[273] But if some mischievous youths became drunk, they imitated the ground drums. As the ground drums roared, just so they went about doing. [The dancers] went moving their hands here and there; they moved in equal rows. None broke ranks; none turned [another] from his course; none went astray.

And when the hand-waving dance began, it was already near sundown. And when all ceased, the sun had already set. And when eight days had passed, then began the mock-battle [of the medicine women], which they carried on for four days before the house of song and dance.

X 796 [754] In this manner and in this way proceeded all the medicine women—old women, maidens, and some of the harlots:

They were divided [into two bands. The likeness of] Teteo innan went with a certain number [of them, and] as many more went opposing her, skirmishing against her, [that] thus they might banish her sad thoughts, her sorrow; [that] they might amuse her and cause her to laugh; that she might not be sad. For if she should weep, it was said, it would be an omen of evil. It was said that many men who were dexterous as warriors would die in

1. *Barrizinzato de cuauac*, in Garibay's rendering (*op. cit.*, p. 306); *der "Wegkehrer,"* according to Seler (*Einige Kapitel*, p. 171); *fiesta barredera*, in Durán, *op. cit.*, Vol. II, p. 198.

[with them], and then went off carrying it. When they came to his presence, then they put it down; they laid it down for him.

And when it was already night, then the beloved old men and old women drank wine. In this manner they spoke: it was said, "They bathe [the god's] feet."

And when the fourth day had come, then ended the scattering of the branches. Then they threw away the branches. And when the fifth day came, then in truth was when [it was the feast] Teotl eco, with which ended the twenty days.

At midnight [the priests] prepared a flour of maize, which they parted and pressed together, making it round [and flat] like a shield, and placing it upon a mat.

When [it was time that] all the gods should reach here, and arrive, they made preparations. All set themselves in motion, that the gods might arrive.

And the old priest, [the god's] aged one, named "He who keepeth the god," kept going back to look upon [the maize flour on the mat]. Often he looked upon it. Never did he rest. His office was only to look. Never did he leave his foot; [for] that which he watched, the maize flour, was called his "foot."

And when [the god] arrived, then he saw a small foot[print], which was there upon the maize flour, or at its edge; when he stood upon the [cake of] maize flour, it split.[7] Then it was plain that the gods had arrived.

Then he who kept the god said to them: "Verily, the lord hath deigned to come."

When this was heard, then [the priests] went in procession, blowing shell trumpets, to proclaim [the news] everywhere. Then by this was it known that in truth the gods had come.

And all the common folk thereupon went away and departed to lay offerings in their temples, the temples of the devils. All offered them balls of dough.

And when they had made the offerings, all was still,

And when night fell, in the same manner as they did [before], the old men and the beloved old women drink wine. It was said: "They bathe the feet of the gods who have come."

And the next day, then came Yacapitzanac, this Yacatecutli, who was the god of the merchants; and

7. The word *ololoia* is explained by Guthrey (*op. cit.*, p. 107): "*Auh quil mach in ixmac ololoia inino ololoia in ixhipal nemiti tlaolinnili*"—"*y luego cuando vendan los dioses, se parte el mismo ahuate de harina de maiz.*"

who did not draw his blood, they stripped him, never-more restoring his cape to him. The overseers took it from him for good.

And when the arrows were being formed, no [man] lay with a woman. And the old men drank no wine; they became not drunk; they abstained and left the wine alone.

And when arrows were made, they brought out their measure; all were made of equal length. And the arrow-points were of equal length. None were larger than others; nothing was joined to them.

Thereupon, [when] the reed [shafts] were cut, they went to put them into the hands of those who fitted and put on the arrow-points. Securely they tied the [ends of] the reeds, binding them well with *maguey* fibres, so that the arrow shafts would not split back. They set [the points] in glue,[2] so that they were held fast, so that they were well embedded.

And when they had [thus] prepared them, then they applied pine pitch to the heads and the ends. This was done quite quickly.

And when they were finished, thereupon they were bound together; they tied them in [bundles of] twenty. And when they were assembled, then everyone was arranged in rows, all ordered in line, in procession, to leave [the bundles] there at the foot of [the Temple of] Uitzilopochtli. There they heaped [the bundles] together. And when they had come to make [this] offering, then all departed [to their homes].

And the fourth day was called "Arrows are made for the homes." All men made arrows in their homes. Thus all passed the time; thus all tried [their skill] and practised, having set up, at a distance, [the leaf of a] *maguey* plant, which they shot with arrows. Hence were apparent those who were good marksmen, the able bowmen, those who could well wield the bow.

And upon the fifth day, one was concerned only with the dead. For them they made small arrows, each one measuring a hand's length, and put upon them only a little resin. And their points were only sticks. They bound four arrows and four pine torches with loose cotton thread, and laid them where the dead lay buried. And they placed [there] two sweet *tamales*. There [they remained] all day. And at sundown they thereupon burned them for [the dead] in the same place. There they set them on fire.

2. Cf. Sahagún (Bustamante ed.), Vol. III, pp. 241, 290.

And upon the next day, all drank wine; all began the drinking. The wine which was drunk was named blue wine. All the old men, the old women, the warriors of noble lineage, they who had wives, the men of marriageable age, and the nobility, and the leaders of nobility—they drank the wine.

And the young chiefs, who were already mature, drank wine, but they drank only in secret, not disclosing themselves; they hid themselves well in the dark; they retired behind bushes, lest they be seen

And if anyone discovered them, if it were known that verily they drank wine, that indeed all had gathered and congregated together—they beat them with pine staves; they bruised their bodies sorely, and shaved their heads like servants. They dragged them, kicking them; they hurled them to the ground; they cast stones at them. Verily, they afflicted them exceedingly. Sometimes, from this, death came.

And after they had taken their pleasure [with them], they cast them hence, they threw them out of the house. Thus fear came over [the people].

And in the home of him who had ceremonially bathed [the victims], there was song; there was beating of ground drums, rattling of gourd rattles, beating of turtle shells. Only as they were [seated] on the ground was there song; only upon the floor was the ground drum beaten. Gifts and favors were given all who worked and served the guests—those who cared for the tobacco, who saw to the tobacco; and those who cared for the chocolate, who saw to the chocolate; or who saw to the water; and those who offered food—the hosts. And the honored women, who were among the [cooking] vessels—who cared for the *tamales*, or the meat; those who set forth the meat, who stood over the meat; and those who stood by the wine—the wine makers. And all the neighbors—all of them—were offered gifts.

And the third day [of Atemoztli] was called "The Mock-fight of the Chonchayotl." One [man was arrayed to] resemble, and was the likeness of, the Chonchayotl. His hair was wild and disordered, bloody and frightful.[19] And when they arrayed the Chonchayotl, then they separated [into bands]. Apart were the priests, who went, and stood, with the Chonchayotl. And [also] apart lay the young warriors.

Then, at midday, they began skirmishing, in mock battle. They struck one another with fir branches, and canes, and tough, thin reeds bound firmly, tightly,

images], holding a vigil for them. And they blew trumpets and flutes for them.

And they who sounded trumpets were not those whose office it was [to blow trumpets], but youths. They were much honored; they were offered food and wine.

And after this, upon the next day, [the priests] then sought weaving sticks. Thereupon they implanted them in the breasts [of the images].[7]

And when they had set in [the weaving sticks], then they cut off the heads of the [figures of] amaranth seed dough. Then they seized what had been used for their hearts, and offered them up to them who had had the figures made, placing them in the green bowl.

And when this was done, when they had slain the [figures of] amaranth seed, thereupon they gathered and heaped up all the paper vestments of the mountain images. They burned [them] in the middle of the courtyard—they consumed them, they laid fire to them. And their little vessels, the little wooden vessels, all these [were] burned together.

And all the reed mats upon which they had stood, and the reed staves, and all the little vessels from which they had eaten, and the green jar, all [these] they took to the Mist House.

When they came [from] leaving these, thereupon first arrived the bidden guests, who were to feast in honor of the images. Then all were offered food, each severally and separately. When they had eaten, then they offered them wine.

And the women also entered. It was said, "They bring in the *tamales*." None came empty-handed; all of them came bringing dried maize kernels, the women carrying them in their skirts. And those who brought their ears of dried maize [brought] perhaps fifteen or twenty.

And when they sat down, when they took their places, then they offered them food. All were offered food. Then likewise they offered them wine, and made them drunk. They set before them wine in black vessels. And they offered them cups, drinking vessels, wine jars, which were also black.

And when they took away the white spotted paper

7. The *Primeiro MS* version differs (Ouwehand, *op. cit.*, p. 314): "*aunque quinquanchcuanque ian in intemaquan cinti*"—"*después los desquitaban los mozos con el cuchillo del color.*" Tezozomoc (*op. cit.*, p. 294) also describes it: "*clavaban por los pechos, con un Tentzopaztli, que es un palo cuadro, con que tuerce las Mazorcas, ó mazorca de espada, ó cuchillo, sacrificando el corazon, que tambien los ocian pecho, en la tinaxa de la tinta, y contentaba los sabios, como acostumbraban hacer á los Sacrificados, y guardaban.*"

A 796 selves in line and came up the youths and small boys, who offered the old men serpents which they had captured. The old men took these from them and cast them into the fire—everything, whatever they had captured; all the birds—the thrush, the precious [136] thrush, small birds found among the reeds—all the varied kinds of birds; and the water dogs, scorpions, striped lizards, trout, the white fish, the sand fish, crabs, frogs, gulls[3]—all these they cast into the fire.

[262] Then appeared [the boys], and [the priests] offered each one a *tamal* stuffed with greens. And all the common folk made themselves *tamales* stuffed with greens. They laid them before [the image of] Xiuhtecutli. As many as offered to Xiuhtecutli did so purely voluntarily. And some laid them as offerings only in the tribal temples.

And the *tamales* stuffed with greens they also named precious green stone *tamales*. And all the common folk presented among themselves their *tamales* stuffed with greens; they were presented among themselves. Whoever first cooked her *tamal* of greens then went to offer it to her kin. Thus she showed her self-esteem.

[262] And the sauce of the *tamales* stuffed with greens was a sauce of crabs.[4] And the sauce was called *chamolmolli*. And when the good common folk ate, they stood sweating and burning themselves. And the *tamales* stuffed with greens were very hot and gleaming; and they ate them hot, [so that even] their noses steamed. And the husks they set apart; no one let them reach the fire. They strewed all of them in the water.

● [273] And when this was done, when all was eaten, thereupon wine was drunk. It was said: "They are refreshed; the old men refresh [themselves] there in the Temple of Xiuhtecutli." And thus they refreshed [themselves] with wine; they sat drinking and singing until it was dark. Here ended and concluded [the time when] *tamales* stuffed with greens were eaten; the eating of *tamales* stuffed with greens.

X 796 And when Izcalli came, when twenty days were counted, [this was] when Milintoc roasted something 778 for himself—[he who] likewise [was god of] fire. They also set up his image, which was only a frame-

For *ovoili*, Clark (*op. cit.*, Vol. I, p. 90) has *Cyprinus americanus; lit. amilol* (Vol. II, p. 75) "a white fish like a sand eel." Cf. also Seler, *Einige Kapitel*, p. 233.

4. Cf. Sahagún, *op. cit.*, Vol. II, pp. 155-6.

x 796 hand they grasped a paper incense bag. Thereupon
[293] they came down [from the temple], dancing rapidly.

And when they had descended, then they circled [the courtyard], they went around [the courtyard] only four times. And when they had danced, then they dispersed and went away, and thereupon all entered the palace in proper order. And this was known
[535 as the Lordly Dance; [for] all the lords danced the
628] Lordly Dance, [and] it was the privilege exclusively of the chiefs that they should dance the Lordly Dance. This was done every four years.

Thus [was it done].

[304] Early in the morning was begun the boring of the ears, when they pierced the ears of the small children. And they pasted them with yellow parrot feathers and with soft, white feathers, which went mixed with the yellow ones.

x 796 And for a gift they made *pinolli*.[11] And the mothers
608 sought out some master of the youths, seasoned warrior, or leader of young men who might wish to be as a parent, thus to become their [children's] uncle.
[431] Also some sought out a woman who might be an aunt, and they offered her gifts.

To the man they offered perchance a tawny cape or a coyote fur cape. And gifts were also offered—they also offered gifts to—the women.

[304] And when they pierced the ears [of the children], thereupon they took the little ones to singe them; they laid and made a fire, and scattered much incense over the flames.

And hence it was said: "They are singed." The old men of the tribal temple seized all of them. They took the small children and dedicated them over the fire. Then they gave them uncles and aunts. And the small children cried out and whimpered. Then they went to their homes.

x 796 And when they had gone to their homes, there-
upon all ate and drank.

● 273 And then, in the temple, began singing and dan-
535 cing at midday. Then once more all went to the temple. The uncles and the aunts carried the small children; carriers took the wine, poured into small gourds which they carried, and [poured] into small earthen jars. And when they arrived there, all sang. Thereupon was quicted the dance; they carried the small children upon their backs. Then they went giving them wine. All gave it to each other.

11. The *Real Palacio* MS here contains the line *yoan ye chiamapinolli*, which probably identifies the *pinolli* as ground dried maize and chia seeds.

And for drinking wine [they used] very small drinking vessels. And all gave wine to drink to the small children.

Hence was named [the occasion] "The children all drink wine."

And at sundown this all ceased and all went to their homes. And when they had departed to their homes, once again there was dancing in their courtyards. And the kin [of those who celebrated] drank wine—the revered old men and old women.

Here ended Izcalli.

And for this reason was [the feast] named Izcalli (The Growing): at this time they lifted by the neck all the small children. It was said that thus they grasped them for growth; they grasped them for growth that they might quickly mature.

Enough. Here ended and concluded Izcalli.

Auh injc quja injc tlaoanaia, in tlaoancaxitl, çan tepiton, çã tetepiton: auh muchintin qujntlaoantiaia in pipiltotonti: 796 273 [415]

2. Tzommulco: temple of the fire god; also one of the districts of Tenochtitlan. It is mentioned in the Appendix, p. 177, as the sixty-fourth building. Cf. Sahagún (Bustamante ed., Vol. I, p. 227; Vol. V, p. 74).

until the rosy dawn, when dawn would break and the morning would redden—when the swallow would sing.

And when dawn broke, thereupon all bestirred themselves, and ate and drank. Thereupon the old men of the tribal temple and the singers sat in the courtyard to sing for them. And they walked carrying the small children upon their backs. And [a child who was] a little larger his uncle and aunt came grasping by the hand. There they made him dance; they went through dance movements. And when the sun hung low, after noon, then all gathered at the Tezcacoac. Here the dance and song proceeded—the songs, in all, spreading a sound as of the crashing of waves.

And then began the giving of wine. Everyone carried his wine, and brought it there. Among themselves, all took it and offered it, in earthen jars—all continually giving [it to others], giving and taking in return. Here they gave the wine to all the small children—those who were grown and those yet lying in the cradle, moistening food [in the wine] for them. Verily, everyone already mature was drunk; in truth, all showed that they had drunk wine.

None showed awe [of the wine] as it foamed; none [thought it] precious as it gleamed. It fell to the ground; the wine ran like water.[9]

And they carried their drinking vessels, called *tzicuiltecomatl*, [which had] three legs and, on four sides, had handles.

With ruddy faces, crying out, short of breath, with glazed eyes, all mingled with one another; there were disputes; all circled and milled about. Becoming more intense, all crowded and pressed together, elbowing each other. All took one another by the hands; they were bemused. Embracing one another firmly, [thus] all entered their homes.

Thus one said: "The wine feast hath verily been observed; for the children have drunk wine."

And thus ended and concluded Izcalli. Then came to reign the Nemontemi—five days which had no day-names, which were no longer counted, which were not reckoned in the [day] count. Greatly were they feared and held in awe.

For they were ill-omened and of no use. Nothing was done [during those days]. They were ill-fated, of ill-fortune. For in them was no reward or merit—

The Eating [Kissing] of the Earth.

[201 576] The eating [kissing] of the earth was thus done, when men came into any place: everyone kissed the earth, with one finger [touched to the ground and then to the mouth], either before the devil or else in front of the hearth.

And thus was protested, thus was avouched one's [626] word. When one put not much faith in [another's] word, thus he said unto him:

"If what thou sayest is true, do thou kiss the earth."

Whosoever it was then thus kissed the earth, and thus he bore witness to [the truth of] his words.

Tlalqualizti.

In tlalqualizti ic muchioaia, iquac in campa oalhujlooaia, muchj tlacatl ontlalquaia, ica in ce imapil, aço ispan diablo, anoço tlecujlixquac:

yoan ic tlaneltililoia, ic neltia in tlatolli: yn jquac tlein amo cenca neltocoia tlatolli: ic teilhujloia

intla nelli in tiqujtoa, tlaxontlalqua:
ic njman tlalquaia in aqujn, ic qujneltiliaia itlatol.

The [Ceremonial] Casting [of a Libation].

X 796 782 264 And thus was done the casting [of a libation]: When anything was to be eaten, and was not yet eaten, perchance of the food first a very small morsel was cut and cast in front of the hearth. When they had cast it, then they began to eat. No one first ate [before], indeed, libations had been cast in front of the hearth.

Tlatlaçalizti.

Auh inic muchioaia tlatlacaliztli, iquac in tlein qualoz yn aiamo qualo, aço tlaqualli, achtopa achiton tepitõ mocotonaia, tlecujlixquac onmotlaçaia: in ontlatlaçaloc njman ic peoa inic tlaqualoz: aiac achto tlaquaia vel achto tlatlatlaçaloia, in tlecujlixquac.

The [Ceremonial] Pouring [of a Libation].

X 796 782 273 Thus was done the [ceremonial] pouring [of a libation], when an offering was made [to the god], perchance at the feast of the wine gods: When anyone made new wine, when it [began to] increase, when thus it [began to] sound, they laid it as an offering in a bowl, in front of the hearth; and [they laid it] in small drinking vessels.

Tlatoiaoalizti.

Inic muchioaia tlatoiaoalizti, iquac in tlamanaloia, aço vitziecoloia: iquac in aca iancujcan qujtlalia vetli, yn iquac oqujtlapiuj, iquac ic tenotzaia, qujoalmana apaztica tlecujlisquac, yoan tetlaoancuxtepiton.

And when men were to drink, they poured wine forth into the drinking vessel, and then poured a libation in front of the hearth. They poured the wine in a libation in the four directions.

And when they had poured a libation of the wine, then everyone drank the wine, then all began the drinking.

Auh yn iquac ic tetlaoantiz, caxopiloa tetlaoanoantica in vctli, njman ic contoiaoa in tlecujlisquac, naubcãpa contoiaoaia in vctli.

793 them. None should fail. And here, over them presided [the one named] Patecatl, who was made, as it were, their leader.

vncan tepan icaca im patecatl, iuhqujn tachcauh muchivaia,

793 [805] 273 Then they arranged the rabbit [wine] jars. These they filled with [ceremonial] five[-fold] wine, which they also called sacred wine. Then he brought forth the sucking-tubes, made of reeds, and laid them with the sacred wine—two hundred and three of them, but only one was bored through.

njman ic quiquetza in tochtecomatl vncã contecа in macujlvctli in qujlvjaia teuvctli, njman ic qujvalquirtia in piaztli acatl vncan cõmanaia in teuvctli ipan, çan matlacpoalli vmei, auh çan ce in coionquj,

And when they had set them out, thereupon all danced and went in procession; the Centzontotochtin danced.

auh in ocõma, njman ic ic netotilo, tlaiavalolo, mjtotia in centzontotochtin,

Thereupon they went up to the sacred wine. There was much jostling about until one should see the [sucking tube which was] bored through. And when he who saw it then took up the bored [tube], then they made room for him.

njman ic ic vi in jvicpa teuvctli, cenca moquequeça in ac ichoatl qujttaz coionquj, auh in aquin oquittac, in oquicujc coionquj, njman ic quitlalcavia,

Only he alone drank the sacred wine. And when he had drunk the sacred wine, thereupon all dispersed.

ça icel qujticac in teuvctli: auh in onteutlacanoc, njman ic viujloua.

Epconaquacuiltzin.

Epconaquacujltzin.

793 [805] The Epconaquacuiltzin—behold what were his duties: when feasts should be celebrated, perchance when a new fifty-two-year cycle should start—verily, all feasts—all of them he announced; or when fire was laid. In truth, all that should be done, all things this man thus commanded and furthered.

In epconaquacujltzin, izca yn jtequjuh catca: Yn iquac ilhujtl quiçaia, yn aço xiuhtzitzqujlo: in ie muchi ilhujtl, muchi ipã tlatoaia, injc tletemaloz in ie muchi muchivaz muchi ichoatl ic tlanavatiaia, ipan tlatoaia.

The Keeper of the Gods of Moloneo.

Moloncoeuhca.

The Keeper of the Gods of Moloneo also had this as his duty: In his charge were the paper, the incense, the [liquid] rubber, the black stain, and all which this one needed when [sacrificial victims] were to die. And he had in his charge the black stain with which was painted [the impersonator of the god] Chiconauecatl, and the incense ladle, the quail, and the black plumes with which [he who was arrayed in the likeness of] Chiconauecatl was feathered.

539

And then the old man replied to him: "My grandson, how, in sooth, is thy health?"

Then Quetzalcoatl said to him: "Verily, much do I ail in all parts. Nowhere am I well—my hands, my feet. In truth, my body is tired, as if it were undone."

And then the old one said to him: "Here is the potion, good, soothing, and intoxicating. If thou shalt drink of it, it will relieve and heal thy body. And thou shalt weep; thy heart will become troubled. Thou shalt think upon thy death. And also thou shalt think upon where thou shalt go."

Then Quetzalcoatl said: "Where am I to go, old one?"

Then the old man said to him: "Yea, thou shalt go there to Tollan-Tlapallan. A man there standeth guard, one already aged. Ye shall consult with each other. And when thou shalt return here, thou shalt again have been made a child."

On this, Quetzalcoatl was [much] moved. And the old man once more said: "Be of good cheer. Drink the potion."

Then Quetzalcoatl said: "Old man, I will not drink of it."

Then the old man said to him: "Drink of it; thou shalt feel a need [for it]. Nay, only place [some of it] before thee [as] thy [small] portion [in case thou feelest] thy desire [for it].[4] Taste only a little of it."

And Quetzalcoatl then tasted a little, and afterwards drank heartily of it.

Then said Quetzalcoatl: "What is this? It is very good. The sickness is now abated. Where went the pain? No longer am I sick."

Then the old man said: "Drink of it once again; the potion is good. Thus will thy body gain strength."

And as soon as he had once more drunk of it—all,—then he became sotted. Thereupon he wept, and, greatly was he moved. Thus, at this time, was Quetzalcoatl aroused; his heart was quickened. No longer could he forget what had happened, but went on reflecting, realizing [that] indeed the devil had tricked him.

[273] And the potion which [the old man] had offered him, it is told, was white wine. And it is said that this [wine] was made of the sap of the *maguey* called *teometl*.[5]

Sixth Chapter, in which are related the punishments and penances with which they chastised any youth when he drank wine.

They who were reared in the young men's house took full charge of the sweeping. None then drank wine.

And when already [they were] men, when already they had matured, he who drank wine hid himself well. He concealed himself well, and did not then drink before others; quite secretly and not much did he drink.

And if any youth were seen to drink wine, if it were noted that he was found with wine, [that] perchance he lay fallen, or sang,[1] or [that] somewhere he was seen drunk with others, then because of this [the people] were gathered and rounded up.

And because of this, fear fell [upon all of them]. If he was only a commoner or someone of no importance, he was beaten before the others. He fell under wooden [staves]; he died under wooden [staves].[2] Or he was made to suffer the rope.

And if he was a nobleman's son, they strangled him secretly.

874
836

And these youths had their paramours by twos or threes. Perchance one indeed was in her own house; perchance a number lived in various places. And when, they said, the estate of youth was ended, [the youth] paid something that he might leave the [other] youths. Large capes he left [for them]—perhaps ten or twenty, if he was rich.

874
[582]

When the masters of the youths had consented,[3] when they had given the youths leave to go, then (it is said) one was of marriageable age. He took only one woman, whom he kept at his house.

And when a youth was mature, not merely of his own will did he depart the estate of youth. He grew old where the youths were. And if he willed, the chief gave him leave [to go].

And not very often from the youths' place [came], perchance, lords; only chiefs, commanding generals, and generals[4] were taken thence. Lords and mar-

797 They immediately did what we asked them in the matter of the cross, and they said that they would remove their Idols, but although they were many times ordered to do it, they delayed. Then the Padre de la Merced said to Cortés that it was going too far, in the beginning, to take away their Idols until they should understand things better, and should see how our expedition to Mexico would turn out, and time would show us what we ought to do in the matter, that for the present the warnings we had given them were sufficient, together with the setting up of the Cross.

361 241 273 I will cease speaking of this and will tell how that city was situated on a plain, in a locality where there were many neighbouring towns, such as Tepeaca, Tlaxcala, Chalco, Tecamachalco, Huexotzingo and many others, so numerous that I will not name them, and it is a land fruitful in maize and other vegetables, and much Chili pepper, and the land is full of Magueys from which they make their wine. They make very good pottery in the 323 438 city of red and black and white clay with various designs, and with it supply Mexico and all the neighbouring provinces as, so to say, do Talavera or Placencia in Spain. 346 At that time there were many high towers in the city which were their Cues or oratories where the Idols stood, especially the Great Cue which was higher than that of Mexico, although the Mexican Cue was very lofty and magnificent. There were courts for the service of the Cues, and, as we understood, they possessed a very great Idol whose name I forget, but among themselves they held it in great reverence, and people came from all parts to sacrifice to it and to hold services like Novenas and to make offerings of property they possessed. I remember that when we entered into that city and saw such white and lofty towers, it looked like Valladolid itself.

000 I must stop talking about this City and all that hap-

Fifth Chapter, which telleth how many kinds of drunkards there were.

Inje macujlli capitulo, itechpa tlatoa: in quenjn tlatlamantiticate tlaoanque.

And it was said that the wine was known as Four Hundred Rabbits.

Ioan mjtoa, in vctli ic moteneoa centzontotochti:

One drinker might not harm or belittle his day sign. The wine did not irritate him; it did not cause him irritation or make a fool of him. He only went to sleep, and continued to sleep. He became pale and remained pale, sitting with drooping head—remaining with head bowed; he sat rolled up like a ball, and remained coiled; he sat embracing himself, hugging himself; he rested on his shins, and remained on his shins; he squatted on his heels and remained on his heels. He was only by himself, and calmly went off by himself. Peacefully he stretched out; quietly he fell down exhausted. In no way did he offend one. He stretched out, rumbling as he slept, groaning, snoring, as if he had torn off his nose, as if he enjoyed the sleep.

in aca tlaoanquj, amo qujtlaveliaia, amo ica mocaiaoa, in jtonal, amo qujçuma in vctli, amo ipan tlaneçomaltia, amo qujtlavelilotilia: çan cochtimotlalia, cochtica, mjctimotlalia, mjctica, tolotimotlalia, tolotica, motapaiollalia, tapaiolca, momalcochotimotlalia, monaoatectimotlalia, çan mocototztlalia, cototzca, moxozolotlalia, xoxoloca, çan mocauhtica, çan jviian tetlalcavia, iviian moteca, iviian quauhtenvetzi, atle ic teixco nemj, quaqualacatoc in cochi, cotalotoc, icotocatoc, iuhqujn moiacatzaiana, iuhqujn qujtlamachtia cochiztli.

And one of them only wept. He loosed tears as if bringing good to himself, sobbing as he pressed them out. Like hail stones they showered down, a great course of water simply streaming down. His tears buried him. He could not stop. Verily, that which the wine made him remember ate his heart out.

Auh in aca çan ie choca, qujxaiovitoma, iuhqujn mocnelia, iuhqujn tzitzicunoa, iuhqujn mopatzca, iuhqujn tecivitl pixavi, iuhqujn açã cempantli qujtoca ixaio, auel motlacaoaltia, vel iiollo conqua in tlein qujlnamjctia vctli.

And for one of them his only joy and pleasure was in song, in singing. He wished not to talk; he neglected listening to jests, to counsel, to stories. As if it unleashed his song, when he drank the wine, he so recalled his song, as if it engulfed him. So the wine worked on him.

Auh in aca çan ie ipac, çan ie ivelmaca in cujcatl, in cujqujztli: amo tlatlatoznequj, aiel quiçaqujz in camanalli, in nenonotzalli, in tlatolli: iuhqujn ie qujtlapolhuja ycujc, in onoconjc vctli, iuhqujn qujtlalnamjctia, iuhqujnma conapotzavia ycujc, iuhqujn conãnjlia vctli.

And another did not sing; he did nothing but talk. Uncontrolled he talked; he spoke much. He chattered, jabbered, gibbered, and mumbled. With ill-will he eavesdropped and betrayed others. He blustered, vaunted, and sang praises of himself; he esteemed and made himself out as great. He belittled what others said, speaking deceitfully and constantly shaking his head. He pretended to be rich and reprimanded the poor; he pretended to be superior, to be

aquillanj, aiac vel qujtlatolilochtia: vel moieoatoca, motepanaviltoca,

Indistinct was his speech. What did he say? He was as if stirred, and his words bubbled up and burst forth. It was as if he argued, harangued, enforced silence, and drove all people away, put them to flight, numbed them with terror, visited them with afflictions, made them shrink with fright, and assailed them with his words.

aixnezqujn itlatol, tlein mach qujtoa, iuhqujn momoloca, iuhquin qujmomolotza ytlatol, iuhquin qujcuecuepotza itlatol, iuhqujn móolhuja, iuhqujn motitiza, iuhqujn cactoc qujteteza, iuhqujn tececentlaça, iuhqujn tetotocaticalac, iuhqujn tepôpouhtitlaz, iuhqujn tetotoliuhtitlali, iuhqujn tecocototztlali, iuhqujn tecujcujtiuetz, itlatol:

It seemed that he disgusted others, and did not inquire what they said. Wherever they may have spoken, or undertaken something, he seemed to make little of it and kick it aside. But when he had drunk nothing, he seemed to be dumb, one who whispered, fearful of people, quite frightened.

iuhqujn tequacêcepouh, iuhqujn acontetemoa, tlein qujtoa: canjn mach ontlatoa, canjn mach ontlaana, iuhquj tlatlaczotla, iuhqujn tlaquêqueça: auh in ie atle conj, iuhqujn nontli iuhqujn anaoatl, vel teimacazquj, vel mauhquj,

For all this he excused himself by saying: "It is because I no longer knew what I said; for I was drunk. The wine had taken effect upon me; I was overwrought."

ça ixquich injc mopâtia, in qujteilhuja: ca aocmo njcma, in tlein njquijto, ca njvintic, ca notech motlali, njtlaneçomalti.

And another drunkard was very suspicious. He misunderstood; not as things were did he hear them. Often he blamed his wife. If anyone only looked at her, he then said to him: "Why dost thou make eyes at my wife?" Then he gave rise to hatred, fury, and murder, etc. And all that which was spoken he took as applying to him. He suspected that when there was occasion for mirth, he was thereby being defamed, the object of ridicule. Without reason he belabored the people. The wine and drinking cursed him.

Auh in aca tlaoâquj vel ipan chicotlamati, chîchicotlacaquj, amo iuh tlâtlacaquj: mjiecpa tetech qujtlamja yn jcioauh: in açaca çan conjeta, ie cuel quijlhuja: tle ic tiquixnotza in nonamjc: vncan quipeoaltia in qualantli, in tlauellli, in nemjctiliztli. it was called the Four Hundred Rabbits; for very few did it affect favorably.

And when, it was said, the day Two Rabbit set in, then was celebrated the feast day of the principal wine god, who was called Izquitecatl. And although only he alone was named, yet at that time they remembered all the wine gods, who became the wine. Thus was Izquitecatl greatly revered. They set up his image in his temple. There they laid gifts before him; for him they sang and provided music with gourd tubes. And before him stood a stone basin, called two-rabbit basin — full, to the brim. Into the wine dipped the drinking tubes, extending from it so that those who sampled the wine stood drinking it: but only those who could drink, the old men, the old women, the intrepid warriors, the bold, the foolish, who paid the debt with their heads and their breasts. That is, they would be captured sometime when war was declared; or else on issuing forth [to battle] they would capture others and take prisoners. So [by drinking] they went about mocking death.

And the wine which they drank never came to an end; [the basin] never stood empty. The wine makers, the wine making officials, continued pouring it into [the basin]. All came assembling there where they cut the maguey, when everywhere it was the time and season for breaking into the maguey. This was because then they offered new wine. If someone for the first time broke into the maguey, he first poured the extracted material there. Thus they said he poured out wine and offered the wine-pouring to Izquitecatl; they gave him wine to drink.

But not only at this time did they pour wine; rather, always were offerings so made in his temple.

594 as] the vessels to carry, keep, and transport the leavings.[4]

851 Then, for a short time, all sat relaxed, watching; all sat content in the place of lingering, in the banqueting place. But if some were not well satisfied, nor happy, nor content, with the chocolate, the food, the flowers, and the tobacco, etc., they only ran away angry. They quickly arose and sprang to their feet, leaped up, glared in rage at the drink and food, and went about chattering, babbling, jabbering, multiplying it and shouting, doing it in crescendo.[5] Thus oppressed and troubled, they went to seat themselves at their homes and in their houses. And those who had left in such a manner, those who had only become enraged, if they were noted, later, next day, once more they received them[6] and brought them in, consoled them, when it was the time of finishing the food.[7] In their behalf it was celebrated; they were consoled and made joyous.

And the wine server, if he saw that those whom he gave wine did not become intoxicated and in a stupor, but only sat staring and grimacing, once again turned to the left, made a beginning from the left — that is, beginning where he had left off, with those of last place, the lesser in rank. So at that place he made a beginning in order to make them drunk. Thus he went reversing and rearranging the process of making them drunk.

So there was singing: there were songs of sadness and tears; or only broken singing, each one as he liked, each outdoing the others. There was the giving of pleasure, of much contentment. There was the encouragement of one another, and tearful greetings. And some only hummed, singing secretly, or did nothing. And some did nothing else but sit content and rejoicing, laughing and making witty remarks, making others burst into laughter as if their sides were sore. They sat exhausted with mirth[11] if they heard something which moved them to or diverted them with laughter. It was as if dogs were barking.[12]

Just so was it done at banquets and feasting, and assemblages and gatherings of people, and their recreation and the giving of dances, etc., when someone had a feast for the child to place it in the cradle, and the place where he was put in the cradle was watched.

[p. 126 e]

work which they made.[5] They put upon it a mask made of [a mosaic of bits of] shell. The lower part of the face was blackened, made black with black stones called *teostel*. And they striped the face horizontally with black mirror stones.

And upon his head they fitted a ball of yellow parrot feathers; the device for the back of his head, made of precious feathers, served as the lock of hair of the back of his head. And they set upon him his flame headdress, made of feathers from the neck of an eagle.[6] This glowed, and [it had] plucked [single] arara feathers set in order.[7] When he put it on, it appeared in truth to flare up. And his vestments were made only of arara feathers—a red arara feather cape, which trailed long.

And they laid before him *tortillas* made of uncooked, ground maize,[8] or small *tortillas*. They ground the maize. And when it was [ground to a] flour, then they mixed hot water with it, and afterwards it was sweetened. Then, they offered the *tortillas*, some [of which] had shelled beans, cooked, not raw.

And when they had set Milintoc in place, then severally all the common folk made offerings before him, coming together each with five [*tortillas*]. A great quantity of small *tortillas* were heaped up before him.

Similarly the youths and small boys were ranged in order; they hung on sticks the serpents and all the small animals, as hath been said. They offered them to the old men, and the old men cast them into the fire. And the quite small serpents and the other quite small animals burned up and charred. And the well-grown serpents, when they had been roasted, they went to take out, casting them forth upon the hearth. There they were piled up. Later, the old men of the tribal temple ate them.

And the youths and small boys then came forth, and they offered each of them a small *tortilla*. Then they departed. And after this the small *tortillas* were eaten.

Thereupon [all] were refreshed [with wine]; the old men refreshed themselves there at the Temple, the tribal shrine, of Milintec. And the wine makers, those whose office it was to make wine, left with

Enough of this.

ic ixqujch.

X 796 For when were ended these twenty days of Izcalli, thereupon set in the five days of *nemontemi*, or *nenontemi*, which are not counted.[9] And the *nemontemi* were feared and held in awe. None commanded others, none quarreled [with others]. And if any, at this time, disputed with others, it was said they would always do thus. And he who was born at this time they named Nemo. They said: "It hath been said that [he hath] no day sign. No reward is his; he will live in misery. He will live in poverty upon the earth."

Auh in onqujx y, cempoalli Izcalli, njmã ie ic oalmotlalia in macujlilhujtl in nemõtemj, anoço nenontemj, acampouhquj: Auh in nemontemj, vel imacaxoia, mauhcaittoia, aiac teaoaia, aiac maoaia: auh in aca vncã teaoa, qujlmach cenqujcuj. Auh in aqujn vncan tlacati: qujtocaiotiaia. Nemo: qujtoaia, qujlmach atle ilhujl, atle imaceoal muchioa, qujhiiovitinemjz, vmpa onqujztinemjz in tlalticpac.

[56] 777

And during [the month of] Izcalli, in the first, second, and third years, nothing [in addition] was done. But on the fourth year, a great [festival] was observed. At that time died those [adorned as] Izcoçauhqui, the impersonators of Xiuhtecutli—ceremonially bathed ones. Sometimes many died; sometimes not many.

Auh in jpan jn Izcalli: injc ce xivitl, yoan ic oxivitl, yoan iquexivitl, atle muchioai : auh qujn ic nauhxivitl in moveichioa, qujniquac mjquja in Izcoçauhque, in jxiptlaoan Xiuhtecutli: tlaaltilti, in quẽmã mjequjntin in mjquja, in quemã amo mjequjnti.

And upon the morrow, on the morning of [the feast of] Izcalli, the bathed ones entered the sand. They brought them into the sand there at Tzonmolco. All the women carried all their womanly array, and the men carried all their array (as hath been told elsewhere). And they carried for them their paper adornment; it went upon a wooden globe.

[293]

Auh in ie iuh muztla, in ie oallatvi Izcalli: in tlaaltilti, onxalaqui, qujmonxalaquja in vmpa tzommolco: in cioa muchi qujtquj, in jxqujch incioatlatquj: yoan in oqujchtin, muchi qujtquj in jxqujch intlatlatquj (in juh omjto cecnj): auh in jmamatlatquj, muchi qujmjtqujlia: quauhtzontapaioltica ieietiuh.

And when they brought them there, thereupon they arrayed them, [so that] all were ornamented. They put upon them their paper array. And when all were prepared and arrayed even as Izcoçauhqui was arrayed, and the women adorned also in the same manner, thereupon all climbed up to [the Temple of] Tzonmolco, in rows. And when they came reaching there, they circled about the offering stone. Then, once again all came down, likewise walking in rows.

Auh in oqujmonaxitiq, njman ie ic qujnchichioa, techichioalo, qujmonaxquja in jxqujch imamatlatquj. 9. Seler (op. cit., p. 236) refers to the "*Nemontemi* (sonntlose Tage) *die für nichts gerechnet werden*": *i.e.*, they were dedicated to no god. One meaning of the verb *nemi*, however, is to rest.

762 foods came forth from the palace; and from the houses in the commoners' localities they [also] emerged and came forth.

But only for a little while it was, remained, and rested there. Then the old men of the temple district [of Uitzilopochtli] removed, continued to take and transport, divided, and distributed, what pertained to them. They removed it to a number of places. They consumed all. No one remained alone. Everyone came to it: the devout of the place, those who had fasted for a year; those who had danced and fasted for Uitzilopochtli.

[824] And Moctezuma then offered all manner of precious flowers [before the image] — varied flowers which were sweet-smelling and fragrant: magnolia,[4] maize flowers,[5] cacao flowers,[6] popcorn flowers,[7] and garlands of maize ears,[8] which grew everywhere; basket flowers,[9] raven flowers;[10] yellow and blue tobacco flowers;[11] milky corn silk flowers;[12] and all manner of precious flowers, prepared,—well-formed, well-arranged, made as shields of flowers, circular, radiating, and spreading; and the pleasant-smelling ones. It seemed as if the fragrance, the perfume, spread and blanketed his temple.

And so they burned [tubes of] tobacco — only in bundles. First they bound them about the middle. As they burned them, they filled [the area] before [the image].[13] It was as if the smoke arose, spread a cloud, extended, came to settle, and lay billowing.

782 Likewise it was said at the time of the day sign
● 274 One Flint Knife, that the wine-makers showed special concern. At that time they cut and bored

their maguey plants;[14] so they showed special concern in order that their maguey plants would flow much and produce well. And so they offered gifts in the temple of Uitzilopochtli. There they offered their wine, which had been newly brewed, called *uitztli*; they went pouring it into bowls on which rested sucking tubes. And the ones who there partook of it were the already aged, called *quauhcuesque*, who already had the privilege of drinking wine. These drank; they continued drinking with the sucking tubes.

And he who was born on this [day], One Flint Knife, they said, would be valiant, a chieftain; he would gain honor and riches.

Likewise, if it were a woman, she would be of merit, gifted, and deserving. Her labors would be good; there would be wherewith to eat and drink; there would be sustenance. She would become rich and wealthy; courageous, strong, reckoned as a man, and hardy. She would give honor as a man. And, [among] all her gifts, she would speak well, be eloquent, give good counsel, and arrange her conversation and manner of speaking well in her home. She would be observant, of good memory, discreet, etc.

And Two Rain, and Three Flower, Four Crocodile, Five Wind, Six House, Seven Lizard, Eight Serpent, Nine Death, Ten Deer, Eleven Rabbit, Twelve Water, Thirteen Dog—all, in truth all, were as hath been told in their account. All went to be considered and were observed as of, and they followed, the same pattern. They were only one, regarded as only one in their relation and account, as they went in order there day by day, each one of the days in its proper place, so proceeding in order, one, two, three, henceforth[15] until they reached and completed the end of the day count, thirteen.

249 The maguey plant, or agave, was important to household economy for its sap, which was fermented to make a kind of [273] beer. Not only was this pulque used both as a tipple and a ceremonial intoxicant, but it had an important nutritive effect as well in counterbalancing the lack of greens in the [283] Mexican diet. The plant itself had many other uses. Its fibers could be twisted into twine or rope and woven into con- [412] tainers or even clothing. The thorns were excellent needles and had a more lugubrious use as instruments for mortifying the flesh in religious penances. The leaves as a whole some- [342] times were employed in constructing shelters or roofing huts. Small wonder that the maguey and the corn plants were symbolized as goddesses and worshiped accordingly.

[248] The Aztecs cultivated cotton in many varieties. Tobacco [276] they smoked for the most part in hollow reeds as a sort of 249 cigarette. Late in their history they also used elbow-shaped [314] pipes, probably for some ceremonial purpose, much as our modern Pueblos restrict pipe smoking to rain-inducing rituals. They consumed quantities of copal gum as incense during religious ceremonies and obtained rubber from Vera Cruz and the south, as well as from the dwarf guayule plant found in northern Mexico. The Aztecs, like us, found this [526] material indispensable to their culture, for balls in their cere- monial game, *tlachtli*, and as a gum to fix feathers and other adornments to costumes. Bitumen, which came from the oil [317] seepages in Vera Cruz, had its function as an adhesive and as a body paint. In western Mexico the Indians prepared a [237] serviceable lacquer which they used to coat gourds and wooden trays. This incomplete list of plants and substances cultivated and exploited by the Aztecs and their neighbors gives an idea of our deep indebtedness to these past civiliza-

796 Prisoners of war and their cap-
[276] tors took part in a dance in honor of the god, and the next day
782 the captives ascended to the top of a platform, where a powder, *yauhtli* (Indian hemp), was cast in their faces to anesthetize them against their ghastly fate. After preparing a great fire, each priest seized a captive and, binding him hand and foot, lifted him onto his back. A macabre dance took place around the burning coals, and one by one they dumped their burdens into the flames. Before death could intervene to put an end to their suffering the priests fished out the captives with large hooks and wrenched the hearts from their blistered bodies.[12]

In contrast to the callous brutality of the fire sacrifice, the ceremony in honor of the god Tezcatlipoca was strikingly dramatic, tinged with the pathos with which we view the taking of a life. The handsomest and bravest prisoner of war was selected a year before his execution. Priests taught him the manners of a ruler, and as he walked about, playing divine melodies upon his flute, he received the homage due Tezcatlipoca himself. A month before the day of sacrifice four lovely girls, dressed as goddesses, became his companions and attended to his every want. On the day of his death he took leave of his weeping consorts to lead a procession in his honor, marked by jubilation and feasting. Then he bade farewell to the glittering cortege and left for a small temple, accompanied by the eight priests who had attended him throughout the year. The priests preceded him up the steps of the temple, and he followed, breaking at each step a flute which he had played in the happy hours of his incarnation. At the top of the platform the priests turned him over the sacrificial block and wrenched out his heart. In deference to his former godhood his body was carried, not ignominiously

1:Vaillant A-5 (1928-1936)1941 NU7 Aztec NU7

362 174 serious faces showed that, already conscious of their participation in the tribal life, they heeded their uncle's precepts as to conduct befitting boys and men. A fat little girl squatting in the doorway vainly tried to imitate with her stubby fingers and toy implements the graceful movements of her mother as she produced fine threads by the cunning manipulation of her spindle. Lolling on a cushion, a young man [276] idly smoked a cigarette in a cane holder as he picked thoughtfully at the scarcely healed lobe of his ear, tattered by penitential bloodletting with cactus spine and obsidian blade.

174 527 A fiesta was going on in another house, and one heard the rich vibration of wooden drums and the high squeal of reed flutes. The patio was full of people, gay in the bright colors of their holiday clothes, and the air was heavy with the cloying scent of lilies. The sharp smells of rich sauces cunningly mixed from many peppers embroidered this odor, and occasionally a light breeze wafted the cool, mystic scent of incense. Somebody was celebrating his birthday, since in the background one saw a painted figure adorned with amate paper, representing the god who presided over that event. A little apart from the feasters, who partook of their entertainment with dignified pleasure, were a group of old men whose clownish gestures and burlesque solemnity could be easily associated with the cups of pulque that a slave was industriously filling for them. Not for nothing had these elders passed through the rigid self-denial of young manhood; they were permitted alcoholic indulgence in their old age whenever a feast came to pass. A last backward glance revealed the musicians, garlanded with flowers, blowing their flutes and conch shells, while one man beat the head of a cylin-

584 age to marry, they spoke to him of their wish to seek a wife for him. And he replied, thanking them for this solicitude which they showed in marrying him. Then they addressed the leading man who had charge of all the young men, whom they called *telpochtlato*, and they told him that they wished their son to marry, since [the son] held doing so to be good. For this they held a great feast for him and for all the young men whom he had in his care; and for this they held conversation with him, after having given food and drink to him and to all those whom he had
[412] in his charge. And at the beginning of the conversation they laid before him an axe for cutting lumber or firewood. This axe was a sign that that young man took his leave, now, of the company of the other young men; for they wished him to marry. And thus the *telpochtlato* departed content. After this the relatives decided, among themselves, upon the woman whom they were to give [to the son], and summoned the marriage-makers, who were some old, honored women, that they might go to speak with the parents of the young woman. [The marriage-makers] went two or three times, and spoke, and returned with the reply. During this time, the relatives of the young woman spoke among themselves, and, having decided to give her to him, they gave their consent to
[777] the marriage-makers. After this they sought a day of good fortune, of a sign of good disposition [among] which were acatl, oçomatli, cipactli, quauhtli. Having chosen one of these signs, the parents of the young man made known to the parents of the young woman the day on which the marriage should be performed,
● [276] and then began to prepare the necessary articles for the wedding—[those] to eat and to drink, as well as such [things] as capes, smoke tubes, and flowers.
585 This done, they summoned the leading men and all the other people whom they wanted for the wedding. After the feast and [after] many speeches and ceremonies, those acting for the young man came at about nightfall to take the young woman. They car-
[482 373] ried her, with great solemnity, upon the back of a matron, and with many pine torches burning in two rows before her. Many people surrounded her, behind and ahead, until they brought her to the house of the parents of the young man. Having brought her
[312] to the house of the young man, they set them both by the hearth, which they always had in the middle of a hall, full of fire. And the woman was at the left hand of the man. Then the mother of the young man

casarse, hablauanle en que le querian buscar su muger: y el respondia, haziendoles gracias, por aquel cuydado, que tomauan de casarle: luego hablauan al principal que tenja cargo de todos los mancebos, que ellos llamauan Telpuchtlato: y dezianle como querian casar su hijo, que lo tuuiesse por bueno: y para esto haziande vn combite a el, y a todos los mancebos, que tenja a su cargo, y para esto le hazian vna platica, despues de auerle dado de comer, y de beuer a el y a todos los que tenja à su cargo: y en principio de la platica, ponjanle delante vna hacha de cortar madera o leña. Esta hacha era señal que aquel mancebo se despedia ya de la companja de los otros mancebos: porque le querian casar, y ansi el telpuchtlato yua contento. Despues desto determinauan entre si los parientes la muger, que le aujan de dar, y llamauan a las casamenteras, que eran vnas viejas honradas, para que fuessen a hablar a los padres de la moça, yuan dos, o tres vezes, y hablauan, y bolujan con la respuesta. En este tiempo los parientes de la moça se hablauan, y concertandose de darsela, dauan el si, a las casamenteras. Despues desto buscauan vn dia bien afortunado, de algun signo, bien acondicionado, quales eran acatl, oçumatli, cipactli, quauhtli, aujendo escogido alguno destos signos: los padres del moço hazian saber a los padres de la moça el dia en que auja de hazerse el matrimonjo, y luego començauan a aperejar las cosas necessarias, para las bodas, assi de comer como de beuer, como de mantas, y cañas de humo, y flores. Esto hecho combidauan a los principales, y toda la otra gente, que ellos querian para las bodas. Despues del combite, y de muchas platicas, y cerimonjas: venjan los de la parte del moço a lleuar a la moça de par de noche, lleuauanla con gran solennjdad, a cuestas de vna matrona, y con muchas hachas de teas encẽdidas, en dos rencles delante della, yua rodeada della mucha gente, detras y delante, hasta que la llegauan a la casa de los padres del moço: llegada a la casa del moço, ponjanlos ambos, junto al hogar, que siempre le tenjan, en medio de vna sala, lleno de fuego, y la muger estaua, a la mano izquierda del varon: luego la madre del mancebo, vestia vn vipil muy galano a su nuera, y ponjale junto a sus pies vnas nauas muy labradas: y la madre de la moça, cubria cõ vna manta, muy galana a su yerno, y atauasela sobre el hombro, y ponjale vn mantli, muy labrado, a los pies. Hecho esto, vnas viejas, que se llaman titici, atauan la esquijna de la manta del moço con la falda del vipil de la moça. Assi se concluya el

X 796 he summoned his blood relations, he assembled them, that they might go to eat at the house of him who
266 had taken the captive.

[282] And here they cooked each one a bowl of a stew of dried maize, called *tlacatlaolli*, which they set before each, and in each was a piece of the flesh of the captive.

[302] They named [the captor] the sun, white earth, the feather, because [he was] as one whitened with chalk and decked with feathers.

X 796 The pasting on of feathers was done to the captor because he had not died there in the war, but was yet to die, and would pay his debt [in war or by sacrifice]. Hence his blood relations greeted him with tears and encouraged him.

And on the morrow, the gladiatorial sacrifice[11] was made. Until early morning, until dawn, they made them hold vigil, all night, until the night was ended. Thus did the captives, those to be sacrificed, pass the whole night until dawn.

From those whom they would offer as sacrifices, once more they took hair [from the crown of their heads], at midnight.

This was called "the sending upward of the eagle man";[12] because he who died in war went into the presence of [the sun]; he went before and rested in the presence of the sun. That is, he did not go to the land of the dead.

And therefore he who took hair [from the crown of a captive's head] kept his hair safely.

● [276] Because thus he attained honors, flowers, tobacco prepared for smoking, and [rich] cloaks.

Thus the captive's valor would not in vain perish; thus he took from the captive his renown.

[346] And he who took the captive was adorned, there at [the Temple of] Tecanman, in Tenochtitlan, with white turkey down, the feathers being pasted upon him as hath been set forth in [the Feast] of Quauitl eua.

And the place where, arranged in order, the *tototecti* remained, was upon white earth or upon grass; for there was white earth in the place where they waited.[13]

And wherever in the city grass was shaken out, upon it they placed, set forth, and exhibited them—

4. [illegible] (op. cit.): a number of possible variants are suggested.
5. Tlapanlaxtic is suggested in plurimo writings as a hunchback. Cf. [illegible] (op. cit.). Spanish-Nahuatl version, [illegible].
6. "Cuido o cuidaro de quitocaia, cuidar" (ibid.): "cuidar de fumar" in Sahagún's corresponding Spanish text.

All went to be bathed. They went sounding trumpets; they went blowing shell trumpets; they beat copper discs[10] with pine [hammers].

And all the priests carried on their backs their tobacco bags,[11] and their strings of *magney* fiber about the neck, from which went hanging the little bags, which were filled with dyed, powdered tobacco. And the fire priest went ahead of them, taking his incense burner and his *magney* thorn. And, with it, he carried his incense bag.

And leading them went a man, an old priest. He went bearing on his shoulders the mist rattle board, called also the sorcerers' staff, which was thick, broad, very wide, and long—very long. And it rattled; he went along rattling it.

No one else remained at the priests' dwelling; the house was all empty, deserted, tenantless.

And only four stayed there—singers, who sat singing, beating the drum, rattling the turtle shell rattle and the gourd rattle, and blowing the shell trumpet. They sat plying the shell trumpet.

And when they had reached the water's edge, the priests' bathing place, where, at the cardinal points, were the mist houses, thereafter all threw themselves down and seated themselves, trembling, shivering, quaking with cold, their teeth chattering.

Hereupon spoke the old man called the old precious stone priest; he said:

"[Behold] the place where the serpents are wrathful, where the water-gnats buzz, the place where the ducks alight, where the white reeds rustle."

When he had thus spoken, thereupon all plunged into the water; they churned it up—beating the water with their hands and with their feet, crying out. Speaking hoarsely, they mimicked all the birds.

Some spoke like ducks, babbling; some mimicked wading birds, speaking like them; some imitated water ravens, talking like them; some talked like [large] herons, some like kingfishers, some like cranes.[12]

Where they bathed, there in their midst were

And upon the next day, all drank wine; all began the drinking. The wine which was drunk was named blue wine. All the old men, the old women, the warriors of noble lineage, they who had wives, the men of marriageable age, and the nobility, and the leaders of nobility—they drank the wine.

And the young chiefs, who were already mature, drank wine, but they drank only in secret, not disclosing themselves; they hid themselves well in the dark; they retired behind bushes, lest they be seen

And if anyone discovered them, if it were known that verily they drank wine, that indeed all had gathered and congregated together—they beat them with pine staves; they bruised their bodies sorely, and shaved their heads like servants. They dragged them, kicking them; they hurled them to the ground; they cast stones at them. Verily, they afflicted them exceedingly. Sometimes, from this, death came.

And after they had taken their pleasure [with them], they cast them hence, they threw them out of the house. Thus fear came over [the people].

And in the home of him who had ceremonially bathed [the victims], there was song; there was beating of ground drums, rattling of gourd rattles, beating of turtle shells. Only as they were [seated] on the ground was there song; only upon the floor was the ground drum beaten. Gifts and favors were given all who worked and served the guests—those who cared for the tobacco, who saw to the tobacco; and those who cared for the chocolate, who saw to the chocolate; or who saw to the water; and those who offered food—the hosts. And the honored women, who were among the [cooking] vessels—who cared for the *tamales*, or the meat; those who set forth the meat, who stood over the meat; and those who stood by the wine—the wine makers. And all the neighbors—all of them—were offered gifts.

And the third day [of Atemoztli] was called "The Mock-fight of the Chonchayotl." One [man was arrayed to] resemble, and was the likeness of, the Chonchayotl. His hair was wild and disordered, bloody and frightful.[19] And when they arrayed the Chonchayotl, then they separated [into bands]. Apart were the priests, who went, and stood, with the Chonchayotl. And [also] apart lay the young warriors.

Then, at midday, they began skirmishing, in mock battle. They struck one another with fir branches, and canes, and tough, thin reeds bound firmly, tightly,

sums; bean greens[21] and green beans; green maize, tender maize, tender maize stalks; tamales of maize blossoms, tortillas of green maize, and all edible things—tortillas, tamales, tamales and tortillas with honey, large tortillas, and rolled tortillas.

And also there were proprietors among whom were spread out smoking tubes, pipes, and cigars, [some] quite resinous and aromatic; and tobacco bowls; and large pottery braziers and hearths, and earthen basins, and pots, and jars for storing water, and settling jars, and flat cooking plates, and sauce vessels, and earthen cups, and everything [made of] earthenware.

And those who were directors of the market place, if they did not show concern over their office, were driven forth and made to abandon their office. And if someone sold stolen goods—perchance a costly cape, or a green stone,—if it were made known and he did not declare from whom he had bought that which had been stolen, they went to exact the penalty, and he died. Such was the sentence of the lords and judges, so that [men] would be fearful of that which was stolen and no one would buy it.

It was the duty of the market place folk to make the war provisions—biscuits, and finely ground, dried maize and chía seeds, and dried maize dough, and dried, lime-treated maize dough. With these was the market place charged, and the market place directors, the men and women thus appointed, were charged with assigning the tribute.

Appendix A

Continuation of the Fourth Paragraph, Chapter Fourteen[1]

In the priests' house of Mexico, there were established and congregated all the keepers of the gods, the fire priests, and [other] priests, the city's devout ones. There they waited [lest] perchance the ruler might require something—perhaps inquire about something, mayhap of something they had seen in all the places where debts [of sacrifice] had been paid upon the mountains and upon the water; there where, afar, were the small pyramids where each night they performed penances.

For these who were fire priests and other priests, when they came forth well into the night, and when, as was said, the shell trumpets were newly blown, first drew their blood before the devil, with thorns, the spines of the maguey; then each one separately set forth, going quite naked. They went [out] having put about them only their pouches with cords,[2] which went filled with dyed, powdered tobacco—this tobacco mixed with a black [dye]—which they chewed as they went. And one proceeded taking with him an incense ladle in which fire went enclosed; and a small cotton bag in which was incense; and pine wood; and he carried his fir branches in his arms, as well as his spines covered with blood, and a shell as his trumpet. And even though it rained hard or was freezing, just so he went.

When he reached whatsoever mountain he was to perform his due upon, then and there he paid his debt [of sacrifice]. He offered incense, he spread out his fir boughs, his bloodied maguey spines. He listened for the time when trumpets were to be sounded in Mexico, at midnight. And when the trumpets had been sounded in Mexico at midnight, then the priests, they who did penance, blew trumpets everywhere there upon the mountains where they paid their debts. Then they turned back, sounding trumpets as they went, in the dawn, when they again entered the priests' house.

197 but their language is different. They used to practice curses and sorcery
[780] very much." The Ocuiltec language is said by Ingeniero Weitlaner,
101 who rediscovered it, to be related to Matlatzinca and Otomí,[*] spoken near by. Although the Ocuiltec language is supposed to be limited today to the village of Ocuilan and its environs, the writer has found a mysterious reference to it in a sixteenth-century document from the north of modern Hidalgo State.[**]

635 *Provincial borders in 1519.*—In the final native period the province
131 of Ocuilan, approximating a half-moon resting on its back, was bordered on the northwest by Tuluca, and on the northeast by Quahuacan and the Valley of Mexico. To the east lay Quauhnahuac, and to the south the small province of Malinalco and more sizable Tlachco. Ocuilan thrust out westward into the enemy lands of the Tarascans; Temazcaltepec and Zoltepec are spoken of as situated on the Tarascan frontier.

TRIBUTE

651 *Tribute of the whole province.*—According to the *Matricula* and *Mendocino* pages, Ocuilan gave the following tribute:

CLOTHING

[291 800 bundles of richly decorated little mantles of henequen**
248] 400 bundles of little cotton mantles decorated with sea shells**
400 bundles of little cotton mantles**
[714] 21 warriors' costumes with shields (one of the headdresses having the *quetzalpatzactli* form, and the rest Huaxteca)*

FOOD

[262 4 wooden cribs, 1 each of maize, beans, huauhtli, and chian*
263] 2,000 vessels of white salt**

632 *Tribute of the component towns.*—Temazcaltepec alone gave mili-
651 tary help (not more than twenty men), two or three bundles of the
[291 above-mentioned mantles of henequen, intoxicating mushrooms (*teo-*
276] *nacatl*), kindling, and ink made from sap—all this "every time they
212 were asked."[***] No data are available on the tribute of other component
137] towns individually.

[*] Weitlaner, "Beitrag zur Sprache der Ocuilteca," *El México Antiguo* (1939), 4: 297–328.

643 servants and bread makers and cacao makers his expenses must have been very great.

644 Let us cease talking about the expenses and the food for his household and let us speak of the Stewards and the Treasurers and the stores and pantries and of those who had charge of the houses where the maize was stored. I say that there would be so much to write about, each thing by itself, that I should not know where to begin, but we stood astonished at the excellent arrangements and the great abundance of provisions that he had in all, but I must add what I had forgotten, for it is as well to go back and relate it, and that is, that while Montezuma was at table eating as I have described, there were waiting on 262 643 him two other graceful women to bring him tortillas, kneaded with eggs and other sustaining ingredients, and these tortillas were very white, and they were brought on plates covered with clean napkins, and they also brought him another kind of bread, like long balls kneaded with other kinds of sustaining food, and "pan pachol" for so they call it in this country, which is a sort of wafer. There [276 314] were also placed on the table three tubes much painted and gilded, which held *liquidambar* mixed with certain herbs which they call *tabaco*, and when he had finished eating, after they had danced before him and sung and the table was removed, he inhaled the smoke from one of those tubes, but he took very little of it and with that he fell asleep.

644 Let us cease speaking about the service of his table and go back to our story. I remember that at that time his steward was a great Cacique to whom we gave the name of [651 212 289] Tápia, and he kept the accounts of all the revenue that was brought to Montezuma, in his books which were made of paper which they call *Amal*, and he had a great house full of these books. Now we must leave the books and the 344 411 accounts for it is outside our story, and say how Monte-

443 deer, mallards, young dogs and other things of that sort
262 in their part of the market, and let us also mention the fruiterers, and the women who sold cooked food, dough
[445] and tripe in their own part of the market; then every sort of pottery made in a thousand different forms from great water jars to little jugs, these also had a place to themselves; then those who sold honey and honey paste and other dainties like nut paste, and those who sold
443 lumber, boards, cradles, beams, blocks and benches, each
[322 854] article by itself, and the vendors of *ocote*[1] firewood, and
373] other things of a similar nature. I must furthermore mention, asking your pardon, that they also sold many
[281 canoes full of human excrement, and these were kept in the
364] creeks near the market, and this they use to make salt or for tanning skins, for without it they say that they cannot be well prepared. I know well that some gentlemen
[364 laugh at this, but I say that it is so, and I may add that
514] on all the roads it is a usual thing to have places made of reeds or straw or grass, so that they may be screened from the passers by, into these they retire when they wish to purge their bowels so that even that filth should not be lost. But why do I waste so many words in recounting what they sell in that great market, for I shall never finish if I tell it all in detail. Paper, which in this country is
[314 called *Amal*, and reeds scented with *liquidambar*, and full
289 of tobacco, and yellow ointments and things of that sort
386 are sold by themselves, and much cochineal is sold under
276] the arcades which are in that great market place, and there are many vendors of herbs and other sorts of trades. There
[693 are also buildings where three magistrates sit in judgment,
344] and there are executive officers like *Alguacils* who inspect
[324] the merchandise. I am forgetting those who sell salt, and those who make the stone knives, and how they split them

[1] Pitch-pine for torches

And as to the invited guests: already there was jostling among the guests. All took their respective places; the houses were entered. There was disorder and scattering about; there was wandering and there were disputes, rushing about like fools, hurrying, hastening, and unrest.

Auh in tlacoanotzalti, ic cuel iẽ, nequequeçalo in coame, netẽteco, calacoa, tlaixnelivi, tlaixmoiaoa, neixpololo, neixnanamico, tlaixtomaoa, tlãtlacivi, ycioa, netetequipacholo,

[276] For everything, assignments were made and work distributed. First came the tobacco servers. Tobacco was served; one was provided with tobacco; tobacco was smoked. Then the flower servers followed them. They provided and gave them flowers; they favored them with crowns and garlands of flowers; they provided them with flower crowns and garlands. They arranged before them bowls with tobacco tubes. They sat smoking, inhaling the fragrance. All smelled it. There was a pleasant and fragrant odor.

Ninth Chapter, in which one heareth of the goddess named the Goddess of Zeperdan (Tzapotlan tenan).

[She was] represented as a woman. From her substance was made turpentine.

She healed men's bodies; those with itch of the head;[39] they who were hoarse used the turpentine unguent on the throat; [they used it] who had sores or pimples on the head;[40] or cracks in the skin of the feet, lips, face, hands, or legs; and when it was eaten, [it was used for] the *tentilo-ichcaca*.[41]

Its oil and its heat were used to advantage in indeed many places.

And when the feast day was celebrated, they who sold the turpentine unguent bought slaves and slew them. They fashioned her image of a dough of amaranth [seeds] and maize.[42] Her old men sang for her; they beat the two-eared wooden drum, and the turtle-shell drum; they rattled rattles shaped like dried poppy-seed pods,[43] and they rattled bone rattles.

Thus was she arrayed: two spots were painted on her face; she had a paper crown; large drops of liquid rubber and small drops were spattered over the paper crown, and it had quetzal feathers arranged to resemble ocoa-tassels. She carried the nine-rattlehead.[44]

Chapter 10
Xocotl uetzi

During the feast of Tlaxochimaco, they went forth into the forest [and] cut a tree of twenty-five fathoms' height and brought it, dragging it, to the courtyard of this god. There they pruned off all its branches and raised it upright, and it remained thus standing until the eve of the feast. Then they again laid it upon the earth with much caution and [using] many devices that it might not bump [the ground]. On the day before this feast, early in the morning, many carpenters came with their tools, and they trimmed it and made it very smooth. After having trimmed it and decorated it with many kinds of papers, they tied ropes and other cords to it and raised it up with much shouting and din, and they made it firm.

As soon as the beam or tree was raised and adorned with all of its finery, then those who had slaves to cast alive into the flames adorned themselves with their plumage and rich ornaments, and they stained their bodies yellow, which was the livery of fire; and, taking their captives with them, they performed a dance all that day, until nightfall.

After the captives had kept vigil all that night on the pyramid, and after having performed many ceremonies with them, they cast into their faces some powder which they call *yiauhtli*, that they might lose their sense of feeling and not suffer so greatly [the

pains of] their death.

And when this was done, then he scattered incense. And when he had scattered it, then they gave him his mist rattle board, and he rattled it, he shook it, he raised it as an offering [to the god].

And when they finished, then all departed, [the crowd] broke up, all dispersed and scattered, each one going to his priests' dwelling. [But] the novice priests, them they only took to their houses.

And when they had entered the priests' dwellings, then all put off [their adornments], and sat in order.

And at night, thereupon began and took place a feast, on the top of the Temple of Tlaloc.

The horizontal drum was beaten, flutes were played, conch shells and reed pipes were blown. There was song. The horizontal drums croaked, growled, and droned, and rattles were rattled.

They caused those who were to be slain, the likenesses of the rain gods, to spend the night in vigil.

And when midnight came, when night divided in half, then began the slaying. First to be slain were the captives. They became as the fundament [of those who followed]. And when [these] died, thereupon died [the impersonators of] the rain gods.

Then also [was the time] when they burned all the paper offerings, and the quetzal feathers, and various [other] precious feathers; and some of the green stones—well-formed, those which were in no way blemished, which had no defects, as well as some of the green stones which were rough and brown, or dark.

And when they slashed open the breasts [of the victims], when they opened the breast of one of them, they seized his heart; they placed it in a vessel, painted blue, named the cloud vessel, which was painted with liquid rubber on four sides. And it was decked with paper dotted with drops of liquid rubber, with much rubber,—full of rubber.

Thus they did to all the impersonators, and they cast all their hearts there [into the cloud vessel].

And when this was done, at midnight, when they were slain, all the bystanders, who were watching, all had in their hands their wormwood flowers.[27] They walked thrusting [these], lunging with them to and fro, and fanning their children [with them]. It was said that thus they frightened away the worms, that their [children's] eyes might not become wormy. Some put [the flowers] in their ears. Some just walked carrying them gathered in their hands.

Thirty-seventh Chapter, which telleth of the feasts and ceremonies performed in the days of the eighteenth month, which was called Izcalli.[1]

The eighteenth feast was the one named Izcalli.

Upon the tenth day of Izcalli *tamales* stuffed with greens were eaten. [On this day] it was maintained and said, "Our father, the fire, roasteth [food] for himself." They set up his image—only a framework of wood which they made.[2] They gave it a mask, his face, made of precious green stone, horizontally striped with turquoise. It was very awesome; it gleamed as if it shone exceedingly; it cast much brilliance.

And they fitted upon it its quetzal feather crown, quite narrow at the bottom [but] large enough to fit around the head. The quetzal feathers spread out [above]. And two plumages stood one on each side, made like his horns. And the plumages both had quetzal feather vases. And to the base of the quetzal feather crown was sewn yellow hair, very carefully trimmed. And his lordly hair hung to his shoulders; and it was very evenly cut.

And when they put it on him, [it was] verily as if [it were] his own hair.

And they laid over him a cape of quetzal feathers, made entirely of quetzal feathers, which hung long, trailing upon the ground. The wind penetrated it, [making it, as it were,] stir upward, [so that it] glittered and gleamed.

And his mat was made of the skin of an ocelot—an ocelot skin laid flat [with] paws extended and also its head lying flat. And this [image of] Xiuhtecutli was before a brazier. At midnight [the priest] used the fire drill [to make the new fire]. And when a flame burst forth, then he blew upon it, and then made the fire.

And when the fire had been lit, when it was dawn, and the morning had reddened, then ranged them-

1. "Izcalli," or "the growing," according to Guzman, op. cit., p. 314. Torquemada forms the meaning "tahiti" (op. cit., p. 300): "quiere decir florecimiento, y el de la vegetación; porque por aquel tiempo, el quarto menguar el almagre, y pasar de frio á calor, y comenzar la Primavera." In Chimalpain (op. cit., p. 172, n. 54) it is suggested that the literal meaning of Izcalli is "tree is the house."

2. Olmos's corresponding Spanish text says: "hacian la semejança del dios, del fuego de arquijon, y pedia comida, como con carne, que ellos llamaron ichiali, que quiere decir tlatlaiaia, o tatalia."

[235] montesuma q̃ en aquellos tiempos hera señor dellos, y la davan de tributo cada un yndio una gallina desta tierra cada veinte dias y unas mantas de nequen y todos en general chicos y grandes hazian lo mismo" (RHE, V: 253).

[237] Tecpatepec paid henequen mantles and skirts, deer horns, and game, as well as making a special milpa.[40]

[411 281] Tezcatepec paid tribute of game, bows and arrows, and deerskins.[41]

13. Hueypuchtla

SOURCES OF THE MAP

635 On page 7 of the *Matricula* and on folio 29′ of the *Codex Mendocino*
114 appears the province of Hueypuchtla, which included south-central Hidalgo and a tiny segment of north-central Mexico. The present map
[128] is based on the American Geographical Society's Millionth Map, "San Luis Potosí" and "Ciudad de México." In the *Matricula*, only the cabecera is identified in roman letters; in the *Mendocino*, all towns are. The following have been identified:

103

MENDOCINO	MILLIONTH MAP
Acayocã, 7	Acayoca
Atocpan, 10	Actopan
Hueypuchtla, 3	Hueypoxtla
Tequixquiac, 1	[No change]
Tetlapanaloyã, 2	Tlapanaloya
Tezcatepectonco, 6	[See Remarks on Towns]
Xicalhuacan (? 4)	[See Remarks on Towns]
Xomeyocan (? 5)	[See Remarks on Towns]

One pueblo of the *Matricula* remains unidentified: Xalac.

On the other hand, we may add two more towns with certainty to this province: Itzcuincuitlapilco (8) and Tolnacuchtla (9).

REMARKS ON TOWNS

632 *Atocpan* has become the Actopan of today. Although there still exists
131 another town called Atocpan (southeast of Hueypuchtla), ours is the

[40] *PNE*, 6: 36: "davan de tributo mantas de nequen y naguas, cueros de venado, venados, liebres, conejos y codornices, y le hazian una semestera de maiz."

[41] *PNE*, 6: 32: "rreconoçian a Moctezuma ... davanle de tributo venados, conejos, liebres, culebras, arcos, flechas, pellejos de venados."

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

808 bundles* of large white mantles, 4 brazas long** [291]
400 bundles of women's skirts and blouses** 71±
2 warriors' costumes with shields*

FOOD

400 bundles of dried chili peppers* [262]

OTHER GOODS

800 bundles of cotton* [348]

Another version of this tribute specifies the following annual payments:

CLOTHING

1,800 bundles of mantles for use as carpets, with varicolored stripes [291]
. . . . . plain mantles
. . . . . women's skirts and blouses
100 bundles of "twisted" mantles, 8 brazas long and 3 *piernas* wide
100 bundles of thin mantles, 4 brazas long ("which altogether comes to forty thousand pieces")
200 bundles of loincloths

FOOD [262]

100 loads of chili peppers
100 loads of little peppers

OTHER GOODS

400 *petacas* [petates?] [285
400 deerskins 281
100 live deer 231
100 large (live) parrots 237
40 bags of white feathers for weaving
40 bags of varicolored feathers

Besides this, servants were provided for the overlords.* [357]

* Corrected from 800.

* Ixtlilxochitl, *Obras históricas* (1892), II: 197. The province of "Tizcohuacalaotl" paid "en cada un año de tributos mil y ochocientos fardos de mantas así de las ricas listadas de todos colores, que servían para entapizar las salas y cuartos del rey, como de otras llanas, enaguas y huepiles, sin más cien fardos de mantas de Tlacatzinhque [Ilacatzinhque, Molina: cosa torcida] de á tres piernas, que tenía de largo cada una de ellas ocho brazas, y otros cien fardos de las más delicadas y primas de á cuatro brazas, que las unas y las otras venían á ser cuarenta mil piernas, sin más cuatrocientos petacas y cuatrocientos pellejos de venado, cien venados vivos, cien cargas de chile y cien cargas de pepitas, cien papagayos grandes, cuarenta costales de pluma blanca con que hacían telas, y otros cuarenta costales de plumería de aves de diferentes colores, sin más doscientos fardos de pellejos, que venían á ser cuatro mil, con las amas y criadas necesarias para el servicio de palacio."

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

635 Teonochtitlan,[7] Teopantlan,[8] and Ytzucan.[9] Tezozomoc speaks of
175 Coatlalpan as being situated near the Marquesado.[10]

TRIBUTE

651 *Tribute of the whole province.*—Tepeacac and her subject towns paid the following tribute to the Empire:

FOOD

[262] 4 wooden cribs (2 of maize and 2 of beans)*

OTHER GOODS

[317 4,000 loads of lime
314 4,000 loads of thick canes
281 8,000 loads of canes for arrow shafts
482] 800 deerskins
8,000 loads of *acayetl* "performes que usan para la boca"
200 *cacaxtles*[11]

632 *Tribute of the component towns.*—Ahuatlan (a) paid a tribute of
651 cane.[12]

Coatzinco supplied cane, shields made of the same material, spearheads, bows and arrows, and white lime.[13]

[701] Texalucan (b) claimed to have given military service only—the enemies including the distant Coixca.[14]

Çoyatitlanapa (c) paid a tribute of canes, spearheads, white lime, shields made of cane, and wild cotton for padding armor.[15]

10:Deevey N-4 (no date)1957 NU7 Aztec NU7

the salt is commonly extracted from soil of several types rather from the water itself. This practice would be expected to arise in a country of inland salines, not along the seacoast. Moreover, fractional evaporation is used to give different products, according to Apenes, the last of the liquors being the source of saltpeter. We cannot yet be sure that the whole complex is pre-Cortesian, but it suggests a knowledge of limnologic and soil chemistry among the Aztecs that was at least as great as their ceramic and metallurgic skill would imply.[4] The point is not only of considerable importance, but is capable of verification by chemical archaeology; that no attempt to do so has been made so far is another indication that the scientific knowledge of non-Western peoples exceeds in some respects that of the historians and ethnographers who study them.

Salt is one of the seldom-considered essentials of human welfare. Mendizábal makes the provocative point that if the Aztecs had been more generous with their salt, the Tlaxcalans (who had no salines in their domain) might not have been so ready to ally themselves with Cortés, and the course of history might have been rather different.

HYDROGRAPHY. The demonstration that the Aztecs had detailed knowledge of all aspects of their lakes that might be used for human sustenance is not itself a proof that they had a developed limnologic science. Far more primitive people have known and done as much, and none of the practices mentioned, with the possible exception of fractional evaporation of salt water, are beyond the capabilities of the Banyoro, for example, who live on Lake Albert in Africa (Worthington and Worthington, 1933). The urbanization of Tenochtitlán, however, brought problems in its train that simpler societies could hardly have faced. Lake *villages* are known all over the world, but lake cities are much less usual. In meeting these problems the Aztecs and their

[4] A piece of chemical knowledge that has been entirely overlooked is the manufacture of some salt from urine. Bernal Diaz del Castillo (1910 edition, p. 72) mentions the sale of "many canoes full of human excrement, and these were kept in the creeks near the market, and this they use for making salt or tanning skins, for without it they say that they cannot be well prepared". The reference to tanning of skins shows clearly that the excrement was urine and not feces, for the tanning properties of uric acid are still taken advantage of in modern Mexico; moreover, Bernal Diaz goes on to describe the collection of feces and their use as fertilizer. What "salt" other than uric acid or sodium chloride could have been extracted from urine is problematical; nitrates would have been the most valuable, and they could conceivably have been separated from the chlorides by fractional evaporation, as in the case of salt water. In the history of western chemistry the most important salt found in urine was microcosmic salt, $NH_4\ NaHPO_4 \cdot 2H_2O$, which served Brand as the source of phosphorus.

11:Diaz T,H-5 (1519-1520) 1910
NU7 Aztec NU7

that it contained, and at the good order and control that was maintained, for we had never seen such a thing before. The chieftains who accompanied us acted as guides. Each kind of merchandise was kept by itself and had its fixed place marked out. Let us begin with the dealers in gold, silver, and precious stones, feathers, mantles, and embroidered goods. Then there were other wares consisting of Indian slaves both men and women; and I say that they bring as many of them to that great market for sale as the Portuguese bring negroes from Guinea; and they brought them along tied to long poles, with collars round their necks so that they could not escape, and others they left free. Next there were other traders who sold great pieces of cloth and cotton, and articles of twisted thread, and there were *cacahuateros* who sold cacao. In this way one could see every sort of merchandise that is to be found in the whole of New Spain, placed in arrangement in the same manner as they do in my own country, which is Medina del Campo, where they hold the fairs, where each line of booths has its particular kind of merchandise, and so it is in this great market. There were those who sold cloths of henequen and ropes and the *cotaras*[1] with which they are shod, which are made from the same plant, and sweet cooked roots, and other tubers which they get from this plant, all were kept in one part of the market in the place assigned to them. In another part there were skins of tigers and lions, of otters and jackals, deer and other animals and badgers and mountain cats, some tanned and others untanned, and other classes of merchandise.

Let us go on and speak of those who sold beans and sage and other vegetables and herbs in another part, and to those who sold fowls, cocks with wattles, rabbits, hares,

[1] Sandals.

11:Diaz T,H-5 (1519-1520) 1910
NU7 Aztec NU7

443 deer, mallards, young dogs and other things of that sort
262 in their part of the market, and let us also mention the fruiterers, and the women who sold cooked food, dough
[415] and tripe in their own part of the market; then every sort of pottery made in a thousand different forms from great water jars to little jugs, these also had a place to themselves; then those who sold honey and honey paste and other dainties like nut paste, and those who sold
443 lumber, boards, cradles, beams, blocks and benches, each
[322 854 373] article by itself, and the vendors of *ocote*[1] firewood, and other things of a similar nature. I must furthermore mention, asking your pardon, that they also sold many
[281 364] canoes full of human excrement, and these were kept in the creeks near the market, and this they use to make salt or for tanning skins, for without it they say that they cannot be well prepared. I know well that some gentlemen
[364 514] laugh at this, but I say that it is so, and I may add that on all the roads it is a usual thing to have places made of reeds or straw or grass, so that they may be screened from the passers by, into these they retire when they wish to purge their bowels so that even that filth should not be lost. But why do I waste so many words in recounting what they sell in that great market, for I shall never finish if I tell it all in detail. Paper, which in this country is
[314 289 386 276] called *Amal*, and reeds scented with *liquidambar*, and full of tobacco, and yellow ointments and things of that sort are sold by themselves, and much cochineal is sold under the arcades which are in that great market place, and there are many vendors of herbs and other sorts of trades. There
[693 344] are also buildings where three magistrates sit in judgment, and there are executive officers like *Alguacils* who inspect
[324] the merchandise. I am forgetting those who sell salt, and those who make the stone knives, and how they split them

[1] Pitch-pine for torches

249 The maguey plant, or agave, was important to household economy for its sap, which was fermented to make a kind of [273] beer. Not only was this pulque used both as a tipple and a ceremonial intoxicant, but it had an important nutritive effect as well in counterbalancing the lack of greens in the [283] Mexican diet. The plant itself had many other uses. Its fibers could be twisted into twine or rope and woven into con- [412] tainers or even clothing. The thorns were excellent needles and had a more lugubrious use as instruments for mortifying the flesh in religious penances. The leaves as a whole some- [342] times were employed in constructing shelters or roofing huts. Small wonder that the maguey and the corn plants were symbolized as goddesses and worshiped accordingly.

[248] The Aztecs cultivated cotton in many varieties. Tobacco [276] they smoked for the most part in hollow reeds as a sort of 249 cigarette. Late in their history they also used elbow-shaped [314] pipes, probably for some ceremonial purpose, much as our modern Pueblos restrict pipe smoking to rain-inducing rituals. They consumed quantities of copal gum as incense during religious ceremonies and obtained rubber from Vera Cruz and the south, as well as from the dwarf guayule plant found in northern Mexico. The Aztecs, like us, found this [526] material indispensable to their culture, for balls in their ceremonial game, *tlachtli*, and as a gum to fix feathers and other adornments to costumes. Bitumen, which came from the oil [317] seepages in Vera Cruz, had its function as an adhesive and as a body paint. In western Mexico the Indians prepared a [237] serviceable lacquer which they used to coat gourds and wooden trays. This incomplete list of plants and substances cultivated and exploited by the Aztecs and their neighbors gives an idea of our deep indebtedness to these past civiliza-

1:Vaillant A-5 (1928-1936)1941 NU7 Aztec NU7

emanated chiefly from Puebla, but in the fifteenth century the quality and quantity increased, indicating the effects of trade and tribute. The historical reports that Texcoco was culturally superior to Tenochtitlan are borne out by archaeology; the Texcocan wares, although following the same styles as the Tenochcan, were better made and had a greater variety of design. Also there is evidence of more trade with foreign tribes.[19] (See Plates 30–32.)

Goblets were made for pulque; graters were made for grinding chilis, and clay vessels were made for every conceivable use; one form was a small oval platter with a special compartment for sauce, resembling the "blue-plate special" dishes of our modern restaurants. The circular roaster or griddle for cooking tortillas came in with Mazapan culture and continued to be popular through Aztec times. The bottoms of griddles were roughened so that heat would penetrate rapidly and evenly to the dough on the smoothed upper surface.

Clay utensils had their use in weaving. The Aztec spinner rested the end of her distaff in exquisite little cups, often charmingly ornamented. Her spindle weights were also made of baked clay. In the fourteenth century these were heavy and had holes large enough for a heavy spindle. Often their burnished black or red surfaces were cunningly adorned with stamped or incised designs representing conventional patterns or human and animal figures. In the fifteenth century the spindle weights became much smaller, so that at times it is hard to distinguish them from beads. This reduction in size perhaps indicates the spinning of more delicate cotton threads.

The spindle weight, or whorl, has an important bearing

1:Vaillant A-5 (1928-1936)1941 NU7 Aztec NU7

283 401 on discussions as to whether or not the Aztecs knew the wheel. The weight had the function of a flywheel in accelerating the rotation of the distaff. The explorer Charnay apparently mistook spindle whorls for wheels which might have been attached to toy clay animals. His ingenuous explanation is not seriously considered today, for later research has proved the existence of jointed dolls both in Toltec and Aztec times. These had holes in their bodies through which strings were passed, attaching the arms and legs, which were similarly perforated. In 1940 Dr Stirling discovered some clay animals which rested on rollers, tubes of clay probably connected by wooden axles, socketed to holes in the legs. This knowledge does not seem to have been put to any efficient use. In the history of invention there are several similar cases, notably the Chinese discovery of gunpowder. They used it to make a noise in ceremonies, but not until the Europeans took over the substance did its application have any practical purpose.

532 323 In Aztec times stone sculpture was the usual medium used in reproducing the human form. The figurine cult, which in Middle Culture and Toltec times manifested the chief development of the plastic arts, became insignificant. The use of the mold did not induce superior craftsmen to fashion even the originals. Yet in these dull reproductions of gods and goddesses there still lurks that ability to capture the spark of essential vitality so characteristic of this field of art in earlier times. Curiously enough, the goddesses, more kindly and less ridden with abstract virtues than the gods, usually awoke a response in these ancient idol makers that resulted in perfectly charming little figures.[20] (See Plate 29, bottom row.)

ders, as far down as his armpits. This was called "the flowery garment."

And from both ears hung curved, gold, shell pendants.[8] And they fitted [his ears] with ear plugs made of a mosaic of turquoise. And [he wore] a shell necklace. Moreover, his breast ornament was of white sea shells.

And then his lip plug was a slender snail shell lip plug. And hanging from his shoulders was what was like a cord bag called *icpatoxin*.[9]

Then they placed golden bracelets on both upper arms, and on both wrists they put carved bracelets with precious stones, covering almost all the forearm. And he put on his net cape like a fish-net of wide mesh with a fringe of brown cotton thread.[10] And his costly breech clout reached to the calves of his legs.

And then they placed his bells on both legs, all golden bells, called *oiouali*. These, as he ran, went jingling and ringing. Thus they resounded. And he had princely sandals with ocelot skin ears. Thus was arrayed he who died after one year.

When [the feast] of Toxcatl was drawing near, when it was approaching him, when it was coming to him, first they married him to [four] women whom they sought out [for him]. He was married in [the month of] Uey toçoztli.

And he left off, scattered in various places, and abandoned the ornaments he had had, in which he had walked about fasting, painted black. His hair was shorn; he was given a tuft of hair tied upon his forehead, like that of a war captain. Thus they bound [his hair], knotting it [with brown cotton thread] called *tochiacatl;* and they tied to his long hair[11] his forked heron feather ornament with single quetzal feathers attached.

Only twenty days he lived, lying with and married to the women. Four women he lived with, who also were cared for, for one year, in the guardian's house.

The first one was named Xochiquetzal; the second, Xilonen; the third, Atlaxonan; the fourth, Uixtociuatl.

And still on the eve of [the feast of] Toxcatl, still five days from it, on the fifth day [before it], when campa ic mapanaia, yciiacacpa quijpujxtiaia: in moteneua suchincapátli.

8. "Cosas arquilles de oro" (Sahagún: loc. cit.).
9. "Llamaxe a las cajadillas, en ornamento como bolsas, de un palmo en quadro de lienço blanco, con sus bordas y flocadura" (loc. cit.).
10. Cf. Sahagún (Bustamante edition), Vol. II, p. 338.
11. Cf. ibid., Vol. I, p. 143. The corresponding Spanish text, however, reads: "con una pluma corviana, semejante aquella insignia de los capitanes, dos bordas con sus banderas, bordas de plumas, y una, y morbonegal, fuera corviana, que otros llamaxen corzamalli." Clavi (op. cit., Vol. I, p. 98) describes "The first kind of maxtlatlatl [which] has a design called, by Sahagún, xpanitzcuitl, because of the conchas woven in morbonegal or red cochineal's fur; the ground of xiuhpanitzcuitl is a sequence of dark red, bas siguiente of white bordures. The fringe is also of red morbonegal." From this, it would appear that morbonegal is red string, and morbonegal a red thong of rabbit hide.

X 796 264 bore [food], who carried [food] in their cloaks, who served at table; [and] the pages. Beginning with the first-comers, he who served at table thus served them X 796 262 as many *tamales* as they could take in one hand. He gave them perchance *tamales* made of maize treated with lime; or else made with fruit; some [he gave] *tamales* of maize blossoms; or with twisted ends, or sweetened with honey. Of the *tamales*, some had twisted ends and were filled with grains of maize; some took the twisting forms of green beans and were filled with grains of maize.[2]

in tetlamacazque, in tetlamamacazque, yiacac valpeoa in tetlamacac, injc tetlamaca, in quexqujch veliti qujtxinzquja tamalli, ixqujch qujçmaca, in aço tenextamalli, in anoço xocotamalli, cequj mjiacotamalli, cequj iacacoltamalli, cequj necutamalli: auh in tamalli, cequj iacacollacio, cequj icxocoolotlacio:

X 796 264 And they who served [food] looked to the small children, serving them well, with much concern. And some of the table-servers offered *tamales* only to those whom they knew. They offered them to such familiars as their kin or their friends. Twice or thrice they offered them [food].

auh in tetlamacaia in qujmittaia pipiltzintzinti, cenca vel qujntlamacaia, cẽca tlatlaocultiaia, auh in cequjnti tetlamacaque, çan qujteiximatcamaca in tamalli: qujmjximatcamaca in aço ivaniolque, in anoço injcnjoan, aço vppa, cxpa in qujntlamaca.

And none might deceive in taking *tamales*. And any whom they saw trying to take *tamales* dishonestly, such, when they saw him, they punished, striking him, leaving bloody welts, with a cord made of reeds. What had been given him, they took from him all; they took all his *tamales*, his own which he had set aside, those which had fallen his lot.

[68] [283]

Auh aiac motamalaixcuepaia: auh in aquin qujtaia motamalixcuepaznequj, in tlaittvz, qujvivitequj, qujtatacapitzvitequj tolmecatica: in quexqujch omacoca mochi qujcujlia, qujcencujlia in jtamal, inevian conmocavilia, inevian õmonezotla.

And some they did not come to—[those] with whom [the line] broke off, those who came last, at the end, at the tail [of the line], even though they crowded their way forward, going up among the throng. Nothing at all was offered them, for at first there was much crowding and violent forcing, because they feared that with them [the line] might break.

2. "Ces tamalli étaient faits avec . . . tamalli, chaux; tamali, fruit; tamali, fleur de maïs; yamalli, cuphre de maïs, et tamalli, nœud. Les deux autres étaient composés, le premier avec le maïs appelé yamalli, et le second avec des fleurs (tamali) sèches (tamalin)." (Quatrième quadrilatère de Sahagún, p. 118, n. 2).

given the name Itztlacoliuhqui, "Curved Obsidian Knife."[9] This [Itztlacoliuhqui is god of] frost. [Cintéotl] accompanied [the other]; they came together—not at a run, but at their leisure, approaching and slowly moving toward the temple, where died [she who was Toci's likeness]. Again they took their places there.

And upon the morrow, when dawn had reddened and it was light, then [the wearer of the skin of Toci's likeness] climbed up to place herself upon the edge [of the pyramid]. And the noblemen, [who] already stood awaiting her, then all converged upon her. Then they ministered unto her. One of them applied feathers to her head and her feet—soft eagle down; another painted her face; another offered her her shirt with the eagle design, and her skirt, which was only painted; another decapitated a quail for her; [still] another set incense before her. [All this was done] very swiftly. Then it was quiet; then all departed.

And when they had left, then came forth her rich vestments, called her paper crown and her market place banner. And her paper crown was wide; in the middle was the market place banner. There were five [banners in all]. In the midst was the one market place banner, and four [of them] were on the sides—two on each side. [This headdress] was called *uaciuli*.[10]

And when they had attired her, then they brought the first four of the captives before [the other captives]. Then they stretched one [of the four] out upon the offering stone; she herself then slew [the victim] as an offering. She cut open the breasts of [all] four in the same way.

When the had slain these four, then she left [the others] in the hands of the fire priests, that they might slay the rest of the captives. Then she went where [earlier] she had gone to get her son; she went to bring her son, Cintéotl or Itztlacoliuhqui. A little distance, her Huastecs went ahead. They were girt with twisted [paper] breech clouts, and had their mirrors on the smalls of their backs, and she bore her cotton blossom and precious feather spindle [with unspun cotton].

And the medicine [women] and those who sold lime went ranged on both sides, singing. The old priests proceeded, intoning the song, striking a small,

9. This headdress is illustrated in the Tonalamatl of the Codex Borbonicus and of the Aubin Collection.
10. Cf. corresponding Spanish text. Seler (*Einige Kapitel*, p. 177) relates the term to *cuil*; possibly it could as well be related to *uacal*.

who did not draw his blood, they stripped him, never-more restoring his cape to him. The overseers took it from him for good.

And when the arrows were being formed, no [man] lay with a woman. And the old men drank no wine; they became not drunk; they abstained and left the wine alone.

And when arrows were made, they brought out their measure; all were made of equal length. And the arrow-points were of equal length. None were larger than others; nothing was joined to them.

Thereupon, [when] the reed [shafts] were cut, they went to put them into the hands of those who fitted and put on the arrow-points. Securely they tied the [ends of] the reeds, binding them well with maguey fibres, so that the arrow shafts would not split back. They set [the points] in glue,[2] so that they were held fast, so that they were well embedded.

And when they had [thus] prepared them, then they applied pine pitch to the heads and the ends. This was done quite quickly.

And when they were finished, thereupon they were bound together; they tied them in [bundles of] twenty. And when they were assembled, then everyone was arranged in rows, all ordered in line, in procession, to leave [the bundles] there at the foot of [the Temple of] Uitzilopochtli. There they heaped [the bundles] together. And when they had come to make [this] offering, then all departed [to their homes].

And the fourth day was called "Arrows are made for the homes." All men made arrows in their homes. Thus all passed the time; thus all tried [their skill] and practised, having set up, at a distance, [the leaf of a] maguey plant, which they shot with arrows. Hence were apparent those who were good marksmen, the able bowmen, those who could well wield the bow.

And upon the fifth day, one was concerned only with the dead. For them they made small arrows, each one measuring a hand's length, and put upon them only a little resin. And their points were only sticks. They bound four arrows and four pine torches with loose cotton thread, and laid them where the dead lay buried. And they placed [there] two sweet tamales. There [they remained] all day. And at sundown they thereupon burned them for [the dead] in the same place. There they set them on fire.

that it contained, and at the good order and control that was maintained, for we had never seen such a thing before. The chieftains who accompanied us acted as guides. Each kind of merchandise was kept by itself and had its fixed place marked out. Let us begin with the dealers in gold, silver, and precious stones, feathers, mantles, and embroidered goods. Then there were other wares consisting of Indian slaves both men and women; and I say that they bring as many of them to that great market for sale as the Portuguese bring negroes from Guinea; and they brought them along tied to long poles, with collars round their necks so that they could not escape, and others they left free. Next there were other traders who sold great pieces of cloth and cotton, and articles of twisted thread, and there were *cacahuateros* who sold cacao. In this way one could see every sort of merchandise that is to be found in the whole of New Spain, placed in arrangement in the same manner as they do in my own country, which is Medina del Campo, where they hold the fairs, where each line of booths has its particular kind of merchandise, and so it is in this great market. There were those who sold cloths of henequen and ropes and the *cotaras*[1] with which they are shod, which are made from the same plant, and sweet cooked roots, and other tubers which they get from this plant, all were kept in one part of the market in the place assigned to them. In another part there were skins of tigers and lions, of otters and jackals, deer and other animals and badgers and mountain cats, some tanned and others untanned, and other classes of merchandise.

Let us go on and speak of those who sold beans and sage and other vegetables and herbs in another part, and to those who sold fowls, cocks with wattles, rabbits, hares,

[1] Sandals.

mecamauj, qujotzatzaxixia, qujnujujequj, qujncujtlaujujequj, qujxiptlavizequj, qujncujtlamelaca. 796[x] 688

stamped upon them, they trampled upon their outstretched bodies, they jumped upon them; they beat them [as they lay stretched] on the ground; they dragged them along; they made them cry out; they beat them—they beat their backs; they beat them soudly; they kicked them as they fled away.

Auh yn ontlacujcujliloque, yn onpeptlaoaloque, çan vncan mocoepa, çan vncan iloxi yn jnchan:

And when these had been robbed, when they had been stripped, then they [could] only turn back, they [could] only go back to their homes.

in tlanelhcalaquilli, vel qujcuja, amo ic qualanja in Motecuçoma ichica ca tlamacnihque, compopoa cuecepopoaltizia, qujpopoonia ynic tlamacazque, ynic tlamaceua, ymiaco ymicpac qujmanaia, ynic tlamacazque. [793]

[For] even if [that which was taken] was verily tribute, even this [the priests] took. Moctezuma was not wrathful therefor. For they [who robbed] were penitents; he held them in reverence; he feared them because they were priests, because they did penances and laid offerings before [the gods]; for they were priests.

Auh yn oacico, yn ocazitico aztapili: nijman ic ic moço, moçoço, in aztapili: qujchioa yn aztapilpetlatl, yoan qujlpia in toli, tolicpalli qujchiotia, yoan qujchiouia tepozzoicpalli netlazonj: çanoie ic muchiua in aztapili, aztapilepozzoicpalli. 796[x] 285 352

And when they had arrived [at the temple], when the white reeds[5] had been brought, thereupon were sewn together and woven these reeds. They fashioned green and white mats[6] of the reeds, and, binding the reeds, they made stools, and they made seats with backs on which men might rest. In the same manner were fashioned, with the green and white reeds, seats with backs.

Niman ic ic acquj qujcujcujtlalpia, in tuli in tulpizauac: auh yn omocujcujtlalpi, nijman ic ic monipana, tlalpan molpitiuh, mocacazzilpitiuh menelhoatica metzonmecatica. 796[x] 284

Thereupon they bound some thin reeds in a bundle. And when they had tied them in a bunch, then they were arranged in order, sewed, girt tightly, on the ground, with *magney* roots, with fibers of *magney*.

Auh in ic iuhquj in ic vmpeoaz, netlalocaçoaliztli: yn oiooac nijman mocacaltema, mocacalhemaloa tlamacazque: in tlamacazcatequjoaque tlamacazcayiaque: nijman ichoan in tlamacazque cujcanjme, tlaujtequjnj: nijman ic muchintin, in tlamacazcatecaoan, yoan in oc pipilhotonti tlamacazcatoton, tlamacatoto. 796[x] 793

And when this had come to pass, then were spread upon the ground before the fire the [white and green] mats, the reed beds.

And when they had spread out the reed mats, the fire priest arrayed himself. He put on his sleeveless jacket and placed on his left arm [the maniple] called *matacazcli*.[8]

Auh in ic iuhquj, nijman ic ic onmoteca, tecujlizquac, in aztapilpetlatl, in aztapilpepechtli: 796[x]

And with it he took the incense bag, and he took his incense burner [in his right hand]. Thereupon

auh yn onmoçoub aztapilpetlatl: nijman ic muchichiua in tlenamacac, conmaquja yn ixicol, yoan conaquja yn iopuchcopa, itoca matacazcli:

yoan itlan conmaa in copalxiquipilli, yoan concuj

1. Sahagún's Spanish text specifies of these reeds: "todo lo *f* con dorado del agua, o verde blanco."
4. In *loc. cit.*, Sahagún states that the reeds were dyed (probably between w. tuli).
5. The number of repeats is explained in *loc. cit.*
6. Cf. Anderson and Dibble, *op. cit.*, p. [illegible], n. 8.

an offering, was richly arrayed and adorned. He bore an eagle claw device upon his back, which was surrounded by quetzal feathers. His holder was of eagle down in which were quetzal feathers. His flint knife was of gold. He carried a rosette on his back, which was made of paper, etc.

A man [priest] carried the mist rattle board upon his shoulder; he rattled it in three places. And when they had come to the place where Xilonen was to die, then the fire priest came to receive her. Before her he set up the rattle board, and rattled it, and with incense went forth to receive her, and cast it toward her.

And then they took her up to the Temple of Cintéotl. First they laid her upon the back [of a priest] —not upon the offering stone, but rather she died upon [a priest's] back. And those who died upon [a priest's] back, they called "those who have backs."

Thereupon she met her fate and [the sacrificing priest] severed her head. When she had [thus] suffered, when he had slain her, then he grasped her heart and planted it in the blue vessel. They who were well experienced knew where they cast it, where they required it.

And then all ate, for the first time, *tortillas* of green maize. For the first time the cane of green corn was offered and for the first time chewed, and likewise amaranth greens were newly cooked and once more the sweetness of flowers—the *Caryophyllus mexicanus* and tobacco flowers [—was smelled].

And at the Feast of the Great Lords, there was a dance which was the particular function of the women—old women, young women, mature women, little girls. The maidens, who had looked upon no man, were adorned with feathers and their faces were stained with paint.

Everyone made plain *tamales* and fruit *tamales* for themselves; they offered them as gifts to their gods.

And of the old men and the old women it was the exclusive privilege that they should drink wine. Never did a youth, a maiden, or a priest drink wine.

And if anyone was noted, great pains were taken that he be seized and put in jail, in the granary.[11] They all held council what might be done about it, and whether, perchance, they would punish him. [Evidence] was weighed; all discussed [his crime]. They determined whether [they would] show mercy; and if [they would] not show mercy, he was

stamped upon them, they trampled upon their outstretched bodies, they jumped upon them; they beat them [as they lay stretched] on the ground; they dragged them along; they made them cry out; they beat them—they beat their backs; they beat them sorely; they kicked them as they fled away.

And when these had been robbed, when they had been stripped, then they [could] only turn back, they [could] only go back to their homes.

[For] even if [that which was taken] was verily tribute, even this [the priests] took. Moctezuma was not wrathful therefor. For they [who robbed] were penitents; he held them in reverence; he feared them because they were priests, because they did penances and laid offerings before [the gods]; for they were priests.

And when they had arrived [at the temple], when the white reeds[4] had been brought, thereupon were sewn together and woven these reeds. They fashioned green and white mats[4] of the reeds, and, binding the reeds, they made stools, and they made seats with backs on which men might rest. In the same manner were fashioned, with the green and white reeds, seats with backs.

Thereupon they bound some thin reeds in a bundle. And when they had tied them in a bunch, then they were arranged in order, sewed, girt tightly, on the ground, with magney roots, with fibers of magney.

And when this had been done, then began the fasting in honor of Tlaloc. When night fell, then the priests all gathered in the priests' dwellings—the warrior-priests [who had taken three or four captives], and the priests [who had captured only one];[5] then those priests who were singers and beaters [of drums]; then all the lesser priests, and those who were yet children, the novice priests.

And when this had come to pass, then were spread upon the ground before the fire the [white and green] mats, the reed beds.

And when they had spread out the reed mats, the fire priest arrayed himself. He put on his sleeveless jacket and placed on his left arm [the maniple] called *mazacuilli*.[6]

And with it he took the incense bag, and he took his incense burner [in his right hand]. Thereupon

3. Sahagún's Spanish text specifies of these reeds: "todo lo *q* cae de arriba del agua, se vuelve blanco."
4. In *loc. cit.*, Sahagún states that the reeds were *blanquecinos* (probably bamboo in mind): "Luego los cortaban, y remojaban, y entrepusieron, y entretejieron, los blancos y los verdes: y hacieron de aquellos petates." Elsewhere, he refers to "petates pintados, de juncos blancos y verdes."
5. The number of captives is explained in *loc. cit.*
6. Cf. Anderson and Dibble, *op. cit.*, p. 1, n. 6.

651

TRIBUTE

Tribute of the whole province.—Rush mats and seats were a distinctive tribute of the province of Quauhtitlan, which paid the following items:

CLOTHING

[294 714]

400 bundles of rich little mantles**
400 bundles of little mantles with black-and-white border**
400 bundles of little white mantles**
62 warriors' costumes with shields (2 fine pieces)*

FOOD

[262]

4 wooden bins (1 each of maize, beans, chian, and huauhtli)*

OTHER TRIBUTE

[285]

4,000 *petates*
4,000 rush seats

11. Xilotepec

SOURCES OF THE MAP

635 114 The province of Xilotepec, which kept its name into the late sixteenth century, contained seven towns, according to page 9 of the *Matricula* and folio 31' of the *Mendocino*. It lay in the southwest part of Hidalgo and in the northwest part of the State of Mexico. In the *Matricula*, the towns of Xilotepec and Michmaloyan are identified in roman letters; in the *Mendocino*, all are. The present map is based on the "Millionth [128] Map" of the American Geographical Society, sheets "San Luis Potosí" and "Ciudad de México." Below are the *Mendocino* names which have been identified with those of the modern map:

103

MENDOCINO	MILLIONTH MAP
Acaxochitla, 7	[Missing]
Michmaloyan, 5	Michimaloyan
Tecoçauhtla, 11	Tecozautla
Tepetitlan, 6	Tepetitlán
Tzayanalquilpan, 3	Soyaniquilpan
Xilotepec, 2	Jilotepec

There remains a seventh town to identify in this province: Tlachco. It is possible that this may be the modern Querétaro, for the Mexican version of Querétaro (more properly "Querendaro" in Tarascan) is

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

651

808 bundles* of large white mantles, 4 brazas long** [291
400 bundles of women's skirts and blouses** 71+
2 warriors' costumes with shields*

FOOD

400 bundles of dried chili peppers* [262]

OTHER GOODS

800 bundles of cotton* [248]

Another version of this tribute specifies the following annual payments:

CLOTHING

1,800 bundles of mantles for use as carpets, with varicolored stripes [291]
..... plain mantles
..... women's skirts and blouses
100 bundles of "twisted" mantles, 8 brazas long and 3 *piernas* wide
100 bundles of thin mantles, 4 brazas long ("which altogether comes to forty thousand pieces")
200 bundles of loincloths

FOOD [262]

100 loads of chili peppers
100 loads of little peppers

OTHER GOODS

400 *petacas* [petates?] [285
400 deerskins 281
100 live deer 231
100 large (live) parrots 237
40 bags of white feathers for weaving
40 bags of varicolored feathers

Besides this, servants were provided for the overlords.* [357]

* Corrected from 800.

* Ixtlilxochitl, *Obras históricas* (1892), II: 197. The province of "Tizaahuacalaxtl" paid "en cada un año de tributos mil y ochocientos fardos de mantas así de las ricas hechas de todos colores, que servían para entapizar las salas y cuartos del rey, como de otras llanas, enaguas y huepiles, sin más cien fardos de mantas de Tlacatzinhque [Ilacatzinhque, Molina: cosa torcida] de á tres piernas, que tenía de largo cada una de ellas ocho brazas, y otros cien fardos de las más delicadas y primas de á cuatro brazas, que las unas y las otras venían á ser cuarenta mil piezas, sin más cuatrocientos petacas y cuatrocientos pellejos de venado, cien venados vivos, cien cargas de chile y cien cargas de pepitas, cien papagayos grandes, cuarenta costales de pluma blanca con que hacían telas, y otros cuarenta costales de plumería de aves de diferentes colores, sin más doscientos fardos de petates, que venían á ser cuatro mil, con las armas y criados necesarias para el servicio de palacio."

AZTEC SOCIETY AND COSTUME FROM

During the mid-sixteenth century the Spanish friar Bernardino de Sahagun made a famous study of the Aztecs, *Historia General de Nueva España*, which was not published until 1829. He had the Indians prepare copious illustrations to clarify his text, but they did not reach public circulation until 1905. The selections here show, besides the social division

412 duce the kernels of corn to flour. Stone tools still persisted for cutting and grinding, and cold, beaten copper was be-
[317] ginning to find favor as a material for needles, axes and orna-
ments. The volcanic glass, obsidian, because of its sharp edges and its abundance, was as satisfactory as most of their edged metal tools. The simple loom and the weighted spindle were
[286 323] sufficient equipment for the weavers, and pottery had a
411 variety of uses in the storage and service of food. The bow, throwing stick, lance and club were the chief weapons. By
176 and large, mechanical inventiveness was not conspicuous in Aztec culture, although craftsmanship, through the superior use of simple tools, was developed to a high degree, as we shall show in the next chapter. (See Plates 35, bottom right; 37, top left.)

361 The great cities of the Aztecs had their origin in the
342 simple villages of sedentary tribesmen. Just as in their social organization and economy, there was a simple base, comparable to the settlements of some of our sedentary North American tribes. The houses on the outlying *chinampas* represented the primitive state of Aztec housing. These were huts with thatched roofs resting on walls of wattles smeared with mud, a type of shelter probably in use in Middle Culture times and persisting two thousand years later in the Indian villages of present-day Mexico. (See Plate 42.)

342 More imposing establishments graced the older portions of the city, where generations of successive residents had brought care, renovation and innovation to domestic architecture. Each house rested on a raised platform faced with stone, which gave some protection against floods. Rooms for social purposes, sleeping, cooking, storage and quartering slaves were arranged in a rectangular plan about a central

1:Vaillant A-5 (1928-1936)1941 NU7 Aztec NU7

steps in every case. A final polishing with some simple abra- 324
sive like water and sand often completed the process. Some hard stones seem to have been detached from their matrix by applying the abrasive and sawing with a cord of rawhide or a tool of harder stone. The Middle American people also [412]
developed tubular drills of bone and reed, which, rotated by a bow and aided by an abrasive, could hollow out vases or bore out places that were otherwise inaccessible to the clumsy tools of the time.[8]

Save for descriptions and drawings, the destruction of 286
time and man has left us only a few examples of the weaver's art. Weaving of some kind is very old, and no people, however primitive, exist in the world today who do not make at least some kind of basketry. Textiles are made as a rule by higher groups, but they are found in the American continent as part of the material equipment of peoples who had not yet learned how to make pottery. An early example of cloth, combining threads of cotton with some fiber like yucca, was found in the Lower Middle Culture horizon of Zacatenco.

The long practice of weaving must and did have a sig- 286
nificant effect on decoration, for the rectangular patterns, to 531
which the weaver is confined, influence all of Indian art in Continental America. Design and the arrangement of elements are more important than form in Indian art. While many geometrical patterns appear in pictures of Aztec clothing, fine embroidery could produce the effect of curvilinear designs or even naturalistic patterns drawn from the regional flora. Batik and tie dyeing also enriched the decoration of [386]
Aztec clothing. Other processes produced the effect of velvet and brocade, and some garments even imitated in tex-

1:Vaillant A-5 (1928-1936)1941 NU7 Aztec NU7

286 ture and pattern the skins of animals. Judged on a visual
531 basis, the designs on Aztec clothing were by no means inferior to those of the celebrated textile art of Indian Peru. However, we have no positive evidence that technical development of Aztec weaving was equal to Peruvian, for those ancient South American weavers knew and practiced every method known to man and even a few unique to themselves.[6] (See Plates 33–36; 62, bottom left; 64.)

287 Feather mosaic is probably an old craft, since evidence seems to show that it was known to the Upper Middle Cultures. Feather- and the technically allied fur-cloth appear in primitive horizons in North America. The process consisted in tying the stems of feathers into a fabric during the weaving process. Featherworkers adorned shields in this way, dispersing the feathers to represent animals or else purely decorative designs. They made cloaks, too, and created sumptuous insignia worn on the head or harnessed to the body. In these objects the blending of colors was so delicate and perfect as to rival paintings. As late as the nineteenth century, although the art had declined, the Mexicans still depicted landscapes and scenes from daily life in this medium, and today they make charming pictures for the tourists with cardboard, feathers and glue.[7] (See Plate 45.)

321 Feather mosaic had an early counterpart in stone and
324 shell; we found a turquoise mosaic in a Lower Middle Culture grave. The wooden handles of sacrificial knives were sometimes ornamented in this way, as were masks, shields and even small gold ornaments. A *tour de force* of the mosaic worker is a wooden shield from the Mixteca, on which little pieces of turquoise were fitted together in a relief sculpture depicting a religious scene.[8] (See Plates 48; 60, bottom right.)

1:Vaillant A-5 (1928-1936)1941 NU7 Aztec NU7

emanated chiefly from Puebla, but in the fifteenth century 223 531 the quality and quantity increased, indicating the effects of [177] trade and tribute. The historical reports that Texcoco was culturally superior to Tenochtitlan are borne out by archaeology; the Texcocan wares, although following the same styles as the Tenochcan, were better made and had a greater variety of design. Also there is evidence of more trade with foreign tribes.[19] (See Plates 30–32.)

Goblets were made for pulque; graters were made for 323 grinding chilis, and clay vessels were made for every con- 415 ceivable use; one form was a small oval platter with a special compartment for sauce, resembling the "blue-plate special" dishes of our modern restaurants. The circular roaster or griddle for cooking tortillas came in with Mazapan culture and continued to be popular through Aztec times. The bottoms of griddles were roughened so that heat would penetrate rapidly and evenly to the dough on the smoothed upper surface.

Clay utensils had their use in weaving. The Aztec spinner 323 rested the end of her distaff in exquisite little cups, often 286 charmingly ornamented. Her spindle weights were also made 283 of baked clay. In the fourteenth century these were heavy and had holes large enough for a heavy spindle. Often their [531] burnished black or red surfaces were cunningly adorned with stamped or incised designs representing conventional patterns or human and animal figures. In the fifteenth century the spindle weights became much smaller, so that at times it is hard to distinguish them from beads. This reduction in size perhaps indicates the spinning of more delicate cotton threads.

The spindle weight, or whorl, has an important bearing 283 401

The sixteenth month they named Atemoztli. In this month they celebrated a feast to the rain gods, because for the most part in this month it began to thunder and to threaten rain; and the priests of the Tlalocs began to do penances and to offer sacrifices, so that the rains would come.

Al mes decimo sesto llamauan Atemuztli: En este mes hazian fiesta a los Dioses de la plouja: porque por la mayor parte en este mes, començaua a tronar y hazer demuestras de agua: y los satrapas de los Tlaloques començauan a hazer penjtencias y sacrificios porque venjesse el agua.

796X [805 776]

Chapter 16
Atemoztli

When it began to thunder, the priests of the Tlalocs, with great industriousness, offered *copal* and other fragrances to their gods and to all the statues of these. They said that then they came to give rain. And the common folk made vows to fashion the images of the mountains, which are called *tepictli*, because they are dedicated [to] those gods of the rain. And on the sixteenth day of this month, all the common folk prepared offerings to offer before Tlaloc. And [during] these four days they performed penances, and the men abstained from women, and the women from men.

Having come to [the time of] the feast, which they celebrated on the last day of this month, they cut lengths of paper, and they bound them to a number of poles, from bottom to top. And they set them up in the courtyards of their houses and made the images of the mountains of *tzoalli*. They fashioned for them their teeth of squash seeds, and their eyes of some beans which are named *aiecotli*. And then they offered them their offerings of food, and they worshipped them.

After having kept a vigil for them, and beaten drums and sung for them, they opened their breasts with a *tzotzopaztli*, which is an instrument with which the women weave, almost like a *machete*; and they took out their hearts and struck off their heads. And later they divided up all the body among themselves and ate it; and the ornaments with which

3. Marginal notation: Domingo de dos anos.

they placed before all the *xipeme*, they who had put on the skins of men.

And others, who had become drunk, unruly [like] warriors, daring, foolhardy, full of spirit, lively, proud of their valor, playing the part of men, started brawls, forced them to join issue, and battled as if in war, and fought.

And to arouse their wrath, verily to move them, that they might become enraged and angry, they snatched at and pinched their navels.

Whereupon the *xipeme* made them run. Behind them stood a *tatec*, named the Youallauan; he followed them and were skirmishing with all the *tototeci*.

Then [the *tototeci*] set upon [the warriors] and took after them; they went on fighting them, seeking to seize and lay hands upon them, like holding those who had detained them by the leg.

And [the warriors] went whirling around, circling back, fighting the others with pine staves.

And if some were taken who had detained [the *xipeme*], these *xipeme* beat them; they struck [such an one] with their rattle sticks, showing their anger.

And they carried him to the Temple of Iopitli; and not for nothing did he come out, not for nothing was he let free. Something was given as ransom; something was taken—perchance a turkey-hen, mayhap a great cotton mantle he offered, etc.

As hath been told in the description of Xipe, just so was it done. Afterwards visits were made and entertainments provided for the *tototeci* and *xipeme*.

Thereupon began the gladiatorial sacrifice. The captives were spread out in order; the captors stood arranging and accompanying them. Then also the striped ones came forth; swiftly the ocelot[-costumed warrior] led and guided them; he came quickly to meet [the captives], displaying his shield and war club and lifting them up toward the sun [in dedication].[34]

Then he turned back, retreated, turned to the rear; once again he went back.

In the same manner there then followed him, coming second, the eagle[-costumed warrior], who similarly lifted up [as an offering] to the sun his shield and his war club.

Once again emerged another ocelot[-costumed warrior], who came out as third, doing the same as he quickly came out.

34. Sahagún's Spanish here: "Levantaban la rodela, y la espada hacia el sol, como demandando esfuerzo al sol." Cf. also Pl. 5.

[If the captive was] a man, he burned

[415] his streamers, and his cloak, and his breech clout, and all the things he had received, and his water gourd. All these he burned.

[462 283 286] And a woman burned all her womanly array—her basket, her spindle whorl, her chalk, her spinning bowl, her warping frame, her *quat* stalks, her batten, her heddle, her divided cord which held [up the textile], her waist band, and her weaving stick, and her thorns, and her skeins, her shuttle, and her measuring stick.[7] All these she burned herself.

Of these of which they disposed in this wise, it was said that they would be needed where they were going, when they went; when they died, there [these things] would await them.

And when it dawned, all were adorned and arrayed. They put upon them their paper vestments, in which they were to die. When they had adorned them, then they were taken where they were to die. Two escorts led them; they went to take them up, and, lest they faint, laid hold of them. And two [escorts] were to bring [the bodies] down; they went [202] to bring them down when they died, and a flag-bearer went bearing a flag. And two escorted each woman. They did likewise when they took each of the ceremonially bathed captives.

And when they had brought them [there], Your captives to be slain went ahead. At the landing at yoan imantli, yoã in quezaqui itlaçvil, yoã intech mochi quijtlaia.

7. These weaving implements have been tentatively identified with the assistance of Dr. Gladys A. Reichard, Barnard College, Columbia University, N. Y., and Dr. Earlen F. Dutton, School of American Research, Santa Fe. The accompanying drawings of weaving and weaving implements are from Books VIII and X, after Pozo y Tezozomoc.

[286]

images], holding a vigil for them. And they blew trumpets and flutes for them.

And they who sounded trumpets were not those whose office it was [to blow trumpets], but youths. They were much honored; they were offered food and wine.

And after this, upon the next day, [the priests] then sought weaving sticks. Thereupon they implanted them in the breasts [of the images].[7]

And when they had set in [the weaving sticks], then they cut off the heads of the [figures of] amaranth seed dough. Then they seized what had been used for their hearts, and offered them up to them who had had the figures made, placing them in the green bowl.

And when this was done, when they had slain the [figures of] amaranth seed, thereupon they gathered and heaped up all the paper vestments of the mountain images. They burned [them] in the middle of the courtyard—they consumed them, they laid fire to them. And their little vessels, the little wooden vessels, all these [were] burned together.

And all the reed mats upon which they had stood, and the reed staves, and all the little vessels from which they had eaten, and the green jar, all [these] they took to the Mist House.

When they came [from] leaving these, thereupon first arrived the hidden guests, who were to feast in honor of the images. Then all were offered food, each severally and separately. When they had eaten, then they offered them wine.

And the women also entered. It was said, "They bring in the *tamales*." None came empty-handed; all of them came bringing dried maize kernels, the women carrying them in their skirts. And those who brought their ears of dried maize [brought] perhaps fifteen or twenty.

And when they sat down, when they took their places, then they offered them food. All were offered food. Then likewise they offered them wine, and made them drunk. They set before them wine in black vessels. And they offered them cups, drinking vessels, wine jars, which were also black.

And when they took away the white spotted paper

7. The Pedrera MS reading differs (Barlow, op. cit., p. 314), "[illegible]" [illegible] Tlamacazqui (op. cit., p. 206) [illegible] "[illegible]" [illegible]

And a fire priest arrayed himself; he was bedight as a young warrior. He imitated a young warrior, with his netting cape, his forked heron feather device, his deer hoof [rattles], his lip pendant. He departed from the temple above, and brought a *magney leaf* on which was a small banner.

When he came down to the ground, he then went to the eagle vessel, where stood the grain bin, and there he placed the magney leaf.

And when he had placed it there, then appeared the priests, hastening greatly, as if [all] strove to be first. This was known as, and called, "The Flower Race." [For] they climbed up to the temple, where the flower was. It was named "Flower of the God."

And upon reaching the summit, then the priests laid fire to, filed burned, the grain bin. Once again they descended, rushing down with the flower; they cast the flower upon the eagle vessel, in which the grain bin burned. Then all the priests ran off, in all directions. Enough of this.

And upon the morrow, then began [the sport of] casting bags at people. All made bags for themselves. They carried grass nets, and filled them with the flowers of reeds or with scraps of papers. They shredded paper; they shredded it fine and bound it to the inside [of the nets]. And some carried nets [made] as it were like gloves, also filled with reed flowers; [these] were called hand bags. And some only prepared themselves green maize leaves, which were made into bags; they pressed the leaves into balls.

And now it was commanded that none should put stones [in the bags]. Those who were yet small boys played purely in fun when they began the mock-fight with bags; only gradually it quickened. As the mock-fight was fought, as it flared [in intensity], blows were struck, perchance at the heads [of the participants], or their backs, or their breasts, as they dealt blows.

And the older boys cast bags at the maidens—those [yet] with long hair[dress]—whenever these came before them. They cast bags at them, surrounded them, [so that] in truth, they made some of them weep. And when some woman took forethought, if she went forth, she carried her staff, or she [carried the branch of] some kind of thorny plant. If anyone came upon her to cast a bag at her, she pursued him; she was thus defended.

And if she carried nothing for her defense, verily

Sixteenth Chapter, in which it is told how the women were trained.

[Theirs were] the device with which [the loom] was held; the divided cord; the skein; the shuttle; the cane stalks; the wide batten, which swished [as it was used]; the thin batten, one made of bone; the small batten with which they worked designs; the heddle; the flail; the spindle whorl; the spinning bowl; chalk; the shallow spindle whorl when they spun with feathers; the basket for unspun cotton, one for rabbit hair, one for cotton thread, the basket for feathers, and the earthen bowl for feathers; the rack for yarn; the colored wood[1] with which they dyed cotton when they wove; the bowl for colors in which they dissolved pigments; the paper patterns from which they took the shape of whatsoever they made; maguey spines, with which they picked the cotton threads.

They took personal charge of preparing food and chocolate. There were their older women, who had reared them; and their hand-maidens were hunchbacks and dwarfs, who sang and played the [small ground] drum to amuse them.

635 *Regional names.*—The cabacera of Hueypuchtla lay within the region known as the Teotlalpan,[a] as did Tequixquiac[b] and the Tezcatepec we have identified as the pre-Hispanic Tézcatepectonco.[c]

TRIBUTE

651 *Tribute of the whole province.*—Hueypuchtla and its subject towns paid the following tribute to the Empire:

CLOTHING

[291 714] 400 little decorated mantles**
400 henequen mantles with black-and-white border**
800 white henequen mantles**
62 warriors' costumes, with shields*

FOOD*

[262 263] 4 wooden cribs (1 each of maize, beans, chian, and huauhtli)
400 jars of thick maguey honey

651 632 *Tribute of the component towns.*—Some of the elements of the tribute listed above may be traced in the relaciones of the sixteenth century.

[284] Hueypuchtla gave game and mantles and weapons, as well as making a special milpa for purposes of tribute. Nets are also mentioned—an unusual item.[d]

Tezcatepec[tonco] provided weapons and game.[e]

[231] Tolnacuchtla gave tribute of game, among which figured live eagles.[f]

that it contained, and at the good order and control that was maintained, for we had never seen such a thing before. The chieftains who accompanied us acted as guides. Each kind of merchandise was kept by itself and had its fixed place marked out. Let us begin with the dealers in gold, silver, and precious stones, feathers, mantles, and embroidered goods. Then there were other wares consisting of Indian slaves both men and women; and I say that they bring as many of them to that great market for sale as the Portuguese bring negroes from Guinea; and they brought them along tied to long poles, with collars round their necks so that they could not escape, and others they left free. Next there were other traders who sold great pieces of cloth and cotton, and articles of twisted thread, and there were *cacahuateros* who sold cacao. In this way one could see every sort of merchandise that is to be found in the whole of New Spain, placed in arrangement in the same manner as they do in my own country, which is Medina del Campo, where they hold the fairs, where each line of booths has its particular kind of merchandise, and so it is in this great market. There were those who sold cloths of henequen and ropes and the *cotaras*[1] with which they are shod, which are made from the same plant, and sweet cooked roots, and other tubers which they get from this plant, all were kept in one part of the market in the place assigned to them. In another part there were skins of tigers and lions, of otters and jackals, deer and other animals and badgers and mountain cats, some tanned and others untanned, and other classes of merchandise.

Let us go on and speak of those who sold beans and sage and other vegetables and herbs in another part, and to those who sold fowls, cocks with wattles, rabbits, hares,

[1] Sandals.

601

Mother: "nantli"—"tenantzin"—"teciztli."[18]

Aunt: "auitl"—"teaui."[19]

Grandmother as well as grand-aunt: "citli."[20]

Great-grandmother "piptontli."[21]

Descending from the "Ego."

Son: "tepiltzin," "tetelpuch." But the women (mother, sisters, etc.), call him "noconeuh."[22]

[18] *Molina* (I, p. 80; II, pp. 62, 88, 98). "Citili" is probably the same as "Citli,"—hare, or grandaunt. The fact that the same name should be given to a near female relative or even to the mother, and to a fleet, timid, quadruped, is very singular. It may be that the timidity of the animal has given occasion to bestow the name, or, since hare's hair was frequently woven into fine mantles, together with feathers, that this also may have given rise to it. The latter is first mentioned by *Peter Martyr*, of *Anghiera*, "*De nouo Orbe*," or the "*Historie of the West Indies, etc., etc.*" London, 1612. An English translation by Michael Lok and Richard Eden, of the famous "Decades," also entitled "*De Rebus Oceanicis*," (Dec. V, cap. X, p. 229), he mentions having seen among the objects brought to the court of Spain by Juan de Ribera, garments; "they compact of Conies haire, and they set those feathers in such order between the Cony haire, and intermingle them between the thriddes of the cotton, and weave them in such difficulty, that we do not well understande how they might do it." *Sahagun* (Lib. XI, Cap. 1, p. 137) mentions another animal to which the name "cioatlamacasqui" is given, which he translated "little old woman," basing upon its other designation of "tlamaton."

[257 284]

The reverend father is, however, in error. The first name signifies literally, "woman medicine-man," or "female doctor" (Indian notion of course), and the second "little medicine-man," from "cinasi" woman, Molina, II, p. 32, "tlama"—medicine-man, (II, 128). This animal seems to be the Raccoon, as the following quotations prove: *Joannis Eusebius Nierembery*, ("*Historia naturæ maxime peregrinæ*," Antwerp, 1635 Lib. IX, Cap. XLII, p. 175). "Antra canitates montium atque collium Tzozocolci hospitatur animal peregrinum, quod cuncta manibus praetentat. Mapach ab Indis dicitur, sed non firmo nomine; alij illamaton seu vetulam appellant, alij maxile seu goozypinum tinguium, alij cioatlamacasque seu sacerdotissam." *Oviedo y Valdés* (Lib. XII, Cap. XXXIX, p. 429), he calls "Coquamatle," an animal which is probably the Coati, makes no mention of the "mapach," but *Clavigero* (Lib. I, Cap. X, p. 76) treats of this animal fully.

The naming of a female relationship, "Citli" appears the more strange, as this name is given, in the Mexican mythological tales, to a *god* who tried to compel the sun to move, and lost his life in the attempt. This story is due to *Andrés de Olmos*, neither Sahagun nor Motolinia mention the occurrence in this manner. Compare *Sahagun* (Lib. VII. Cap. II, p. 245, etc., etc.); *Mendieta* (Lib. II, Cap. I, pp. 77, 78) and *Torquemada* (Lib. VI, Cap. XLI, p. 76). Both refer it to his authority. We shall refer to it in our essay on "Creed and Belief."

[773]

[19] *Molina* (I, 118; II, 9, 91).

[20] *Molina* (I, 118; II, 22). See note 18.

[21] *Molina* (I, p. 117; II, 88). There is also, "alpiptzin"—"parente fraco de vejez," and "Piptzqui yuacayo"—"viejo fraco y arrugado." The affix "tontli" is a diminutive.

[22] *Molina* (I, p. 71). A singular etymology is shown here: The man says, "Thy" / "Thine" boy" or "Thy" / "Thine" youth." ("Te-piltzin"—Te-tetpuch" from "Tehuatl" or "Te") "thou" / "thine" and "Piltzintli," child, male or female, (II, p. 88,) and "Tetpochtli," youth, (p. 98). The woman, however, calls: "my child" (or boy, since the same name is for both

787X

drew blood. It was said: "Thus was the sun nourished."

And Seven-Flower was said [to be] good and bad. As a good [sign], in certain places the scribes paid it honor and were devoted to it. They set up its image and made offerings to it. Also those women who were embroiderers and cotton thread workers first fasted for eighty days; some fasted for forty or twenty days, when penance was done. Thus they requested of it that what they undertook might be well done; [that] their embroidery or design might be a work of art well fabricated and well painted. All therefore offered incense and slew quail; and all bathed and sprinkled themselves with water, when [the fasting] had been lifted. Then the feast of the day sign, Seven Flower, was celebrated.

And they said when it was not a good [day sign], that if some embroiderer broke her fasting — it was said — then she merited for herself infamy and an ill name. Thus she could only live in vice and become a harlot. For it was said the embroiderers lived in great vice and became terrible whores.

It was said the one who was their goddess, named Xochiquetzal, made sport of and mocked her. And she gave and thus scourged her with piles and infections.

But she who did well her penances, who took heed, and so then attained success, was esteemed, and gained honor for herself. In [all] places she was looked to; by the grace of the people, she lived well on earth.

Also it was said of this [day sign] that he who was born on it would perform all crafts well: he would be a good craftsman; he would plan well great works; he would constantly be prudent, if he took good heed. But if he did not take good heed, nothing resulted; he deserved nothing. He only merited the infamy with which he was defamed and the mockery with which he was mocked.

And Nine Wind was said to be wholly and entirely evil. As to him who was then born, nothing could be made of his life; so nothing would be retained; he could hold nothing; nothing would be kept; nothing would appear; he could do nothing; he was incapable on earth. He was as one driven by the winds, wandering here and there. He might wish to be something, to be someone: he became only nothing. For truly so was his day sign. He might wait for public esteem — to become a mer-

825 And when it appeared that indeed all the chicks
235 fell upon their backs so that they died,[27] upon this they said: "They died of filth; perchance someone came to go in among them; or looked upon them; or indeed it was the householder who slew them by filth." Because of this, they believed, indeed all the turkeys had fallen upon their backs so that they died.

825 It was said that also the same befell those who
236 were married. If perchance somewhere one's spouse, whether woman or man, fell into adultery, they then
837 believed that those which had fallen upon their backs or stumbled over, indeed accused him.

286 ture and pattern the skins of animals. Judged on a visual
531 basis, the designs on Aztec clothing were by no means inferior to those of the celebrated textile art of Indian Peru. However, we have no positive evidence that technical development of Aztec weaving was equal to Peruvian, for those ancient South American weavers knew and practiced every method known to man and even a few unique to themselves.[6] (See Plates 33–36; 62, bottom left; 64.)

287 Feather mosaic is probably an old craft, since evidence seems to show that it was known to the Upper Middle Cultures. Feather- and the technically allied fur-cloth appear in primitive horizons in North America. The process consisted in tying the stems of feathers into a fabric during the weaving process. Featherworkers adorned shields in this way, dispersing the feathers to represent animals or else purely decorative designs. They made cloaks, too, and created sumptuous insignia worn on the head or harnessed to the body. In these objects the blending of colors was so delicate and perfect as to rival paintings. As late as the nineteenth century, although the art had declined, the Mexicans still depicted landscapes and scenes from daily life in this medium, and today they make charming pictures for the tourists with cardboard, feathers and glue.[7] (See Plate 45.)

321 Feather mosaic had an early counterpart in stone and
324 shell; we found a turquoise mosaic in a Lower Middle Culture grave. The wooden handles of sacrificial knives were sometimes ornamented in this way, as were masks, shields and even small gold ornaments. A *tour de force* of the mosaic worker is a wooden shield from the Mixteca, on which little pieces of turquoise were fitted together in a relief sculpture depicting a religious scene.[8] (See Plates 48; 60, bottom right.)

714 While we shall, further on, have occasion to recur again to the 287 question of military costume and ornaments; when we treat of 237 the different grades of warriors and captains, it remains to be said here that *featherwork*, worn as a *layer* over the "escaupil," played a prominent part in the Mexican armour.[65] It formed an elastic layer on the outside of the quilted jacket, and besides it furnished, through an assemblage of colors peculiar to each sub-division of the force, the "uniform," or, as the Spanish authors call it, the "livery," of that particular sub-division. The Anonymous Conqueror says: "They cover their jackets and breeches "with feathers of various hues, presenting a very good appear-"ance; one company of soldiers has them white and red, others "blue and yellow, and others wear them still different."[66] Bernal-Diez mentions that while fighting on the causeways during the siege of Mexico: "in the morning many captaincies (detach-"ments) would attack us, relieving each other from time to time; [302] "some had one livery and ensign, others had other ones."[67] Such of the warriors as were but scantily clothed painted their naked bodies.[68]

[293] "of gold." Tezozomoc (Cap. LIV, p. 88) gives the following description of the figure of Axayacs, carved out of the rock of Chapultepec, "with hair of precious feathers, "painted of the colors of the bird tlauhquechol . . . ." The bird whose plumage furnished the material was called "quetzal-tototl." It is "*Trogon resplendens*." (See "San Salvador and Honduras im Jahre 1571," a German translation of the report of Diego Garcia de Palacio, by Dr. A. von Frantzius, of Freiburg, ib.—p. 39, No. 61 note. The notes by the learned translator, as also those of Dr. Berendt, are highly valuable.) The "tlauhquecho!" was also used.

[65] Prescott (History of the Conquest of Mexico, 1809, Book I, chap. II, pp. 45, 46, and 47, of Vol. I).

[66] (El Conquistador anónymó) Col. de Doc., Vol. I, p. 372.

[67] "Historia verdadera de la Conquista de Nueva-España" (Cap. CLIII, p. 188, in vol. II. of Vedia).

[68] It is presumable that the colors were those of the detachments to which the warriors belonged. At any rate, it shows that the Mexicans, like the northern Indians, had a special "war-paint." Those of Tepeaca, their allies or subjects, used black and red (Herrera, Dec. II, cap. XXI, p. 287, of Lib. X). Clavigero says (Lib. VII, cap. XXIII): "The common soldiers were naked with the exception of the girdle (maxtlatl), but they "sought to *imitate* the dress which they lacked, by painting their bodies with various "colors." Further on he adds (Cap. XXIV): "Besides the common flag of the army "each company of two or three hundred men had its own banner, and was, besides, "distinguished by the color of the plumage, which the officers and nobles wore over "their armour." Although this is no direct evidence of the fact, still it tends to intimate that the paint used by the common warriors was in *imitation of the featherwork* peculiar to their corps. They also painted their faces previous to an engagement: sometimes black. Tezozomoc relates that, on one occasion, Ahuitzotl painted his face *yellow* ("con un betun amarillo"). His armour was *blue* (Durán, Cap. XLVI, pp. 371 and 372, "tizñéndose las caras con la tizne divina. quellos asi llamauan, y el rey Auit-"zotl vestido de ricas mantas, y debaxo muy bien armado con sus armas açules . ."

16:Bandelier E-4 (no date) 1880 NU7 Aztec NU7

463 *compelled* him to do it.[70] It is true, that such as formed gold or silver into pleasing or (as viewed from eastern notions of taste) rather striking shapes, enjoyed some particular consideration; but this was not so much in deference to their skill, as to the *material* upon which they exerted it. Gold ("teo-cuitlatl") and silver ("Iztac-teo-cuitlatl") were regarded as "offal of gods." Thus they became objects of "medicine," and those who wrought them into useful or decorative articles, were near to the "medicine-men" themselves.[71] Furthermore, the manner and method of working was so slow, it relied so exclusively upon that patient [556] disregard of time which characterizes even the manufacture of a simple arrowhead, that no accumulation of wealth could result from it.[72] Besides, the artisan had, like any other member of the kin, to furnish his share towards the requirements of public

[70] *Zurita* ("Rapport, etc.," p. 129). "Les chefs inférieurs et les personnes du peuple élevaient aussi leurs enfants avec beaucoup de soin, leur inspiraient l'horreur du vice, leur recommandaient le respect des dieux, les conduisaient aux temples et les faisaient travailler suivant leurs dispositions; cependant, en général, le fils embrassait la profession de son père." *Gomara* ("*Conquista*, etc.," Vedia, Vol. I, p. 438). "Los pobres enseñaban á sus hijos sus oficios, no porque no tuviesen libertad para mostralles otro, sino porque los aprendiesen sin gastar con ellos." *Carlos Maria de Bustamante. Tezcoco en los ultimos Tiempos de sus antiguos Reyes*," 1826. Parte tercera, (Cap. III, p. 212). "Enseñaban ademas los oficios á que tenian aficion." *Clavigero* (Lib. VII, [564] cap. V, p. 462). "The sons generally learned the trade of their fathers," but they were not bound to do it, and therefore no "caste."

[71] The words are composed of: "Iztac," white object (*Molina* II, p. 49), "Teotl" god (II, p. 101), "Cuitlatl" filth, therefore gold was "offal of God," and silver, "white offal of God."

325 The working of gold and silver was regarded, by the Mexicans, as an invention of "Quetzalcohuatl." *Sahagun* (Lib. III, cap. III, p. 243), "y los vasallos que tenia eran todos oficiales de artes mecánicas, y diestros para labrar las piedras verdes, que se llaman chalchivites, y tambien para fundir plata, y hacer otras cosas; y estas artes todos tuviéron principio y origen de l dicho *Quetzalcoatl*." (Also Lib. X, cap. XXIX, [685] p. 113, etc.). Theft of gold or precious stones was punished by death through sacrifice. *Clavigero* (Lib. VII, cap. XVII, p. 487). *Vetancurt* (Parte IIa, Trat. I°, p. 484. "Leyes do los Mexicanos").

● 287 [72] A very remarkable way of manufacturing their most admired works—those made of feathers—is reported by *Mendieta* (Lib. IV, cap. XII, pp. 405 and 406): "And there is, besides, something else to notice of this featherwork, namely: that if there are twenty artisans, they will undertake jointly the manufacture of one piece ("imágen"), for, dividing among themselves the figure of the image in as many parts as there are of their number, each one takes his piece home and finishes it there. Afterwards they all meet again and put their pieces together, thus finishing the figure in as perfect a manner as if one alone had made the whole." (Copied by *Torquemada*, Lib. XIII, cap. XXXIV, p. 489, and, with slight variations, also by *Vetancurt*, Vol. I, p. 380.) In regard to the manner of working, *Torquemada* (Lib. XIII, cap. XXXIV, p. 487), makes the pertinent remark: "All this they worked (as we have said) with other stones, and with flint; and according to the subtlety of the work, I think they must have spent long time in finishing it." See in general *E. B. Tylor* ("*Researches into the Early History of Mankind*," Cap. VII, pp. 187 and 188), also *Motolinia* (Trat. I, cap. IV, pp. 31 and 32).

1:Vaillant A-5 (1928-1936)1941 NU7 Aztec NU7

divinity to appease on the date of that undertaking. It is im- 796
probable that the ordinary communicant daily honored each god any more than a Catholic layman prays daily to each saint in the calendar. He did reverence in terms of his own spiritual and actual necessity.

A number of the *tonalamatl* have survived. These ref- 212
erence books for priestly guidance are made of paper beaten [289]
from the bark of the amate or wild-fig tree, although some post-Conquest copies were composed of European paper. An ancient book consisted of a long paper strip which was prepared and coated to take paint and subsequently folded screenwise to permit easy handling. Occasionally only one but usually the two open pages were devoted to each week. A large colored drawing depicted the divinity controlling the week, and other figures represented subsidiary gods and objects connected with their worship, such as thorns, incense burners, altars, and the like. The rest of the space was ruled off into squares, in which were painted the requisite thirteen day names and numbers, the gods and goddesses associated with each and occasionally their *nahuals*, the bird or animal forms which the divinities could assume. Obviously only the initiate could make use of this information, which existed in the form of pictures without an explanatory text. However, it is the great good fortune of Mexicanists that some of the friars after the Conquest annotated a few of these manuscripts according to the explanations of Indian informants.[8] (See Plate 59, top.)

The great Aztec ceremonies, however, took place in ac- 796
cordance with the solar year, composed of eighteen months 805
of twenty days and a five-day period which was considered unlucky (Table XVII). The months had names having to do

[Text continues on p. 198. --- Analyst]

776 Quetzaltepec, Chalchiuitl ytec, Tlaloc, Papoztepec, Iztac
782 tepetl, Poiauhtecatl,[117] and any other mountains of which
they had vowed to make representations.

And they represented the mountains, they made their
532 images, only in a dough of amaranth seed and maize,[118]
782 made in human form, made to look like men.

They gave them teeth of squash seeds; they provided them
755 eyes of fat black beans. With whatever adornment [the
mountains] were represented, thus when they made them,
they thereupon arrayed them.

[314 And they made papers, and they spattered them with
289] liquid rubber.[119] And they laid these over them as mantles.

And some of these papers, which were spattered with
drops of liquid rubber, they hung on a cord, tied and fa-
tened together, so that they were held in a row before
the small molded ones [Tepictoe].

They rustled, quivered, and flew in the breeze. Canes of
fat, round reeds [held the cord] at both ends; [the canes]
were stuck into and supported by the ground. On this were
hold the rubber-spotted papers.

[415] And a green spotted gourd was split in two and cored.
Before [the Tepictoe] they set this, which they called the
turquoise cup, for the wine, in which the wine was. Thus
they offered [them] wine.

793 And it was the office of the priests alone, who were experi-
532 enced, to make [the Tepictoe] and set them in place. None
of the householders dared make or adorn them.

And on the fifth [day], when they feasted the priests,
it was said, they caused them to forget.

782 When the Tepictoe were fashioned, thereupon they held
755 a vigil and made music for them.

During the night, they made offerings four times; they
set before the priests, before those who sang the songs for
the Tepictoeton, round *tamales* which they gave them.

And four times they offered them food during the night,
and they made music for [the Tepictoeton].

[192 They whistled with their fingers, they made music for
533] them with shells, with flutes, and with fifes.

Young persons, in their cups, who cut capers, and amused
[273 people, blew the flutes. They also were offered food.

463] And on the next day they slew the Tepictoeton [images];
they slew them, like sacrificial quail, twisting their necks.
Then they gathered up and carried away the Tepictoeton
figures made of a dough of amaranth-seed and maize to
the priests' house, where dwelt the priests.

And he who [caused to be] fashioned the Tepictoe there-
upon returned to his guests, where they were entertained.

273 And in the evening, toward nightfall, there all the old
782 people sat drinking wine—those already advanced in age, the

117. Gods of the air, of water, and of rain (*cf.* corresponding Spanish text). Popocatepetl and Iztac tepetl (Snow cloud) are mountain-gods in the Valley of Mexico; Poiauhtecatl is Mt. Orizaba.

118. Made of dough (*tzoalli*), in the Spanish colonial, Sahagún's contemporaries *Samuel dos Santos* (Ensaye Español, p. 27).

119. ". . . *cubre papeles llenos de goteo de cáli, a los cuales papeles llamaban amatemalli*" (Sahagún, *Historia general*, Vol. 1, p. 130).

The thirteenth month they named Tepeilhuitl. In this month they celebrated a feast in honor of the high mountains, which are in all these lands of this New Spain, where large clouds pile up. They made the images of each one of them in human form, from the dough which is called *tzoalli*, and they laid offerings before these images in veneration of these same mountains.

Al tercio decimo mes llamauan Tepeilhujtl: En este mes hazian fiesta a honrra de lo montes eminẽtes, que estan por todas estas comarcas desta nueua españa: donde se armã fiublados: hazian las ymagenes en figura humana a cada vno dellos de la masa que se llama tzoal, y ofrecian delante destas ymagenes, en respecto destos mismos montes.

Chapter 13
Tepeilhuitl

In honor of the mountains they made a number of serpents, of wood or of the roots of trees, and they fashioned them heads like [those of] serpents. They made also some lengths of wood, as thick as the wrist, and long. They called them *ecatzontli*. These, as well as the serpents, they overlaid with that dough which they call *tzoalli*. These pieces they provided a covering in the manner of mountains. Above, they placed the head, like the head of a person. Likewise they made these images in memory of those who had drowned in the water, or had died such a death that they did not burn them, but rather buried them.

After, with many ceremonies, they had placed upon their altars the aforementioned images, they also offered them *tamales* and other food; and also they uttered canticles of their praises, and they drank wine in their honor.

Upon arrival of the feast in honor of the mountains, they slew four women and one man. The first of these [women] they called Tepexoch. The second they called Matlalcueie. The third they named Xochtecatl. The fourth they called Mayauel. And the man they named Milnaoatl. They decked these women and the man in many papers covered with rubber. And they carried them in some litters upon the shoulders of women highly adorned, to the place where they were to slay them.

1. Mexicanos [illegible] *Cuauhtlehuanitzin* [illegible] *Ecatzontli*.

Cap. 13.
Tepeilhujtl.

EL Hazian a honrra de los montes: vnas culebras de palo o de rayzes de arboles, y labrauanles la cabeça como culebra: haziã tãbien vnos troços de palo gruesos como la muñeca largos llamauanlos Ecatotonti: ãsi a estos como a las culebras los investian cõ aquella masa que llamã tzoal: a estos troços los investian a manera de montes, arriba les ponjan su cabeça como cabeça de persona: hazian tambien estas ymagenes, en memoria de aquellos que se aujan ahogado en el agua o avian muerto de tal muerte que no los quemauan, sino que los enterrauan.

Desptes que cõ muchas cerimonjas, aujan puesto en sus altares a las ymagenes dichas: ofrecianles tambien tamales y otras comjdas: y tambien los dezian cantares de sus loores, y beujan vino por su honrra.

Llegada la fiesta a honrra de los montes, matauan quatro mugeres y vn hombre: la vna dellas llamauã tepexoch; la segũda llamauã Matlalcueie: la tercera llamauan Xochtecatl: la quarta llamauã Mayauel, y al hombre llamauã Milnaoatl: adereçauan a estas mugeres y al hombre cõ muchos papeles llenos de vlli: y lleuauanlas en vnas literas en hombros de mugeres muy atauiadas, hasta donde las aujã de matar.

X 796 After they had slain them and torn out their hearts, they took them away gently, rolling them down the steps. When they had reached the bottom, they cut off their heads and inserted a rod through them, and they carried the bodies to the houses which they called *calpulli*, where they divided them up in order to eat them. The papers with which they arrayed the images of the mountains, after they had broken them to pieces in order to eat them, they hung in the tribal temple. Many other ceremonies were performed in this feast, which are set down at length in its account.

[266]

[289]

Despues que las ouieron muerto, y sacados los coraçones: lleuauanlas passo rodando por las gradas abaxo: llegadas abaxo cortauanlas las cabeças, y espetauanlas en vn palo, y los cuerpos lleuauanlos a las casas que llamauan Calpul: donde los repartian para comer: los papeles con que adereçauan las ymagenes de los montes despues de averlas desbaratado para comer, colgauanlos en el Calpul. Otras muchas cerimonjas se hazian en esta fiesta, que estan a la larga puestas en su historia.

The sixteenth month they named Atemoztli. In this month they celebrated a feast to the rain gods, because for the most part in this month it began to thunder and to threaten rain; and the priests of the Tlalocs began to do penances and to offer sacrifices, so that the rains would come.

Al mes decimo sesto llamauan Atemoztli: En este mes hazian fiesta a los Dioses de la pluuja: porque por la mayor parte en este mes, començaua a tronar y hazer demuestras de agua: y los satrapas de los Tlaloques començauan a hazer penjtencias y sacrificios porque venjesse el agua. 796 [805 776]

Chapter 16
Atemoztli

When it began to thunder, the priests of the Tlalocs, with great industriousness, offered *copal* and other fragrances to their gods and to all the statues of these. They said that then they came to give rain. And the common folk made vows to fashion the images of the mountains, which are called *tepictli*, because they are dedicated [to] those gods of the rain. And on the sixteenth day of this month, all the common folk prepared offerings to offer before Tlaloc. And [during] these four days they performed penances, and the men abstained from women, and the women from men.

Having come to [the time of] the feast, which they celebrated on the last day of this month, they cut lengths of paper, and they bound them to a number of poles, from bottom to top. And they set them up in the courtyards of their houses and made the images of the mountains of *tzoalli*. They fashioned for them their teeth of squash seeds, and their eyes of some beans which are named *aiecotli*. And then they offered them their offerings of food, and they worshipped them.

After having kept a vigil for them, and beaten drums and sung for them, they opened their breasts with a *tzotzopaztli*, which is an instrument with which the women weave, almost like a *marlete*; and they took out their hearts and struck off their heads. And later they divided up all the body among themselves and ate it; and the ornaments with which

2. Marginal notation: *Domingo de dias [illegible]*

785 fasted, [some] for forty days, others for twenty, in
x 796 order to prevail over chance, in order to paint well
463 and to weave textiles well. For this purpose they offered quail and incense, and performed other ceremonies—the men to the god Chicome xochitl, and the women to the goddess Xochiquetzal.

The Third Movable Feast

x 796 In the third sign, which is called ce maçatl, in the
[776] first house, they celebrated a feast to the goddesses
who are named Cinapipilti, because they said that
●[289] then they came down to the earth. They adorned their images with papers and offered them offerings.

The Fourth Movable Feast

x 796 In the sign which is called ce maçatl, in the second
house, which is called ome tochtli, they celebrated a
273 great feast to the god named Izquitecatl, who is the
[776] second god of wine: and not alone to him but to all the gods of wine, who were many. On this day they adorned his image very well on his pyramid, and offered him things to eat, and they sang and played [musical instruments] before him. And in the courtyard of his pyramid they set a large open jar of wine,
[463] and those who were wine merchants filled it to overflowing, and all who wished went to drink. They had some canes through which they drank. The wine
[415] sellers kept feeding the large jar, so that it was always full. Mostly those who had newly cut the maguey did this. The first syrup which they took out they took to the house of this god as first fruits.

The Fifth Movable Feast

x 796 In the sign called ce xochitl, in the first house, they
celebrated a great feast. The leading men and the
lords danced and sang in honor of this sign, and they
[309] otherwise made merry. And then they brought forth the richest feathers, with which they adorned themselves for the dance. In this feast the lord gave gifts
[432] to the warriors and to the singers and to the palace folk.

The Sixth Movable Feast

In the sign named ce acatl, in the first house, the lords and the leading men celebrated a great festival
[346] to Quetzalcoatl, god of the winds. This feast they observed in the house called calmecac, which was the house where dwelt the priests of the idols, and where were trained the boys. In this house, which was like

dias, otros veinte por alcançar ventura para pescar bien y para tener bien labores, offrecian a este proposito codornices y encienso, y hazia otras cerimonias los hombres al dios Chicome xochitl y las mugeres a la diosa Sochiquetzal.

La tercera fiesta mouible.

En el tercero signo que se llama ce maçatl: en la primera casa hazian fiesta a las diosas que se llaman cinapipilti porque dezian que entonce descebdian a la tierra, seaujauã a sus ymagines con papeles, y ofrecianlas ofrendas.

La quarta fiesta mouible

En el signo que se llama ce maçatl: en la segunda casa que se llama vme tochtli: hazian gran fiesta al dios llamado Yzquitecatl, que es el segundo dios del vino, y no solamente a el: pero a todos los dioses del vino que eran muchos: adereçavan este dia muy bien su ymagen en su cu, y ofrecianle cosas de comida, y cantauan, y tañjan delante del: y en el patio de su cu, ponjan vn tinajon de pulcre, y hinchianle los que eran taberneros hasta reberter, y yuan a beuer todos los que querian: tenjan vnas cañas con que beujã: los taberneros yuan cosando el tinajon: de manera que siempre estaua lleno: principalmente hazian esto los ãj de nueuo aujan cortado el maguey, la primera agua mjel que sacauan la lleuauan a la casa deste dios como primjcias.

La quinta fiesta mouible

En el signo llamado ce xochitl: en la primera casa, hazian gran fiesta, los principales, y señores, baylauan, y cantauan a honrra deste signo, y hazian otros regozijos: y saçauan entonce los mas ricos plumajes, con que se adereçauan para el areyto: y en esta fiesta, el señor hazia mercedes a los hombres de guerra, y a los cantores y a los del palacio.

La sexta fiesta mouible

En el signo llamado ce acatl: en la primera casa, hazian gran fiesta a quetzalcoatl dios de los vientos: los señores y principales: esta fiesta hazian en la casa llamada calmecac, que era la casa donde moraua los sacrapas de los ydolos: y donde se criauan los muchachos, en esta casa que era como vn mones-

The Thirteenth Movable Feast

In the sign which they called ce tecuintli, [which] they said was the sign of fire, they held a great festival in honor of Xiuhtecutli, god of fire. In it they offered him much *copal* [incense] and many quail. They arrayed his image in many kinds of papers and with many rich adornments. Among the rich and powerful, they celebrated a great feast in honor of the fire, in their own houses; they held dinners and banquets in honor of the fire. In this same sign they held elections of lords and cónsuls, and in the fourth house of this sign they enacted the formalities of their elections, feasts, dances, and gift [giving]. After these feasts, they forthwith proclaimed war against their foes.

La treueua fiesta mouible.

En el signo que llamauan ce tecuintli: deziau que era el signo del fuego: hazian gran fiesta a honrra de xiuhtecutli, dios del fuego: en ella le ofrecian mucho copal, y muchas codornizes: componjan su ymagen, con muchas maneras de papeles, y con muchos ornamentos ricos: entre las personas ricas y poderosas, hazian gran fiesta, a honrra del fuego, en sus mijmas casas, hazian combites, y vanquetes, a honrra del fuego. En este mijmo signo: hazian la election de los señores y consules, y en la quarta casa deste sino: hazian la solēnjdad, de sus electiones, combites, y arrytos, y dones. Despues destas fiestas apregonauan luego la guerra contra sus enemigos.

796 [314] [289] 778 [565] [666] [431] 721

The Fourteenth Movable Feast

In the sign named ce atl, in the first house of this sign, they celebrated a feast to the goddess of water, named Chalchihtli cue. All those who dealt in water celebrated the festival—those who sold water, as well as those who fished, and those who gained other livelihoods which there are in the water. These arrayed her image and laid offerings before her, and revered her in the house called *calpulli*.

La catorzena fiesta mouible

En el signo llamado ce atl: en la primera casa deste signo, hazian fiesta, a la diosa del agua llamada chalchihtli cue: hazian la fiesta, todos los que tratauan en el agua: assi vendiendo el agua, como pescando, como haziendo otras gragerias, que ay en el agua. Estos componjan su ymagen, y la ofrecian, y reuerenciauan, en la casa llamada Calpulli.

[776] [463]

The Fifteenth Common Movable Feast

The lords, leading men, nobles, and rich merchants, when a son or daughter was born to them, paid much heed to the sign, the day, and the hour in which he was born. And of this they forthwith set out to inform the judicial astrologers, and to ask as to the good fortune or ill of the child who was born. And if the sign in which he was born was propitious, they had him baptized at once; and if it was adverse they sought the most favorable house of that sign [in which] to baptize him. When they baptized him, they banqueted the kinsmen and friends, so that they would be present at the baptism, and then they gave food and drink to all the guests, and also to the children of the whole suburb. They baptized him at sunrise in the house of his father. The midwife baptized him, uttering many prayers and performing much ceremony over the child. This [same] feast they also observe today in the baptism of their children, as to feasting, eating, and drinking.

La quinta decima fiesta mouible comū.

Los señores, y principales, nobles, y mercaderes, ricos quando les nacia algun hijo o hija; tenjan gran cuēta con el signo en que nacia; y el dia, y la hora en que nacia: y desto yuan luego a ynformar a los astrologos, judiciarios: y a preguntar por la fortuna buena o mala de la criatura que nacia. Y si el signo, en que nacia era prospero, luego le hazian bapotizar, y si era aduerso buscauan la mas prospera-casa de aquel signo para le batizar. Quando le batizauan, combidauan a los parientes, y amigos: para que se hallassen presentes al batismo: y entonce dauan comida, y bebida, a todos los presentes, y tambien a los njños, de todo el barrio: bapteizauanle, a la salida del sol, en casa de su padre, bapteizauale la partera, diziendo muchas oraciones: y haziendo mucha cerimonja sobre la criatura. Esta fiesta, tambien la vsan agora, en los bapteismos de sus hijos, en quanto al combidar, y comer, y beuer.

3: Sahagún M-5 (1529-1590) 1951 NU7 Astec NU7

X 796 **Twentieth Chapter, which telleth of the feast and blood sacrifices which they made on the first day**
[805] **[and] month, which was named, and which they called, Atl cauaiio or Quauitl eua.**[1]

Quauitl eua: This day came, and when it was this [month], a feast was then celebrated for the Tlaloca.

[202] Everywhere on mountain tops, blood sacrifices[2] were made and sacrificial banners were hung. Blood sacrifices were made at Tepetzinco, or there in the very gulf of the lake at a place called Pantitlan.

[789] At this place they left consecrated papers[3] and set up long poles called *cuenmanili*, by means of which would come to pass greenness, sprouting, and growth.

[777 827] And there they took children, known as "human banners"[4]—those who had two cowlicks of hair and whose day signs were favorable. They were sought everywhere, and bought. It was said: "These are precious blood-offerings. [The rain gods] receive them with rejoicing; they wish for them; they are thus satisfied and given contentment." With them, the rains were sought; rain was asked.

And everywhere, in the houses, in each home, in each of the quarters where the young warriors were trained, and in each tribal temple, everywhere they erected the slender green poles; on them, they placed white paper flags dotted with large and small drops of liquid rubber.[5]

---

1. Sahagún, in the corresponding Spanish text, observes that Quauitlua is the term used by the Mexicans. Cf. Manuel Orozco y Berra: *Historia antigua y de la conquista de México* (Mexico: Tipografía de Gonzalo A. Esteva, 1880), Vol. II, p. 16: "*Xilomanaliztli,*—*Atlacahualoa,*—*Cuauhtlaloa,*—*Cihuatlquiyl. Xilomanaliztli, ofrenda de sangre de niños; nombre usado por los de Tlaxcalla. Cuauhtlaloa, quemados de los árboles: nombre perteneciente á lugares fuera de México. Atlcahualoa ó Atlacahualoa, nombre admirado por los mexicanos, según el P. Leon, derrotos de las aguas, y es la interpretación de todo que nada sea superior. Cihuatlquiyl, fiesta de la mujer. El símbolo religioso es la imágen de Tlaloc y su dribal representando, con el agua como los mismos.*" Cf. also Francisco J. Clavijero: *Historia antigua de México* (México: Editorial Porrúa, S. A., 1945), Vol. II, pp. 401-2: ". . . *el primer mes, cuyo nombre Atrahualoa o Atlacahualoa, significa la ceremonia del agua, pues en el mes de marzo eran las lluvias del invierno en los países septentrionales, en donde tuvo origen el calendario mexicano o nahuatl. La llamaban también Quauhtlaloa, la que significa la inundación de los árboles, que se cumplía en este tiempo en los países fríos. Los sacerdotes llamaban a este mes Xilomanaliztli, esto es, oblación de las mazorcas de maíz, porque en él ofrecían a sus dioses las del año corriente, para ayudar los nuevos que por este tiempo comenzaban a hacer en los lugares altos.*"

Angel María Garibay K. in "Relación breve de las fiestas de los dioses, Fray Bernardino de Sahagún" (Tlalocan, Vol. II), p. 291, translates *cuauhtzi eloa* as *palo se abre*. Eduard Seler, in *Einige Kapitel aus dem Geschichtswerk des Fray Bernardino de Sahagún über Altertümer und Religion Mexicos* (Camillo Sofer Sarlo, Walter Lehmann, Walter Krickeberg, eds.; Stuttgart: Strecker und Schröder, 1927), Vol. I, p. 55, translates the terms as *der Baume erbeben sich (machen sich auf den Weg)*.

2. *Nextlaoaloa*: Seler rather consistently renders forms of this word in terms of penance of a debt rather than of a sacrifice. Cf. *informe de Alonso de Molina: Vocabulario de la lengua mexicana* (Serie Plateresca, ed.; Leipzig: B. G. Teubner, 1880), and in Remi Simeon: *Dictionnaire de la langue nahuatl ou mexicaine* (Paris: Imprimerie Nationale, 1885). In *Collected Works* (Cambridge, Mass.: Carnegie Institution of Washington, 1950), Vol. II, Pt. 4, p. 13, Seler says: "The child sacrifices to the rain god were called *nextlaoaloli* 'the debt paid.'"

3. Garibay (*op. cit.*, p. 292) translates *cuenmanili* as *arco triunfal*.

4. In *loc. cit.*, Garibay renders *tlacatecteuhti* as *niño tlacatecuhtli*, and makes it clear (Subpoint commentary No. 4) that the term refers to the children who died. Seler (*Einige Kapitel*, p. 55) refers to them as *Menschen-Opfersoeuhne* (*Opfersoeuhne* or *Menschenopfersöhne*). They may actually have been paper sacrifices surrounded by a representation of a human head, and have symbolized the children who died. See illustration (Seler: *op. cit.*, p. 60) from the Biblioteca del Palacio MS.

5. See Note 3. Sahagún, in the corresponding Spanish text, refers to "*unos papeles, flores de papel de allí a los quales pegaban hermosos ornamentos.*" *Tlaulchachapatztli*: cf. *chachapaztli*, in Molina (*op. cit.*).

And they took [the children] to many [different] places.

[First was] Quauhtepec.[6] And the one who died here bore the same name—Quauhtepetl. His paper vestments were brown.[7]

The second place where one died was the top of Mount Yoaltecatl.[8] The human banner [the child to be sacrificed] had the same name—Yoaltecatl. His paper vestment was black striped with red.

The third place was Tepetzinco,[9] where died a girl called Quetzalxoch, a name which they took from Tepetzintli, [also] named Quetzalxoch. Her array was blue.

The fourth place was Poyauhtlan,[10] just at the foot and in front of Mount Tepetzinco. The name of him who died was Poyauhtecatl. Thus he went adorned: he was bedight in rubber, stripes of liquid rubber.

The fifth place, there in the midst of the lake, was a place named Pantitlan. He who died there had the name Epcoatl. The vestments in which he went, having put them on, were set with mussel shells.

The sixth place to which they carried [a victim] was the top of [the hill of] Cocotl,[11] and also he went bearing the name Cocotl. His array was varicolored—part red, part brown.

The seventh place was on the summit of Yiauhqueme, and also the human banner bore the name Yiauhqueme. The clothing which he bore was completely brown.

These were the places where [the children] died, as blood-offerings, as human banners.

And all went with head-bands[12] with sprays and sprigs of quetzal feathers; they had green stone necklaces, and they went provided with green stone bracelets; they provided them with bracelets of green stone. Their faces were painted with liquid rubber, and spotted with a paste of amaranth seeds. And their liquid rubber sandals: they had sandals of liquid rubber. All went in glorious array; they were adorned and ornamented; all had valuable things on them. They gave them paper wings;[13] wings of paper they had. They were carried in litters covered with quetzal

[6. Maps of the Valley of Mexico in Colonial times locate most of the places and features mentioned by Sahagún, but the frequent repetition of place-names is an issue confusing. Of Quauhtepec, Sahagún's Spanish text says: "*en este sitio compusiste que este sitio del Tlaxcalteca.*"
7. *Vlpiaoac*, Sahagún (Spanish text) has *amarillo* (dusty red, flesh colored); later he has *bermejo* (bean colored, yellow) for *yiapalli*. For *papaloc*, Seler (*op. cit.*, p. 54) has *gelbbraun*; *Molina* (*op. cit.*), *color violeta de mayo*; *Simeon* (*op. cit.*), brown or black.
8. The Spanish text explains: "*en este sitio compusiste que este sitio grandeza.*"
9. *Loc. cit.*: "*en aquel sacrificaste, que este dentro dentro lugar, frente del Tlaxcalteca.*"
10. *Loc. cit.*: "*en su sacrificio, que este en los pensamiento de Tlaxcalteca, y allí este repentino.*"
11. *Loc. cit.*: "*en su sacrificio que este cabo chalco atenco.*"
12. Seler (*op. cit.*, p. 57) reads *yenamatlapaltiua*, which he translates as *ihre eigentümliche Binde*.
13. Sahagún (*loc. cit.*) says "*pusiste este alas de papel como angeles.*"]

feathers, and in these [the children] were kept

And four times they appeared before the people. They were looked at; they were made to be seen by the people; they were made known. They gave them and provided them their paper vestments.

The first time they were given, and ornamented with, red; they were [dressed] in red; their paper garments were red.

The second time their paper ornamentation was white.

The third time they again bore their red vestments.

The fourth time, white.

This last time, they ornamented them and gave them presents; for this last time, they wore [this array]—so that in it their fate would come, they would be slain, they would breathe their last, they would be the [sacrificial] striped ones. For this last time, they took their red array.

No more did they change [their garments]. And they ornamented them as the striped ones with liquid rubber.

And those who had captured prisoners, who had captives whom they had taken, also anointed themselves with red; they covered themselves with feather down; their hands and feet were covered with white turkey feathers.

And also they were given costly insignia; [but] not given [to keep] always—only that they should smoke with them; that they should dance the captives' dance with them.

Only thus they appeared and were seen; only thus men marveled at them; only thus [garbed] they celebrated the feast; only thus did one make known to men that his captive was to be offered as a sacrifice.

And he bore his shield, which went resting on his arm; and he carried his rattle stick, which he went rattling, and he proceeded planting his rattle stick on the ground, and it rattled and jingled.

And all those who had captives, those who had taken prisoners, were thus garbed—they whose captives would be offered as sacrifices when the Feast-day Tlacaxipeualiztli came.

X 796 Any who wished, to whom it was pleasing, who wanted to, of the youths who had been drunk, [did so].

in çaço aquiçi connequiça, conmonectiaia, entlaeleujaia in mihivintia telpopochti.

[275] And some of them had so made vows that they [755] would hide away the skins; because perchance they were covered with sores, or perhaps had an infection of the skin, or had maladies of the eyes, since for some this was successful and thus they recovered. Some did not recover.

Auh cequintin ic moneztoltia, yn eoatlatizque: ipampa aço papalanja, aço çaçaoati, anoço ixcoaia: tel in aca, ipanti, ic pati, in aca amo pati:

Each one of the captors came forth from his house, [301] and appeared in and went wearing the [captive's] ● 289] skin. They went with paper streamers[6] upon their shoulders and upon the calves of their legs.

ceeciaca inchan in tlamanjme oalpeoa, oaleoa conmaquitiuj in eoatl, amateteujtl, ymacolpan mamãtiuh, yoan in tlanitico.

And so they went jumping, pressing on, arriving [515] together. So [foul] did they smell [that verily] the stench wounded the head. [It was] repellent. All men held their noses when they were met, when they went among people.

Auh ynic vih, chocholotiuj, hiaztiuj, centlalli mantiuh, ynic yiaque, vel tetzonujtec, aixnamjquiztli: çan neiacapacholo ynic namjco, ynic tetla quiça.

And the skins, crumpled and crackling, were hardened. And some carried them in baskets—dried up, frayed, stiffened.

Auh yn eoatl, ocotoczauh, ocacalachoac, oquaoac: auh in cequj ça chiquijuhtica quinapaloa, yn ouelteçioac, yn oquelochauh, oquappizoac.

And the captors came in lead of the *tototecti*. They [431] bore their incense-ladles. They went with their gifts [531] tied up in bundles—mantles perchance painted with 291] designs, or in dark brown,[7] or crimson, or in two colors diagonally divided,[8] or with edges adorned with feathers—with feathers surrounding the edge.

Auh in tlamanjme, quiniacan.uj in tototecti, intletlema, intletlema ietiuh: quimoolpilitiuj yn innetlauhtil, tilmatli, aço tlacujlolli, anoço camopalli, anoço nochpalli, anoço nacazminquj, anoço teniujoaoanquj, yhujtenoaoanquj, yhujtentlaiaoalo.

And when they had arrived at the place where the skins were hidden away, on the top of the Temple of Yopitli, Yopitli's Temple, each one dedicated [incense] to the four directions; the captors offered incense, raising [toward the sky] their incense-ladles, and shaking them.

Auh yn oaxioac, yn eoatlatiloian, yn çepac teucalli iopitli, iopiteucalli: nauhcampa ceeciaca ontlaiiaoaia, in tlamanjme ontlenamacaia, conjiaoa yn intlema, conujixoa.

And those who stood clothed in the skins then undid them, and stood divested [of them]. And when they had taken the skins off, they cast them down, they threw them into a cave. And the captors went down to the bottom [of the temple pyramid] and quickly left and poured out the coals into the incense-burner.

Auh yn onacticac eoatl, nimen mototoma, mototonticac: yn oquiçoalcopin eoatl, contlaça ica onmaisuj yn oztoc. Auh in tlamanj, oaltemo tlatzitla, quiçoalcauhtiquiça, quiçoaltentiquiça, tlehquazco in tecolli.

X 796 And they who had come to dispose of the skins, 515 which they had gone about wearing, washed themselves not with water, but with flour—with corn meal, with which they rubbed their faces. They scrubbed their faces with flour.

6. See Chapter 20, n. 1.

7. In *Gesammelte Abhandlungen zur Amerikanischen Sprach- und Altertumskunde* (Berlin: A. Asher & Co., 1902-23), Vol. II, p. 525, Seler translates *quinoalpilitiuj* as *kastanienfarbene or in orange-farbene Decke*. In *Einige Kapitel*, p. 79, he has "*kastanienfarbenen (aus der braunen Farbe der Kastilien der Bemalte abzuleiten).*" Molina (*op. cit.*) has *color morado carmesi*.

For *nochpalli*, Seler (*loc. cit.*) writes "*kaktusfarbenen (aus der Farbe des Nopalkaktus, der Kakteen-Schildlaus).*"

8. Cf. Seler: *Gesammelte Abhandlungen*, *loc. cit.*, and illus., p. 531.

They departed hence to go to the temple to bathe. These who bathed they did not rub, but struck and slapped, [with a noise] like the breaking of ocean waves. Thus came to an end and disappeared the grease. And also this was the time for the washing of heads. The captors washed their heads and washed off the sweat with a soap [called *amolli*].[9]

vncã oneoa, in teupan, ynic maltitiuh, ynin nealtiaia, amo qujnmamatiloaia, çan qujntlotzona, qujntlatlatzinja, iuhqujn tlatlatzcatimanj, ic poujia, ic vel quiça in chiaoaliztli. Auh no yquac, netzompaco in tlamanj, mozopaca, mamouja: 796[x] 515 [388]

For while all had fasted for their captives, they had never bathed; they had remained in filth until twenty days had passed. Likewise those of their household had never bathed. Then all bathed and washed their heads with soap. Thus it was said: "The hair was washed," or, "The filth was washed away." [For] so were they covered with filth.

ipampa inic oquinneçaujlique, yn inmaloa, aic omaltique, omotzoiotique, inic oquiz cempoalilhujtl: cenvetzi yn inchantlaca, yn aic omaltique, qujnmuchiquacmaltia, mamoujia: ic mjtoa netzõpaco, anoço netzopaco, ynjc omotzoiotiquẽ:

And thereafter the owner of the captive set up in the courtyard [of his house] a woven twig ball on three small feet.[10] Upon it he placed the paper adornment with which had been adorned the Totec [when he died].[11]

auh çatepan itoalco, qujquetza in male, qujtlalia quauhtzontzapaiolli, ey icxi, tzicujlicxe, ytech qujtlatlalia: yn jamatlatquj, ynjc omochichioaia totec. 796[x] [778]

And from here he brought out one pleasing to look upon, acceptable, and strong. He likewise was adorned [with the paper vestments of Xipe]. In them he took after people; he dispersed them; the man vexed them. He ran; he went using his shield as shelter and rattling his rattle-board. They went after him in disorder; they showered him with stones, and pelted him and attacked him with stones.

Auh vncan conana ce tlacatl talqualittalli, tlauelittalli chicaoac: ic no ceppa ic ic muchichioaia, ipan tetotoca, tececenmana, tlacatl qujcocomonja, motlaloa mochimalcaltitiuh, qujcacalatztiuh ychicaoaz qujcaoztztiuj, qujtetoca, q'tepachotiuj, qujtecicali:

Everyone feared him, and let him pass. They said: "Now cometh he who hath washed his head."[12]

muchi tlacatl qujmauhtia, ipan macãuj: qujtoa, le uitz tetzompacquj:

And if he seized someone, if he snatched at anyone, he despoiled him of and ran off with his cloak; and however many cloaks he took, he carried them to the house of the captor and cast them on the ground in the middle of the courtyard.

auh intla aca cana, intla aca qujcujtiuetzi, qujpepetlaoa, qujtlatlalochtia yn jtilma: in quezçuj qujtecujlia tilmatli, ychan concaoa in tlamanj, itoalnepantla tlalli ic qujujujtequj in tilmatli.

Thereupon the captor planted his "pole of the flaying of men" in the courtyard; it betokened that this man [the captor] had flayed a captive.

Çatepan itoalco qujquetza, itlacaxipeoalizquauh, in tlamanj: ic qujnextia, yno ce tlacatl quixipeuh malli. 796[x] 778

Moreover, at this same time he put up[on the point of the pole], so that it hung,—having removed the [remaining] flesh,—the thigh bone[13] of the captive, and suspended with it the sleeveless knotted cord jacket and a small spray of heron feathers.

Auh yoan yn jquac y, tlascopiloaia: auh ynaca oc concholoktiaia, yn iquezteqpol malli: yoan mecaxicolli, aztapatlactontli itech pilcac. [291/237]

And he wrapped the thigh bone with paper, and provided it a mask. And this was called the god-captive.[14]

Auh in quezteqpolli, amatica qujquijquijmiloaia, qujxaiacxiaia: auh ynjn motocaiotiaia, malteotl. [289]

9. Molina: *op. cit.*, Spanish-Nahuatl section (*ambos*).
10. Corresponding Spanish text: "*un globo redondo, hecho de paxaro.*"
11. *Ibid.*: "*pusoe sobre los papeles con que se avia adornado, el mesmo quando muerto.*"
12. Cf. Sahagún: *Historia de Mexico*, p. 93, n. 1: *entonces dijeron*—"*C'est-à-dire que celuiçi (parcil) le calçoyer, le mulier* (mentil, *en compatiotes* [illegible], *qui d'empêche subsistance pour dire: noble d'une bonne famille*)." This would imply a double meaning.
13. Sahagún's Spanish text suggests that the thigh bone was then suspended. Seler, in *Besige Kapitel*, p. 91, has "trophy."
14. *Gottesgefangener*, in Seler, *loc. cit.*

opochtli, here at the Temple of Uitznauac, in the tribal district. They placed it on the serpent bench.

This serpent bench was hewn of wood, to represent serpents; four sides carried the tails; four sides carried their heads.

They covered [Uitzilopochtli's] mesquite wood framework with fish amaranth dough; for his figure was always hewn of mesquite wood, which they covered.

Then they placed upon him his raiment; they put on him his sleeveless jacket, on which human bones were painted.

And over it they laid a mantle, his cape of *maguey* fiber, like a network cape.

And they fitted on his paper crown, adorned with feathers, called *amenxiotl*. On his feather headdress stood a flint knife, also made of feathers, half of it being blood-colored.

Then they arrayed him in a godly, costly cape, made, embellished, and designed all in precious colored feathers, with the red eye border, all thus edged with [the feathers of] the red spoonbill. And in the center lay a great golden disc.

And his bones were made of fish amaranth dough, shaped like cylinders. They called them *teomimilli*. They piled them before [Uitzilopochtli's figure], until they were hip high.

And the cape which covered them, and spread before them, was designed with skulls, with the palms of hands, with hip bones, ribs, legs, the lower arm bones, and with the outlines of feet. Thus was it painted.

And this cape was named *tlaquaquallo*.

And yet one more thing they caused to be spread before him: they cast down what was named the sacred roll. In this form it was named his breech clout.

And this was a paper, white paper and *not* yellow paper,[18] a finger thick, a fathom wide, and twenty fathoms long.

With ceremonial arrows, arrows hardened in fire, they supported it; they were made only that they might carry [the paper]; that his breech clout might be carried.

In three places were they plumed, with white turkey feathers: first on the point, second on the shaft, and third on the end.

18. Cf. V. W. Von Hagen: *The Aztec and Maya Paper Makers* (New York: J. J. Augustin, 1944), pp. 68, 72 esp. In the Rahmuño edition of Sahagún, Vol. V, p. 231, a note by Señor Antonio Quezhuatzi: "*Se muestra manuscritado por la capa de libro de algunos árboles de glucera flaca. Sirvió de papel para los pintores o los libros, y de tela para hacer las adornos, cuentas y otros adornos que el cuerpo de los dioses requería.*"

And when they were beheaded, they cast and threw them toward [the figure of] Uitzilopochtli.

And the quail, when their necks were wrung, went fluttering away, thrashing and striking the earth.

And the masters of the youths took them and gathered them up, stripped off the feathers, and roasted and salted them, seasoning them with salt.

Some they laid aside for Moctezuma, and the rest they assigned to his chiefs, only to the princes. And also to the masters of the youths, who marched in front, and also those [who were] priests.

And all took their large braziers—not their polished braziers. In them were coals and shavings of wood. They heaped it up, raised it, and made a hearth, and fired it with pine branches. And it burned exceedingly.

And they took white incense and coarse incense.[10] And when it was the proper time to offer incense, they laid coals in the incense burner and on it cast the white incense, and raised it as an offering to Uitzilopochtli.

Thus they offered him fire, they incensed him, not only here in the great temple but in their houses, and the tribal temples. Incense was offered all the gods whom they acknowledged.

And after they had dedicated the fire [and incense to the gods], then they cast the coals into the hearth [in the courtyard].

And the young women had painted their faces and were arrayed in red feathers.

And they fastened their sacrificial paper banners to canes. [The banners] were painted in black in what was called a scroll design.

And the rich [women and girls had] narrow cotton blankets thus fastened [to canes], likewise similarly painted with a scroll design.

And two masters of youths, with black paint spread on their faces, stood above and before the round fire vessel. Occupying the leading position, they carried on their backs pine wood cages with small paper banners; they carried them with tump lines which passed only across the chest.

They caused the women to begin the dance; they danced leaping, dancing in the fashion of women. And the women were in the middle, holding their sacrificial banners in both hands. They danced and

10. Thus identified in Seler, op. cit., p. 185.

X 796 714 richly adorned, with much gold, covered with gold, and with many quetzal feathers, covered with quetzal feathers.

And when they had been given these devices, then they went to perform the hand-waving dance. Moctezuma led it, wonderful [to look upon] as he moved. Before all they displayed the arms and insignia, glistening far like the sun's rays, glittering greatly—these devices.

X 796 And after this, when it had ceased, when the sun was near setting, then came forth [the priests of] Chicome coatl,[15] representatives of those wearing the skins of flayed sacrificial victims who, when [the likeness of] Toci died, also died at the same time.

Then these issued from their temples, to strew seeds [of maize] here at the banquet table of the devil [Uitzilopochtli, which is a pyramid] not very high.[16] And when they had climbed up [the pyramid], then [244] they flung, sowed, and scattered the seed among the onlookers—white maize grains, yellow, black, red;[17] and squash seeds. All scrambled for them, as if stealing or snatching them, and in truth fought over them.

And the maidens who belonged among [the priests of] Chicome coatl were known as priestesses. They [314] bore upon their backs the ears of dried maize, seven ● 289 ears each, striped, painted well with liquid rubber, well girt in paper and wrapped in costly capes. And the priestesses who carried them upon their backs had [302] their faces painted and [their arms and legs] pasted with feathers. And also they proceeded singing as they went; the priests of Chicome coatl intoned the chant for them.

And when this was done, when they had scattered the seed, thereupon [the priests] went back whence they had come. Then were brought down the [white] [317] chalk and [white] feathers, which lay in a wooden vessel, from above, [in the Temple of] Uitzilopochtli. 237 And he who brought down the chalk was the fire priest. When he had come down to reach the base of the pyramid, then he placed it there on the landing.[18]

And when he had placed it, then set forth the chiefs, running hard and fast. In truth then were beheld the fast and light runners. He who came first quickly took for himself a handful of feathers. Then

8. The corresponding Spanish text reads, besides: *"La cabeça de cada vna manera traxo dos cuernos, vna de persona, y otra de cabaho. . . ."*
9. Cf. Anderson and Dibble, *op. cit.*, p. 2, n. 15.
10. According to Sahagún (*loc. cit.*), *"vsaban o vsaron hechas de hoxa, atadas con cuyas de cuerda."*
11. Cf. Anderson and Dibble, *op. cit.*, p. 22, n. 114.
12. In the Rehusko ed. of Sahagún, Vol. III, p. 235, *atalli* is explained: *"Hay otra que se llama tecuapilli, es muy verde y tiene unos cabellos hacia como aquella hierba que se llama atalli y crecen cerca del agua, y cuando se vnsan vnsan vnos los dentes cuando la comen."*

And [the women] who carried [litters] were well and proudly bedight, all in new shirts and skirts, which they had put on them. And their faces were painted and they were arrayed in feathers.

And when the time was favorable that [the victims] should die, thereupon they set down the litters. Then they were brought up [to the top of the pyramid]; they proceeded to leave them there at the [Temple of] Tlaloc. And when they had brought them there and stretched them out upon the offering stone, then the officiating priests and the slayer came to take their places, and thereupon cut open their breasts.

And when [the victims] had suffered, when they had died, then they brought [their bodies] down. And thus they lowered them: they only went rolling them down [the steps], with great care turning them over and over.

And when they had come down with them, then they carried them to the skull rack. And when they had brought them there, then they cut off and severed their heads. There they inserted into their heads [the cross pieces of the rack].

And when they had severed the heads from the bodies, then they took [the bodies] to the tribal temples [whence the victims had been sent]. And next day, at dawn, [took place the ceremony] called "They are dismembered." Thereupon they dismembered the [figures made of] amaranth seed dough. And when [the bodies] were dismembered, then they took them up to the roof tops, there to dry in the sun—to dry stiff and hard. Little by little they kept taking some of it and eating it, and gradually they finished it.

And with the paper array which had been [theirs] they covered the circular mats which they had [used]. And when they had covered them, they hung them from the rafters of the tribal temples. For one year they cared for them; then they threw them down, scattered, in the Mist House. Only the paper vestments they [thus] scattered; the circular mats they returned to their houses.

Here ended the feast which was called Tepeilhuitl.

Thirty-fifth Chapter, which telleth of the feasts and the ceremonies which they observed in the days of the sixteenth month, which was called Atemoztli.

The sixteenth feast was called "The Falling of the Water."[1]

As for naming it "The Falling of the Water," it was when for the first time threatened, rumbled, and thundered the rains. All the common folk said, "Water cometh down"; or, "The Tlaloca descend."

And when this happened, the fire priest at the Temple of Tlaloc went [about his tasks] very soberly, devoutly, in faith and hope that in its time the rain would threaten.

And when the rain threatened, then he forthwith arose and took up his incense ladle, the stem of which was long and rounded, and it rattled. The incense ladle ended [in the form of] a serpent. And the head of the serpent also rattled; it also [was] hollow.

Then he speedily fanned the coals into a flame. Then he swiftly filled it with incense, doing only this. Then he offered incense, raising the ladle as an offering to the four directions, rattling [the ladle] greatly, to and fro. Then he went to all the courtyards of the temples, offering and burning incense everywhere. Thus he besought and called upon the Tlaloca. Thus he prayed for rain.

And a number of the common folk made vows that they would make figures of the mountain [gods].[2] And five days [before the feast], they arranged and bought paper, and liquid rubber, and obsidian knives, and they bought *magney* fiber.

They paid great honors [to the mountain gods], and did penances that they might make the figures and cover them [with paper]. No soap was used in bathing; only their necks did they wash.[3] Neither might [a man] lie with a woman, nor a woman with a man.

And until dawn of the day of the feast, when the twenty days of Atemoztli were completed, all the

1. "*Bajada de el Agua,*" according to Tezozomoc (*op. cit.*, p. 299), "*porque este Mes cada Buvia, y nunca algunos Años.*" Corbley, (*op. cit.*, p. 313) has the same.
Concerning the term Atemoztli, Tovar refers to frequent, extraordinary deluges in the region, attributed to Tlaloc.—Kubler and Olivera, *op. cit.*, p. 33.
2. The *Pebuals MS* (Corbley, *loc. cit.*) places this in the houses of the dials: "*Se acostumbraron de labrarlos amontejados*"—"*se cada uno de los viejos se hacian los dioses chicos* (*Tlaquelites*)."
3. Cf. corresponding Spanish text.

796 And when he had already taken shape, then they
778 pasted his head with feather down and made his diagonally-striped face painting, and [gave him] his serpent ear plug of glued turquoise [mosaic]. And from the serpent ear plugs hung the circlet of thorns, [made of] gold, with toes — cut in the form of toes. And his nose rod [was] arrow[-shaped]; of beaten gold [was it] wrought and set with stones. It was shaped of metal plate painted as if with stones. Likewise from it hung what was called the thorn circlet, painted with diagonal stripes. Thus was it diagonally striped: on it were [alternating] blue and yellow [bands]. And upon his head stood his humming bird disguise. Then there was, besides, what was named *anecuyotl*, [his headdress] of featherwork, round, a little narrow and pointed at its base. After
[237] that they placed upon the back of his head the ball of yellow parrot feathers, from which hung his child's lock of hair. And [he had] his cape of stinging nettles,[6] colored black, in five places ornamented with feathers — with eagle down. It was wrapped about him. And below, he was wrapped in his cape with severed heads and bones; and above, he was
[532] wrapped, also, in his jerkin painted with the limbs and members [of men] — all painted there with severed heads, ears, hearts, entrails, livers, lungs, and prints of the hand and the foot. And [he was given] a breech clout. Only the breech clout was very finely wrought. And its design was also the limbs and
●[289] members [of men: it was] so woven. But his large [breech clout was][7] only of paper: it was of white paper,[8] one fathom wide and twenty long, with a design painted on it in blue. And as for the blood banner with the flint knife as the point: his blood banner was only of paper, painted red, as if [striped] with blood. And the flint knife at the point was likewise only of paperwork, and also similarly painted — colored as if with blood. And his shield, which he carried, was of reedwork; [it was] a shield of coarse reeds decorated in four places with feathers —

6. Hernández, *op. cit.*, pp. 390-391, translates as *ortiga* (*Urtica*, sp.?); on pp. 388-390 he mentions seven kinds: four are *Urtica* sp.; others are *Urtica dioica*, var. *angustifolia*; *Barragindera urgendis* Knuth; Chaiy ("quemadora," "ortiga"); and *W. cuneiner* - H. B. K. ("ortiga de tierra caliente"). Santamaría, *op. cit.*, I, p. 496, writes of *chichicaste*: "*la ortiga americana. . . . La especie principal es la Jatropha urens L. . . . En México, plantas herbáceas, semiarpadoras, comúnmente las urens ofilida y tomplada*" (*Mikania denticulata*, *Eupatorium denticulatum*). Also, "*Plantas urticáceas, llamada también ortiga, mal hombre, malo mujer, quemador, chichicastillo, tlachichicaste, en México.*" See also Maximino Martínez: *Las plantas medicinales de México* (México: Ediciones Botas, 1933), pp. 414-415 — chichicaxtli (*Urera caracasana* [Jaq.] Gaudich.).

7. In the MS, a blank follows *pol*. Seler, *op. cit.*, p. 500, has supplied *-ezuio*. Reference to the description of this ceremony in Book II, however, suggests that the ceremonial is *-maxtli*.

8. In Victor Wolfgang Von Hagen: *The Aztec and Maya Paper Makers* (New York: J. J. Augustin, 1944), p. 60, *amatl-amatl* is given as "amate, thickly fibered paper, more difficult to fashion than the fig tree variety"; from bull's horn acacia (*Acacia cornigera*). On the other hand, a note in Sahagún (Robredo ed.), V, p. 231, reads: "*la materia amacizadada por la capa de liber de algunos árboles del género ficus. Sirvió de papel para los pintores o los libros, y de tela para hacer los calzones, vestidos y otros objetos que el culto de los dioses requería.*"

8,000 reams of native paper**

651 632 *Tribute of the component towns.*—Coatlan [del Río], not many decades after the Spanish Conquest, gave its new masters goods which were probably similar to its former tribute. This was still paid by the old calendar system on four of the fiestas, or "cada ochenta dias," as it is expressed. They gave the following:

76 pesos of unrefined gold (*tepuzque*)
2 jars of honey
6 women's skirts
6 women's blouses

and made four "sementeras" of maize."

23. Huaxtepec

SOURCES OF THE MAP

635 114 The province of Huaxtepec, with twenty-six towns, is represented on the fifth page of the *Matricula* and on folio 24' and 25' of the *Mendocino*. The glyph in the lower right-hand corner of the *Matricula* page has been worn away, but the corresponding one in the *Mendocino* may be seen as "Huiçilan." Every town is identified in roman letters in both manuscripts, and the two versions agree except in details of spelling. This province formed the eastern part of modern Morelos State, and [128] the present map is based on the "Carta General del Estado de Morelos," of the Comisión Geográfico-Exploradora (1910). Former and present 103 place names are compared below:

MENDOCINO	1910 MAP
Ahuehuepan	[See Remarks on Towns]
Amilçinco, 19	Amilcingo
Anenecuilco, 16	[No change]
Atlatlauca, 5	Atlatlahucan
Ayonochapã, 24	Axochiapan
Coacalco, 4	Oacalco
Huaxtepec, 7	Oaxtepec

* *FNE*, 1: No. 163.

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

Only in the northeast was there any contact with enemy terrain. 635
There Tetela and Hueyapan are described as frontier towns,[*] while 131
memory of conflict with the dwellers of the plateau also persisted in Totolapan and adjacent towns well within the province.[*]

Regional names.—The zone of the towns specified as Xochimilca, together with near-by Atlatlauca, was called Quauhtengo.[*] South of Yacapichtla lay another district referred to as the Tlalnahuac, in which Tlayacac and Tecpaçinco were prominent centers.[*]

TRIBUTE

Tribute of the whole province.—In the *Matricula* we see, and in the 651
Mendocino we read of, the following opulent tribute which flowed to the Triple Alliance from the province of Huaxtepec:

CLOTHING [291]

400 bundles of loincloths**
400 bundles of women's clothing**
1,400 bundles of large mantles of "twisted" cloth**
8,000 bundles of rich little mantles**
46 warriors' costumes with shields (6 being fine pieces)* [714]

FOOD*

4 large wooden cribs (1 each of maize, beans, chian, and huauhtli) [262]

OTHER GOODS**

2,000 polished pottery dishes of various colors [323]
8,000 reams of native paper [259]

Tribute of the component towns.—Rather curiously, no details are 632
available on the origins of the foregoing tribute, military aid and 651
prisoners alone being mentioned. [727]

[*] *PNE*, 6: 286.

[*] Atlatlauca, Totolapan, and Tlayacapan "trayan guerras" with "Chalco, Guexoçingo, Taxcala, Cholula; las quales heran sobre sus tierras" (*PNE*, 6: 9). We read in Lehmann, *Die Geschichte der Königreiche von Colhuacan und Mexico* (1938), §§ 1202–1203, how the people of Totolapan accompanied Nezahualpilli in a successful campaign against Huexotzinco in 11. Tochtli, 1490.

[*] "Estan las dichas tres cabezeras asentadas en tierra llana, çercadas de montes y sierras no muy altos: llamase la Probincia Quahutengo, y dixose asi porque los mas de sus subjetos estan poblados en montes, y en la dicha lengua se dize el monte quahutla o quahutengo" (*PNE*, 6: 10).

[*] RHE, 1: 224: "Los pueblos de la tlalnahuac son catorze cabeçeras caen casi todas desta villa [Yacapichtla] á la parte del sur dizen llamarse asi porque es tierra llana y mas caliente questa la una cabeçera dizen que antiguamante no abia mas de dos cabeçeras que heran tequepaçinco y tlayalaque y que los demas heran estançias y asi agora se nombran catorze cabeçeras."

10:Deevey N-4 (no date)1957 NU7 Aztec NU7

103 212 *chilacaxtli* = *Azolla* sp.", and *Tequixquiac* (3G), "saltpeter water", all contain the idea of a lake as well as the sound for water, and all are shown in section. The ideology behind the glyphs was undoubtedly formed before the Aztecs entered the Valley of Mexico, during their wanderings through semi-arid country where streams are of vital importance and lakes are small and astatic. Moreover, the glyph for flowing water is a horizontal waterfall, and is the widespread and ancient Mesoamerican columnar stream, (Rands, 1955), rotated 90 degrees. It is probably no accident that streams are shown as something to be crossed, while lakes are thought of as bodies of water with definite boundaries and *containing* useful objects.

The remaining glyphs of Figure 4 require little comment. *Tamazolan* (3I), "toad", is perfectly clear, and Sahagún gives this as the meaning, but Clark interprets it as "frog". *Iztatlán* (3J), "near the salt", is a salt-pan, with *tlantli,* teeth, showing the place-name ending, while *Iztacalco* (3K), "salt house", is literally that: an earthen *pila* serving as a filtration apparatus in which the clear salt water is collected before being placed in the evaporation basin shown at the top. *Ayotlán* (3L), "turtle", is obviously a freshwater species, probably *Kinosternon hirtipes,* though Clark's interpretation ("a captured turtle on its back") shows confusion with the marine *Chelone,* whose name was *chimalmichin* ("shield fish"). *Tollán* (3M), "cattails", has been discussed in the previous section.

127 823 If the Aztecs commonly thought of lakes edge-on, so to speak, they were perfectly capable of showing them in plan. For cartographic purposes it would be essential to show a bird's-eye view, and there are many indications that Aztec cartography was well developed (Linné, 1948). No certain examples have survived, unless we except the famous "maguey plan" (Toussaint *et al.*, 1938) that shows part of the city of Tenochtitlán. This map is not on maguey paper, as Maudslay (1910) and many others have believed, but on native paper made of *Ficus* bark (Lenz, 1948), and unpublished work by D. Robertson suggests that it is in fact a pre-Conquest document on which later elements, such as churches, have been superimposed. Whether pre-Conquest or not, it shows the lake of Mexico only by implication, as empty space off the edge of the city. The Codex Xólotl, an early but not pre-Conquest Texcocan pictographic manuscript, clearly shows the Valley lakes with a string of mountains overlooking them, but not in a way suggesting that a map was intended. The nearest equivalent to an Aztec map of a lake is probably the "Aztlán" picture in the Codex Boturini, reproduced in Figure 4. In fact, since the two earliest European maps of the lake of Mexico (in the 1524 Nuremberg edition of Cortés' Letters

11:Diaz T,H-5 (1519-1520) 1910
NU7 Aztec NU7

643 servants and bread makers and cacao makers his expenses must have been very great.

644 Let us cease talking about the expenses and the food for his household and let us speak of the Stewards and the Treasurers and the stores and pantries and of those who had charge of the houses where the maize was stored. I say that there would be so much to write about, each thing by itself, that I should not know where to begin, but we stood astonished at the excellent arrangements and the great abundance of provisions that he had in all, but I must add what I had forgotten, for it is as well to go back and relate it, and that is, that while Montezuma was at 262 table eating as I have described, there were waiting on 643 him two other graceful women to bring him tortillas, kneaded with eggs and other sustaining ingredients, and these tortillas were very white, and they were brought on plates covered with clean napkins, and they also brought him another kind of bread, like long balls kneaded with other kinds of sustaining food, and "pan pachol" for so they call it in this country, which is a sort of wafer. There [276 314] were also placed on the table three tubes much painted and gilded, which held *liquidambar* mixed with certain herbs which they call *tabaco*, and when he had finished eating, after they had danced before him and sung and the table was removed, he inhaled the smoke from one of those tubes, but he took very little of it and with that he fell asleep.

644 Let us cease speaking about the service of his table and go back to our story. I remember that at that time his steward was a great Cacique to whom we gave the name of [651 212 289] Tápia, and he kept the accounts of all the revenue that was brought to Montezuma, in his books which were made of paper which they call *Amal*, and he had a great house full of these books. Now we must leave the books and the 344 accounts for it is outside our story, and say how Monte- 411

11:Diaz T,H-5 (1519-1520) 1910
NU7 Aztec NU7

443 deer, mallards, young dogs and other things of that sort
262 in their part of the market, and let us also mention the fruiterers, and the women who sold cooked food, dough
[415] and tripe in their own part of the market; then every sort of pottery made in a thousand different forms from great water jars to little jugs, these also had a place to themselves; then those who sold honey and honey paste and other dainties like nut paste, and those who sold
443 lumber, boards, cradles, beams, blocks and benches, each
[322 854] article by itself, and the vendors of *ocote*[1] firewood, and
373] other things of a similar nature. I must furthermore mention, asking your pardon, that they also sold many
[281 364] canoes full of human excrement, and these were kept in the creeks near the market, and this they use to make salt or for tanning skins, for without it they say that they cannot be well prepared. I know well that some gentlemen
[364 514] laugh at this, but I say that it is so, and I may add that on all the roads it is a usual thing to have places made of reeds or straw or grass, so that they may be screened from the passers by, into these they retire when they wish to purge their bowels so that even that filth should not be lost. But why do I waste so many words in recounting what they sell in that great market, for I shall never finish if I tell it all in detail. Paper, which in this country is
[314 289 386 276] called *Amal*, and reeds scented with *liquidambar*, and full of tobacco, and yellow ointments and things of that sort are sold by themselves, and much cochineal is sold under the arcades which are in that great market place, and there are many vendors of herbs and other sorts of trades. There
[693 344] are also buildings where three magistrates sit in judgment, and there are executive officers like *Alguacils* who inspect
[324] the merchandise. I am forgetting those who sell salt, and those who make the stone knives, and how they split them

[1] Pitch-pine for torches

1:Vaillant A-5 (1928-1936)1941 NU7 Aztec NU7

346 Each temple usually had a chamber and an antechamber, and in some cases two or even three shrines rested on the same platform. This platform or substructure gave height and mass to the temple. The usual practice was to lay up rough stone, set in adobe or lime, into a truncated pyramid, the sides of which were broken up by three narrow setbacks and by a steep ramp leading to the top. The surface was of veneered cut-stone slabs, and additional blocks were laid along the ramp to make the stair. Wide balustrades bordered the staircase and often ended in gigantic serpent heads. Aztec construction was the simplest type of engineering, but imposing architectural effects were gained by the consummate artistic sense and superb craftsmanship of the builders.[19] (See Plates 50–51.)

291 554 The adequate, even imposing, housing of the Aztecs and their gods by no means eclipsed their dress. Clothing, besides protecting man from the weather, has an important social function. It is a guide to the sex, age, group, occupation, rank and even character of its wearer. The simple and standardized clothing of our modern society performs the same service, and with a moment's observation one can tell much about a stranger from his clothes. The Aztecs, like many peoples of the world, strove by their dress to accentuate the social differences between people, and pomp and panoply dominated their costume. Or the barbaric splendor of high civilian dress superimposed the fantastic garb of the priests and priestesses in their impersonation of the complex and ornately represented divinities in their pantheon.[20]

[302] The *macehual*, or ordinary tribesman, left his head uncovered, his hair long, and customarily wore a *maxtli*, or loincloth, a mantle knotted over one shoulder, and sandals of

1:Vaillant A-5 (1928-1936)1941 NU7 Aztec NU7

leather or woven maguey fiber in cold weather. Women 291 ●
wrapped about their loins a finely woven cloth, which they 554
sustained with a narrow belt. A sleeveless slipover, or *huipil*,
completed their costume. They plaited their hair into braids, [302]
sometimes interlacing them with ribbons, and these they
wrapped around their heads. This woman's costume may
still be seen in many parts of Indian Mexico. (See Plates
33–36.)

The poor made their garments of maguey fiber or coarse
cotton. The rich wore the same clothing fashioned from finer
textures and decorated with elaborate embroidery. The many
names given to the different kinds of mantles show their in-
terest and importance to the wearers. Wool was almost never
made into cloth, since dog hair was all they had, but feather
cloaks were highly esteemed. Chiefs wore a fillet of leather [292]
from which hung two tassels, and administrative chiefs
had a sort of diadem of gold or jade and turquoise as a badge
of office.

The warriors frankly gloried in their costumes. Rich man- 292
tles and ornate feather headdresses were not enough for some,
who carried on their shoulders a harness of wicker support-
ing an elaborate structure in feather mosaic. Others wore
costumes modeled on the appearance of an ocelot or an eagle.
On specified occasions the priests assumed the dress of the
gods and goddesses, whose costumes were sumptuous and
ornate and defined by exacting ritualistic marks of identi-
fication. (See Plate 61.)

Jewelry consisted of ornaments of copper, gold and silver, 301
shell, various-colored stones, like jade, turquoise, emeralds, 304
opals or moonstone, and mosaics laid on a backing of clay,
wood or reed. Large plugs were inserted in the ear lobes of

1:Vaillant A-5 (1928-1936)1941 NU7 Aztec NU7

themselves the owners of extensive estates by which their 797
descendants could profit. The Spaniards married into chiefly 636
families, which they believed hereditary, according to their own cultural pattern. In some cases chiefs, like those of Tlaxcala, received coats of arms and patents of nobility from the king for their service in the Spanish cause. Out of 190 coats of arms presented for services during the Conquest of Middle and South America, at least twenty were granted to Indians. In consequence there took place a modest renascence of Indian culture. Indian authors like Ixtlilxochitl and Chimalpahin set forth, in Spanish or Nahuatl, the annals of their forebears as proof of their descent from great Indian nobles and of their right to Spanish honors as well.[4] (See Plate 44.)

The old culture died slowly. In the Indian towns the 177
records were kept in both Spanish and the old Aztec picto- [217]
graphic system to avoid dispute. Dress maintained its old form, except that the friars insisted on trousering the Indians. [291]
The rich agriculture was a great boon to the conquerors, who modified it little except for the addition of fruit trees and wheat. Household utensils, like pottery, revealed an engaging [415]
fusion of Indian and Spanish ideas, and glazing delighted the Indians, who applied the flux to purely aboriginal forms. Some enchanting little sculptures in clay reveal the old gods and goddesses masquerading as saints in a very thin disguise.

The Indians were used to building temples, and it seemed 797
to them perfectly fitting that they should labor long hours 346
in great numbers to rear structures honoring the new gods. 177
The conversion was so popular that the churches were too small to hold the worshipers, and several conventual temples, like Acolman, Actopan and Tlamanalco, had chapels which

X796 [535] the emperor himself were decked and arrayed very richly in costly adornments, and they began a dance of great solemnity and gravity which they called *netecuitotilitzli*, which meaneth "Dance of the Lords." This was performed only every four years, during this feast. On this same day, very early in the morning, before dawn, they began to pierce the ears of the [304 291 825 314] boys and girls, and they applied to their heads a wig of parrot feathers, pasted on with *ocotzotl*, which is pine resin. Etc.

mente con ricos adereços todos los principales y señores y personas yllustres, y el mesmo Emperador: y començauan vn areyto de gran solemnidad y grauedad: al qual llamauan Netecuitotilitzli, quiere dezir: areyto de los señores: Este solamente se hazia de quatro en quatro años en esta fiesta. Este mesmo dia muy de mañana ante que amaneciesse començauã a agujerar las orejas a los niños y niñas: y echauãlos vn casquete en la cabeça de pluma de papagayos, pegado con ocutzotl que es resina de pino. Etc,

X 796 Any who wished, to whom it was pleasing, who wanted to, of the youths who had been drunk, [did so].

in çaço aquin connequja, conmonectiaia, ontlaelcuiaia in mihivintia telpopochti.

[27] And some of them had so made vows that they would hide away the skins; because perchance they were covered with sores, or perhaps had an infection of the skin, or had maladies of the eyes, since for some this was successful and thus they recovered. Some did not recover.

Auh cequintin ic monectoltia, yn eoatlatizque: ipampa aço papalanja, aço çaçaoati, anoço izcoonia: tel in aca, ipanti, ic peti, in aca amo peti:

[755]

Each one of the captors came forth from his house, and appeared in and went wearing the [captive's] skin. They went with paper streamers[4] upon their shoulders and upon the calves of their legs.

ceceiaca inchan in tlamanjme oalpeoa, oaleoa conmaquitiuj in eoatl, amatreuitl, ymacolpan mamãtiuh, yoan in tlanitzco.

[301] 289]

And so they went jumping, pressing on, arriving together. So [foul] did they smell [that verily] the stench wounded the head. [It was] repellent. All men held their noses when they were met, when they went among people.

Auh ynic vih, chocholotiuj, hiaxtiuj, centlalli mantiuh, ynic yiaque, vel tetzonujtec, aiamjquiztli: çan neiacapacholo ynic namjco, ynic tetla quiça.

[515]

And the skins, crumpled and crackling, were hardened. And some carried them in baskets—dried up, frayed, stiffened.

Auh yn eoatl, ocototzauh, ocacalachoac, oquaoac: auh in cequj ça chiqujuhtica qujnapaloa, yn oueltepioac, yn oquelochauh, oquappizoac.

And the captors came in lead of the *tototecti*. They bore their incense-ladles. They went with their gifts tied up in bundles—mantles perchance painted with designs, or in dark brown,[7] or crimson, or in two colors diagonally divided,[8] or with edges adorned with feathers—with feathers surrounding the edge.

Auh in tlamanjme, qujniacan:iuj in tototecti, intletlema, intletlema ietiuh: qujmoolpilitiuj yn innetlauhtil, tilmatli, aço tlacujlolli, anoço camopalli, anoço nochpalli, anoço nacazminquj, anoço teniujoaoanquj, yhujtenoapanquj, yhujtentlaiaoalo.

[431] 531] 291]

And when they had arrived at the place where the skins were hidden away, on the top of the Temple of Yopitli, Yopitli's Temple, each one dedicated [incense] to the four directions; the captors offered incense, raising [toward the sky] their incense-ladles, and shaking them.

Auh yn oazioac, yn eoatlatiloian, yn icpac teucalli iopitli, iopiteucalli: nauhcampa ceceiaca ontlaiiaoaia, in tlamanjme ontlenamacaia, conjiaoa yn jntlema, conujujxoa.

And those who stood clothed in the skins then undid them, and stood divested [of them]. And when they had taken the skins off, they cast them down, they threw them into a cave. And the captors went down to the bottom [of the temple pyramid] and quickly left and poured out the coals into the incense-burner.

7. In *Gesammelte Abhandlungen zur Amerikanischen Sprach- und Alterthumskunde* (Berlin: A. Asher & Co., 1902-23), Vol. II, p. 525, Seler translates *camopalli* as *kastanienfarbene* or as *orange-farbene Decke*. In *Einige Kapitel*, p. 79, he has "*kastanienfarbenen* (*von der braunen Farbe der Kaulles der Banane abolsi*)." Molina (*op. cit.*) has *color morado oscuro*.

For *nochpalli*, Seler (*loc. cit.*) writes "*karmoisinfarbenen* (*von der Farbe des Nochtzli, der Kochenille-Schildlaus*)."

8. Cf. Seler: *Gesammelte Abhandlungen*, *loc. cit.*, and *Illus.*, p. 531.

They departed hence to go to the temple to bathe. Those who bathed they did not rub, but struck and slapped, [with a noise] like the breaking of ocean waves. Thus came to an end and disappeared the grease. And also this was the time for the washing of heads. The captors washed their heads and washed off the sweat with a soap [called *amolli*].[9]

For while all had fasted for their captives, they had never bathed; they had remained in filth until twenty days had passed. Likewise those of their household had never bathed. Then all bathed and washed their heads with soap. Thus it was said: "The hair was washed," or, "The filth was washed away." [For] so were they covered with filth.

And thereafter the owner of the captive set up in the courtyard [of his house] a woven twig ball on three small feet.[10] Upon it he placed the paper adornment with which had been adorned the Totec [when he died].[11]

And from here he brought out one pleasing to look upon, acceptable, and strong. He likewise was adorned [with the paper vestments of Xipe]. In them he took after people; he dispersed them; the man vested them. He ran; he went using his shield as shelter and rattling his rattle-board. They went after him in disorder; they showered him with stones, and pelted him and attacked him with stones.

Everyone feared him, and let him pass. They said: "Now cometh he who hath washed his head."[12]

And if he seized someone, if he snatched at anyone, he despoiled him of and ran off with his cloak; and however many cloaks he took, he carried them to the house of the captor and cast them on the ground in the middle of the courtyard.

Thereupon the captor planted his "pole of the flaying of men" in the courtyard; it betokened that this man [the captor] had flayed a captive.

Moreover, at this same time he put up[on the point of the pole], so that it hung,—having removed the [remaining] flesh,—the thigh bone[13] of the captive, and suspended with it the sleeveless knotted cord jacket and a small spray of heron feathers.

And he wrapped the thigh bone with paper, and provided it a mask. And this was called the god-captive.[14]

9. Molina: op. cit., Spanish-Nahuatl section (*amolar*).
10. Corresponding Spanish text: "un globo redondo, hecho de paxaro."
11. Ibid.: "*paxaro* indica los pequeños cuyos que se usaban sahumerios, el equivalente quemado incienso."
12. Cf. Sahagún: *Historia de las cosas*, p. 93, n. 1: *mitotiqui*—"*El que va dando gran alegría (gozo) la conquista, la mudanza (cambio, en conquistadores), que [illegible] sahumerios quemados gran olor, mucho olor (como humo perfumado).*" This would imply a double ceremony.
13. Sahagún's Spanish text requires that the thigh bone was then suspended. Seler, in *Einige Kapitel*, p. 61, has "trophy."
14. *Quinquapanahuiztli*, in Seler, *loc. cit.*

And if anyone should stumble, if anyone went not there, if he loitered, for this he was detained.

And if there were any who tarried, if they made not haste, if any ceased walking, [if they] did not lay down their reeds with the others, for this they seized [such an one]; for this all [such] were then made captive.

And this was done for four days.

And in these four days, whosoever had been seized might well be freed, might well ransom himself; he might yet escape [in return for] perhaps a turkey, perchance a breech clout, mayhap a cape, or a *magney* fiber cape, or a small cotton *mantu*.

And the poor, these ransomed themselves with a wooden plate with balls of dough.[28]

And all which was paid, all this, the captor, he who detained them, the accuser, took.

And upon the fifth day, on the day of the feast, one might no longer ransom himself; even though it were something very great [as a gift] that [one offered] to excuse oneself, no longer might he try.

And when the feast day [came], then all the common folk made cooked maize and beans for themselves—*etzalli* was made; everyone did so; [for] none did not prepare maize and beans for himself.

And when they were cooked, then they were eaten; they presented it to one another. Some thus feasted others.

And some who took their pleasure and some of the warriors danced; and they did thus only to divert themselves.

Thus were they adorned—they had circles about their eyes and carried their sheaves of dried maize. They kept going from house to house, singing and dancing the *etzalli* song. They went about bearing a handled jar, the *etzalli* jar, in their hands.

And thus they danced, sang, and chanted: "I do it; I do it. [Give me] a little of thy *etzalli*. If thou givest me none, I shall break a hole into thy house."

And the householders then offered them a measure of *etzalli*, and went to place it in the *etzalli* jar.

In fives, in sixes, in sevens gathered those who danced.

This *etzalli* dance began at midnight, and only at daybreak all dispersed, and it became quiet.

And when the sun arose, then was adorned the fire priest. He put on his sleeveless jacket; over it he placed his [thin, transparent, netted] cape, called the

adultery. They accused him before Moctezuma, who then condemned him to be stoned before the people.

FOURTH PARAGRAPH, in which is discussed the council chamber of the brave warriors devoted to war.

Tequiuacacalli or Quauhcalli: there were the brave warriors, the generals, and the commanding generals,[9] whose personal charge was command in war.

Achcauhcalli: there were the constables, the brave warriors who were the ruler's executioners. These who brought to an end [the life of] any upon whom sentence had fallen [were] the Quauhnochtli, Atempanecatl, and Tezcaçoacatl. And if they erred in something, they exacted the penalty of them and they died.

Cuicacalli: there were the masters of the youths and the rulers of the youths, there established in order to oversee what was by way of work. And every day, when the sun had already set, they turned their attention to dances. They went quite naked. So they went to the house of songs; so they danced with song, proceeding with, about their necks, only [a cape] made like a net. They set in place and proceeded with their forked heron feather ornaments and the red cord with which they bound their hair: and [they had] their turquoise ear plugs and sea shell lip pendants. All the youths, when they danced and sang, ceased when it was well into the night, when for the first time the fire priests and [other] priests blew the shell trumpets. None of [the youths] entered their homes; none slept at home. Rather, they went straight to the young men's houses, which were everywhere. There they slept, stretched out quite naked. Only little did they sleep. On the morrow, when it was still dark, they set forth, to lodge in the house of the ruler.

And when the ruler knew something ill of them—either drunkenness or concubinage;[10] or that they wrought something to their advantage behind the back of the ruler; [or] that without his command they levied tribute on the town, perchance of chocolate, or of food, which became a tribute, and it was done without leave, and [that] they exacted as tribute whatsoever they wished, then the ruler commanded that they be jailed in wooden cages. He condemned them to pay the penalty; perchance they strangled

Nineteenth Chapter, in which is described the ordering of the market place, and [how] the ruler took great care of it.

The ruler took care of the directing of the market place and all things sold, for the good of the common folk, the vassals, and all dwellers in the city, the poor, the unfortunate, so that [these] might not be abused, nor suffer harm, nor be deceived nor disdained. Thus were things bought, or sold: they arranged them in order so that each thing sold would be placed separately—in its own place or station. They were not spread about in confusion.

Market place directors were appointed to office. They cared for, and attended to, the market place and all and each of the things sold—the merchandise which was there. Each of the directors took care, and was charged, that no one might deceive another, and how [articles] might be priced and sold.

[306] Separate were those who sold gold and silver, and green stone, and turquoise, and emeralds, and quetzal feathers, and [those of] the blue cotinga, and the red spoonbill, and all the various precious feathers of birds, which were needed for devices and shields.

● [291 270] Separate were those who sold chocolate, aromatic herbs,[1] and vanilla. Apart were those who sold great capes, costly capes, embroidered capes, costly breech clouts, embroidered skirts and shifts, large common capes, maguey fiber capes, and thin maguey fiber capes.

[292] And all food necessary to them also was sold separately: dried grains of maize, white, black, red, and yellow; yellow beans, white ones, black, red; pinto beans; large beans; gray amaranth seed, red amaranth seed, and fish amaranth; white chía,[2] black chía, and the wrinkled variety;[3] salt; fowl; turkey cocks and hens; quail; rabbits, hares, and deer; ducks

Appendix A

Continuation of the Fourth Paragraph, Chapter Fourteen[1]

In the priests' house of Mexico, there were established and congregated all the keepers of the gods, the fire priests, and [other] priests, the city's devout ones. There they waited [lest] perchance the ruler might require something—perhaps inquire about something, mayhap of something they had seen in all the places where debts [of sacrifice] had been paid upon the mountains and upon the water; there where, afar, were the small pyramids where each night they performed penances.

For those who were fire priests and other priests, when they came forth well into the night, and when, as was said, the shell trumpets were newly blown, first drew their blood before the devil, with thorns, the spines of the maguey; then each one separately set forth, going quite naked. They went [out] having put about them only their pouches with cords,[2] which went filled with dyed, powdered tobacco—this tobacco mixed with a black [dye]—which they chewed as they went. And one proceeded taking with him an incense ladle in which fire went enclosed; and a small cotton bag in which was incense; and pine wood; and he carried his fir branches in his arms, as well as his spines covered with blood, and a shell as his trumpet. And even though it rained hard or was freezing, just so he went.

When he reached whatsoever mountain he was to perform his due upon, then and there he paid his debt [of sacrifice]. He offered incense; he spread out his fir boughs, his bloodied maguey spines. He listened for the time when trumpets were to be sounded in Mexico, at midnight. And when the trumpets had been sounded in Mexico at midnight, then the priests, they who did penance, blew trumpets everywhere there upon the mountains where they paid their debts. Then they turned back, sounding trumpets as they went, in the dawn, when they again entered the priests' house.

197 of a few old people of Totolapan (San Miguel). According to the "Relación de Citlaltomáua," the area in which Cuitlatec was spoken extended in the southeast as far as vanished Chiantepec,* and fragments have been recorded by Weitlaner in coastal Atoyac.

635 *Provincial borders in 1519.*—The borders of Çihuatlan are as unclear as its linguistic features. Zacatula must have represented approximately the westerly outpost. Somewhere in the pathless mountains all along the north of Çihuatlan was the border between this province and the [101] Tarascans and Cuitlatec. (The Cuitlatec seem to have been an entity distinct from both their powerful neighbors, Mexican and Tarascan.) A slender link through Otlatlan (modern Otatlán), in the fellow-tributary province of Tepequacuilco, bound Çihuatlan to the Empire, and to the east lay the never-subdued Yopes.**

TRIBUTE

651 In the records of tribute presented for this and the following thirty-seven provinces, the frequency of payment is indicated as follows: one asterisk, annual; two asterisks, semiannual. The few quarterly payments ("de ochenta en ochenta días") are noted.

Tribute of the whole province.—According to the *Matricula* page and its copy in the *Mendocino,* the following items of tribute were exacted from the province of Çihuatlan:

CLOTHING**

[291] 1,616 bundles*** of large orange mantles
2,400 bundles of large mantles of "twisted" cloth

FOOD**

[245] 80 loads of çacao bermejo

OTHER GOODS**

[248] 400 bundles of cotton
[136] 800 red seashells, like scallops

* See the preceding note. On Cuitlatec see Hendrichs, "Un estudio preliminar sobre la lengua cuitlateca de San Miguel Totolapan, Guerrero," *El México Antiguo* (1939), 4: 329–362; Weitlaner, "Beitrag zur Sprache der Ocuilteca," *ibid.*, pp. 297–328, notes; and McQuown, "La fonémica del cuitlateco," *ibid.* (1941), 5: 239–254.

** See section on Tepequacuilco, below.

*** The *Mendocino* résumé, in Spanish, has been followed throughout this study as a convenient guide on tribute. There are slight inaccuracies in the version it gives of numbers, however; the figures representing single units are consistently overlooked. Here I have corrected the figure from the erroneous "1,600."

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

635 and its fellow Cuitlatec of the west, but we have seen that "eran de
632 Moteçuma," being, indeed, a link with the uttermost western hinter-
131 land, the provice of Çihuatlan.

Tlacotepec warred with southern neighbors on the coast,[m] among them Tecpan—this latter, presumably, ceasing to be an enemy when it was subjugated to form part of the province of Çihuatlan.

Zompanco and Chilapan were strong-points on the Yope frontier.[n]

Just south of Chilapa lies Quecholtenanco, a garrison town whose
[712] glyph is in both the *Matricula* and the *Mendocino* (fol. 17') accompanied by the head of one "Mixcoatl, tlacatectli governador."

Regional names.—The whole eastern part of this former province was known as Coixcatlalpan,[o] "que quiere decir Tierra de Lagartijas porque ay muchas."[n]

651 TRIBUTE

Tribute of the whole province.—The original *Matricula* and the *Mendocino* copy specify the following tribute:

CLOTHING

[291] 402 bundles[q] of mantles *colchadas*[**]
402 bundles of mantles striped black and white[**]
400 bundles of rich mantles (the drawing is of a Tlaloc-head decoration)[**]
400 bundles of women's skirts and blouses[**]
400 bundles of little white mantles[**]
1,600 bundles of large mantles[**]
[714] 22 warriors' costumes (20 of the common "Huaxteca" armor and 2 special pieces: one Tiger Knight and one with *quetzalpaxacuti* headdress)[*]

FOOD

[262] 4 *troxes* (wooden cribs), 1 each of maize, beans, *huauhtli*, and *chian*[*]
[263] 200 little jars of honey (quarterly)

[m] *PNE*, 6: 124: "trayan gerra con los de la costa, que era los pueblos de Tequepa, Acamalutla, Temazcaltepec y otros pueblos." Tequepa (*PNE*, 1: No. 904) "parte terminos con Nuzco," hence is the present Tecpan.

[n] *PNE*, 6: 318 and 5: 178. On the Yope, see Ortega, "Extensión y límites de la Provincia de los Yopes ...," *El México Antiguo* (1940), 5: 48–53.

[o] *PNE*, 5: 249.

[p] *Relación de Iguala* (1931), p. 221.

[q] The figures for this and the following item are corrected from the erroneous 400 of the *Mendocino* annotation.

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

NATURE OF THE PROVINCE

191 101 *Inhabitants and languages.*—The aborigines of the west of this province spoke "Chontal de Guerrero," a language which is commemorated in the place name Chontalcoatlan.[a] This little-known tongue is distinguished from Mexican, Matlatzinca, Mazatec, and Tarascan, all of which were spoken in the province,[b] and was still current in the late sixteenth century in Coatepec, Chontalcoatlan, and Teticpac,[c] as well as in towns of the adjacent province to the south.

131 635 *Provincial borders in 1519.*—Tlachco Province was a part of the Tarascan frontier. To its south lay the hot-country province of Tepequacuilco, and to its north, Ocuilan, both of these also western frontiers. On the east was opulent Quauhnahuac.

TRIBUTE

651 *Tribute of the whole province.*—It is clear from the *Matricula* that the rich silver mines of later fame were ignored by the Culhua Mexica. Tlachco was a second-rate province, as we see by the list of goods remitted:

CLOTHING

[291] 400 bundles of little cotton mantles, richly worked**
400 bundles of women's clothing**
[248] 1,206 bundles[d] of little mantles of soft henequen**
[314] 2 warriors' costumes (a *Huaxteca* and a *quetzaltzitzimitl*)*

FOOD

[263] 2 wooden cribs, one of maize, the other of chian*
263 200 little jars of honey (quarterly)

OTHER GOODS (quarterly)

[323] 1,200 yellow pottery bowls
314 400 little baskets of copal for incense-burners
8,000 pellets of unrefined copal wrapped in palm leaves

651 632 *Tribute of the component towns.*—Tlachco itself is the only town for which itemized tribute data are available. It remitted men's cotton mantles (measurements are given) and women's skirts and blouses,

[a] "Son los antiguos de la tierra" (*PNE*, 6: 143).
[b] *PNE*, 6: 265; *GPM*, p. 135.
[c] *PNE*, 6: 100, 118; *GPM*, p. 127.
[d] Corrected from 1,200.

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

197 but their language is different. They used to practice curses and sorcery
[780] very much." The Ocuiltec language is said by Ingeniero Weitlaner,
101 who rediscovered it, to be related to Matlatzinca and Otomí,[*] spoken near by. Although the Ocuiltec language is supposed to be limited today to the village of Ocuilan and its environs, the writer has found a mysterious reference to it in a sixteenth-century document from the north of modern Hidalgo State."

635 *Provincial borders in 1519.*—In the final native period the province
131 of Ocuilan, approximating a half-moon resting on its back, was bordered on the northwest by Tuluca, and on the northeast by Quahuacan and the Valley of Mexico. To the east lay Quauhnahuac, and to the south the small province of Malinalco and more sizable Tlachco. Ocuilan thrust out westward into the enemy lands of the Tarascans; Temazcaltepec and Zoltepec are spoken of as situated on the Tarascan frontier.

TRIBUTE

651 *Tribute of the whole province.*—According to the *Matricula* and *Mendocino* pages, Ocuilan gave the following tribute:

CLOTHING

[291] 800 bundles of richly decorated little mantles of henequen**
248] 400 bundles of little cotton mantles decorated with sea shells**
400 bundles of little cotton mantles**
[714] 21 warriors' costumes with shields (one of the headdresses having the *quetzalpatzactli* form, and the rest Huaxteca)*

FOOD

[262 4 wooden cribs, 1 each of maize, beans, huauhtli, and chian*
263] 2,000 vessels of white salt**

632 *Tribute of the component towns.*—Temazcaltepec alone gave mili-
651 tary help (not more than twenty men), two or three bundles of the
[291 above-mentioned mantles of henequen, intoxicating mushrooms (*teo-*
276] *nacatl*), kindling, and ink made from sap—all this "every time they
[212 were asked."[**] No data are available on the tribute of other component
137] towns individually.

[*] Weitlaner, "Beitrag zur Sprache der Ocuilteca," *El México Antiguo* (1939), 4: 297–328.

[**] In Tlachinolticpac, *PNE*, 3: 130.

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

Provincial borders in 1519.—The province of Tuluca was a frontier against Michoacan all along its western side. It was during their expansion into this region that the Mexica met one of their few outstanding defeats, being thrown back after penetrating to the shores of Lake Cuitzeo. To the north lay the province of Xocotitlan (a single town and its tributaries); to the east, that of Quahuacan, long Mexicanized; and to the south, Ocuilan, which was separated from Tuluca by the mountain of the icy and sacred lake, the Zinantecatl, now called Nevado de Toluca.

Regional names.—The province of Tuluca was called the Matlatzinca[n] as far west as Temazcaltepec.[100] Since this term is a rather familiar one, the exact boundaries which it includes have not been investigated here.

TRIBUTE

Tribute of the whole province.—The province of Tuluca gave the following tribute, according to the *Matricula* and its *Mendocino* copy:

CLOTHING

400 bundles of little white cotton mantles with decorated border**
400 bundles of henequen mantles, with designs in red, black, and white**
1,200 bundles of white henequen mantles**
22 warriors' costumes and shields, 2 of them of fine quality*

FOOD

6 wooden cribs, 2 of maize, 2 of chian, 1 of beans, 1 of huauhtli*

Tribute of the component towns.—Tzinacantepec's special milpa has been noted. No other information is available on this point.

6. Malinalco

SOURCES OF THE MAP

Two provinces are shown on the thirteenth page of the *Matricula*, which is copied as folio 35' of the *Codex Mendocino*. The two sections are separated by a strong line in the original, but in the copy this is so weak as to be scarcely visible, and it apparently was not visible to the annotator. There is no question, however, that we are dealing with

[100] PNF 7: 16.

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

is attributed to the Matlatzinca,[128] although in 1791 the Matlatzinca language is not mentioned in a "Descripción" of the place.[129] The religious importance of Malinalco is probably linked with an episode of the migration story of the Mexican tribe. This is given in several variants, the gist of it being that Malinalxochitl, sister of the tribal god Huitzilopochtli, being a great sorceress, was such a plague to the migrating tribesmen that they abandoned her en route, while she slept. She settled then at Malinalco, and bore a son, whose later attempt to avenge the family honor is a part of the story of the foundation of Tenochtitlan. The ramifications of the name Malinalco lead also into a maze of calendaric ritual, for the sacred grass Malinali was the twelfth day-sign.

It has been noted[130] that Malinalco joined the northern Cohuixca in attacking Quauhnahuac after the latter's surrender to the Spaniards.

Provincial borders in 1519.—Malinalco lay well embedded in the Empire, with Ocuilan to the north and west, Quauhnahuac to the east and south, and Tlachco to the south and west.

TRIBUTE

Tribute of the whole province.—The annotations of the *Mendocino*, which we are following for our summary of tribute, do not distinguish between what Malinalco paid and what its fellow, represented on the same page, paid. However, the pictures do show this distinction, and from them we gather that Malinalco Province paid the following:

CLOTHING

1,200 bundles of large mantles of soft henequen**

FOOD

4 large bins (1 each of maize, beans, huauhtli, and chian)*[111]

[128] Cf. Gante, "The Recently Discovered Malinalco Ruins," *Mexican Art and Life*, No. 2 (April, 1938), and Larsen, "The Monolithic Rock Temple of Malinalco, Mexico," *Ethnos* (1938), 3: 59–63. García Payon's more complete report appeared recently ("Los monuments arqueológicos de Malinalco ... ," *RMEA* [1946], 8: 5–63).

[129] "Descripción topográfica de la jurisdicción Malinalco," dated July 13, 1791, at Tenanzingo: "Los Yndios de toda esta Jurisdiccion hablan el Ydioma Mexicano, á excepcion de el Pueblo de San Juan Azingo, que para su govierno interior, conserban el *Ocuiteca*, de dificil comprehencion para los estraños."

[130] In the section on Tepequacuilco.

[111] To get this figure I have followed the *Mendocino* annotations, which specify 8 bins for Malinalco and the other province together. This I have divided equally, in view of the equal division of the bins as drawn in the picture.

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

TRIBUTE

651 *Tribute of the whole province.*—The following tribute was paid in pre-Conquest days by Quahuacan Province:

CLOTHING

[291 714] 800 bundles of rich mantles**
800 bundles of little mantles of henequen**
41 warriors' costumes with shields*

FOOD

[262] 4 wooden cribs (1 each of maize, beans, chian, and huauhtli)*

OTHER GOODS: TIMBER (quarterly)

[313] 1,200 large planks
1,200 large boards
1,200 poles (*quaumimilli*, morillos)

8. Xocotitlan

SOURCES OF THE MAP

635 Page 13 of the *Matricula* is divided into two sections, as has been
114 mentioned. The left-hand section contains the province of Malinalco,
175 the right-hand section that of Xocotitlan, with but a single town. The material concerning this one-town province is copied on the lower part of folio 35' of the *Codex Mendocino*. In both manuscripts, in addition to the glyph, its name appears in roman letters. Xocotitlan [128] (1) is located on the authority of the American Geographical Society's "Millionth Map," sheet "Ciudad de México," where it is spelled Jocotitlán. It lies in the modern State of Mexico, at the foot of the peak also called Jocotitlán. With Xocotitlan has been placed the town of Xiquipilco (2), a vaunted conquest of the Mexicans.[16] Five estancias were subject to Xocotitlan in the mid-sixteenth century,[17] which probably were under its jurisdiction pre-Hispanically. If these estancias could be located, they would define the frontier a little more precisely.

[16] Xocotitlan and Xiquipilco were conquered at the beginning of Axayacatl's reign, before the invasion of the Matlatzinca country, as the writer's forthcoming chronological study will show.

[17] *PNE*, 1: No. 799. These are Almolonga, Tlalchichilco, Tlamacuelpa, Tlalcuzpan, and Tlaxomulco.

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

NATURE OF THE PROVINCE

Inhabitants and languages.—The inhabitants of present-day Xocotitlan 197
and Xiquipilco speak Mazahua and Otomí[28]—a fact in harmony with 101
Ixtlilxochitl's remarks concerning these people at the time of their incorporation into the Empire.[29]

Provincial borders in 1519.—Xocotitlan was a prolongation of the 635
Empire frontier towards Michoacan, exposed to attack from the west 131
and north. East of it lay the province of Quahuacan.

TRIBUTE 651

Tribute of the whole province.—The tribute of Xocotitlan is given as follows:

CLOTHING

400 little mantles of embroidered henequen** [291]

FOOD

4 large bins (1 each of maize, beans, huauhtli, and chian)** [262]

Tribute of the component towns.—Xocotitlan (like the other dimin- 651
utive province of Malinalco) gives us figures—lacking from most of 632
the relaciones—for the tribute derived by the Mexicans from a single town, and these figures suggest that life under Mexican rule was arduous.

9. Atotonilco de Pedraza

SOURCES OF THE MAP

The province of Atotonilco de Pedraza (not to be confused with that 635
of Atotonilco el Grande) occupied with its list of towns the verso side 114
of a lost page of the *Matricula*, as we may ascertain by the copy which forms folio 28' of the *Mendocino*.[30] It consisted of seven pueblos, of which only the cabecera survives with its original name. Despite the plethora of Atotonilcos, we may be sure of the location of this particular town and of its corresponding province because references to one other pueblo listed, Otlazpan, have been found in old documents. The

[28] Soustelle, *La Famille Otomi-Pame du Mexique Central* (1937), *passim*.
[29] He puts them among Otomí, Mazahua, and Matlatzinca peoples. *Obras históricas* (1892), II: 256.
[30] See n. 111, p. 31.
[31] The lost original might be called p. 6B.

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

635 *Regional names.*—Atitlaquia and Apaxco lay in the margin of the ancient Teotlalpan, on which we have commented elsewhere.[27]

TRIBUTE

651 *Tribute of the whole province.*—This obliterated province gave the following items of tribute:

CLOTHING

•[29] 714 400 bundles of rich mantles**
400 bundles of mantles with black-and-white border**
800 bundles of large mantles of "twisted" cloth**
62 warriors' costumes, together with shields*

FOOD

[262] 4 wooden bins (1 each of maize, beans, huauhtli, and chian)*

OTHER GOODS

[317] 400 loads of lime**

651 *Tribute of the component towns.*—Atotonilco de Pedraza itself
632 seems to have figured in the lime manufacture noted above.[28]
317 Otlazpan, in 1549, paid tribute of lime, "mantas labradas con tochomitl," and many other articles, as we see in the *Codex Mariano Jiménez*. These must be the "mantillas de ricas labores ... ropa que bestian los S[eñore]s y caciques." *Tochomitl* is defined in the "Relaciones históricas estadísticas" (1: 228) as "lana teñida de colores la qual dicha lana era conejos y liebres." (Compare with Tepechpa, p. 72.)

10. Quauhtitlan

SOURCES OF THE MAP

635 Page 6 of the *Matricula* represents the once great province of Quauh-
114 titlan, whose annals are so precious to the investigator of ancient Mexican history and ethnology. This page is copied as folio 26' of the *Codex Mendocino*. The province lay in the modern State of Mexico, north
[128] of the Federal District. Seven towns are listed in this province, the present map of which is based on that of the Secretaría de Agricultura

[27] Barlow, "Las provincias septentrionales del Impero de los Mexicanos," in *Tercera Reunión de Mesa Redonda sobre Problemas Antropológicos de México y Centro América, ... 1943: El Norte de México y el sur de Estados Unidos* (1944), pp. 119–121.

[28] *PNE*, 1: No. 1 [*ca.* 1550]: "Ay muchos magueyes y tunas y piedra para hazer cal y destas cosas tienen mucha grangeria los yndios." The whole region was abundant in lime.

651

TRIBUTE

Tribute of the whole province.—Rush mats and seats were a distinctive tribute of the province of Quauhtitlan, which paid the following items:

CLOTHING

[296 714]

400 bundles of rich little mantles**
400 bundles of little mantles with black-and-white border**
400 bundles of little white mantles**
62 warriors' costumes with shields (2 fine pieces)*

FOOD

[262]

4 wooden bins (1 each of maize, beans, chian, and huauhtli)*

OTHER TRIBUTE

[285]

4,000 *petates*
4,000 rush seats

11. Xilotepec

SOURCES OF THE MAP

635 114

The province of Xilotepec, which kept its name into the late sixteenth century, contained seven towns, according to page 9 of the *Matricula* and folio 31' of the *Mendocino*. It lay in the southwest part of Hidalgo and in the northwest part of the State of Mexico. In the *Matricula*, the towns of Xilotepec and Michmaloyan are identified in roman letters; in the *Mendocino*, all are. The present map is based on the "Millionth Map" of the American Geographical Society, sheets "San Luis Potosí" and "Ciudad de México." Below are the *Mendocino* names which have been identified with those of the modern map:

[28]

103

MENDOCINO	MILLIONTH MAP
Acaxochitla, 7	[Missing]
Michmaloyan, 5	Michimaloyan
Tecoçauhtla, 11	Tecozautla
Tepetitlan, 6	Tepetitlán
Tzayanalquilpan, 3	Soyaniquilpan
Xilotepec, 2	Jilotepec

There remains a seventh town to identify in this province: Tlachco. It is possible that this may be the modern Querétaro, for the Mexican version of Querétaro (more properly "Querendaro" in Tarascan) is

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

212 their Náhua masters. These unique historical annals for the years 1403–1528 were discovered by Lic. Alfonso Caso.[a] They come from the town of Hueichiapan, on the verv Chichimec frontier, and should afford important ethnographic and historical data when published.

632 Three of the seven towns listed on the *Matricula* page are definitely
635 stated to be old Tepanec domain. These are Michmaloyan, Tecoçauhtla, and Xilotepec. Two others, which fell within the province but are not on the *Matricula* page, were also Tepanec: Tula (4) and the unlocated frontier town of Acaualtzinco.

635 *Provincial borders in 1519.*—To the west and north of the province
131 of Xilotepec lay the "tierra de guerra" of the Chichimec nomads.[b] Traders ventured into this region, however, as did Conin, the Otomí *pochtecatl* who founded Querétaro. East of Xilotepec lay the Empire province of Axocopan, and to the south that of Atotonilco.

Regional names.—The ancient Teotlalpan began immediately on the borders of Xilotepec, with the town of Atitlaquia,[c] but apparently did not overlap with it.

TRIBUTE

651 *Tribute of the whole province.*—According to the *Matricula* and the *Mendocino,* the following tribute was extracted from the province of Xilotepec:

CLOTHING

● [291 714] 400 bundles of women's skirts and blouses, richly decorated**
408 bundles[d] of men's mantles**
400 bundles of embroidered skirts**
800 bundles of mantles with a spotted design**
408 bundles[d] of rich little mantles**
400 bundles of mantles with a red stripe in the middle**
2 warriors' costumes with shields*

FOOD

[262] 4 wood cribs (1 each of maize, beans, chian, and huauhtli)*

OTHER GOODS

[231] 1–4 live eagles, "according to what they found"[e]

[a] Alfonso Caso, "Un Codice en Otomí," in *Proceedings of Twenty-third Congress of Americanists, . . . 1928* (1930), pp. 130–135.
[b] Cf. n. 35 above.
[c] *PNE*, 6: 201.
[d] Corrected from 400 of *Mendocino* commentary.
[e] Corrected from 400.
[e] The only other live-eagle tribute specified in the *Matricula* came from the province of Ozitipan, also in the north of the Empire.

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

Provincial borders in 1519.—To the north lay the republic of Metz- 635
titlan, whose soldiers fought with Yzmiquilpan. To the east was 131
Hueypuchtla, to the south Atotonilco, and to the west Xilotepec—all Empire provinces.

Regional names.—Many of the towns of the province of Axocopan 635
lay in a region called the Teotlalpan.[*] This term is defined as "tierra de los dioses." The Teotlalpan is a term used far into the sixteenth century, by Alonso de Santa Cruz in his *Geography*, and by others. It does not seem to have been coterminous with the province of Axocopan in the north: Yzmiquilpan is nowhere stated to be inside the Teotlalpan, for example. But documentation is scarce.

TRIBUTE

Tribute of the whole province.—The tribute of Axocopan and the 651
other subjects of this province was as follows:

CLOTHING [291 714]

800 bundles of rich little mantles**
400 bundles of little mantles with black-and-white border**
800 bundles of little white mantles**
400 bundles of women's skirts and blouses**
42 warriors' costumes with shields*

FOOD** [262 263]

4 wooden cribs (1 each of maize, beans, chian, and huauhtli)
400 large jars of thick maguey honey

Tribute of the component towns.—Some indication of the way in 651
which this burden was divided among the tributaries appears below. 632

Atenco is grouped with Mizquiyahuala (*q.v.*).

Axocopan gave shields and spears, henequen mantles, and made nine special milpas for its overlords.[*]

Mizquiyahuala, together with Atenco, paid one turkey every twenty [235]
days, as well as henequen mantles: "... estavan sujetos al p[uebl]o de

[*] Axocopan, *PNE*, 6: 14; Mizquiyahuala, *PNE*, 1: No. 347; Tecpatepec, *PNE*, 6: 34; Tezcatepec, *PNE*, 6: 32 and 1: No. 546; Tlaahuelilpa, on the other hand, "está ya casi fuera de la comarca que dizen de la Teotlalpan" (*PNE*, 3: 73).

[*] *PNE*, 6: 14 and *passim*.

[*] To the ruler in México, "dauanle de tributo: rrodelas de nequen [*sic*] y varillas tostadas, mantas de nequen de diferentes labores; hazianle nueve sementeras de mahiz" (*PNE*, 6: 15).

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

635 *Regional names.*—The cabacera of Hueypuchtla lay within the region known as the Teotlalpan,[*] as did Tequixquiac[*] and the Tezcatepec we have identified as the pre-Hispanic Tezcatepectonco.[*]

TRIBUTE

651 *Tribute of the whole province.*—Hueypuchtla and its subject towns paid the following tribute to the Empire:

CLOTHING

[291 714] 400 little decorated mantles**
400 henequen mantles with black-and-white border**
800 white henequen mantles**
62 warriors' costumes, with shields*

FOOD*

[263 263] 4 wooden cribs (1 each of maize, beans, chian, and huauhtli)
400 jars of thick maguey honey

651 632 *Tribute of the component towns.*—Some of the elements of the tribute listed above may be traced in the relaciones of the sixteenth century.

[286] Hueypuchtla gave game and mantles and weapons, as well as making a special milpa for purposes of tribute. Nets are also mentioned—an unusual item.[*]

Tezcatepec[tonco] provided weapons and game.[*]

[231] Tolnacuchtla gave tribute of game, among which figured live eagles.[*]

---

[*] *PNE*, 3: 48, 6: 26. See discussion of regional names, Axocopan (p. 47) for a definition.

[*] *PNE*, 3: 51.

[*] *PNE*, 6: 32.

[*] *PNE*, 6: 28: "rreconoçian a ... Moctezuma y a sus antecesores, dauanle por tributo, venados, conejos, rredes y vnas mantillas de nequen que son como anjeo de Castilla, y codornyses y cutalas, arcos y flechas, y le hazian vnas sementeras, mahiz, frisoles, calabaças y otras semyllas menudas de esta tierra."

[*] *PNE*, 6: 32: "davanle de tributo venados, conejos, liebres, culebras, arcos, flechas, pellejos de venados."

[*] Live eagles were depicted in the *Matrícula* from two other provinces of the north: Oxitipan and Xilotepec. *PNE*, 6: 25: "davanle de tributo aguilas, codornyces, venados, liebres y conejos."

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

Chilton later fell into the hands of Indians near Santiago de los Valles (Ciudad Valles), and was threatened with cannibalism, but they feared his leanness to be due to the pox, and spared him. Scalp-taking here is noted by Chilton: 635 105 [726]

> ...they take a great pride in killing a Christian; and to wear any part of him where he hath any haire growing, hanging it about their necks, and so are accounted for valiant men.

Native trade connections between the Valles area and distant Xalapa of Veracruz are also noted by Chilton. [139]

In early pre-Hispanic times, Oxitipan was claimed, along with Tulancinco and other towns of the north, as part of the old domain of Xaltocan.[6] 635 175

Provincial borders in 1519.—In 1519, the province of Ctzicoac lay to the south; on all other sides, the province of Oxitipan lay open to Chichimec attack. 635 131

TRIBUTE

The town of Oxitipan, which probably included various subjects, gave the following tribute in the native period: 651

CLOTHING[7,8] [291]

2,010 bundles[7] of large mantles, each 2 varas long
806 bundles[8] of large mantles, striped red, blue, and yellow

FOOD[8] [262]

400 loads of dried *axi*

OTHER TRIBUTE[8] [231]

1 or more live eagles, as many as were caught

It is noteworthy that the same items of tribute, though in lesser quantities, were given annually in early colonial days to the Spanish masters of Oxitipan. 177 651

CLOTHING

9 "sauanas"

FOOD

30 loads of *axi*
9 jars of honey
... maize

[6] *ENE*, 10: 126. [7] Corrected from 2,000. [8] Corrected from 800.

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

635 pire, in territory governed by the aboriginal Huaxtec. Huaxtec was
648 spoken in the northern part of Ctzicoac Province, and Náhuatl (in
197 recent times, at least) in the south.[16] The Huaxtec people, generally
105 speaking, possessed a high and very old culture, inherited from legendary sea-borne founders.[17] Sahagún gives voluminous data on the Huaxteca, of which we quote a part:

> ... they wore their hair dyed different colors, some yellow, others red, and others varicolored ... they all had sharp teeth because they sharpened them on purpose; they wore for ornament gold bracelets on their arms, and half-boots made of feathers on their feet, and jade bracelets on their wrists ...

together with feather headdresses and fanlike collars. "The defects of the Cuexteca," he adds, "are that their men do not cover their shameful parts with loincloths, though there is a great quantity of clothing among them. ..."[18]

635 *Provincial borders in 1519.*—To the south of Ctzicoac lay the inde-
131 pendent principality of Metztitlan, with its old Náhua speech and gods. To the east were Atlan and Tuchpa, Empire provinces acquired at about the same time as Ctzicoac, and to the north an obscure "Chichimec" frontier.

635 *Regional names.*—Ctzicoac lay in the Huaxteca, a region more
103 properly known as "Cuextlan."[19] This region is also called "Tonacatlalpan," "the land of foodstuffs," and "Xochitlalpan," "place of flowers."[20] One rather corrupt document speaks of Ctzicoac as "Tizcohuacalaotl" ("Tzicohuacaloth"?).[21]

TRIBUTE

651 *Tribute of the whole province.*—According to the *Matricula,* Ctzicoac and her subject towns gave this tribute to the Mexican masters:

CLOTHING

[291] 400 bundles of white mantles with red, blue, and yellow borders**
400 bundles of loincloths**

[16] Jiménez Moreno and Mendizabal, "Distribución prehispanica de las lenguas indígenas de México."

[17] Sahagún, *Historia general de las cosas de Nueva España* (1938), III: 131.

[18] *Ibid.*, pp. 131–132. Mende (*La Huaxteca: Epoca Antigua* [1942]) gives the best general résumé of the province.

[19] Sahagún, *Historia general de las cosas de Nueva España* (1938), III: 130.

[20] *Ibid.*, p. 131.

[21] Ixtlilxochitl, *Obras históricas* (1892), II: 196.

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

651

808 bundles* of large white mantles, 4 brazas long** [291]
400 bundles of women's skirts and blouses** 71+
2 warriors' costumes with shields*

FOOD

400 bundles of dried chili peppers* [262]

OTHER GOODS

800 bundles of cotton* [248]

Another version of this tribute specifies the following annual payments:

CLOTHING

1,800 bundles of mantles for use as carpets, with varicolored stripes [291]
..... plain mantles
..... women's skirts and blouses
100 bundles of "twisted" mantles, 8 brazas long and 3 *piernas* wide
100 bundles of thin mantles, 4 brazas long ("which altogether comes to forty thousand pieces")
200 bundles of loincloths

FOOD [262]

100 loads of chili peppers
100 loads of little peppers

OTHER GOODS

400 *petacas* [petates?] [285
400 deerskins 281
100 live deer 231
100 large (live) parrots 237
40 bags of white feathers for weaving
40 bags of varicolored feathers

Besides this, servants were provided for the overlords.* [357]

* Corrected from 800.

* Ixtlilxochitl, *Obras históricas* (1892), II: 197. The province of "Tizcohuacalaotl" paid "en cada un año de tributos mil y ochocientos fardos de mantas así de las ricas betadas de todos colores, que servían para entapizar las salas y cuartos del rey, como de otras llanas, enaguas y huepiles, sin más cien fardos de mantas de Tlacatziuhque [Ilacatziuhque, Molina: cosa torcida] de á tres piernas, que tenía de largo cada una de ellas ocho brazas, y otros cien fardos de las más delicadas y primas de á cuatro brazas, que las unas y las otras venían á ser cuarenta mil piezas, sin más cuatrocientos petacas y cuatrocientos pellejos de venado, cien venados vivos, cien cargas de chile y cien cargas de pepitas, cien papagayos grandes, cuarenta costales de pluma blanca con que hacían telas, y otros cuarenta costales de plumería de aves de diferentes colores, sin más doscientos fardos de paletes, que venían á ser cuatro mil, con las amas y criadas necesarias para el servicio de palacio."

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

reached to the limits of that of Xonoctla in the adjacent province of 632 Tlatlauhquitepec.[*] 131

Tenexticpac appears in the Mexican conquest lists as number 78.

Tuchpa is also called Tomilco (? Tochmilco) in some documents in the *Suma de visitas de pueblos* ... (*PNE*, 1: Nos. 449 and 525).

Çihuateopa has been located by Krickeberg (*Los totonaca* [1933], p. 110), who identifies it with Cihuatitlan.

NATURE OF THE PROVINCE

Inhabitants and languages.—Like Ctzicoac, northern Tuchpa Province 197 belonged to the Huaxteca. The south was different. Papantla was, and 635 still is, a focal point of those who spoke Totonac. The elaborate ruins 648 of that region (El Tajín) are the source of much debate; however, they are clearly linked with Teotihuacán.[*] As noted above, Papantla was first subjected to the Empire by Moctezuma II, whereas Tuchpa was one of the towns long tributary to the Acolhuaque of Texcoco.[*]

Provincial borders in 1519.—To the east of Tuchpa lay the province 635 of Ctzicoac, to the southeast the tiny province of Atlan, and to the 131 south the provinces which cut Tlaxcala off from the sea. Beyond the northern frontier were the unconquered Huaxtec peoples.

Regional names.—The regional names given under the section "Ctzi- 635 coac"[2] are equally applicable to Tuchpa. The south, however, formed 103 part of the Totonac country, Totonacapan.

TRIBUTE

Tribute of the whole province.—Tuchpa Province was wealthy, espe- 651 cially in textiles. She paid the following to her overlords, according to the *Matrícula:*

CLOTHING

400 bundles of black-and-white checked mantles[**] [291]
400 bundles of red and white mantles[**]
400 bundles of loincloths[**]
808 bundles[**] of large white mantles, 4 brazas long[**]

[*] RHE, 1: 487.
[*] Cf. Palacios, *La cultura totonaca* (1941), and the valuable bibliography of García Payon, *Interpretación ... de el Tajín* ... (1943).
[*] Ixtlilxochitl, *Obras históricas* (1892), II: 197.
[*] Corrected from 800.

1 [p.58.—Analyst] 2 [p.56.—Analyst]

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

[651] 816 bundles[30] of orange-striped mantles, 8 brazas long[**]
[291] 408 bundles[31] of large white mantles, 8 brazas long[**]
402 bundles[32] of mantles striped red and yellow[**]
400 bundles of women's skirts and blouses[**]
240 bundles of rich mantles in three styles[**]
[714] 2 warriors' costumes with shields[*]

FOOD[*]

[262] 800 loads of dried chili peppers

OTHER GOODS[*]

[23] 20 bags of small white feathers for decorating mantles
[301] 2 strings of chalchiuites
1 string of turquoises
2 disks of turquoise mosaic

Another source, which magnifies the seven towns into seven prov-
[114] inces in the "gran provincia de Tochpan"[33] (seventy-eight pueblos in all), gives the following version:

CLOTHING

[291] 1,580 bundles of mantles
25 mantles and *huipiles*
400½ bundles of "twisted" mantles, 8 brazas long
400½ bundles of thin "twisted" mantles, 4 brazas long

This is summed up as 47,645 articles of clothing, a smaller figure
[357] than that given by the *Mendocino*.[34] Perhaps we have here the tribute of the cabecera alone. Servants were also supplied, we are told.[35]

Still other sources give more details concerning items included in the opulent tribute of Tuchpa Province, among them a kind of mantle called "Tuchpanecayotl."[36]

---

[30] Corrected from 800.
[31] Corrected from 400.
[32] Corrected from 400.
[33] Ixtlilxochitl, *Obras históricas* (1892), II: 197. It is interesting that the number seven is given, which corresponds to the number of towns known to us from the *Mendocino*.
[34] The total number of pieces of clothing from Tuchpa Province specified in the *Mendocino* is 85,480.
[35] Ixtlilxochitl, *Obras históricas* (1892), II: 197: "En la gran provincia de Tochpan puso por su mayordomo á Huehutli, que cobraba en cada un año de las mantas del género atrás referido, mil quinientos y ochenta fardos, y mas veinticinco mantas y huepiles, sin más cuatrocientos fardos, y más diez mantas de ilacatziuhqui [Molina: cosa torcida] de a ocho brazas, y otros tantos fardos le mantas de ilacatziuhqui delgado de a cuatro brazas, que por todo venían á ser cuarenta y siete mil seiscientos cuarenta y cinco mantas, enaguas y huepiles, piezas de ilacatziuhqui y pañetes sin más las amas de palacio y criadas que eran necesarias para el servicio. La gran provincia de Tochpan se dividía en siete provincias, que contenian todas ellas sesenta y ocho pueblos a ellas sujetos."
[36] Tezozomoc, *Crónica mexicana* (1878), p. 315. See also Krickeberg, *Los totonacas* (1933), pp. 110–111.

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

635 Atlan was nearly surrounded by other Empire provinces: Ctzicoac
131 to the northwest, Tuchpa to the northeast and east, and Tlapacoyan to the south. West of it lay Tototepec de Veracruz, seemingly an independent city-state.

TRIBUTE

651 *Tribute of the whole province.*—The following tribute was paid by the small frontier province of Atlan to its masters, the Mexica:

CLOTHING**

[291] 800 bundles of rich red and white mantles, bordered in red, blue, and yellow
800 bundles of loincloths
404 bundles** of large white mantles, 4 brazas long

OTHER GOODS*

[248] 1,200 bundles of cotton

18. Tlapacoyan

SOURCES OF THE MAP

635 The province of Tlapacoyan occupies page 26 of the *Matricula*, copied
114 as folio 50' of the *Codex Mendocino*. It contains the seven principal towns of a province now forming part of northern Puebla State. In the *Matricula* the cabecera alone is identified in roman letters; in the *Mendocino*, all towns are. The present map is based on the Puebla map of the Comisión Geográfico-Exploradora (1908). A list of the ancient place names, together with their modern equivalents, is given below:

[103]

MENDOCINO	1908 MAP
Acaçacatla, 7	Zacatlan
Tlapacoyan, 4	[No change]
Xiloxochitlan, 6	Eloxochitlan
Xochiquauhtitlan, 5	Xochicuatla

These three remain to be located: Aztaapan, Coapan, and Tuchtlan.

To this province may be added: Cuauhchinanco (2), Chila (3), and Xicotepec (1).

REMARKS ON TOWNS

632 *Acaçacatla* can hardly be other than the Zacatlan of today.
131 *Cuauhchinanco* was one of the fourteen cabeceras of the Acolhuaque.

** Corrected from 400.

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

TRIBUTE

651 *Tribute of the whole province.*—Tlapacoyan paid the following tribute to its Mexican masters:

CLOTHING

[291 714]

400 bundles of black-and-white striped mantles**
800 bundles of large white mantles**
2 warriors' costumes*

651 632 *Tribute of the component towns.*—Acaçacatla, if we are correct in identifying it with the modern Zacatlán, gave no tribute other than a few judicious gifts.[80]

Chila paid, as might be expected from the *Matricula* leaf, a tribute of cotton mantles.[81]

19. Atotonilco el Grande

SOURCES OF THE MAP

635 114 The glyphs for Atotonilco and its five fellow towns appear on page 8 of the *Matricula* and is copied on folio 30' of the *Codex Mendocino.* There is an Empire province of Atotonilco which may be called the province of Atotonilco de Pedraza (see p. 37 above), but the one represented on folio 30' may be named after the town within it which is indicated by the *Matricula* annotator as Atotonilco el Grande—the only town he identifies on this page. The towns of this province lay in the south-central part of eastern Hidalgo. The *Mendocino,* as usual, identifies all towns, and has been compared with the modern map [128] (American Geographical Society, "Millionth Map," sheet "San Luis Potosí") with the following result:

103

MENDOCINO	MILLIONTH MAP
Acaxochitla, 3	Acaxochitlán
Atotonilco, 1	Atotonilco el Grande
Hueyapan, 5	[No change]
Quachqueçaloyã, 2	[See Remarks on Towns]
Tulançinco, 4	Tulancingo
Çtzihuinquiloca	[See Remarks on Towns]

[80] RHE, 1: 469: "no tributaban como otros pueblos mas de que quando ellos querian hazer algun presente á mocteçuma lo hazian y no otra cosa."

[81] RHE, 1: 481: "antiguamente tributauan á monteçuma mantas de algodon."

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

REMARKS ON TOWNS

Quachqueçaloyan is given as "dos leguas del mismo Atotonilco"[a] and seventeen leagues from México.[b] As "Tlaquetzaloyan" it appears eight leagues from Hueyacocotla.[c] It was one of two subject towns belonging to Atotonilco in the sixteenth century.[d] 632 131

Çtzihuinquilocs may be located from a literary reference, which places it southeast of Epazoyuca.[e]

NATURE OF THE PROVINCE

Inhabitants.—Tulançinco, in this province, was a town of great antiquity, a former center of the Toltecs of Tula, Hidalgo. Sahagún comments on the ruins at Tulançinco in the same breath with those of Tula itself and of Xochicalco.[f] These ruins have only recently been surveyed.[g] Tulançinco eventually became an important garrison town of the Acolhuaque,[h] and it was from this point, according to Tezozomoc's *Crónica mexicana* (p. 312), that the conquest of the Huaxteca was launched. 635 175

Provincial borders in 1519.—The province of Atotonilco el Grande lay between two *tierras de guerra.* To the north was Metztitlan, and probably a second city-state (Tototepec de Veracruz); to the south was Tlaxcala. East and west, however, were other Empire provinces, Tlapacoyan and Hueypuchtla. 635 131

TRIBUTE

Tribute of the whole province.—The tribute of the province of Atotonilco el Grande to its overlords in Mexico is given below: 651

CLOTHING [291 714]

800 bundles of rich mantles**
1,600 bundles of mantles of white nequen**
4 warriors' costumes with shields*

[a] *PNE*, 3: 91.
[b] *PNE*, 1: No. 133.
[c] *GPM*, p. 250.
[d] *PNE*, 1: No. 21.
[e] RHE, 1: 140: "Entre levante y sur [de Epazoyuca] estan muchos pueblos pequeños como tzihuiquilocs [*sic*] y tetlyztaca y el pueblo de tepepulco está cinco leguas camino llano."

[h] Ixtlilxochitl, *Obras históricas* (1892), II: 199.

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

TRIBUTE 651

Tribute of the whole province.—Acolhuacan Province is said to have given the following tribute:

CLOTHING [291]

2,000 bundles of large white "twisted" mantles**
1,200 bundles of rich thin mantles, in three styles**
400 bundles of loincloths** [714]
400 bundles of women's skirts and blouses**
121 warriors' costumes with shields ("one fine piece")**

FOOD [263]

4 wooden bins (1 each of maize, beans, chian, and huauhtli)

Tribute of the component towns.—Acolman (a) rendered tribute 632 of henequen garments, in bundles of twenty, every quarter, and 651 maguey leaves for fuel, but, to judge from a statement in the *Papeles de Nueva España* (6:213), this seems to have been destined for the local cacique.

Cenpoalan at first gave obsidian knives for war clubs to Texcoco. [412] After passing into Mexican hands it gave a canoe annually, and then, in the time of Moctezuma's predecessor, fowl and other things.[a]

Epaçoyucan and adjacent towns paid only obsidian knives until [412] Ahuizotl enlarged the temple of Huitzilopochtli and increased tribute demands generally. Thereafter they paid mantles and maize and domestic fowl.[b]

** Corrected from the *Mendocino* version: 103 pieces, 3 fine.

[a] RHE, 1:131: "estos quatro pueblos y sus sujetos eran en tiempo de su gentilidad del señor de tetzcuco netzavvalcoyotzin andando el tiempo y siendo señor en mexico ytzcohuatzin pasaron los pueblos de senpuala y tlaquilpa y tecpilpa al señor de mexico solamente tzaquala se quedo en el senorio que sobre ellos tenia y reconocian siempre el Reyno de tetzcuco Reyno de aculhuaca tributaban nabajas con que hazian macanas y despues andando el tiempo y siendo señor en mexico ytzcohuatzin mucho tiempo no tributaron nada sino solamente cada año llebaban vna canoa a mexico hasta que en tiempo de ahuitzotzin antesesor de monteçuma fue el primero que mando tributasen mantas gallinas y todo genero de bolateria [this for a new temple] como sucedio Monteçuma en su lugar no quiso personarlos tributos."

[b] RHE, 1:142: "eran del señorio de tezcuco ... no tributauan nada solamente nabajas con que hazian macanas y siendo senor en mexico ytzcohuatzin pidiole al señor de tezcuco que no tenia muchas tierras que le diese algunos pueblos de la comarca de mexico entonzes se dividió este pueblo porque gozase tambien el señor de mexico las nabajas la mitad llevó el de tetzcuco y otra mitad el de mexico y entró tambien otros pueblos debaxo del señorio de mexico como cenpohuala tlaquilpa pachuca teçontepec y temazcalapa todos estos pueblos pasaron a mexico y estos pueblos ayudauan a sacar nabajas y no tenian otro tributo hasta que vino a señorear el antecesor de moteçoma que

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

frontier. To the south was Huaxtepec, to the southwest Quauhnahuac, and to the north the jigsaw-puzzle provinces of the heart of the Empire.

TRIBUTE

Tribute of the whole province.—The province of Chalco gave the richest food tribute of the whole Empire:

CLOTHING

800 large mantles**
2 warriors' costumes with shields*

FOOD*

6 wooden bins of maize
2 wooden bins of beans
2 wooden bins of chian
2 wooden bins of huauhtli

22. Quauhnahuac

SOURCES OF THE MAP

The fourth page of the *Matricula* shows us a series of towns headed by Quauhnahuac, a name the Spaniards, in an unfortunate jest, changed to Cuernavaca.[1] This province now forms the western half of the State of Morelos, with a very minor prolongation south into Guerrero. There are sixteen of these town glyphs, all of which are copied in the *Mendocino* on folio 23', with the tribute lists running over onto folio 23". The *Mendocino* annotator seems to have made one of his rare slips, identifying one of the glyphs wrongly, as shown below. The map of this province is based on the 1910 "Carta General del Estado de Morelos" (Comisión Geográfico-Exploradora), on which the following towns have been located:

MENDOCINO	1910 MAP	MENDOCINO	1910 MAP
Acatlycpac, 4	Acatlipa	Quauhnahuac, 2	Cuernavaca
Amacoztitla, 14	Amacuzac	Teocalçinco, 17	Teocalzingo (Gro.)
Atlicholoayan, 9	Atlacholoaya	Xiuhtepec, 3	Xiutepec
Coatlan, 7	Coatlán del Río	Xochitepec, 6	[No change]
Chimalco, 16	Panchimalco	Xoxoutla, 15	Jojutla de Juárez
Huiçilapã, 1	Huitzilac	Yztla, 11	Puente de Ixtla
Miacatla, 5	[No change]		

Three towns remain to be located: Molotla, Ocpayucã, and Yztepec.

[1] Bernal Díaz (*Historia verdadera de la conquista de la Nueva España* [1904], II: 40) speaks of the "pueblo que se dize Coadlabaca [!] e comundmente corronpemos agora aquel bocable y le llamamos Cuernavaca."

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

and are "muy tímidos y toscos o torpes." This seems to have been a 181
general opinion.[32] Quauhnahuac was their principal town, from which [632]
they spread south and into what later became Huaxtepec Province.[33]

Provincial borders in 1519.—The province of Quauhnahuac was sur- 635
rounded by other provinces of the Empire. The intricate provinces of 131
the Valley of Mexico lay to the north. Eastward were Chalco and Huaxtepec, and in the south Tlalcoçauhtitlan. Tepequacuilco, Tlachco, and Malinalco formed the western borders, from south to north.

Quauhnahuac itself was subject to Texcoco specifically. There was a special room in the palace at Texcoco for storing the tribute of this southern province[34] and even a detailed list of what Texcoco received.

Regional names.—The region is called Tlalhuic, by one source, at 635
least.[35]

TRIBUTE

Tribute of the whole province.—The following goods were exacted 651
from the Cuernavaca region:

CLOTHING

1,200 bundles of large "twisted" mantles** [291]●
800 bundles of little white mantles**
1,200 bundles of little mantles "richly worked, the sort the lords and caciques wore"**
400 bundles of loincloths**
400 bundles of women's skirts and blouses**
8 warriors' costumes with shields*[36] [714]

[32] Códice Ramírez, fol. 20: "los tlalhuicas que era la gente mas tosca destos seis tribus ... ."

[33] Durán, *Historia de las indias de Nueva España* (1867–1880), I: 12: "llegaron los Tlaluiccas [*sic*] ... los quales como allaron ocupado lo demas, asentaron en lugar que agora poseen, tomando por prencipal asiento y cabeça de su provincia, á Cuauhnauac, de donde salieron los Señores de aquella congregacion á hacer sus moradas y asientos como los demas, unos á Yahutepec, otros á Oaxtepec, á Acapichtlan, á Tlaquiltenanco con todos los demas pueblos, villas y estancias que llamamos Marquesado, pues es el del felicísimo Marqués del Valle."

[34] Ixtlilxochitl, *Obras históricas* (1892), II: 180. A plan of the Texcoco palace and its storerooms figures in the *Códice Quinatzin*.

[35] Códice Ramírez, fol. 20: "llamaron estos a su provincia Tlalhuic porque la poblaron los Tlalhuica."

[36] Among these was the "Huaxtec" (Cuextecatl) dress with its peaked cap so typical of the statuary and divinities of that region. In the *Matricula* it is clearly marked "cetecpantli cuextecatl toztli," "one yellow Huaxtec costume"—which confirms Seler's identification of the style from literary sources alone. He says, "Ich kein Bild kenne, das durch eine Beischrift als cuextecatl Devise gekennzeichnet wäre" (Seler, *Gesammelte Abhandlungen zur Amerikanischen Sprach- und Alterthumskunde* [1902–1923], II: 603–610).

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

Only in the northeast was there any contact with enemy terrain. 635
There Tetela and Hueyapan are described as frontier towns,[**] while 131
memory of conflict with the dwellers of the plateau also persisted in Totolapan and adjacent towns well within the province.[**]

Regional names.—The zone of the towns specified as Xochimilca, together with near-by Atlatlauca, was called Quauhtengo.[**] South of Yacapichtla lay another district referred to as the Tlalnahuac, in which Tlayacac and Tecpaçinco were prominent centers.[**]

TRIBUTE

Tribute of the whole province.—In the *Matricula* we see, and in the 651
Mendocino we read of, the following opulent tribute which flowed to the Triple Alliance from the province of Huaxtepec:

CLOTHING [291]

400 bundles of loincloths**
400 bundles of women's clothing**
1,400 bundles of large mantles of "twisted" cloth**
8,000 bundles of rich little mantles**
46 warriors' costumes with shields (6 being fine pieces)* [714]

FOOD*

4 large wooden cribs (1 each of maize, beans, chian, and huauhtli) [262]

OTHER GOODS**

2,000 polished pottery dishes of various colors 323
8,000 reams of native paper 289

Tribute of the component towns.—Rather curiously, no details are 632
available on the origins of the foregoing tribute, military aid and 651
prisoners alone being mentioned. [727]

[**] *PNE*, 6: 286.

[**] Atlatlauca, Totolapan, and Tlayacapan "trayan guerras" with "Chalco, Guexoçingo, Taxcala, Cholula; las quales heran sobre sus tierras" (*PNE*, 6: 9). We read in Lehmann, *Die Geschichte der Königreiche von Colhuacan und Mexico* (1938), §§ 1202–1203, how the people of Totolapan accompanied Nezahualpilli in a successful campaign against Huexotzinco in 11. Tochtli, 1490.

[**] "Estan las dichas tres cabezeras asentadas en tierra llana, çercadas de montes y sierras no muy altos: llamase la Probincia Quahutengo, y dixose asi porque los mas de sus subjetos estan poblados en montes, y en la dicha lengua se dize el monte quahutla o quahutengo" (*PNE*, 6: 10).

[**] RHE, 1: 224: "Los pueblos de la tlalnahuac son catorze cabeçeras caen casi todas desta villa [Yacapichtla] á la parte del sur dizen llamarse asi porque es tierra llana y mas caliente questa la una cabeçera dizen que antiguamante no abia mas de dos cabeçeras que heran tequepaçinco y tlayalaque y que los demas heran estançias y asi agora se nombran catorze cabeçeras."

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

NATURE OF THE PROVINCE

Inhabitants and languages.—According to the Mendizabal-Jiménez Moreno linguistic map, Tlalcoçauhtitlan embraced a diversity of languages. Apart from the predominant Náhuatl, areas of Tlapanec, Matlame, and the unclassified Tuxteca are noted. The province of Tlalcoçauhtitlan was brought into the Empire by Nezahualcoyotl, who placed a governor over it.[**]

Provincial borders in 1519.—West of Tlalcoçauhtitlan lay the province of Tepequacuilco; east of it Quiauhteopan, and to the north Quauhnahuac and Huaxtepec. These were Empire provinces. On the south, however, it gave on obscure and bellicose Yopitzinco.

TRIBUTE

Tribute of the whole province.—The yellow earth which gave its name to the province of Tlalcoçauhtitlan naturally figured in its tribute, which was as follows:

CLOTHING

400 bundles of large mantles**
1 warrior's costume with shield*

FOOD

100 pots of bee honey**

OTHER GOODS

20 dishes of *tecoçahuitl,* "ques un barnyz amarillo con que se embixavan"[***]

[**] Ixtlilxochitl, *Obras históricas* (1892), II: 198: Nezahualcoyotl "... fué sobre la [provincia] de Tlauhcocauhtitlan y la ganó, en donde puso por su mayordomo á Huitziltecuh, en donde se le daban de tributo y reconocimiento en cada un año diez y seis bateas de color y veinte cargas de copal, doscientas sesenta y ocho jícaras y tecomates finos, y veinte cargas de varas de tlacuilol quahuitle." The last item is clarified by Sahagún (*Historia general de las cosas de Nueva España* [1938], III: 222): "Hay unos árboles silvestres que se llaman tacuiloquauitl, que quiere decir que tiene madera pintada, porque ellos son bermejos, y tienen las vetas negras que parecen pinturas sobre el bermejo; es árbol muy preciado, porque de él se hacen teponaztles, tamboriles y vihuelas, y suenan mucho estos instrumentos cuando son de esta madera; y por ser muy pintada y de buen parecer es muy preciada."

[***] Tezozomoc (*Crónica mexicana* [1878], p. 315) includes among the tribute from the Huaxtéca "betun amarillo que llaman Tecuezalin y tecozahuitl con que untan y tiñen jícaras, y ablandan manos y piés."

Editorial note (C. O. Sauer): This Náhua word may possibly also signify the yellowish lacquer base, prepared from Coccus insects. The intermediate slopes between the volcanic highlands and the Balsas lowland were and are the chief source of this substance, prized in the aboriginal crafts of central and southern Mexico.

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

NATURE OF THE PROVINCE

Inhabitants and languages.—The Mendizabal–Jiménez Moreno linguistic map indicates great linguistic complexity for this province: Náhuatl, Mixtec, Tlapenec, and Matlame.

Olinalan, celebrated for its lacquer-work, probably carried on that activity in pre-Hispanic times. From adjacent Tlalcoçauhtitlan Province, perhaps only a few kilometers away, "bateas" went as tribute to Texcoco.[a]

Provincial borders in 1519.—Because half the towns of the province cannot be identified on the maps of unexplored Guerrero, the north of this province is a great blank. It bordered, probably, on Huaxtepec Province in that direction, as on the west with Tlalcoçauhtitlan, on the east with Yoaltepec, and on the south with Tlapan, all of them fellow tributaries.

Regional names.—Somewhere in the dubious northeast began the region known as Totollan.[a]

TRIBUTE

Tribute of the whole province.—Quiauhteopan was a rich mining region, as is shown by the following list of its tribute to the highlands:

CLOTHING

400 large mantles**
1 warrior's costume with shield*

FOOD

100 jars of bee honey*

OTHER GOODS

40 large copper bells**
80 copper axeheads**
1 dish of little turquoises*

Tribute of the component towns.—Olinalan, in the mid-sixteenth century, rendered a sizable quarterly tribute of base gold, cacao, money resulting from the sale of cacao, and sixty little jars of honey (over

[a] See the section on Tlalcoçauhtitlan, above.

[a] *PNE*, 5: 57: "Piaztla ... está en la provincia de los Totoltecas de lengua mexicana diferente de los de la Misteca sujetos a la dotrina de la cabacera de Acatlan." Of the same town, it is said farther on (5: 77): "En este pueblo se habla la lengua mexicana corruta, porque es de la provincia de Totola."

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

Provincial borders in 1519.—This was the northernmost of the three provinces lying east of Tlaxcala and separating it from the sea. North of it was Tuchpa; northwest, Tlapacoyan; and to the south, Quauhtochco.

Regional names.—The northern part of the province was part of the Totonacapan.

TRIBUTE

Tribute of the whole province.—The tribute of Tlatlauhquitepec held little variety:

CLOTHING

1,608 bundles[30] of black-and-white striped mantles**
2 warriors' costumes and shields*

OTHER GOODS

800 cakes of liquidambar**[31]

Tribute of the component towns.—Xilotepec gave maize, chickens,[1/A] and liquidambar.[32]

Teotlalpan (Hueytlalpan) gave cotton mantles.[33]

Xoxopanco and Tzotzocolco "... antiguamente tributaban a montecuma mantas de algodón," according to the unpublished relación mentioned above.

27. Quauhtochco

SOURCES OF THE MAP

Quauhtochco was one of the provinces cutting Tlaxcala off from the sea. Glyphs of its seven principal towns are painted on page 24 of the *Matricula* and on folio 48' of the *Mendocino*. By means of the 1908 map of Veracruz,[34] in the center of which area this province lay, five of these towns may be identified, as follows:

MENDOCINO	1908 MAP	MENDOCINO	1908 MAP
Ahuilizapan, 5	Orizaba	Tuchçonco, 3	Tozongo
Quauhtochco, 2	Huatusco	Ytzteyocan, 4	S. Nicolas
Tototlan, 1	Totutla		

Two others remain to be located: Quauhtetelco and Teuhçoltzapotlã.

[30] Corrected from 1,600.
[31] Cf. Krickeberg, *Los totonaca* (1933), pp. 111–112, for an examination of tribute from this province.
[32] Cf. n. 6 above.
[33] RHE, 1: 462: "eran basallos de montecuma tributabanle mantas de algodon."
[34] Comisión Geográfico-Exploradora.

[1/A Chickens are not known to date from pre-Spanish times in the New World. In this case, the word may be a generic term for fowl. — Analyst]

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

REMARKS ON TOWNS

632 *Quauhtochco* figures among the garrison towns on folio 17' of the
[712] *Mendocino* (see p. 128, n. 1), though no governor is mentioned.

Tuchçonco, though shown in the *Matricula* as a pre-Hispanic town,
[175] seems to have been resettled in the sixteenth century. There are various documents concerning this resettlement, now kept in the Archivo General de la Nación, in Mexico City.[15]

Teuhçoltzapotlan was a doubtful name even to the *Mendocino* commentator.[16]

Ytzteyocan, like Tuchçonco, was subject to Cuescomatepec from the sixteenth century on.[17] It was later called San Nicolas Tolentino, then San Nicolas del Gentil, and, finally, Juventino Rosas.[18]

Ytzteyocan figures on folio 17' of the *Mendocino,* among the garrison towns (see p. 128, n. 1), although no mention is made of a governor or governors.

NATURE OF THE PROVINCE

635 *Inhabitants and languages.*—The troops of Texcoco brought Quauh-
197 tochco itself into the Empire.[19] After various uprisings in the fifteenth century, it was finally so well assimilated that it remained faithful to Moctezuma in the Spanish Conquest.[20] Náhuatl was the native tongue; what preceded it is doubtful.

635 *Provincial borders in 1519.*—To the west of Quauhtochco was Tlax-
131 cala; to the east the sea, from which Quauhtochco barred that dwindling state. Two Empire provinces lay to the north and south: Tlatlauhquitepec and Cuetlaxtlan.

TRIBUTE

651 *Tribute of the whole province.*—The tribute of Quauhtochco consisted of a narrow range of items:

CLOTHING

[791] 400 large mantles**

[15] E.g., AGN, Mercedes, 1: 36 and 40: 170', speaks of "tuçongo, subjeto al [pueblo] de san ju° cuesçomatepeque de la jurisdizion de gustusco." Dominguez (*Coxcomatepec de Bravo: I* [1943], p. 42) publishes the earlier document.

[16] He first wrote "çolan" and then rubbed it out.

[17] AGN, Mercedes, 1: 36, calls it "ysteyuca," and the same ramo, 18: 305', "ystoyuca."

[18] Dominguez, *Coxcomatepec de Bravo: I* (1943), pp. 17 and 56.

[19] Ixtlilxochitl, *Obras históricas* (1892), I: 320 and II: 196.

[20] Cortés, *Cartas y relaciones* (1866), pp. 260–261.

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

632 *Teoçiocan* is called "Teocinyocan" by another native source.[28] It is perhaps an estancia of Zongolica (a), "en tierra fria," called San Juan de Teoyxuacan, two leagues from the cabecera.[29]

NATURE OF THE PROVINCE

175 *Inhabitants and languages.*—Cuetlaxtlan, we are told by a Texcocan
197 chronicler, was conquered by that power,[30] a statement confirmed by the "Relación de Cempoalla."[31] The pre-Hispanic language was Náhuatl.

635 *Provincial borders in 1519.*—Cuetlaxtlan lay between Quauhtochco
131 and Tochtepec, which were on the northwest and on the southeast respectively. Northeastward was the sea, and to the southwest was a doubtful region embracing at least one free city-state of the Mazateca.

TRIBUTE

651 *Tribute of the whole province.*—The tribute of Cuetlaxtlan, in contrast with that of adjacent Quauhtochco, was variegated:

CLOTHING

[291] 400 women's blouses and skirts**
400 small mantles, borders black and white**
400 half-quilted mantles**
400 mantles of 4 brazas each**
400 large white mantles, 4 brazas each**
160 very rich mantles for lords and caciques**
1,200 black-and-white striped mantles**
[714] 2 warriors' costumes with shields*
[317] 1 string of chalchiuites*
[237] 400 bunches of quetzal feathers*
[301] 2 lip plugs of crystal, with blue and gold mountings*
20 lip plugs, light amber, mounted in gold*
1 hair adornment of quetzal feathers*

FOOD

[262] 200 loads of cacao*

Cuetlaxtlan paid cacao and cotton mantles, both white and decorated.[32]

[28] Sahagún, *Historia general de las cosas de Nueva España* (1938), IV: 134.
[29] *PNE*, 5: 230.
[30] Ixtlilxochitl, *Obras históricas* (1892), I: 320 and II: 196.
[31] RHE, 1: 131.
[32] *PNE*, 5: 9: "tributavanle cacao y mantas de algodón blancas e pintadas."

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

province was Náhuatl, but along the southwest both Chinantec and Mazatec were spoken.

Provincial borders in 1519.—To the northwest of Tochtepec Province lay Cuetlaxtlan and its fortress; to the southwest was the doubtful zone of the independent Mazatec. Southward, Coayxtlahuacan and Coyolapan provided another strong link with the Empire, but somewhere along the southeast the province of Tochtepec gave on enemy regions, through which a thin line of fortresses must have led to Xoconochco.

TRIBUTE

Tribute of the whole province.—The wealth of Tochtepec was phenomenal. Of the several lists of tribute which we have, the *Matricula* shows the following items:

CLOTHING

1,600 rich mantles, of the kind the lords and caciques wore**
800 red-and-white striped mantles**
400 women's blouses and skirts**
1 warrior's costume and shield, with a birdlike standard*
1 gold shield*
1 feather standard like a bird's wing—yellow feathers*
1 gold diadem*
1 gold headband, a hand's width and thick as vellum*
2 strings of gold beads*
3 large chalchiuites*
4 strings of chalchiuites*
20 lip plugs of light amber mounted in gold*
20 lip plugs of crystal with blue smalt and gold setting*

FOOD

20 loads of cacao

la mar del Norte hasta otra provincia que se dice Teochtepec [*sic*] que asimismo la ganó y sujuzgó, y puso en ella por su mayordomo y cobrador de tributos (de más de la gente de guarnición que en cada una de ellas dejaba) á Toyectzin, que cobraba en cada un año cuarenta fardos de mantas ricas y viente de unas camisetas asimismo ricamente tejidas de finos colores, que montan ciento y viente piezas: igualmente le sembraban y cultivaban en cada un año una sementera de cacao, que tenía de longitud cuatrocientas medidas y de latitud doscientas, sin más treinta y tres cargas de cacao que se cobraban de tributo, dos mil pelotas de hule y cuatrocientos paños de grana, sin más muchas piezas de plumería, como eran rodelas, penachos y otras divisas que los reyes usaban cuando salían a las guerras, hechas de la plumería rica que llaman quetzali. Esta provincia contenía doce pueblos, asimismo sujetos, y daban de tributo cierta cantidad de amas y criadas para el servicio de palacio."

* Contributed by Ucila. See Tribute of the Component Towns, below.

** Also from Ucila.

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

OTHER GOODS

651 16,000 rubber balls
[314 100 pots of liquidambar
237] 24,000 little bunches of blue, red, and green feathers
4 tufts of green feathers trimmed with yellow ones
80 handfuls of quetzal feathers

[114] Ixtlilxochitl gives another list for the whole province: what it paid to Acolhuacan when it was first subjugated:[80]

CLOTHING

[291] 40 bundles of rich mantles
20 bundles of rich blouses
. . . shields, panaches, etc., of quetzal plumes

FOOD

[262] 33 loads of cacao

OTHER GOODS

[314 2,000 rubber balls
237] 400 measures of cochineal

[357] Personal services were also exacted, he relates.

651 The same chronicler says that twelve pueblos were subject in this
114 province. In a little list inserted without explanation in the annals of Quauhtitlan, Tochtepec and eleven other towns of the province are named, along with these items:

[314] 20 + 10 + 1 (31) loads of cacao
400 [measures] of *achiote*
5 *centzontli* [2,000?] rubber balls[81]

The agreement between the Ixtlilxochitl and Quauhtitlan lists suggests that Ixtlilxochitl had the latter at his disposal.

632 *Tribute of the component towns.*—Even more detailed information
651 may be secured on the tribute of Tochtepec Province.

Chinantlan and its subjects paid gold and cacao.[82]

Tlacotlalpan paid cotton mantles (some bearing painted pictures of

[80] Quoted in n. 36 above.

[81] Lehmann, *Die Geschichte der Königreiche von Colhuacan und Mexico* (1938), p. 311. The twelve towns are Quechollan, Tlacoapan, Chiltepec, Poctlan, Oxitlan, Ichcatlan, Tlequauhtla, Coyatepec, Tzinacanoztoc, Xallapan, Otlztitlan, and Tuchtepec.

[82] *PNE*, 4: 60: "este señor ... rreconoçia a Moteçuma, y el y todos sus pueblos le tributaben oro e cacao."

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

635 131 *Provincial borders in 1519.*—North of Yoaltepec Province lay the Empire province of Tepeacac, and to the east that of Tlachquiauco, but to the south were other Mixtec peoples never subjugated by the Triple Alliance: Tototepec of Oaxaca and her allies. Ayoxochiquilazala was an outpost against these. To the west Tlapan and Quiauhteopan were Empire territory again.

TRIBUTE

651 *Tribute of the whole province.*—The tribute rendered by Yoaltepec was small but choice; it included gold and turquoises. It is listed as follows:

CLOTHING

[291 714] 400 large mantles**
1 warrior's costume with shield*

FOOD

[263] 40 jars of honey**

OTHER TRIBUTE

[316 533] 40 little gold disks, "the size of a Host" and as thick as one's finger*[41]
10 middle-sized turquoise masks (mosaic)*[42]

632 651 *Tribute of the component towns.*—Acatlan gave military supplies and food to the Imperial armies which passed through it and from time to time sent gifts of mantles and rabbitskins to its overlord in Mexico, as well as providing personal services. Certain gifts were received in return.[43]

[712] Ayoxochiquilazala, though a garrison town giving military service, also paid tribute of gold dust.[44]

---

[41] Cooper Clark, in his edition of the *Códice Mendocino* (1: 75), remarks that "it is reasonable to suppose that these gold disks . . . measured about three inches in diameter."

[42] The *Mendocino* commentary considers the turquoise symbol appearing with the masks to represent a separate tribute of turquoises, but this conclusion does not seem justified.

[43] As in Ocelotepec, in the province of Coyolapan, *q.v.*, *FNE*, 5: 59, says that Acatlan "solamente ... daus ... a la jente de guerra que por el passaba" food and arms from an arsenal there, and " ... enbiauan de quando en quando vn presente al Rey de Mexico, de mantas y pellejos de liebres y de conejos." In the same source are mentioned the services rendered by various lords and their wives in the Imperial court, in eighty-day shifts.

[44] *RMEH*, T. 2, Appendix, pp. 147–148: "acudian con el tributo á monteçuma y le davan oro en polvo y no le acudian con otra cosa porque en este dicho pueblo tenia monteçuma jente de guarnicion aperçebida para las guerras y esta gente mexicana comian y gastivan las gallinas venados conejos y maiz que eran obligados á dar á monteçuma."

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

as the "Nómina de Tributos de Tlapa y su senorio al Imperio Mexi- 651
cano" give us unparalleled material for a future study in detail of the 212
tribute of this province. We now have the bookkeeping from both sides, that of the conquerors and that of the conquered. Until the codices are fully published, however, we can only remark the abundant tribute of gold, confirmed by the *Matricula* and reconfirmed by the excavations of Atliztac, which may have been included in the province."

The *Matricula* and *Mendocino* specify: 651

CLOTHING

400 bundles of mantles and women's blouses** [291 ●
402 bundles* of little red-striped mantles** 714]
800 bundles of large mantles**
2 warriors' costumes with shields*

OTHER TRIBUTE

10 strips of gold "de quatro de dos en ancho y de largo tres quartos [316
de vara," and the thickness of parchment
20 bowls of gold dust, each bowl of 2 *almoçadas* capacity 415]
800 bowls called tecomates, "the good kind they drink cocoa from"

Tribute of the component towns.—We have testimony regarding 632
the tribute of one town, Ayutla, in both the pre-Hispanic and the 651
early colonial periods. On certain other towns, only information about the latter period is available.

Ayutla and near-by towns joined in giving Moctezuma the following [415
every six moons: a bar of heavy gold, three fingers thick; gourds; deer 291
and tiger skins; fish and cotton.* In the mid-sixteenth century it gave 248
40 measures of gold dust and various items of clothing quarterly, as 262]
well as a turkey daily and the services of three Indians in a cacao grove.*

* Noguera, "Importancia arqueológica del descubrimiento de objetos en Texmelincan, Guerrero," *Boletín del Museo Nacional* (1933), Epoca II, 2: 42–44.

* Corrected from the figure of the *Mendocino* commentary, 400.

* *PNE*, 4: 260: "era de Moteçuma ... le davan vna vara de oro maçiscn de gordor de tres dedos, y 'tecomates' que son como calabaças, y cueros de venado y pescado y algodon y cueros de tiguere, y que todos los dichos pueblos ... le davan este tributo antiguamente cada seys lunas."

* *PNE*, 1: No. 28: "dan cada ochenta dias quartenta pesos de oro en poluo y dos mantas de dos braças cada vna, damascadas, y dos cotines grandes y ocho mantillas y quatro camisas y quatro naguas y cada dia vna gallina de la tierra y mas tres yndios de servicio en vna huerta de cacao y todos juntos quando es menester la benefician."

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

NATURE OF THE PROVINCE

Inhabitants and languages.—This province seems to have been formed 635
out of a vanquished Mixtec city-state, at a very late period indeed in 648
the Empire's history. It is listed as one of three principal pre-Hispanic powers of the region in the "Relación de Teoçapotlan,"[28] though we know that it lost its independence in 1511 or 1512.[29]

Provincial borders in 1519.—To the south lay sister Mixtec states 635
such as Puctla and Zacatepec, which defied the Mexicans successfully, 131
to the east and north the Empire province of Coayxtlahuacan, and to the west that of Yoaltepec. 635

Regional names.—Tlachquiauco lay in what is commonly called the Mistecapan.

TRIBUTE

The only data available on the tribute of Tlachquiauco Province 651
comes from the *Codex Mendocino:*

CLOTHING [291 714]

400 large mantles**
1 warrior's costume and shield*

OTHER GOODS* [316 237]

20 vessels of gold dust
5 sacks of cochineal
400 bunches of quetzal feathers

35. Coayxtlahuacan

SOURCES OF THE MAP

The province of Coayxtlahuacan appears on page 21 of the *Matricula* 635
and is copied on folio 43' of the *Codex Mendocino*. It contained eleven [131]
principal towns,[30] all of which have been found. They lay in northern 114
Oaxaca. In the *Matricula* the towns of "Cohuaxtlauacã," "Tamaçolapan," and "Tepozcololan" are identified in the roman alphabet; and

[28] *PNE*, 4: 193: "dizen los yndios que poco antes que los españoles viniesen solos auian los de Tututepec que estos eran guerreros por si, y los de Tlachiaco que tambien eran guerreros por si, y Montecçuma que era el Señor de México."

[29] Anderson and Barlow, "The Maize Tribute of Moctezuma's Empire," *Annals of the Missouri Botanical Garden* (1943), 30: 414–415.

[30] Cortés (*Cartas y relaciones* [1866], pp. 152–153) speaks of twelve towns in the province of "Coamoca."

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

NATURE OF THE PROVINCE

197 *Inhabitants and languages.*—The province of Coayxtlahuacan was Mixtec in speech, except for Cuicatec (extending eastward from Cuicatlan), Chinantec (north and east of Atlatlaucca), and, curiously enough, Chocho-Popoloca in the very heart of the province (Tamaçulapan to Coayxtlahuacan).

101 In Coayxtlahuacan Province centered the rich and complicated
175 Mixtec culture, concerning which some detailed information has been preserved for us in such codices as the Nuttall and the Vindobonensis. Most extensive data on the pre-Hispanic history and ethnography of this region can be recovered from these manuscripts when they are fully studied. Many of the towns of this province were originally important city-states, with their own dynastic histories.

171 Among the notable cultural differences separating the peoples of
805 this province from the Náhua, are such variant calendar systems as the Mixtec, studied by Jiménez Moreno,* and the Cuicatec, in the still inadequately investigated "Codex Fernández Leal."

635 *Provincial borders in 1519.*—At the height of the Empire of Mocte-
131 zuma, Coayxtlahuacan had certain half-intimidated (though not actually subjected) zones to the north, the sprawling Empire province with its Oaxaca garrison to the east, the still resisting Mixtec city-states** to the south, and Tlaxiaco and other Mixtec towns, recently overrun, to the west.

TRIBUTE

651 *Tribute of the whole province.*—The province of Coayxtlahuacan was exploited for the following items:

CLOTHING

[291] 400 bundles of quilted mantles, richly decorated**
400 bundles of mantles, striped red and white**
400 bundles of black-and-white mantles**
400 bundles of loincloths**
[714] 400 bundles of women's blouses and skirts**
2 warriors' costumes together with shields*

* *Códice de Yanhuitlán.*

** Such as Puctla, Zacatepec, and others the relaciones of which appear in *RMEH*, T. 2, Appendix.

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

NATURE OF THE PROVINCE

Inhabitants and languages.—At the time of the Spanish Conquest the predominant language of the province of Coyolapan was Zapotec, though the Zapoteca had lost their political power. Two other groups also inhabited the province.[128] If we draw a line from north to south through Malinaltepec, Etla, Huaxolotitlan, Oaxaca, and Teozapotlan, then west to Totomachapa and Xilotepec, we delineate the western limits of Zapotec. The region beyond this line is Mixtec. In the northern panhandle, the fringe of the area in which Chinantec was spoken was a little south of Coaxomulco (1).[129]

The advanced and dissimilar cultures of the Zapotec and Mixtec, especially in the frontier zone of Oaxaca City, have become known in recent years through the investigations of Dr. Alfonso Caso.[130]

Provincial borders in 1519.—The province of Coyolapan was one of the far corners of the Empire. To the west and south it faced unfriendly Mixtec city-states, chiefly the huge realm dominated by Tototepec de Oaxaca. Eastward lay the Mixe and the "unprotected" Zapoteca. Both of these were uneasy frontiers. In the west and north, however, lay the strong Empire garrison of Coayxtlahuacan, in the province of the same name.

TRIBUTE

Tribute of the whole province.—Coyolapan and its subject towns paid the following tribute to the Triple Alliance:

CLOTHING**

400 bundles of richly worked mantles
800 bundles of large mantles

FOOD*

4 wooden cribs (2 of maize, 1 of beans, and 1 of chian)

OTHER GOODS*

20 gold disks, the size of an average plate and as thick as one's forefinger
20 bags of cochineal

[128] Chatino, the tongue of the Zenzontepec region, may be classified with Zapotec.

[129] García Granados, "Contribución para la geografía etnográfica y lingüística de Oaxaca," *Boletín de la Sociedad Mexicana de Geografía y Estadística* (1934).

[130] In addition to various monographs, Dr. Caso has also written a good summary in his *Las culturas mixtecas y zapotecas* (1939).

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

651

CLOTHING

80 Huaxtec warriors' costumes, together with shields* [291]
800 bundles of wide mantles (quarterly) 714

FOOD (quarterly)

40 baskets of cacao ground with maize [262]
40 baskets of chian pinolli

OTHER TRIBUTE

Perpetual repair of the *teocalli* of Huitznahuac[7] [358]

38. Petlacalco

SOURCES OF THE MAP

On the verso side of the American Philosophical Society leaf (2A) of 635
the *Matricula* and on folio 20' and 20' of the *Codex Mendocino* the 114
tributary province of Petlacalco is represented. Just as Çitlaltepec 131
and Tlatelolco included the northern lakes, so this province included
the Lake of Chalco and its southern shore—the Pedregal. The tribute-
gathering center lay in the zone of once powerful Azcapotzalco. On [128]
the 1: 100,000 map "Valle de México" of the Secretaría de Agricultura 103
y Fomento (1937) we find a number of the towns of this province:

MENDOCINO	1937 MAP
Auchpanco	Ayapango
Cocotlan, 15	[No change]
Colhuacacinco	[See Remarks on Towns]
Cuitlahuac, 11	Tlahuac
Huiçilopochco, 9	Churubusco
Mizquic, 14	[No change]
Olac, 12	[See Remarks on Towns]
Petlacalcatl, 8	[See Remarks on Towns]
Tecalco	[No change]
Tecoloapan, 7	
Tepopulan, 16	[No change]
Tezcacoac	[See Remarks on Towns]
Tzapotitlan, 10	Zapotitlan
Xico, 13	[No change]

The list of missing towns, however, is extensive:

Acapan	Tlaçoxiuhco
Nextitlan	Toyac
Tepechpan	Xaxalpan
Tequemecan	Yopico

[7] San Juan Huitznahuac, jurisdiction of Azcapotzalco, D.F. (?).

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

NATURE OF THE PROVINCE

Inhabitants and languages.—The northern part of this province was 101
the heart of the Tepanec zone. The Tepanec tribe is assumed—with 197
little proof—to have been Náhuatl-speaking. To the south were two other conquered tribes of better-known affiliation, the Chalca and Xochimilca, mutually related.

Provincial borders in 1519.—South of Petlacalco lay the sterile lava 635
flows which separated it from the province of Chalco (Chalco-Tlal- 131
manalco, not Chalco-Atenco), a province curving down through the mountain passes to Tepoztlan. To the west was the province of Quahuacan, and to the north Quauhtitlan, both at one time Tepanec strongholds. Eastward lay the lake provinces of Çitlaltepec and Tlatelolco.

Regional names.—At least the zone around Petlacalco itself be- 635
longed to the former Tepanecapan—the Tepanec area subject (until 1428) to Azcapotzalco.

TRIBUTE

Tribute of the whole province.—The following materials were col 651
lected by the tribute gatherers to Petlacalco:

CLOTHING*

65 warriors' costumes with shields
2,400 loads of mantles of "twisted" cloth
800 loads of colored mantles
400 loads of loincloths
400 loads of women's clothing

[291 714]

FOOD*

1 bin of beans
1 bin of chian
2 bins of huauhtli

[262]

[p. 134 is blank]

11:Diaz T,H-5 (1519-1520) 1910
NU7 Aztec NU7
Zapotec NU44

A 648

through our interpreters Doña Marina and Jerónimo de Aguilar, that he thanked them both for the food they had brought and for the good will which they showed us.

We slept there that night after posting watchmen and spies and scouts, and at dawn we began to march towards the city. As we were going along and were already close to the town, the Caciques and priests and many other Indians came out to receive us. Most of them were clothed in cotton garments made like tunics, such as the Zapotec Indians wear, I say this for those persons who have been in that province and have seen them, for that is what they wear in that city. They came in a most peaceable manner and willingly, and the priests carried braziers containing incense with which they fumigated our Captain and us soldiers who were standing near him. When these priests and chiefs saw the Tlaxcalan Indians who came with us, they asked Doña Marina to tell the General that it was not right that their enemies with arms in their hands should enter their city in that manner. When our Captain understood this, he ordered the soldiers and the baggage to halt, and, when he saw us all together and that no one was moving, he said—"It seems to me, Sirs, that before we enter Cholula these Caciques and priests should be put to the proof with a friendly speech, so that we can see what their wishes may be; for they come complaining of our friends the Tlaxcalans and they have much cause for what they say, and I want to make them understand in fair words the reason why we come to their city, and as you gentlemen already know, the Tlaxcalans have told us that the Cholulans are a turbulent people, and, as it would be a good thing that by fair means they should render their obedience to His Majesty, this appears to me to be the proper thing to do."

A Z [29] 171]
A [314]

Then he told Doña Marina to call up the Caciques and priests to where he was stationed on horseback with all of

11:Diaz T,H-5 (1519-1520) 1910
NU7 Aztec NU7

that it contained, and at the good order and control that was maintained, for we had never seen such a thing before. The chieftains who accompanied us acted as guides. Each kind of merchandise was kept by itself and had its fixed place marked out. Let us begin with the dealers in gold, silver, and precious stones, feathers, mantles, and embroidered goods. Then there were other wares consisting of Indian slaves both men and women; and I say that they bring as many of them to that great market for sale as the Portuguese bring negroes from Guinea; and they brought them along tied to long poles, with collars round their necks so that they could not escape, and others they left free. Next there were other traders who sold great pieces of cloth and cotton, and articles of twisted thread, and there were *cacahuateros* who sold cacao. In this way one could see every sort of merchandise that is to be found in the whole of New Spain, placed in arrangement in the same manner as they do in my own country, which is Medina del Campo, where they hold the fairs, where each line of booths has its particular kind of merchandise, and so it is in this great market. There were those who sold cloths of henequen and ropes and the *cotaras*[1] with which they are shod, which are made from the same plant, and sweet cooked roots, and other tubers which they get from this plant, all were kept in one part of the market in the place assigned to them. In another part there were skins of tigers and lions, of otters and jackals, deer and other animals and badgers and mountain cats, some tanned and others untanned, and other classes of merchandise.

Let us go on and speak of those who sold beans and sage and other vegetables and herbs in another part, and to those who sold fowls, cocks with wattles, rabbits, hares,

[1] Sandals.

14:Bandelier E-4 (no date)1880 NU7 Aztec NU7

round, small, "target," worn by the "brave" on his left arm and 714
made of "canes netted together and interwoven with cotton 'two-
"fold,' covered on the outside with gilded boards and with feath-
"ers, and so strong that a hard cross-bow shot could alone pene-
"trate them . . . ."[54]

With this shield they warded off blows in close combat,[55] and even arrows and darts at full speed. Each warrior probably carried his own shield, although it is sometimes stated that the ar- [726]
chers, while shooting, were shielded by others.[56] This, however, would necessarily imply a greater progress of the military art among the Mexicans than we may safely allow.

The remainder of the protective armour of the Mexicans is intimately connected with their *costume*.

The ordinary dress of a Mexican consisted of a sleeveless jacket 291
("huepil") fastened on the right shoulder, and of the breechcloth 714
("maxtlatl"). The head, arms, and legs from the knees downwards, were bare. A mantle, short among the common Indians, longer among the chiefs, completed the costume.[57] Sometimes 714
they went to war without any other protection, but in most cases the warrior wore a frock of quilted cotton, about three-quarters of

[54] The "anonymous conqueror" (Col. de Doc., Vol. I, p. 373). Compare Torquemada (Lib. IV, cap. XXXI, p. 423), and Clavigero (Lib. VII, cap. XXIII).

[55] See the description of a single combat between a Cempoaltecan and Tlaxcaltecan (Herrera, Dec. II, lib. VI, cap. VI, p. 143, and Torquemada, Lib. IV, cap. XXXI, p. 422).

[56] Clavigero (Lib. VII, cap. XXIII) and the anonymous conqueror both assert, that each warrior had a shield. But Fray G. de Mendieta is still more positive (Lib. II, cap. XXVI, p. 130): "Tras estos llegaban los golpes de espada y rodela, con los cuales iban "arrodelados los de arco y flecha, y alli gastaban su almacen." However, Fray Diego Durán says: (Cap. XIV, p. 121) "y llegados á un lugar que llaman Tecuitlatenco, hicie-"ron alto y esperaron la armada de Mexico que venian por la laguna, que eran mill "canoas, muy bien Adereçadas de gente y paueses con gran numero de flagas y varas "arrojadiças, flechas y rodelas y de hombres para defensa de los flecheros, los quales "estauan tan diestros en desviar flechas con las rodelas, que era espanto, porque en "viendola venir, luego la dauan con la rodela que la echauan à través." This seems to indicate that there were special men detailed to protect the archers, and therefore a division into different arms, although there is no other evidence of such a fact. It may have been the case here, since the fight (against Cuitlahuac) was to take place on water chiefly, but nowhere else do we meet a division into kinds of arms, like archers, spearmen, swordsmen, etc., etc. All Mexican warriors were armed as nearly alike as possible. The Anonymous Conqueror, after mentioning the different weapons, says: "y "molti, ò la maggior parti di esse portano tutte queste sorti di armi con che combattono." ("Relatione, etc.," in Vol. I. of Col. de Doc., p. 374.)

[57] Gomara (Conquista de Méjico. Vedia, Tom. I. p. 440. "Calzan unos zapatos como "alpargates, pannicos por bragas. Visten una manta quadrada, afiudada al hombro "derecho como gitanas"). The Anonymous Conqueror (p. 376. "La maniera del ves-"tire de gli huomini"). Tezozomoc (Crónica, Cap. XXXVI, p. 58. "the macehuals "of lower grade, wore short mantles, plain, of cotton or nequen"). The "maxlatl" is described by the Anonymous Conqueror as follows: "a towel, like unto a sheet

14:Bandelier E-4 (no date) 1880 NU7 Aztec NU7

714 an inch thick, up to one and one-half inches, and therefore strong enough to resist an arrow-shot, or even the dart at long range. This was the cotton-armour subsequently adopted by the Spaniards under the name of "Escaupil" ("Ichcahuipilli").[58] Sometimes even the limbs were encased in such quilted armour,[59] and the outside of the "ichcahuipil" was adorned with feathers and plates of gold or silver. The *feet* were protected by leather soles or moccasin-like shoes ("cactli," "cotaras"), but the use of them was not general.[60] Warriors of merit especially, inserted their *heads*

[291] "worn over the head while travelling, of various colors, and variously adorned, with "the ends hanging downwards, one in front and the other behind." It was common to the aborigines of Mexico and Central America, and is represented on the sculptures of Palenqué, of Copan, and of Chichen-Itza. The tables of Durán give, perhaps, the most reliable picture of these costumes.

[58] "Ichcahuipilli" derives from "Ichcatl," cotton, and "huepil," jacket. Alvarado, in his second letter to Cortés, dated 28 July, 1524 (Vedia. Vol. I), mentions an ichcahuipil used by Indians of Guatemala, which was three inches thick and reached as far down as the ankle: "porque venian tan armados, que el que caia en el suelo no se po-"dia levantar; y con sus armas coseletes de tres dedos de algodon, y hasta en los "pies. . . . ." (p. 402.)

[59] There are several representations of such protection of the thighs, and also of the arms, especially in the splendid work of Lord Kingsborough, taken from the Mendoza codex. The entire costume, from the neck to the knee, seems to be of one piece. We have no accurate *description*, however, of them. It is doubtful whether they terminated into upper "leggings," or whether into a frock-like continuation, reaching from the girdle to the knee. Perhaps both; at least there are traces of both. (Anonymous Conqueror, p. 374. Clavigero, Lib. VII, cap. XXIII.) The absence of the "Ichcahuipil" was not, however, always a sign of low rank. Some warriors of particular merit even went to war almost naked (See Humboldt, "Vues de Cordilléres," Tab. XIV, fig. 4), and Herrera (Dec. II, cap. XXI, p. 287, speaking of the natives of Tepeaca, who were subject to Mexico: "and the most valiant ones went only in breech-cloth, painting their naked body black and red"). There was, consequently, no absolute uniformity and uniform distinction in dress and armament, and this was still increased by the variety of customs among the numerous tribes which assisted the Mexicans in war, each tribe having its own manner of dress, and keeping separate on the battlefield. A Mexican army must have been a rather strange, motley crowd. Still there was, in all probability, less variety than among the Peruvian warlike bodies. Of the latter's variegated array the report of Francisco de Xeres, secretary of Pizarro, gives a good illustration (Vedia, vol. II).

[60] "Cactli," corrupted into "catle," is rendered by Molina (II, p. 11) as "shoes, or sandals." Torquemada says (Lib. IV, cap. XVI, p. 450, vol. I): "the King wore "golden shoes, which they call cacles, and are after the fashion of those of the ancient "Romans, adorned with much jewelry, the soles fastened with cords." (Idem: Lib. XI, cap. XXX, p. 365) "they gave to him cotaras or sandals . . . ." Gomara (Conquista, etc., p. 322), in the list of presents sent by Cortés to the Emperor, mentions: "many shoes like as of grass, made of deer-hides, some with golden thread, and the "soles of certain white and blue stones . . . ," "other shoes, six pairs, of leather "of different color, adorned with gold or silver or pearls." The question is, whether they were moccasins or sandals. The sculptures of Palenqué show an approach to either. Durán (Cap. XXVI, p. 214), in speaking of the distinctions of dress, says: "And "thus it was ordained, first: that the Kings should not appear in public, except in ur-"gent cases; that the King alone might wear a crown in the city, but that in war all the "great chiefs and valiant captains might wear crowns also, and royal tokens . . . .

[643]

14:Bandelier E-4 (no date) 1880 NU7 Aztec NU7

726 carriers were burthened with a surplus of arms, and even with or-
724 naments, designed to reward deeds of high valor on the battlefield itself. This "train" (if we may use the expression) was under the command of stewards, who accompanied the force for that purpose.[145] The Mexicans having no domestic animals besides small
[231] dogs and fowls, it necessarily followed that their supplies and stores taken along by carriers were limited, and that consequently their expeditions could never be of long duration, partaking more of the character of forays or "raids" than of regular campaigns. As long as they moved among friendly tribes they expected these to furnish victuals; further on they relied upon what the enemy's country might possibly afford.

726 But the Mexicans, since their position in the middle of the la-
648 gune had been secured, and after they had once gained a foothold on its shores by overpowering successively some of the tribes scattered along the mainland, not any longer ventured out alone on their marauding expeditions. They required of those whom they conquered to join them in arms at their bidding.[146] What the exact relations were, which existed between the Mexicans and the other tribes of the valley, especially those of Tezcuco and Tlaco-

Slaves were not nu-
[567] merous among the Mexicans, if there were any at all beyond the prisoners of war. The latter they could not use for such a purpose. Some of the young people often accompanied the warriors, carrying their weapons and supplies, that they might see and learn (Tezozomoc, Cap. LXXI, p. 121). But the numbers of these carriers (100,000) are greatly exaggerated. Among the various objects mentioned by Tezozomoc as carried along by the Mexicans in their campaigns, there are "tents, low huts, reeds for the xacales." "Tent," in Mexican, signifies "Quachcalli," from "Quachtli," mantle, and "calli," house. Huts, "xacalli," of straw, or bowers, they certainly used, and the step is not very great, from the hut to the tent covered with what we call among northern Indians a "blanket." Durán mentions both tents and huts, "tiendas y xacales," frequently (Cap. XXI, pp. 183 and 186; cap. XXII, p. 190, etc.). The cooking utensils, like pans and kettles, had to go along, of course. Mats, "petlatl," for couches, and probably, also, for the covering of huts, were equally requisite and even indispensable. Lastly, mantles of "nequen" (Sisal hemp, "Jennequin"). This was the most ordinary
[291] material composing the dress of Mexicans. The "huepil" of the ordinary Mexican was made out of "nequen." These mantles were used for protection against the sun; they were light and therefore convenient to wear and to have carried (See Tezozomoc, Cap. XXXII, pp. 49 and 50).

[145] Tezozomoc (Cap. XXXII, p. 50): "Y los mayordomos personalmente fuéron á "esta jornada" (against Orizava).

[146] Those tribes which had been made subjects to Mexico were compelled, whenever called upon, to join the armed forces of the Mexicans. Tezozomoc seldom speaks of any foray without mentioning that the subjected tribes took part in it, on the summons of the Mexicans to that effect. See Herrera (Dec. III, lib. IV, cap. XV, p. 133); Tezozomoc (Cap. XXXI, p. 49; cap. XLVII, p. 77; cap. LI, p. 83). There is hardly any direct testimony, but the fact is abundantly proven that the Mexicans could call out, and did call out, to their assistance, any tribe which they had previously conquered. See Durán (Cap. XI, p. 313); and Zurita "Rapport, etc." p. 11.

16:Bandelier E-4 (no date) 1880 NU7 Aztec NU7

441 thing for another" ("tlanamacani"),[75] and such was every artisan, since, in the market place of aboriginal Mexico, every artisan bartered his own manufactures for whatever he needed for sub-

436 *al Padre Fray Luis de Figueroa.*" Santiago de Cuba, 14 Nov., 1521. Col. de Doc. Vol. I,
437 p. 361). "Hay una moneda entre ellos con que venden y compran, que se llama cacahuate, . . ." *Anonymous Conqueror* (p. 380, etc.) mentions Cacao, "e é moneta la piu comune, ma molto incomoda dopo l'oro é l'argento . . . . *Acosta* (Lib. IV, cap. 3, p. 198) "No se halla, que los Indios usassen oro, ni plata, ni metal para moneda, ni para precio de la cosas, usauanlo para ornato, como esta dicho." The statement of Torquemada is plain. While it explains the gradual ascent and development of the notion that the Mexicans had an equivalent to money, it clearly proves that only barter and exchange, and no actual buying, took place. The copper-plates which, as Mr. Bancroft justly remarks, "constituted perhaps the nearest approach to coined money," still were not intended even for such a purpose, since they were of varying size and thickness. But the story of the *copper* or *golden* "*Eagles*" given to the Mexican traders as money wherewith to buy, as faithfully reported and gravely discussed by Mr. Bancroft also, deserves some special ventilation. This story is taken from *Sahagun* (Lib. IX, cap. II, p. 342) "y dábales 1600 toldillos, que ellos llaman quauhtli para rescatar." These toldillos they divided into two parts of 800 each. Now Sahagun's editor, Sr. C. M. de Bustamante, very confidently asserts in note a, (p. 342): "Era una moneda que consistia en unos pedazos de cobre cortados en figura de T.— Clavigero, tom. I, pág. 349." The reference to *Clavigero* is for Lib. VII, cap. XXXVI. Now "Toldillo" is derived from "toldár" that is, to shroud or cover, and means merely a *cover*, and not a piece of metal. Used also for a covered litter or portable chair. Besides, "quauhtli" indeed signifies Eagle, but it is an evident misprint and should read "quachtli," which signifies a *mantle* or *sheet*, thus perfectly agreeing both with the "toldillo" and with the "patolquachtli" of Torquemada. The "golden eagles" of Mr. Brasseur are therefore rendered utterly useless.

● 291 Anyone reading *Texcocoac* will see at a glance what a conspicuous part these mantles "Quachtli," (*Molina*, II, p. 84) played in intercourse and barter. According to *Ramirez de Fuenleal* (Letter, etc., Col. de Doc's conc. le Méxique, I, p. 251) they formed to a certain extent the basis of tribute. These cotton-sheets are well described by *Peter Martyr* ("*De nouo Orbe.*" Dec. V., cap. X, p. 230): "Concerning the shape and fashion of their garments, it is ridiculous to behold: they call it a garmente, because they couer themselves therewith, but it hath no resemblance with any other garment, of any fashion: it is only a square couering like unto that, which your holiness cast on your shoulders, sometimes in my presence, when you are about to kimbe your heade, to preserve your garments, least haire, or any other filth should fal upon them. That couering they cast about their necke, and then knitting two of the four corners under their throate, they lette the couering hang downe, which scarce couereth the bodie as lowe as the legges. Having seen these garments I ceased to wonder, that so great a number of garments was sent to Cortes, as we mentioned before: for they are all of small moment, and many of them take uppe but little roome."

441 With the absence of money the profession of merchant as one who lives from the
439 profits of his sales, becomes limited almost to what he can gather from out-side of his
437 own community, in other words, to what he can *import*. Their main and almost exclusive business consisted in effecting intercourse between the tribes. At home, every artisan sold or rather exchanged his own wares in the public markets. See *Cortés* ("*Carta Segunda*," Vedia I, pp. 32 and 33), *Bernal Diez* ("*Hist. verdad.*," etc., Vedia II, p. 89, cap. XCII), *Gomara* ("*Conquista*," p. 348, Vedia I), "Cada oficio y cada mercaderia tiene su lugar señalado . . . .", *Sahagun* (Lib. X, cap. XVI, p. 41), "El que vende piedras preciosas, ó lapidario es de esta propriedad, que sabe lábrar sutilmente las piedras preciosas y pulirlas. . . ." He mentions as manufacturers of their own goods the following: "plateros de oro" (41), "Tratantes en mantas" (Cap. XVII, 42), "que venden mantas," "que venden cotaras" (Cap. XX, pp. 48, 49 and 51), "olleros," "que

leather or woven maguey fiber in cold weather. Women 291
wrapped about their loins a finely woven cloth, which they 554
sustained with a narrow belt. A sleeveless slipover, or *huipil*,
completed their costume. They plaited their hair into braids, [302]
sometimes interlacing them with ribbons, and these they
wrapped around their heads. This woman's costume may
still be seen in many parts of Indian Mexico. (See Plates
33–36.)

The poor made their garments of maguey fiber or coarse
cotton. The rich wore the same clothing fashioned from finer
textures and decorated with elaborate embroidery. The many
names given to the different kinds of mantles show their in-
terest and importance to the wearers. Wool was almost never
made into cloth, since dog hair was all they had, but feather
cloaks were highly esteemed. Chiefs wore a fillet of leather [292]
from which hung two tassels, and administrative chiefs
had a sort of diadem of gold or jade and turquoise as a badge
of office.

The warriors frankly gloried in their costumes. Rich man- 292
tles and ornate feather headdresses were not enough for some,
who carried on their shoulders a harness of wicker support-
ing an elaborate structure in feather mosaic. Others wore
costumes modeled on the appearance of an ocelot or an eagle.
On specified occasions the priests assumed the dress of the
gods and goddesses, whose costumes were sumptuous and
ornate and defined by exacting ritualistic marks of identi-
fication. (See Plate 61.)

Jewelry consisted of ornaments of copper, gold and silver, 301
shell, various-colored stones, like jade, turquoise, emeralds, 304
opals or moonstone, and mosaics laid on a backing of clay,
wood or reed. Large plugs were inserted in the ear lobes of

Sixteenth Chapter, which telleth of the god named Little Black Face (Ixtlilton), the earth-stamper (Tlalteteccuini).[76]

He was a god, whose temple was made entirely of wood, at a place named Tlacuilocan. Here in his temple were many earthen bowls, covered over. These were called "his black water."

And whenever a child sickened, they brought him to the temple of Ixtlilton. They uncovered one of the jars and had him drink "his black water." Thereupon the child became whole.

When one wished [to arrange] a dance, amid incense, he went and brought [Ixtlilton's] impersonator to his house. It was only a man, who was arrayed [like the god].

When they had arrived at his house, where there was to be a dance, food was eaten and thirst was quenched. After eating, Ixtlilton danced. After he had danced, he entered into the house; he uncovered the wine [which] for four days had been covered. This was called the first opening or tapping of the new wine.[77]

Then they began to drink. Again they went out into the court, [and] uncovered "his black water," which also had been covered for four days. On the fifth day they uncovered it.

If dirt, cobwebs, straw, charcoal [were found] upon it, then it was said perchance he was either an adulterer or a thief; or he lived dissolutely, or he lived in vice; or he was a sorcerer, he who had the dance. Thus they confronted and reproached him openly. Thus they said [the god] sowed discord because he revealed and reproached people to others for their sins.

And when he departed for his house, they gave him a large mantle called iaquen (face-covering).[78]

Thus was [Ixtlilton] bedight: he was spread over with unguent; his face was covered with soot; about his lips was

75. For description, see Sahagún and text in Sahagún: *Garamondo Alhambraquen*, Vol. II, pp. 513 and 523; and also Sahagún (Ossuna) —Plate 23.

The term *cuachtli* means the natural cape or mantle, with sea-snail shells fastened where the cords crossed. The *chalchuiqui* and the *tecuiqui* were presumably the name of similar. Sahagún: *Collected Works*, Vol. II, pt. 1, pp. 79, 82, citing, in the first instance, Sahagún's *Historia general*, Lib. III, Apendice, cap. 3. In Lib. II (*Florentine Codex, fo. 37v*), Sahagún refers to "*un ornamento de un palmo en quadro, hecho en tela rala, al qual llamavan yquauhtecuiqui, atado con unas cuerdas de algodon a los pechos. . . .*"

76. *God of medicine. Tlalteteccuini (or tlalteteccuini) is probably formed from tlalli and teteccuini. Cf. Sahagún: Ensiqo Kapital*, Vol. I, p. 18.

77. Sahagún, *Historia general*, Vol. I, p. 314: ". . . *las que communmente llamaban las mugeres y hacian vino nuevo, que es llamado octapilli.*" The Spanish text of the *Florentine Codex* explains that "*a este abrimiento, llamavan chiuacxopotla, quiere decir, este abrimiento primero, o vino nuevo.*" On the meaning of *oxmacxuh*, see Sahagún, *op. cit.*, p. 37, for a definition of *oxmacxuhqui*.

78. ". . . *delante estaba* [*a*] *las quatro llamas* [*que quiere decir, enhestaron de la cara: porque quadrado, amorçaçado, equal que anda hecho, de fuerte. . . .*" *Loc. cit.*

blood], so that they terrified those whom they followed.[88] They fought, joining in battle against the valiant chiefs—chosen men [all].

And all [the chiefs], having taken their pleasure with wine, acted like buffoons, imitating and pretending to be warriors, unafraid of death, jostling one another, acting perversely, like warriors. Here they exercised their arms [against those who were skins], and played at combat like fighters in war, some resting.[89] This was [at Xipe totec's temple] called Tozoca.

And the young men garbed like Xipe totec, wearing human skins,[87] then went everywhere from house to house, begging. They were placed on zapote-fiber seats; bunches of [corn] were hung on them like jewels; they placed garlands on their shoulders, they covered them with flowers. They gave them to drink.

And if any woman had blisters, or ophthalmia, she said: "Let me make an offering to Totec, when [the Feast] of the Flaying of Men [is celebrated]."

[Xipe's] garb [was thus]: he had the quail-painting on his face.[90] Rubber divided his lips in two parts. On his *Yopi*-crown[91] was *placed* [a *band*] *with forked ends. He* wore a human skin, the skin of a captive. He had a wig of loose feathers, golden ear-plugs, a zapote-leaf skirt. He had rattles. His shield was red and had circles. His rattle stick[92] was in his hand.

88. The corresponding Spanish text describes the scene thus: "*En este festín, bebían como un juego de cabar: de manera que el vino tomado, era de la parte donde iban, o venían del dios totec; y entre todos, unos vestidos de pellejos de hombres que eran muertos, y desollados, en aquello fueron. . . . Los del bando contrario, eran los soldados valientes, y mozos, y personas valientes, y esforçados: que no tenían en nada la muerte: mozos, atrevidos, que de su voluntad salían, a combatirse, con los otros. Allí los unos, con los otros, se exercitaban, en el exercicio de la guerra: peleando los unos, a los otros: hasta su punto, y de allí, holgaban huyendo, hasta su propio punto.*" Cf. also the description in Sahagún, *op. cit.*, Vol. I, p. 124. The game of cabar in the *Enciclopedia Universal Ilustrada*, Vol. II, pp. 299-300, is described as "*Antiqua fiesta, juego é ejercicio caballeroso en que tomaban parte dos bandos é cuadrillas convocadas á caballo, concurriendo gallardamente y arrojándose cañas de las que se empuñaban con la colonga.*" A Moorish exercise, in Medieval times adopted also by the Spaniards, it was reserved to the nobility. It took the form of a pitched-pole game requiring considerable skill in horsemanship and spear-throwing.

89. *MS Biblioteca del Palacio*, Sahagún, *Códice Espinosa*, has *ocoaia* in the Aztec text, instead of *aiac*, which is in the *Florentine Codex*. Sahagún translates the passage as "they stopped, rested, at the place called Tozoca."

90. Cf. Sahagún, *op. cit.*, Vol. I, p. 126: "*Todos los pellejos de los desollados se vestían vestidos muertos, a los cuales llamaban Totecuio.*" Cf. also *ibid.*, p. 123, defining Totecuio as "*los muertos o heridos del dios Totec.*"

91. In the *MS Biblioteca del Palacio* text (Sahagún, *op. cit.*), the word is *ozpaltlachichiuhca*, translated as "*se hace un Gorrito de Waschlederarbeit.*" Sahagún also (*Translation of the Aztec Collection*, p. 102) uses the term *ozpaltlachichiuhca* (quail face painting).

92. Sahagún (*Gesamtausgabe Abhandlungen*, Vol. II, p. 466) translates *yopi* as "the red people" (Thepanecs), and gives two illustrations to indicate that they were painted caps.

93. "The word *chicoatlli* means 'chicoatlli reaching to south among.' Word and symbol obviously refer to the accomplishing of the superdestiny function, to fructifying, hence we also see the chicoatlli with the fire sign projecting between the human couple in sexual union." Seler: *Translation of the Aztec Collection*, p. 108.

94. Seler suggests that the form of the name should be *tecuz-tecuhtli* or *pocoxa-tecuhtli* ("the lord, the prince, the leader") (*Collected Works*, Vol. II, pt. 1, p. 57). Temporarily (*op. cit.*, Vol. II, p. 57) says he also was named *Yacancauhqui* ("*el que tiene la nariz equivocada*"); Francisco Javier Clavijero, in *Historia antigua de México* (México: Editorial Porrúa, S. A., 1945), Vol. II, p. 87, n. 17, adds the name *Xiuhtecuhtli*.

In *op. cit.*, Vol. II, pt. 4, p. 91, Seler refers to Yacancauhqui as meaning "lord of the nose," and to the form Iyacancauhtli, which Sahagún uses in the *Florentine Codex*, as "lord of the dispersed," explaining the association of the cult of this god with that of Tezcatlipoca, and linking Yacancauhqui with Iztapalotl. Both the latter were among the "old gods."

95. Cut in four pieces and covered with liquid rubber. (Seler: *op. cit.*, p. 92).

96. The corresponding Spanish text states: ". . . *en una cuba, empiza, que olor Roman valed. Y también usan de otra manera de hacelo,*

104. Cf. Tezozomoc (op. cit., p. 57): Yaomilchiqui "*pregonaron rapsodias poemas, que eran vituperio, é habilidad, para mofar grandemente, é engañar, y ir salvo, y capto (que es propio condición de Mercaderes)* . . . ."

105. Cf. Sahagún (*Escuela Española*, p. 22) citing *Hist. Regn. Colh. Mex.* B. II §63.

106. Book IX of the *Hist.* is general dealing almost entirely with the activities of the merchants. Chapter VI, entitled *De las ceremonias que se hacia a los mercaderes ricos: Ungaban a un caso, que se llama Iacapitzo de pino, mantenian washing mouth and hands.*

107. Sahagún defines calpulli as "*vecindad del barrio, ó parroquia*" (Spanish version).

108. Sahagún defines the sacrifices in this manner: "*Entre diaches que mataban a estos esclavos.*"—*Historia general*, Vol. I, p. 213.

109. According to the Spanish version, they were four brothers and a sister of Yiacatecutli. Sahagún (*Collected Works*, Vol. II, pp. 4, p. 93) recognizes Cochimetl and Yacapitzoac as synonyms for Yiacatecutli; "Chicomquiauitl or Chalmocacioatl is the name of a goddess of water and the earth"; Acxumccuji is Tezcatlipoca; Nacxitl is Quetzalcoatl.

Then the mother of the young man

placed a very fine shift upon her daughter-in-law, and put for her, by her feet, a richly embroidered skirt. And the mother of the young woman covered her son-in-law with a very fine cape, and tied it over his shoulder, and laid a very richly embroidered breech cloth at his feet. This done, a number of old women, who are called *ximci*, tied the corner of the young man's cape to the lower part of the young woman's shift. In this way was concluded the marriage, with many other ceremonies, and dinings, and drinking, and dances, which were given thereafter, as is contained in the account of the marriages.

matrimonjo, con otras muchas cerimonjas, y comeres, y beueres, y bayles, que despues se hazian, como se contiene, en la historia del matrimonjo. 585 302 292

They observed two other feasts which in part were fixed and in part were movable. They were movable because they were celebrated in interpolated years. One was observed every four years, and the other every eight years. They were fixed because they had year, month, and day assigned. In the one which was celebrated every four years, they pierced the ears of the boys and the girls, and they performed for them ceremonies for good growth, and they purified them over the fire. In the one which they celebrated every eight years, they fasted before it for eight days on bread and water, and enacted a dance in which they assumed the forms or characters of various birds and animals. And they said that they sought good fortune, as is set forth in the appendix of the Second Book.

Otras dos fiestas tenjan, que en parte eran fixas, y en parte eran moujbles: eran moujbles, porque se hazian por años interpolados. La vna se hazia, de quatro en quatro años, y la otra de ocho en ocho años: eran fixas porque tenjan año, mes, y dia señalados. En la que se hazia, de quatro en quatro años, horadauan las orejas a los njños o njñas: y hazianlos, las cerimonjas, de crezca para bien, y lustrauanlos por el fuego. En la que hazian, de ocho en ocho años: ayunauan antes della, ocho dias a pan y agua, y hazian vn areyto, en que tomauan figuras, o personajes, de diuersas aues y animales: y dezian que buscauan ventura, como esta escrito, en el apendiz del segundo libro. 796^ [304 854] [535 785]

These movable feasts, in some years, displace the feasts of the calendar, as also happeneth in our calendar.

Estas fiestas mouibles en algunos años echan de su lugar a las fiestas del kalendario: como tambien acontece, en nuestro kalendario.

And they took [the children] to many [different] places.

[First was] Quauhtepec.[6] And the one who died here bore the same name—Quauhtepetl. His paper vestments were brown.[7]

The second place where one died was the top of Mount Yoaltecatl.[8] The human banner [the child to be sacrificed] had the same name—Yoaltecatl. His paper vestment was black striped with red.

The third place was Tepetzinco,[9] where died a girl called Quetzalxoch, a name which they took from Tepetzintli, [also] named Quetzalxoch. Her array was blue.

The fourth place was Poyauhtlan,[10] just at the foot and in front of Mount Tepetzinco. The name of him who died was Poyauhtecatl. Thus he went adorned: he was bedight in rubber, stripes of liquid rubber.

The fifth place, there in the midst of the lake, was a place named Pantitlan. He who died there had the name Epcoatl. The vestments in which he went, having put them on, were set with mussel shells.

The sixth place to which they carried [a victim] was the top of [the hill of] Cocotl,[11] and also he went bearing the name Cocotl. His array was varicolored—part red, part brown.

The seventh place was on the summit of Yiauhquemec, and also the human banner bore the name Yiauhquemec. The clothing which he bore was completely brown.

These were the places where [the children] died, as blood-offerings, as human banners.

And all went with head-bands[12] with sprays and sprigs of quetzal feathers; they had green stone necklaces, and they went provided with green stone bracelets; they provided them with bracelets of green stone. Their faces were painted with liquid rubber, and spotted with a paste of amaranth seeds. And their liquid rubber sandals: they had sandals of liquid rubber. All went in glorious array; they were adorned and ornamented; all had valuable things on them. They gave them paper wings;[13] wings of paper they had. They were carried in litters covered with quetzal

[6. Map of the Valley of Mexico in Colonial times leaves most of the places and features mentioned by Sahagún, but the frequent repetition of place-names is at times confusing. Of Quauhtepec, Sahagún's Spanish text says: "es una sierra cualquiera que esta entre del Tlaxcalteca."
7. Tlapaltic, Sahagún (Spanish text) has *encarnado* (deep red, flesh colored); here he has *leonado* (lion colored, tawny) for *paapalli*. For *papalli*, Siméon (op. cit., p. 56) has *grisâtre*; Molina (op. cit.), *cosa verdosa de negro*; Simeón (op. cit.), brown or black.
8. The Spanish text explains: "es una sierra pequeña que esta cerca quauhtepec."
9. Lat. ed.: "es aquel monteculillo, que esta derecho delante Ixpaxna, frontero del Quauhtlatlac."
10. Lat. ed.: "es un estanque, que esta en los arenales de Amanalli, y cerca cada cuatro capitulos."
11. Lat. ed.: "es un cerrete que esta cerca chalco ocoyan."
12. Seler (op. cit., p. 57) reads *panquetzaliztli*, which he translates as *Ehrenschmuckstücke Federn*.
13. Sahagún (loc. cit.) says: "*papelpaper como alas de papel*" [illegible].

feathers, and in these [the children] were kept.

And four times they appeared before the people. They were looked at; they were made to be seen by the people; they were made known. They gave them and provided them their paper vestments.

The first time they were given, and ornamented with, red; they were [dressed] in red; their paper garments were red.

The second time their paper ornamentation was white.

The third time they again bore their red vestments.

The fourth time, white.

This last time, they ornamented them and gave them presents; for this last time, they wore [this array]—so that in it their fate would come, they would be slain, they would breathe their last, they would be the [sacrificial] striped ones. For this last time, they took their red array.

No more did they change [their garments]. And they ornamented them as the striped ones with liquid rubber.

And those who had captured prisoners, who had captives whom they had taken, also anointed themselves with red; they covered themselves with feather down; their hands and feet were covered with white turkey feathers.

And also they were given costly insignia; [but] not given [to keep] always—only that they should smoke with them; that they should dance the captives' dance with them.

Only thus they appeared and were seen; only thus men marveled at them; only thus [garbed] they celebrated the feast; only thus did one make known to men that his captive was to be offered as a sacrifice.

And he bore his shield, which went resting on his arm, and he carried his rattle stick, which he went rattling, and he proceeded planting his rattle stick on the ground, and it rattled and jingled.

And all those who had captives, those who had taken prisoners, were thus garbed—they whose captives would be offered as sacrifices when the Feast-day Tlacaxipehualiztli came.

[illegible] and University of Utah, 1950; Monographs of the School of American Research, No. 14, Pt. II), p. 13. On use of some yopi, and its relations to Xipe cults, see op. cit., p. 27 and n. 80.

ders, as far down as his armpits. This was called "the flowery garment."

And from both ears hung curved, gold, shell pendants.[8] And they fitted [his ears] with ear plugs made of a mosaic of turquoise. And [he wore] a shell necklace. Moreover, his breast ornament was of white sea shells.

And then his lip plug was a slender snail shell lip plug. And hanging from his shoulders was what was like a cord bag called *icpatoxin*.[9]

Then they placed golden bracelets on both upper arms, and on both wrists they put carved bracelets with precious stones, covering almost all the forearm. And he put on his net cape like a fish-net of wide mesh with a fringe of brown cotton thread.[10] And his costly breech clout reached to the calves of his legs.

And then they placed his bells on both legs, all golden bells, called *oiouali*. These, as he ran, went jingling and ringing. Thus they resounded. And he had princely sandals with ocelot skin ears. Thus was arrayed he who died after one year.

When [the feast] of Toxcatl was drawing near, when it was approaching him, when it was coming to him, first they married him to [four] women whom they sought out [for him]. He was married in [the month of] Uey toçoztli.

And he left off, scattered in various places, and abandoned the ornaments he had had, in which he had walked about fasting, painted black. His hair was shorn; he was given a tuft of hair tied upon his forehead, like that of a war captain. Thus they bound [his hair], knotting it [with brown cotton thread] called *tochiacatl*; and they tied to his long hair[11] his forked heron feather ornament with single quetzal feathers attached.

Only twenty days he lived, lying with and married to the women. Four women he lived with, who also were cared for, for one year, in the guardian's house.

The first one was named Xochiquetzal; the second, Xilonen; the third, Atlatonan; the fourth, Uiztociuatl.

And still on the eve of [the feast of] Toxcatl, still five days from it, on the fifth day [before it], when

8. "Como arquillas de oro" (Sahagún: loc. cit.).
9. "Llamaua a las capillas, un ornamento como balas, de un palmo en quadro de lienço blanco, con sus barlas y flecadura" (loc. cit.).
10. Cf. Sahagún (Robredo edition), Vol. II, p. 310.
11. Cf. ibid., Vol. I, p. 163. The corresponding Spanish text, however, reads: "con una pluma corviua, ensarcada aquella ambra de las cabellos, dos barbas con sus hazuelas, barbas de plumas, y una, y tachiacatl, cosa corriuas, que eran llamauan ensarcadas." Clark (op. cit., Vol. I, p. 88) describes "The first lord of quauhxo [which] has a design called, by Sahagún, quauxoxo ichcatl, because of the cotton woven in tachiacatl or red rabbit's fur; the general of ocelotzacatl contained in a square of dark red, his squares of white feathers. The fringe is also of red tachiacatl." From this, it would appear that tachiacatl is red cotton, and tachiacatl is a red dyeing of rabbit hair.

opochtli, here at the Temple of Uitznauac, in the tribal district. They placed it on the serpent bench.

This serpent bench was hewn of wood, to represent serpents; four sides carried the tails; four sides carried their heads.

They covered [Uitzilopochtli's] mesquite wood framework with fish amaranth dough; for his figure was always hewn of mesquite wood, which they covered.

Then they placed upon him his raiment; they put on him his sleeveless jacket, on which human bones were painted.

And over it they laid a mantle, his cape of *magney* fiber, like a network cape.

And they fitted on his paper crown, adorned with feathers, called *anecuiotl*. On his feather headdress stood a flint knife, also made of feathers, half of it being blood-colored.

Then they arrayed him in a gadly, costly cape, made, embellished, and designed all in precious colored feathers, with the red eye border, all thus edged with [the feathers of] the red spoonbill. And in the center lay a great golden disc.

And his bones were made of fish amaranth dough, shaped like cylinders. They called them *teomimilli*. They piled them before [Uitzilopochtli's figure], until they were hip high.

And the cape which covered them, and spread before them, was designed with skulls, with the palms of hands, with hip bones, ribs, legs, the lower arm bones, and with the outlines of feet. Thus was it painted.

And this cape was named *tlaquaqualle*.

And yet one more thing they caused to be spread before him: they cast down what was named the sacred roll. In this form it was named his breech clout.

And this was a paper, white paper and not yellow paper,[10] a finger thick, a fathom wide, and twenty fathoms long.

With ceremonial arrows, arrows hardened in fire, they supported it; they were made only that they might carry [the paper]; that his breech clout might be carried.

In three places were they plumed, with white turkey feathers: first on the point, second on the shaft, and third on the end.

10. Cf. V. W. Von Hagen: *The Aztec and Maya Paper Makers* (New York: J. J. Augustin, 1944), pp. 68, 72 esp. In the Bulmolo edition of Sahagún, Vol. V, p. 231, a note by Salvador Quezada quechanual so "la materia manufacturada por la capa de fibra de algunos árboles de gruesa fama. Sirvió de papel para los pintores o los libros, y de tela para hacer las adornos, vestidos y otros adornos que el indio de los dioses requería."

And if anyone should stumble, if anyone went not there, if he loitered, for this he was detained.

And if there were any who tarried, if they made not haste, if any ceased walking, [if they] did not lay down their reeds with the others, for this they seized [such an one]; for this all [such] were then made captive.

And this was done for four days.

And in these four days, whosoever had been seized might well be freed, might well ransom himself; he might yet escape [in return for] perhaps a turkey, perchance a breech clout, mayhap a cape, or a *maguey* fiber cape, or a small cotton mantle.

And the poor, these ransomed themselves with a wooden plate with balls of dough.[18]

And all which was paid, all this, the captor, he who detained them, the accuser, took.

And upon the fifth day, on the day of the feast, one might no longer ransom himself; even though it were something very great [as a gift] that [one offered] to excuse oneself, no longer might he try.

And when the feast day [came], then all the common folk made cooked maize and beans for themselves—*etzalli* was made; everyone did so; [for] none did not prepare maize and beans for himself.

And when they were cooked, then they were eaten; they presented it to one another. Some thus feasted others.

And some who took their pleasure and some of the warriors danced; and they did thus only to divert themselves.

Thus were they adorned—they had circles about their eyes and carried their sheaves of dried maize. They kept going from house to house, singing and dancing the *etzalli* song. They went about bearing a handled jar, the *etzalli* jar, in their hands.

And thus they danced, sang, and chanted: "I do it; I do it. [Give me] a little of thy *etzalli*. If thou givest me none, I shall break a hole into thy house."

And the householders then offered them a measure of *etzalli*, and went to place it in the *etzalli* jar.

In fives, in sixes, in sevens gathered those who danced.

This *etzalli* dance began at midnight, and only at daybreak all dispersed, and it became quiet.

And when the sun arose, then was adorned the fire priest. He put on his sleeveless jacket; over it he placed his [thin, transparent, netted] cape, called the

16. *"Vna manta delgada transparente, que se llama cimalpopoyal"* (*loc. cit.*). Elsewhere he mentions *"manta delgada que llaman xyal"* (Rubiales ed., Vol. IV, p. 66).

17. *"Vna flor de papel grande arrizada, redonda a manera de rodela"* (corresponding Spanish text). Later, in the same chapter, he describes the chapeo ipanmeli as *"ornamento, que va sobre el pescuezo."*

18. *"El cuchillo, vna flor de papel, tambien fruncida, que sobresale a ambas partes de la cabeça a manera de orejas de papel, como medias alondras,"* and, later in the same chapter, *"era ornamento, que se ponjan tras el cuchillo, como vna flor hecha de papel"* (*loc. cit.*).

19. *"Morenos: vestuan (teyamilmanca) cubrend the whole of their bodies black except the face, as may be seen from the drawings, but they also painted the face with a few black stripes on which they sprinkled iron pyrites (apozuali)"* (Clark, *op. cit.*, Vol. I, p. 93n.).

20. *"Hay otro que se llama yauhtli. El muy verde, tiene muchas ramas y crecen todas juntas hacia arriba; (y) siempre huele; se tambien medicinal para los que tienen almorrar, molido y bebido con el cacao; hace de tostar, y despues molido y mezclado con el cacao. Aprovecha tambien para los que escupen sangre; y para los que tienen calenturas"* (Sahagún, Rubiales ed., Vol. III, p. 270).

21. Probably the singular of *quaquamilitin* is meant by *quamalli*. Sahagún, however, defines *quamalli* as the priest charged with the raising of young girls dedicated to live in the temple. Cf. *op. cit.*, Vol. I, p. 253.

22. Following *mec viloa*, the *Real Palacio MS* contains a few lines which are missing from the *Florentine Codex*: *auh ihuqujn tlaca ic tlachichioalti, yoan cocoxqui, in tlachichioalli yoan papar y pantlati omo, omatl yoan pilonitoh, yoan tlamatlati omoiquat, quinquatlatlati, omoz quimmamalitiuat,*—and in the midst of them went what is called a reed mat, made of reeds, with two feathers [upright] upon it. Paper went hanging from it, spreading out from it, painted haughtwise with stripes. They went carrying it with much reverence.

she[1] walked, much did she rattle, clink, jingle, and tinkle.

And her sandals, her foam sandals,[6] [had] side pieces. The side pieces were of loose cotton yarn with flecks of raw cotton woven in, put in by hand. And the tassels on the sandals were similarly of loose cotton yarn. And the sandal thongs also were of the same loose cotton yarn.

And her shield had water lilies [and flowers];[7] it was as if painted with a water lily leaf [and flower] design, [or] as if it had [that design], and was hung [also] with yellow parrot feather pendants.[8]

And the yellow parrot feather pendants were made [into tassels] like locust heads[9] [made of] eagle feathers and eagle down, and cut [pieces of] quetzal feathers and trupial[10] [feathers], and the red [and yellow wing feathers of the parrot] named *tzauxolloti*;[11] and the shield [was] rimmed with a circle of yellow parrot feathers.

When she danced, she swung the shield around; it was swung in a circle.

And her reed staff was hung with paper spattered with rubber; it had rubber. In three places it had vase-like flowers, and there in the vase-like flowers was incense. On each of the three were [crossed] feathers; they were provided with [crossed] feathers.

When a dance was held, she walked leaning on it and thrusting it into the ground; she went marking the dance rhythm with it.[12]

And for ten days they sang [and danced] in the manner of women. All gathered together and took their places, the salt people and the salt-makers—the old women, the mature women, the maidens, and maidens recently matured.

While yet there was sun, while it yet shone, then they began to dance. They went arranged in order, each in his place, in rows; they held one another with

6. Cf. *ibid.*, p. 4, n. 32.

7. "*Waterlily*," in Seler, *op. cit.*, p. 132. The shield design is the same as for Nappa w- di (cf. Anderson and Dibble, *op. cit.*, p. 21). Sahagún's Spanish reads: "*Traya una rodela pintada, con una que nacher, de la yerba que se llama ahuaxoyoca.*" In Vol. III of the Rehusdo ed., p. 336, in Dr. Nicolás León's essay, "Ensayo de nomenclatura e identificación de las láminas 98 a 134 (Nos. 368 a 965) del libro XI, de la 'Historia de las Cosas de Nueva España' escrita por Fr. Bernardino de Sahagún," *ahuaxoyoca* is defined as "*cabeza de negro. Nimphaea elegans. Hook, Nimphaeae.*"

8. "*Otra manera de papagayos llamaban tzauhli y eran como mariposas cuando ya son grandes y redondos y colorados; entonces tienen las plumas muy amarillas y resplandecientes; cuando nace son verdosos en obra, como papagayos tienen todo en amarillo redondo, y por esto le llaman tzauhli, que quiere decir cosa muy amarilla*" (Sahagún, Rehusdo ed., Vol. III, p. 146).

9. "*Con flores en las colas, hechas al plumas de aquéllos*" (Sahagún, corresponding Spanish text). *Chapulín*, however, may be an element in *fitzochapolli*.

10. Cf. Anderson and Dibble, *op. cit.*, p. 18, n. 101.

11. "*Otra manera de papagayos hay que llamaban cuchan (y) es muy semejante al que llamaban tzauxuxu; tiene el pico amarillo y corvo, la cabeza colorada, y todas las plumas del cuerpo amarillas, tan redondas y todo lo amarillo de las alas, tiene colorado encima, mezclado con amarillo; las plumas pequeñitas que están sobre la cerca del ala que llamaban tzilcuil, son amarillas mezcladas de colorado; el rabo, como pelo malo, que tiene cerca de la cola y cerca de las alas, es colorado mezclado de amarillo*" (Sahagún, Rehusdo ed.; Vol. III, p. 146).

12. Cf. *Anonymous* (Bandelier, *op. cit.*: "*Entre cantando gentes en danzando*"). In Sahagún's corresponding Spanish: "*Cuando bailaban en el areyto, yuan andando al bailar, y deteniéndose [sic] a compas del bailo.*"

1 [i.e., the god(dess) of the salt-makers, Uixtociuatl. – Analyst]

his vassals. Because verily there was much hunger; when dried maize was costly, then there was much want, [and] it was hard to gain a livelihood; [and] many then were our dead.

And until the time that the Feast Day of the Lords came, upon every day there was song. When singing and dancing began, [it was] toward evening, when only little sun shone. Thereupon fire was laid in the braziers; flame was put upon the braziers.

And the braziers were arranged and ordered in six rows, and in each row were ten [braziers] and [each] brazier was two fathoms thick; and each was as tall as one's hip.[5]

And thereupon all went forth from the house of song, coming singing and dancing. Between [pairs of men] came the women. Light women, harlots, chosen —picked out, set apart.

And they went together, they went taking by the hands the honored ones—the young chieftains, the leaders of the young men, and those with shorn hair, the Otomí, and the noblemen [not warriors. These last] were not arranged in order; of their own free will they placed themselves near the others.

And richly were the women arrayed and bedight; all good were the skirts and shirts which they had put on. Of their skirts, some had [designs of] hearts, some were [embroidered] with a mat design like birds' gizzards, some were ornamented like coverlets, some had spiral or leaf [designs], some were of plain, fine weave. All had borders and fringes; all [the women] wore skirts with borders.

And of their skirts, some had brown [streamers] hanging, some had smoke symbols, some had black [streamers] hanging, some had house designs, some had fish [patterns], some were of plain, fine weave. And the neck [openings] were all large, and their borders were also deep and wide.

And when they danced, they unbound their hair; their hair covered them like a cloak. But they brought braids of their hair across their foreheads.

And they were not decked with feathers; neither were their faces adorned with paint.

And thus were bedecked the chieftains: their array consisted of the cloak of netting. And the brave warriors, they who had straw lip plugs, they had white net cloaks with shells set in fish patterns. [These] were called their vermillion net cloaks.

X 796 ● 292 301 304

And all the men, whether leaders of youths, or youths, had only black net cloaks, all with eyelets on the border, and all had turquoise [ear plugs].

And those who led had only bell-shaped ear plugs.[4] And those who had bell-shaped ear plugs, also had lip plugs. Some were like lizards, some like dogs, some like a broad-leafed water plant, some rectangular.

[729]

And the youths who already wore [their] hair long [in token of war exploits] had lip plugs which were rounded.

And all the [others] who were only youths [had] only circular lip plugs, which they set in place.

[701]

And the leaders of the youths bore breast plates made of small, white, sea shells. And those with shorn hair, the Otomí, wore their neck bands with round pendants.[5] These were shells.

And the shorn ones were provided with bird-formed lip plugs; and the Otomí were decked with lip plugs formed like the broad leaf of a water plant.

And those who were diligent to be leaders of the youths bought themselves real sea shell neck bands, all clear and limpid. And the lower class bought themselves [common] shell-fish for their neck bands, [which were] only yellow, not hard, and not very costly.

X 796 293

And those who had taken captives, the leaders of the youths, carried their feather shoulder devices in the form of birds. They carried them upright over their heads.

[301 714]

And the captains carried upon their shoulders feather devices [formed like] trees, tied in three places with eagle feather clusters bound with ocelot skin. And at the base they were wound in three places with red string.

237 X 796

And some raised up quetzal feathers in the form of corn silk; some a forked heron feather ornament; some set up the head plumage in bird form; some the device made of diverse quetzal feathers.

293

And upon their legs, upon their left legs, they placed hooves, real deer hooves. And the thong was of real deer skin, cut thin, cut into narrow strips.

X 796 302

And thus were they variously painted: Some placed a black stain upon their cheeks, called "black cheek ash vase," and laid pyrites [upon the stain]. And some had a black [stripe] upon their foreheads, [in

4. In the corresponding Spanish text, *tolompias* [*tecolomias*] *cuyuas*, which may have been the material of which the bells were made.
5. Seler (op. cit., p. 144) has *dieses Perlenhalsband für yyamatzachapac*.

They said unto him:

"Go, my friend! Though thou art a brave man, a warrior, how may we care about thee? Wherever our foes come rising against us, may we die as brave men!"

And these were the words which they said unto him; and much else besides.

And thereafter, when they had cast him out, he slowly crept away, going backwards and on all fours, lamenting as he went. Thus he went off, nevermore to sing and dance with the others.

And the matrons cast out the woman. Nevermore would she take up the song and dance with the others. Nevermore would she clasp hands with the others [in dance]. Thus they dismissed her; the leaders of the maidens cast her out forever.

And the woman who had sinned evermore went alone. Never might she hope once again to sing and to dance with the others.

And the one whom they had punished because of the woman, then married her, and quieted the affair with her.

And before the real feast came which they called Uei tecuilhuitl, on the tenth day, when the woman [who was the likeness of] Xilonen died, her face was painted in two colors. Thus she was stained yellow about her lips, and her forehead *chili*-red. From her paper cap, which had four corners, hung quetzal feathers in the form of maize tassels; and [she wore] a wide neck band. Her neck piece consisted of many strings of turquoise. She wore a golden disc, as breast ornament. Her shirt and skirt had the water lily [flower and leaf design]. She wore princely sandals, carmine-colored sandals. Her shield and her rattle stick were *chili*-red. In the four directions she entered, or went down into, the sand.[7]

For this reason was it said, "She goeth into the sand": in this way she foretold her death—that on the morrow she would die.

She began the feast day when she entered Tetamaçolco. The second place where we went to arrive, we reached [to accomplish the ceremony], and it was a place named Necoquixecan. The third place in which she entered [the sand] was Atenchicalcan, and for this reason was it called Atenchicalcan—that here gushed forth the water, and also here faded away the

7. Entering the sand was evidently a ceremony literally enacted, and logical in view of the attributes of the deities whose festivities were honored by it. The explanation in both Sahagún's Spanish text and the Aztec column is not explicit. The four places in which Xilonen entered the sand may be identified in modern Mexico City and are associated with water and sand. *Aqueia* is probably an assimilation of *aquaia*.—Angel Maria Garibay, personal communication.

[415]

[p. 102 I]

X 796 And after that it was quickly lifted upright. Much
778 did the earth stir, move, and swirl. Upon this, they cast stones in [the hole]—all these round rocks—throwing in large stones, pouring them in. And when [the space] was filled with stones, then it was covered with earth. Thereupon each went to his house; all was quiet and calm.

auh in ie iuhquj ommoquetztivetzi, vel tecujnj in tlalli, vel olinj, yoã comonj: in ie ihuquj, njmã ie ic qujtetema: mochi ichostl in teololli, in vevei tetl conmaia, contepeoa: auh in omoteten, njman ie ic motlalpachoa in panj, njman ie ic viviloa, cacalacoa, cactivetzi, cactimomana.

X 796 And thereafter came out the captors [with] their captives, who were to be cast into the fire. [The captors] were well arrayed and adorned. They were
[302] painted with yellow ochre; their faces were stained
[237] red. They bore upon their backs butterfly devices made of red arara feathers. And their shields [were
[293] decorated with] lower legs[7]—those of either eagles or ocelots. These were designed on this shield in feathers. Hence were these named "shields with legs."

Auh njman ie ic valquiça in tlamanjme: in immalhoan, in motlepantlazque, vel mocencaoa, mochichioa, motecocauhaltia, mjxtlapalhuja, in qujmama tlaviztli, papalotl: çan cuecalin in tlachiuhtli: yoã in jchimal tetepontli, aço quauhicxitl, anoço ocelomatetepontli, in vncã chimalpan icujliuhtica, hivitica: ic moteneoa in chimalli, tetepontli:

[535] And so they went dancing with the captives; they went winding back and forth. Thus they proceeded by twos. The captives, they who were to be cast into
[30] the fire, also danced. They covered their bodies with white clay; they had paper breech clouts and paper
[302] shoulder sashes; then they had their paper wigs, and
292 they decked their heads with feathers. They had feather lip plugs; they were stained bright red about the mouth; they were stained black in the hollows of the eyes.

ic mjtotitivi, momalitotitivi, momamãtivi: ic vmpatitivi in mamalti in motlepantlaçazque, no mjtotitivi, qujntiçavia, imaamamaxtli, imamanecapanal, njmã ie imamatzon, qujnquapotonja; imjvitençac, motenchichiloa, mjxtentlilcomoloa.

And when the sun set, then it all ceased, and they shut the captives in. And the captors departed. There in the same place reposed those who owned the captives. They guarded their captives.[8]

Auh in oncalac tonatiuh: njmã ie ic mocacaoa, qujncalcaquja in mamalti: auh in tlamanjme vivi: çan no vncan ommotlalia in maleque, qujnpia in immalhoan.

And then they started holding a vigil for them. It was already far into the night when the old men, those of the tribal temple, to which they belonged, departed. And when they ended the vigil, it was midnight; in the deep of night, when night divided in half.

Auh in peoa in qujntoçavia, ie tlaquauhiova in quiça: ichoantin in calpolvevetque, in calpoleque, in vncan povi: auh in mocacaoa in tetoçavia, iovalnepantla, iovalli itic, ioalli xelivi:

[302] After that the captors then took [some of the captives'] hair; they took hair from the crowns of the captives' heads—a little of the captives' hair, [which] they cut from the crowns of their heads. They bound the ends [of the locks of hair] with bright red thread, to which were attached two heron feathers, forked.
[413] And the obsidian knife with which they cut the hair they named the "falcon nail."

7. Literally, knee. Réné Simeon, however, renders *ocepanalli* as tibia.
8. The context suggests a distinction between *demanzinar* and *mahque*.

Then they climbed up the ropes. On one rope mayhap twenty climbed, like a cluster hanging upon it. Not all reached the point; only some reached the top. The one who led grasped the *xocotl* image, which was made only of a dough of amaranth seeds. He took all—its shield, arrow, dart, and dart-thrower.

And the amaranth seed dough [*tamales*] he scattered down so that they fell to the ground upon those [who watched]. All who stood below looked up. When the amaranth seed dough fell, all stretched forth their hands and shouted as if there were a fight. Some took its head ornaments of amaranth seed dough, which he also scattered upon them. They were carried off by those below.

And when this was done, then he who had captured the *xocotl* [image] came down. When he descended and reached the ground, then they seized him; the old men [of the temple] took him up to the place of sacrifice and offered him gifts. And all thereupon pulled upon the ropes, exerting themselves greatly, verily destroying the work. And the *xocotl* then fell to the ground, raising a cloud of dust, breaking into pieces. Into three or four sections it quickly broke apart.

Upon this, all then went; all was quiet and left clear. And then they accompanied the captor of the *xocotl* to his house, and arrayed him in a brown striped cloak edged with a feathered border.

And if one were a captor [of the *xocotl*], he might well thus array himself, wrapping about him [such a cloak]; none might therefore dispute him [the right]. But if one were not [such a] captor, he might only keep one in his care. And mayhap he might sell it when he was poor or sick.

And thus they accompanied him to his home; two old priests went carrying him, taking him by the arms. Behind came the priests, blowing horns for him as they went, sounding shell trumpets for him. And he bore upon his back his shield. And when they left him, then they returned [to the temple].

Thus in truth ended here, [thus] concluded, the feast day.

X 796

to die, then they came to seize her; one [of them] took her upon his back, and they swiftly cut off her head. And when they had cut her head off, then, as quickly, they flayed her. And when they had flayed her, then in haste a man [priest] flung on her skin. He was called Tecticzquacuilli—a strong [man], powerful, and very tall.

And her thigh they then also quickly flayed, and hastened with it then to Pochtlan. [He who was the likeness of Toci's] son put it on. His name was Cinteotl. There he received it.

And thereupon, when the Tecticzquacuilli donned [her skin], then she[6] quickly went up to place herself upon the edge [of the pyramid].[7] As she hastily climbed up to place herself [there, she did so] with great speed. Then she as quickly came down [with], on either side of her, two of her Huaxteca, coming [with her].

And the priests, [who] went siding her, came bringing up the rear, surrounding and guarding her. And a number of the noblemen and the great chieftains stood awaiting her.

And when she went, then they set forth spread out ahead of her. Fast, swiftly, they ran; as if flying, they ran. They wheeled about toward her as they went, striking their shields against each other; they went knocking their shields. Again they whirled about, pressing forward, as they ran. All were fearful [of them]; fright came over the people; they were filled with dread.

And when they thus ran, it was called "fighting with grass"; because it was grass, it was a straw [broom], bloody, covered with blood, that they ran holding in their hands. And those whom they set upon scattered and routed; and greatly were they terrified.

And when [Toci's impersonator] had come to the foot, or the base, of [the Temple of] Uitzilopochtli, then she raised her arms, she spread arms and legs, at the foot of [the Temple of] Uitzilopochtli. She put herself facing [the god], and then turned about to place herself by her son, Cinteotl.

Here [this one] was waiting. He had his mask made of the skin of the thigh [of her who had been the likeness of Toci];[8] and he put on his peaked cap, which was curved back and serrated. And this was

6. Though a priest, a man, wears the skin, he impersonated Toci. For the purpose of distinguishing the sex of the impersonator of Toci from those of the impersonator of Cinteotl, the former is referred to in subsequent passages as a woman (she) and the latter as a man (he).
7. "*Lenguje se levantaron al cuerpo del cu*" (corresponding Spanish text).
8. Translator: Garibay (op. cit., p. 187) translates this as her endeavor de vestir: Sahagún (loc. cit.) speaks of la envoltura del pellejo.

given the name Itztlacoliuhqui, "Curved Obsidian Knife."[9] This [Itztlacoliuhqui is god of] frost. [Cintéotl] accompanied [the other]; they came together—not at a run, but at their leisure, approaching and slowly moving toward the temple, where died [she who was Toci's likeness]. Again they took their places there.

And upon the morrow, when dawn had reddened and it was light, then [the wearer of the skin of Toci's likeness] climbed up to place herself upon the edge [of the pyramid]. And the noblemen, [who] already stood awaiting her, then all converged upon her. Then they ministered unto her. One of them applied feathers to her head and her feet—soft eagle down; another painted her face; another offered her her shirt with the eagle design, and her skirt, which was only painted; another decapitated a quail for her; [still] another set incense before her. [All this was done] very swiftly. Then it was quiet; then all departed.

And when they had left, then came forth her rich vestments, called her paper crown and her market place banner. And her paper crown was wide; in the middle was the market place banner. There were five [banners in all]. In the midst was the one market place banner, and four [of them] were on the sides—two on each side. [This headdress] was called *matiaili*.[10]

And when they had attired her, then they brought the first four of the captives before [the other captives]. Then they stretched one [of the four] out upon the offering stone; she herself then slew [the victim] as an offering. She cut open the breasts of [all] four in the same way.

When she had slain these four, then she left [the others] in the hands of the fire priests, that they might slay the rest of the captives. Then she went where [earlier] she had gone to get her son; she went to bring her son, Cintéotl or Itztlacoliuhqui. A little distance, her Huastecs went ahead. They were girt with twisted [paper] breech cloths, and had their mirrors on the small of their backs, and she bore her cotton blossom and precious feather spindle [with unspun cotton].

And the medicine [women] and those who sold lime went ranged on both sides, singing. The old priests proceeded, intoning the song, striking a small,

9. This headdress is illustrated in the Tonalamatl of the Codex Borbonicus and of the Aubin Collection.
10. Cf. contemporary Spanish term *tocado* (Santiago Kapital, p. 177) where the term is *matl*; possibly it could as well be related to *mati*.

X 796 Izaçaubqui, he who [was named] Xiuhtecutli, who likewise was god of the merchants. Only these came
[796] last, behind [the others], last of all; because they were already old.

And after this, then began the casting [of victims] into the fire, there on the large altar.[8] Indeed many wretched captives they cast into the flames.

X 796 And when they were being cast into the fire, there then went dancing [one arrayed as a] squirrel. He
● 242 was bedecked with a small feather crest; he had a
535 crest. The painting on his face was in two colors. He bore a small box upon his back as he went, in which
[198] was a small dried rabbit. When they cast one into the flames, [the dancer] whistled with his fingers.

And one [in the likeness of a] bat was there, [also] doing a dance; indeed [in an array] like a bat was
[534] he adorned. He had two gourd rattles which, one in each hand, he went rattling.

And when they had cast [the captives] into the fire, then the priests formed themselves in rows, that they might descend. [They were bedight with] their paper stoles, which were painted with designs.

X 796 They took one another's hands, grasping them firmly. When the line [of the procession] was broken,
535 where a gap was formed [in the line], one was, as it were, thrown off. Some fell, striking the ground, biting the earth. This was called "They fall upon their hands."

And next day all assembled at the same time to
[237] dance the serpent dance. All were decked in colored feathers—yellow, bright red, orange, and green. Thus were people adorned with feathers—[even] all the small children, although they [still] lay in their cradles—all the people, [but] only the men.[9]

Thereupon was begun the serpent dance, at midday. Hands were clasped; there was song. It was no matter what [song] they intoned—mere pleasure songs. And when they ceased, it was night. And any who were taking much pleasure, verily, spent the night there.

And these two festive days they had already taken from the [next month], Tepeilhuitl.

Enough. Here ندeth and concludeth the feast [of the month] Teotl eco.

8. ". . . en el dicho cadalso echaban vivos en un gran incendio. Y a buenos muchos cautivos, en la llama que se levantaba tendían y hacían los ademanes, especialmente aquellos cautivos que se llamaban cuauhtlamacazque, como se dijo, en la cuarta forma de sacrificar." (Sahagún, op. cit., Vol. I, p. 231).
9. ". . . porque no los hacían mal el dicho hechizamiento" (ibid., p. 234). Cf. Clavigero, op. cit., p. 144.

And [the women] who carried [litters] were well and proudly bedight, all in new shirts and skirts, which they had put on them. And their faces were painted and they were arrayed in feathers.

And when the time was favorable that [the victims] should die, thereupon they set down the litters. Then they were brought up [to the top of the pyramid]; they proceeded to leave them there at the [Temple of] Tlaloc. And when they had brought them there and stretched them out upon the offering stone, then the officiating priests and the slayer came to take their places, and thereupon cut open their breasts.

And when [the victims] had suffered, when they had died, then they brought [their bodies] down. And thus they lowered them: they only went rolling them down [the steps], with great care turning them over and over.

And when they had come down with them, then they carried them to the skull rack. And when they had brought them there, then they cut off and severed their heads. There they inserted into their heads [the cross pieces of the rack].

And when they had severed the heads from the bodies, then they took [the bodies] to the tribal temples [whence the victims had been sent]. And next day, at dawn, [took place the ceremony] called "They are dismembered." Thereupon they dismembered the [figures made of] amaranth seed dough. And when [the bodies] were dismembered, then they took them up to the roof tops, there to dry in the sun—to dry stiff and hard. Little by little they kept taking some of it and eating it, and gradually they finished it.

And with the paper array which had been [theirs] they covered the circular mats which they had [used]. And when they had covered them, they hung them from the rafters of the tribal temples. For one year they cared for them; then they threw them down, scattered, in the Mint House. Only the paper vestments they [then] scattered; the circular mats they returned to their homes.

Here ended the feast which was called Tepeilhuitl.

scized [the game], all fell upon it. All that escaped did not yet die.[4]

And when they did this, thereupon they dispersed and all returned. And the captors yet remained and slew more [game]. And those who caught a deer or a coyote, those Moctezuma favored with capes whose edges were striped with feathers.

If one were a captor, one might array oneself [in it]. And if one were not a captor, one might only place [his cape] in a basket, or sell it. And Moctezuma offered the captors food, and they drank.

And when [game] had been slaughtered on Çacatepetl, thereupon all departed. They took with them only the heads, carrying them in their hands, dripping drops of blood. When they reached their homes, they hung up [the heads]. And they took Moctezuma there.

And when they went out upon the grass, then they offered paper vestments to as many as would die. For [the god] Tlamatzincatl, many of his bathed sacrificial victims were arrayed. For the second [god], Izquitecatl, either two or three. These the wine makers ceremonially bathed,[5] they who made wine for the great chief.

The third for whom they died was Mixcoatl and his consort, a woman named Yeoatl icue. Only two of them died. Only the majordomos secured [the victims]. And also those women, [each one named] Coatl icue, the wives of Tlamatzincatl and Izquitecatl—these also took upon their heads their paper array.

And when [the time] had come, when [it was] verily the feast of Quecholli, then the [space of] twenty days ended. Then went those who were to die, into the sand.[6] After midday, they then took them to the place where they would die. They took them in procession about the offering stone; they went in line. And when they came to encircle [the sacrificial stone], thereupon all came down [from the pyramid]. No more were they taken where they were guarded, but they took them there to the tribal temples. [There] they kept them in vigil all night, and watched and guarded them.

And when it was midnight, thereupon they took hair [from the crowns of their heads]. And when they had cut the hair, thereupon [their belongings] were burned. [If the captive was] a man, he burned

X 796 **Thirty-fourth Chapeer, in which they tell of the feasts and sacrifices which were performed on the days of the fifteenth month, which was called Panquetzaliztli.**[1]

The fifteenth feast day: this one was called Panquetzaliztli.

[785] When the feast of Panquetzaliztli had not yet arrived, the priests fasted for eighty days, and laid down green boughs. When they began [the fast], it was upon the day following [the month of] Ochpaniztli. At midnight they spread the green boughs, on all the mountain tops and upon the circular altars, [even those] which were distant.

And this they did until [the month of] Panquetzaliztli arrived. When they laid the green boughs, they [292] went quite naked, wearing nothing. They went carrying green boughs; these [were] green reeds and thorns. And they went blowing their shell trumpets [534] and pottery whistles.[2] They proceeded blowing [them] alternately.

And when the feast of Quecholli ended, then began the singing and dancing, when was intoned the song named the Tlaxotecaiotl—the song of Uitzilopochtli. This was begun at nightfall; and it was ended at the time when the trumpets sounded, when the conch [534] shells were blown.

Also, among them, the women sang and danced—harlots, who went between [pairs of men] (as hath been told). Daily they did this, until twenty days [had passed].

X 796 TR And when the ninth day before [the feast] arrived, then were bathed in sacred water [the yictims known as] the ceremonially bathed ones, or those to die the captives' death.[3] The old men of the tribal temple secured the water; they got the water there

1. "*Elevación de banderas,*" in Gulley, *op. cit.*, p. 312; "*el acto de cuerbolar el pendón*" (Chavero, *op. cit.*, p. 170)—possibly a reference to the raising of the standard and the raising of Papaul up to the altar in the Temple of Uitzilopochtli. Torquemada (*op. cit.*, p. 299) writes: "*Embalsamaban de Pendones, ó Vanderas; porque ú por este Tiempo se hacian hechas las cuerchas de sus Pinos; las quales pendian, comenzaban á tomar sus Guerras; y en este tiempo renovaban sus Mozamorras, Aldabas, y Lendreas; y deferendian sus Tornaiuas, y Mosaas, y otras cosas de interés que tenian. De manera, que en todo este Mes estaban las Provincias, en Armas, y continuas todo, y hacian entre ellas sus crueles Guerras, y Batallas; porque muchas veces venian á rompimiento, y morian muchas Gentes, y hacia grandes pérdidas, y despojos, y presas de Cautiuos, y Esclauos, y se templaba Pueblos, y gandian Provincias, en orden de ampliar, cada qual, sus Reinos, y Señorios. Y antes de las cuerchas se acostumbraban cada de esto, porque los Pinos, y Sembrados, no se talaua, ni destruieran; y para esto hacian grandes Ofrendas á su Dios Huitzilopochtli, ó Camazotz, ofreciendole Armas, y otras cosas, pidiendole favor, y ayuda contra sus enemigos.*"

According to Tezozomoc (Kubler and Gibson, *op. cit.*, p. 32) it was the special festival of the war captains, who set up a banner in the middle of the temple courtyard.

2. "*Trompetas de Caracol cantar Tandas,*" according to Seler, *op. cit.*, p. 285.

3. Cf. Anderson and Dibble, *op. cit.*, p. 1, n. 5; p. 19. Sahagún (Bustamante ed., II, p. 370) says: "*Los sacerdotes hacian un banquete en que daban á comer carne humana; esto hacian en la fiesta que se llama panquetzaliztli. Para esta fiesta compraban esclavos que se llamaban tlacatecolos,*

Thirty-sixth Chapter, where are related the feasts and sacrifices which were made in the days of the seventeenth month, which was called Tititl.[1]

Seventeenth feast: this was known by the name of Tititl.

Upon [this] feast died a person named Ilama tecutli—[one in] her likeness, a ceremonially bathed [slave].[2] The majordomos procured her.

And the adornment of [the likeness of] Ilama tecutli was [as followeth: she had] her white skirt, her white shift—completely white. And over this she was girt with [what was] named the star skirt. This was bedight with small sea shells, on cured skin cut into long, thin strips, [with] shells set at the end of each [strip]. She wore it about her hips over [the other skirt]. When she walked, much did [the shells] jingle, the pleasant sound [carrying] far. And her sandals had white toes, woven with cotton threads.

And her shield was covered over with white clay and pasted with eagle feathers. Its center was made of eagle feathers, sewn to the middle [of the shield], and it had pendants at the edges, of heron feathers, and [tassels shaped like] grasshopper heads, of eagle feathers, hung at the point. And in [the other] hand she bore her weaving stick.[3]

And her face painting was in diverse colors. About the lower part of her face, they spread black. It was said, the lower part of her face was blackened. And upon her nose and forehead, they laid yellow ochre.

And her eagle feather headpiece, a headdress with eagle feathers arrayed upon it, consisted only of hair, twisted, arranged and well disposed, braided and intertwined with itself. The headdress was called *tzompilinalli*.

until the half division of the night passed, until after midnight.

And in those times they covered themselves with nothing else. All thus danced, wrapped only in netted capes. They went about nearly naked.

When the singing ended, then all dispersed. Next day [was] the same, and the next day the same. They went together to their city quarters; they all went to sleep in their sleeping quarters, in this young men's house.

And the more valiant men, who already were wise in the ways of the flesh, always slept with their paramours.

[p. 36(E)]
[p. 36(D) is blank]

SEVENTH PARAGRAPH, in which is told how the singers bedizened themselves when the ruler would dance; and of that in which they would dance.

Mixcoacalli: there were established all the kinds of singer-dancers of Tenochtitlan and Tlatilulco. There they awaited the word of the ruler, that he would dance, or try some song, or learn some new song. All this the singers prepared, all that was necessary—two-toned drums, rubber drum hammers, ground drums, rattles shaped like dried poppy heads, copper bells, flutes; players of two-toned drums and ground drums, intoners of chants, leaders of the dance; and all the properties used in the dance.

If the song were to be intoned after the manner of Uexotzinco, they were adorned like men of Uexotzinco, and spoke even as they did; they were imitated with the song and in their adornment and their equipment. Likewise if a song were to be intoned after the manner of Anauac, the speech of the men of Anauac was imitated, and their adornment as well as their equipment. Likewise, if a song were to be intoned after the manner of the Huaxteca, their speech was imitated, and their headdresses were taken, with which to imitate them in coloring their hair yellow; and the masks [had] arrow marks [painted] on the face, noses pierced like jug handles, teeth filed [to a point], and conical heads. And they [were clad] only in their capes. Likewise [they did] other songs.

EIGHTH PARAGRAPH, which telleth of the houses in which were the slaves.

Malcalli: the majordomos guarded[13a] the captives. They took great care of them as to food and drink. That which they needed, they gave all to the captives.

Totocalli: there majordomos kept all the various birds—eagles, red spoonbills, trupials, yellow parrots, parakeets, large parrots, pheasants. And there all the various artisans did their work: the gold and silversmiths, the copper-smiths, the feather workers,[14] painters, cutters of stones, workers in green stone mosaic, carvers of wood. Caretakers of wild animals,[15] majordomos, there guarded all the wild animals: ocelots, wolves, mountain lions, and mountain cats.

643 FOURTH PARAGRAPH, in which is told how
726 he who was the ruler kept vigil; how he kept guard at night and all day, because of war.

The ruler was especially concerned with the keeping of watch against enemies and the guarding of the city, all day and all night. Hence he gave stern commands that guard should be kept faithfully. For at times, suddenly, the City of Mexico was circled by foes; perchance somewhere for this they were gathered together, and were laying a snare. Therefore the ruler kept careful vigil. He did not become benetted. He himself sometimes set forth by night, circled the city, and beheld what was done: perhaps the priest

643 644 FIRST PARAGRAPH, in which is told how they arrayed those who had been elected when they did penance, and led them to the house of Uitzilopochtli.

And at this time were brought together, according to command, the noblemen, the lords, the masters of the youths [who were] leaders, and great judges. When these lords were assembled, then they commanded the keepers of the gods, the long-haired ones, to seek out and go to take among themselves, those who had been chosen: the one whom they had named ruler and those whom they had named lords. When they had been put in office, then the keepers of the gods, the long-haired ones, went to take, wheresoever he was, the one who had been vested in the office of ruler. Then they speedily laid hold of him; before them, all the people beheld him.

SECOND PARAGRAPH, in which it is told how those chosen did penance there in the temple and came not forth for four days.

And when this was done, and they had offered incense and spread a fragrance before Uitzilopochtli, then they brought down the ruler, the lord of men; he went covered with the green fasting cape with a design of bones. Then they also brought down each one of the lords. They went quite slowly in order; they went with faces veiled, each one, with the fasting cape with the bone design.

The keepers of the gods, the long-haired ones, went taking them in their midst. They took [the ruler and] they escorted[7] [the lords] there to the house of fasting, a place named Tlacochcalco, or Tlacatecco, the house of Uitzilopochtli. There they fasted and did penance for four days. Nowhere went they forth; they only remained seated. When it was already midday, then the keepers of the gods, the long-haired ones, also went; the ruler and the lords in the Tlacatecco, who fasted there, they seized—they went taking them in their midst. They went with faces veiled in fasting capes; in the hands of each one went his incense ladle, and each one went taking with him his cotton bag filled with incense. Slowly and in order they went to take them up, above to [the Temple of] Uitzilopochtli, to offer incense, to spread a fragrance before [the image of] Uitzilopochtli. In the same way they came down; they came in order; they came with faces veiled in fasting capes designed with bones. Then was the time

of Uexotzinco,[8] and the lords of foreign lands, and the lords of Tzapotlan, and the lords of Anauac, and the ruler of Tehuantepec, and all the lords posted on the shores of the oceans, and all the lords of the cities encircling Mexico—the ruler of Texcoco and the ruler of Tlacopan.

And when all the invited lords had assembled—[both] friendly and unfriendly lords—he provided them food. He gave them drink and food; costly goods he gave them all: capes without price, and valuable breech clouts, and devices, and costly shields. There was dancing; there was a procession; there was singing, night and day, as the ruler provided them solace.

And at that time he also gave gifts to all the noblemen, brave warriors, and lords, and judges, and rulers of the youths, and all the singers, and all the keepers of the gods, fire priests, and [other] priests.

And when the feast ended, then all the bidden guests departed.

FIFTH PARAGRAPH, in which it is told how the ruler adorned himself when he was to war upon some city.

And then, when some days had passed, the ruler proclaimed war—that they would go to set forth somewhere to war. He gave costly devices and shields to the noblemen and to all the brave warriors and men [at arms]. And the ruler himself went to war. To set forth to battle and to conquer, he took all the warriors, and the lords of all the cities about, that they might set forth to war and conquest. And when they had gone forth to conquer and to wage war, they rejoiced greatly over the number of captives whom they had taken, since they would slay them all before [the image of] Uitzilopochtli in order with them to observe his feast. And he accorded honor to all the brave warriors and captors; with many things did he favor them. He gave them costly capes, and breech clouts, and long labrets, and head bands; and he gave them titles by which they would be honored and obeyed as men [at arms] and brave warriors.

1. Following quitecozauhuia, the Real Academia de la Historia MS has yoan vmpa quimopaxtiaia—and there they painted headbands on their heads. This passage is missing in the Florentine Codex.

2. The corresponding Spanish text reads: "una manta con unas listas labradas de color morado; y otra manta labrada, de otras cintas labradas de colorado que se llamaua cotolalpilli; y . . . un maxtlatl labrado de colorado, largo que entonçaua hasta enlpedio, y otro maxtlatl labrado de muchos colores."

648 **Second Chapter, in which it is told how those arrived who first came by boat, which, they say, was only one boat.**

And when were seen those who had reached the shore of the ocean, traveling by boat, then in person went Pinotl, the high steward of Cuetlaxtlan. He took with him other stewards [The second was] the steward of Mictlanquauhtla, Yaoztzin. The third was the steward of Teociniocan, named Teociniacatl. The fourth was Cuitlalpitoc, who was only an underling[1] and a leader. The fifth was Tentlil,[2] likewise a leader.

Only these went to look at [the Spaniards]. They proceeded as if to sell [goods]; hence they went in disguise, to find out about them. They went to offer them precious mantles, richly made, [which] could be only Moctezuma's mantles. No one else might wear them; they were his alone—his very own.

[643] [29a]

By boat they went in order to see them. As they did so, Pinotl said: "Let us not deceive the lord Moctezuma; for no longer would [we] live.[3] Let us indeed go, lest we die, in order that he may learn the truth." ([For] Moctezuma[4] was his name as a prince, and Tlacatecutli [lord of men] was his title as ruler.)

[643]

Thereupon they went into the water. They entered the boats and followed the water['s current]. The water folk rowed them.

And when they had drawn near, where they could see the Spaniards, then, in their presence, [as if] kissing the earth,[5] [they kissed] the prows of the boats. For they thought that Quetzalcoatl Topiltzin had come.

[576]

The Spaniards called to them. They said to them: "Who are you? Whence have you come? Where is your home?"

15. *Tzitzilli*: tzitzilli is probably meant in the Aztec sense.

16. Corresponding Spanish text: "una cofia de cuero de tigre, y colmaguas [sic] de la cofia, sobre las espaldas, una capilla grande, hecha de plumas de cuerno, llamauan la cofia en chalchiuhjl grande, y redondo, en la punta."

17. *Ibid.*: "de mosaqueo de turquesas."

12
1/4 [There is no known species of pheasant native to the New World. Perhaps the term is here used colloquially. — Analyst]

golden shells used upon his ankles; and a shield with a golden disc in the center, and spread quetzal feathers along its [lower] rim, and also with a quetzal feather banner.[18] [He had] the curved staff of the wind god, hooked at the top,[19] and white precious stone stars[20] spread over it; and his foam sandals.

Behold, these [were] all the things called the array of the gods, which became the charge of the messengers, and yet many more things which they bore as their greeting gifts — the shell-shaped headpiece of gold, with pendant parrot feathers;[21] the golden conical cap,[22] etc.

Thereupon were baskets filled; wooden frames for carrying burdens on the back were loaded. And the five [messengers] named, Moctezuma then commanded; he said unto them: "Go! Linger nowhere! Pray to our lord the god; say unto him: 'Thy servant Moctezuma hath sent us; behold what he offereth you, for [the god] hath come to reach his wretched home in Mexico.'"

And when they had gone to reach the coast, they ferried them across, they took them by boat across to Xicalanco. Then once again they departed from there by boat; the water folk took them. Everything was placed and heaped in the boat; they filled the boat with the goods. And when the boat was filled, thereupon they departed. They betook themselves into the water and left to reach the boats [of the Spaniards], they approached their boats.

Then [the Spaniards] inquired of them: "Who are you? Whence came you?"

Then [the messengers] answered them: "We have come from Mexico."

Again [the Spaniards] said to them: "Perhaps not. Perchance you only claim to come from there. Perhaps you only pretend. Maybe you make sport of us."

But when they had verified it, when they had quieted their doubts, then they hooked the prow of the boat with an iron pole, and thus drew them near. Then also they let down a ladder.

with eagle down — with tufts of feathers. It was called *xiuhcuelli*. And the shield banner was painted like the blood banner. And his four arrows he held together with his shield. And his left arm band was hanging from his arm; it was composed of [strips of] coyote fur, and from it hung paper cut in strips.

And when dawn broke, when it was now the feast day, early in the morning, then those who had made vows before him unwrapped him. Before him they stood in one row and offered him incense; before him they laid all manner of gifts — feast foods, rolls of amaranth seed dough. And this was when they had not yet taken him up and elevated him to Itepeyac. And all the men, the young, seasoned warriors, were as if determined and eager to proceed with and observe the feast, and thus show, exhibit proudly, and demonstrate it to the Spaniards.

All hastened and ran, as they made their way toward the temple courtyard, in order there to dance the winding dance. And when all had assembled, then the start was made; then began the chanting and the winding dance. And those who had fasted twenty days, and[2] those who had fasted a year, stood aside facing the others. Those who hemmed in [the dancers had] their pine cudgels; whosoever tried to leave [the dance] they menaced with the pine cudgels. But one who would [leave to] urinate took off his net cape and his forked heron feather ornament. But one who did not at once obey, who would not be excluded, or who was mischievous, they soundly beat his back therefor, [or] his thighs, [or] his shoulders, and thrust him outside. They cast him out by force; they threw him on his face — he went falling on his face; he fell forth on his ear. No one in their hold took his leave.

The elder brothers of Uitzilopochtli — those who had fasted for a year — were much feared, looked upon with terror and awe, and dreaded. And those at the head, the great leaders, the participants, might leave. They did not detain them. Yet all the small boys, those with the lock of hair at the back of the head, with the back lock of hair, and those with the jar-shaped hair dress — they who had taken a captive with others' help, — the leaders, these called leaders of young men, who were unmarried, who had gone [to war] to take one or two [captives], they also held away. They said to them: "Go along there, knaves! You shall give a good example! Appear not before us!"

-51-

All went forth about holding, by their capes, Quauhtemoc, Coanacoxtzin, and Tetlepanquetzatzin[8] — grasping only these three. [And also appeared] the ruler's vicar Tlacotzin, the lords' judge Petlauhtzin, the captain of the armies Motelchiuhtzin, the constable of Mexico, the lord priest Coatzin, the keeper Tlaquiyauhtl — the men who guarded all the gold.

Then they went straightway to Atacaxtzin,[9] to the house of the chieftain and commanding general Coyoacaxtzin. The Spaniards came in files; they stretched out in two rows, which went to their ends at a distance and extended far. And when they had reached the house of Coyoacaxtzin, then they climbed up to the roof-top, on to a platform. Then they sat down. With a many-colored cloth they made a canopy for the Captain. Then the Marquis sat there, and with him stood Marina.

And Quauhtemoc was by the Captain. He had bound on the cape of quetzal feathers, each half of different color, with humming bird feathers, after the manner of those of Ocuillan. It looked soiled. He had only this. Then, after him, came Coanacoxtzin, ruler of Texcoco, who had bound on only a maguey fiber cape bordered with flowers and with a design of radiating flowers. It also seemed dirty. Then after him came Tetlepanquetzatzin, ruler of Tlacopan. He likewise was covered by a cape of maguey fiber, also very dirty — much soiled. Then, next, came the chief justice Auelitoctzin, and last walked Yopicatl Papocatzin, a prince. On the other side were the men of Tenochtitlan — Tlacotzin, Petlauhtzin, Motelchiuhtzin, the constable of Mexico, the lord priest Coatzin, and the keeper Tlaquiyauhtl.[10]

got down from his litter, and those great Caciques 648
supported him with their arms beneath a marvellously rich canopy of green coloured feathers with much gold and silver embroidery and with pearls and chalchihuites suspended from a sort of bordering, which was wonderful to look at. The Great Montezuma was richly attired 292
according to his usage, and he was shod with sandals 643
[*cotonas*], for so they call what they wear on their feet, the soles were of gold and the upper part adorned with precious stones. The four Chieftains who supported his arms were also richly clothed according to their usage, in garments which were apparently held ready for them on the road to enable them to accompany their prince, for they did not appear in such attire when they came to receive us. Besides these four Chieftains, there were four other great Caciques, who supported the canopy over their heads, and many other Lords who walked before the Great Montezuma, sweeping the ground where he would tread and spreading cloths on it, so that he should not tread on the earth. Not one of these chieftains dared even to think [576]
of looking him in the face, but kept their eyes lowered with great reverence, except those four relations, his nephews, who supported him with their arms.

When Cortés was told that the Great Montezuma was 576
approaching, and he saw him coming, he dismounted 643
from his horse, and when he was near Montezuma, they 648
simultaneously paid great reverence to one another. Montezuma bade him welcome and our Cortés replied through Doña Marina wishing him very good health. And it seems to me that Cortés, through Doña Marina, offered him his right hand, and Montezuma did not wish to take it, but he did give his hand to Cortés and then Cortés brought out a necklace which he had ready at hand, made of glass stones, which I have already said are called Margaritas, which have within them many patterns of

apart from the great Cue there was another small tower 346
which was also an Idol house, or a true hell, for it had at the opening of one gate a most terrible mouth such as they depict, saying that such there are in hell. The mouth was open with great fangs to devour souls, and here too were some groups of devils and bodies of serpents close to the door, and a little way off was a place of sacrifice all blood-stained and black with smoke, and encrusted with [415]
blood, and there were many great ollas and cántaros and tinajas[1] of water inside the house, for it was here that they [782 266]
cooked the flesh of the unfortunate Indians who were sacrificed, which was eaten by the priests. There were also near the place of sacrifice many large knives and [412]
chopping blocks, such as those on which they cut up meat in the slaughter houses. Then behind that cursed house, some distance away from it, were some great piles of firewood, and not far from them a large tank of water [312]
which rises and falls, the water coming through a tube from the covered channel which enters the city from Chapultepec. I always called that house "the Infernal Regions."

Let us go on beyond the court to another Cue where the [766]
great Mexican princes were buried, where also there were many Idols, and all was full of blood and smoke, and it had other doorways with hellish figures, and then near that Cue was another full of skulls and large bones arranged in perfect order, which one could look at but could not count, for there were too many of them. The skulls were by themselves and the bones in separate piles. In that place there were other Idols, and in every house or Cue or oratory 793
that I have mentioned there were priests with long robes of black cloth and long hoods like those of the Dominicans, [292]
and slightly resembling those of the Canons. The hair

The thirteenth month they named Tepeilhuitl. In this month they celebrated a feast in honor of the high mountains, which are in all these lands of this New Spain, where large clouds pile up. They made the images of each one of them in human form, from the dough which is called *zoualli*, and they laid offerings before these images in veneration of these same mountains.

Al tercio decimo mes llamauan Tepeilhuitl: En este mes hazian fiesta a honrra de lo montes emjnẽtes, que estan por todas estas comarcas desta nueua españa: donde se armã fiublados: hazian las ymagenes en figura humana a cada vno dellos de la masa que se llama tzoal, y ofrecian delante destas ymagenes, en respecto destos mismos montes.

796[1] [805 778]

Chapter 13
Tepeilhuitl

In honor of the mountains they made a number of serpents, of wood or of the roots of trees, and they fashioned them heads like [those of] serpents. They made also some lengths of wood, as thick as the wrist, and long. They called them ecatotonti. These, as well as the serpents, they overlaid with that dough which they call *zoualli*. These pieces they provided a covering in the manner of mountains. Above, they placed the head, like the head of a person. Likewise they made these images in memory of those who had drowned in the water, or had died such a death that they did not burn them, but rather buried them.

After, with many ceremonies, they had placed upon their altars the aforementioned images, they also offered them *tamales* and other food; and also they uttered canticles of their praises, and they drank wine in their honor.

Upon arrival of the feast in honor of the mountains, they slew four women and one man. The first of these [women] they called Tepexoch. The second they called Matlalcueie. The third they named Xochtecatl. The fourth they called Mayauel. And the man they named Milnauatl. They decked these women and the man in many papers covered with rubber. And they carried them in some litters upon the shoulders of women highly adorned, to the place where they were to slay them.

796[1] [289 314 293] [493 482]

opechtli, here at the Temple of Uitzenauac, in the tribal district. They placed it on the serpent bench.

This serpent bench was hewn of wood, to represent serpents; four sides carried the tails; four sides carried their heads.

They covered [Uitzilopochtli's] mesquite wood framework with fish amaranth dough; for his figure was always hewn of mesquite wood, which they covered.

Then they placed upon him his raiment; they put on him his sleeveless jacket, on which human bones were painted.

And over it they laid a mantle, his cape of *magney* fiber, like a network cape.

And they fitted on his paper crown, adorned with feathers, called *anecuiotl*. On his feather headdress stood a flint knife, also made of feathers, half of it being blood-colored.

Then they arrayed him in a gaudy, costly cape, made, embellished, and designed all in precious colored feathers, with the red eye border, all thus edged with [the feathers of] the red spoonbill. And in the center lay a great golden disc.

And his bones were made of fish amaranth dough, shaped like cylinders. They called them *teoxiuhtli*. They piled them before [Uitzilopochtli's figure], until they were hip high.

And the cape which covered them, and spread before them, was designed with skulls, with the palms of hands, with hip bones, ribs, legs, the lower arm bones, and with the outlines of feet. Thus was it painted.

And this cape was named *tlapanquaxilo*.

And yet one more thing they caused to be spread before him: they cast down what was named the sacred roll. In this form it was named his breech clout.

And this was a paper, white paper and not yellow paper,[15] a finger thick, a fathom wide, and twenty fathoms long.

With ceremonial arrows, arrows hardened in fire, they supported it; they were made only that they might carry [the paper]; that his breech clout might be carried.

In these places were they planted, with white turkey feathers: first on the point, second on the shaft, and third on the end.

leape about. And the priests also danced. It was called "the leap in the month of Tencal."[17]

There were paper rosettes fastened upon [the priests'] foreheads; they decked their heads with white feathers. And they smeared honey on their lips; their lips were gleaming. They had paper breech clouts. And their black feathered staves had jackdaw feathers in the form of a cup, and a round ball at the base, also of black feathers. The black feathered staves also were called black rain-bird [staves].[18]

And where they went grasping [the staves] were papers painted with black scroll designs. And these [priests], as they danced, made circles with, and struck, their black feathered staves on the ground.

And only in the tribal temples were those who beat the drums for them, seated upon the ground. They beat the upright drums; they sat beating gourd rattles; they sat rattling gourd rattles and beating turtle shells.

And all the masters of the youths, the young seasoned warriors, and the youths were spread out, dancing elsewhere [a dance] called the serpent dance.

And hence [they named what] was danced a serpent dance, because they moved back and forth, and from side to side, and met each other face to face. They went holding each other's hands as they danced.

And also a number of young women danced, having so vowed, a popcorn dance. As thick as tassels of maize were their popcorn garlands. And these they placed upon [the girls'] heads. And they were painted; down to the thighs were they bedecked with feathers. And [these] reached up to their upper arms. And they went mingling with and among those who danced.

Of these, it was said that they embraced, they embraced one; they embraced Uitzilopochtli.

And these girls were very well guarded, that none might covet them, nor ravish them.

And all who danced the serpent dance were well watched, that none might fall into covetousness.

And if anyone were seen seducing one [of the girls], then the masters of the youths threw him to the ground. They dragged him; they stepped upon him as he lay stretched out; they trampled upon him.

17. Corresponding Spanish text: "saltar o bailar de la fiesta de tencal"; Garibay (op. cit., p. 294) translates tencachocholoa as "se salta el salto de Tencal."

18. Sahagún's Spanish text speaks only "black feathers; cf., however, Robredo edition, Vol. III, pp. 162-3 and 167. The last-mentioned reference to tzanatl is: "Hay una ave que se llama tzanatl, es negra y tiene el pico corvo." Seler (op cit., p. 106, n. 2) calls tzanatl jackdaw or daw; ib (ibid., p. 233) said dawk. Of this and of tzanaivitl he says it is "eine Vogel, der gegen Ende der Regenzeit sich hören läßt und deswegen Tlaloc, auch diese (Gaukler der Mexikaner, Landregen verkündete sollte. Ich habe den Namen dieses Vogels deshalb mit 'Regenpfeifer' übersetzt. Es wird wohl ein Vogel mit ähnlichen schnarrenden Gesängen gewesen sein wie der der tzanatl oder Dohlen." Sahagún (loc. cit.) merely explains: "y que eran llamados cuitlanacochcho, por razon de la barba, que llevaban colorada, en el rostro." See also supra, p. 94.

For he had committed a crime in the temple; for he had done a wrong. They said to him: "Verily, here penitence is done; here a feast is held."

And as night fell during the dance, so closed the day of feasting when the day ended.

And next morning, when [the feast] was over, again there was dancing. Again all danced the serpent dance.

And [this day] died Iztucale,[19] he who had lived together with Titlacauan. And him they also named Tlacaxepan,[20] and Teicuiztin.

And his paper raiment was painted with black discs. On his paper crown were eagle feathers. His headdress hung in disorder. Upon the crown of his head rested a flint knife made of red feathers.

And also he had his network cape; over it hung a small net bag; and his [ornament like a priest's] maniple hung from his arm. It was of the skin of a wild beast. He fastened shells [to his legs]. He danced with the others; he danced the serpent dance. He went first in line guiding the others.

And purely of his free will, when he wished, he would die. When he wished, then he delivered himself to the place where he would die.

Priests called *tlatlacaouaqui* seized him, stretched him out [on the sacrificial stone], held him, and cut open his breast. His heart they lifted up as an offering to the sun.

And his head also they strung on the skull rack. So he came to his end, even as Titlacauan, [whose head was] strung [on the skull rack].

And at this time, the priests cut the skin: with a stone knife they cut the skin of youths, young boys, and even small children yet lying in their cradles. Thus they cut the skin of their stomachs, their breasts, both upper arms, and [both] forearms.

This was done only at the time of [the feast of] Teucaxi, when it ended, each year; [and] thus ended [the feast].

24. Seler (*op. cit.*, p. 125) has "*rote . . . farbig der Gesichte in der Art der heutigen Weiber.*"
25. Described in Sahagún, Robredo ed., Vol. III, p. 179. Seler (*op. cit.*, p. 125, n. 1) cites Hernández (cap. 18, fol. 32) and defines it as the chichicuilote. Cf. also Cecilio A. Robelo: *Diccionario de Aztequismos* (Cuernavaca: Imprenta del Amate, 1904), pp. 542-3.
26. In a description of the Huastecs and their region, Sahagún writes: "*Se dan muy bien todas las hortalizas y cosas frescas que por acá se siembran, como es la que dicen quequexquite*" (*op. cit.*, Vol. III, p. 131). Seler (*op. cit.*, p. 126) calls it *Phytolaccadecandra*, and cites Hernández's definition as *Sagittar paniculata*.

she walked, much did she rattle, clink, jingle, and tinkle.

And her sandals, her foam sandals,[6] [had] side pieces. The side pieces were of loose cotton yarn with flecks of raw cotton woven in, put in by hand. And the tassels on the sandals were similarly of loose cotton yarn. And the sandal thongs also were of the same loose cotton yarn.

And her shield had water lilies [and flowers];[7] it was as if painted with a water lily leaf [and flower] design, [or] as if it had [that design], and was hung [also] with yellow parrot feather pendants.[8]

And the yellow parrot feather pendants were made [into tassels] like locust heads[9] [made of] eagle feathers and eagle down, and cut [pieces of] quetzal feathers and trupial[10] [feathers], and the red [and yellow wing feathers of the parrot] named *teuxolloti*;[11] and the shield [was] rimmed with a circle of yellow parrot feathers.

When she danced, she swung the shield around; it was swung in a circle.

And her reed staff was hung with paper spattered with rubber; it had rubber. In three places it had vase-like flowers, and there in the vase-like flowers was incense. On each of the three were [crossed] feathers; they were provided with [crossed] feathers.

When a dance was held, she walked leaning on it and thrusting it into the ground; she went marking the dance rhythm with it.[12]

And for ten days they sang [and danced] in the manner of women. All gathered together and took their places, the salt people and the salt-makers—the old women, the mature women, the maidens, and maidens recently matured.

While yet there was sun, while it yet shone, then they began to dance. They went arranged in order, each in his place, in rows; they held one another with

13. Cf. p. 63, n. 27. Simeon (op. cit.) defines it as *ajenjo hortense*; see, further, note 15, below. Molina (op. cit.) has "Intiebqual. *ajenjo o ajenjos grosos*"; Sahagún (*loc. cit.*) has the same. See also Rubrodo ed., Vol. III, p. 252.

14. "*Un plumaje muy hermoso, hecho a manera de manga de cruz*" (Sahagún, corresponding Spanish).

X 796 292 301 304 And all the men, whether leaders of youths, or youths, had only black net cloaks, all with eyelets on the border, and all had turquoise [ear plugs].

And those who had had only bell-shaped ear plugs.[4] And those who had bell-shaped ear plugs, also had lip plugs. Some were like lizards, some like dogs, some like a broad-leafed water plant, some rectangular.

[729] And the youths who already wore [their] hair long [in token of war captives] had lip plugs which were rounded.

And all the [others] who were only youths [had] only circular lip plugs, which they set in place.

[701] And the leaders of the youths bore breast plates made of small, white, sea shells. And those with shorn hair, the Otomí, wore their neck bands with round pendants.[5] These were shells.

And the shorn ones were provided with bird-formed lip plugs; and the Otomí were decked with lip plugs formed like the broad leaf of a water plant.

And those who were diligent to be leaders of the youths bought themselves real sea shell neck bands, all clear and limpid. And the lower class bought themselves [common] shell-fish for their neck bands, [which were] only yellow, not hard, and not very costly.

X 796 ● 293 And those who had taken captives, the leaders of the youths, carried their feather shoulder devices in the form of birds. They carried them upright over their heads.

[701 714] And the captains carried upon their shoulders feather devices [formed like] trees, tied in three places with eagle feather clusters bound with ocelot skin. And at the base they were wound in three places with red string.

237 X 796 And some raised up quetzal feathers in the form of corn silk; some a forked heron feather ornament; some set up the head plumage in bird form; some the device made of diverse quetzal feathers.

293 And upon their legs, upon their left legs, they placed hooves, real deer hooves. And the thong was of real deer skin, cut thin, cut into narrow strips.

X 796 302 And thus were they variously painted: Some placed a black stain upon their cheeks, called "black cheek ash vase," and laid pyrites [upon the stain]. And some had a black [stripe] upon their foreheads, [in

4. In the corresponding Spanish text, Sahagún mentions copper, which may have been the material of which the bells were made.
5. Seler (op. cit., p. 144) has dieses Perlenhalsband für pectoral-necklace.

They said unto him:

"Go, my friend! Though thou art a brave man, a warrior, how may we care about thee? Wherever our foes come rising against us, may we die as brave men!"

And these were the words which they said unto him; and much else besides.

And thereafter, when they had cast him out, he slowly crept away, going backwards and on all fours, lamenting as he went. Thus he went off, nevermore to sing and dance with the others.

And the matrons cast out the woman. Nevermore would she take up the song and dance with the others. Nevermore would she clasp hands with the others [in dance]. Thus they dismissed her; the leaders of the maidens cast her out forever.

And the woman who had sinned evermore went alone. Never might she hope once again to sing and to dance with the others.

And the one whom they had punished because of the woman, then married her, and quieted the affair with her.

And before the real feast came which they called Uei tecuilhuitl, on the tenth day, when the woman [who was the likeness of] Xilonen died, her face was painted in two colors. Thus she was stained yellow about her lips, and her forehead *chili*-red. From her paper cap, which had four corners, hung quetzal feathers in the form of maize tassels; and [she wore] a wide neck band. Her neck piece consisted of many strings of turquoise. She wore a golden disc, as breast ornament. Her shirt and skirt had the water lily [flower and leaf design]. She wore princely sandals, carmine-colored sandals. Her shield and her rattle stick wore *chili*-red. In the four directions she entered, or went down into, the sand.[7]

For this reason was it said, "She goeth into the sand": in this way she foretold her death—that on the morrow she would die.

She began the feast day when she entered Tetamaçolco. The second place where we went to arrive, we reached [to accomplish the ceremony], and it was a place named Necoquiztecan. The third place in which she entered [the sand] was Atenchicalcan, and for this reason was it called Atenchicalcan—that here gushed forth the water, and also here faded away the

7. Entering the sand was evidently a ceremony literally enacted, and begins to view of the attributes of the deities whose festivities were honored by it. The explanation in both Sahagún's Spanish text and Old Aztec colloquy is not explicit. The four places in which Xilonen entered the sand may be identified in modern Mexico City and are associated with water and sand. *Aquja* is probably an assimilation of *aquatl*.—Angel Maria Garibay, personal communication.

X 796 And after that it was quickly lifted upright. Much
778 did the earth stir, move, and swirl. Upon this, they cast stones in [the hole]—all these round rocks—throwing in large stones, pouring them in. And when [the space] was filled with stones, then it was covered with earth. Thereupon each went to his house; all was quiet and calm.

auh in ic iuhquj ommoquetztivetzi, vel tecujnj in tlalli, vel olinj, yoã comonj: in ic ihuquj, njmã ic ic qujtetema: muchi ichoutl in teololli, in vevei tetl conmaia, contepeoa: auh in omotetten, njman ic ic motlalpachoa in panj, njman ic ic vivilõa, cacalacoa, cactivetzi, cactimoemana.

X 796 And thereafter came out the captors [with] their captives, who were to be cast into the fire. [The captors] were well arrayed and adorned. They were
[302] painted with yellow ochre; their faces were stained
[237] red. They bore upon their backs butterfly devices made of red arara feathers. And their shields [were decorated with] lower legs[7]—those of either eagles
● [293] or ocelots. These were designed on this shield in feathers. Hence were these named "shields with legs."

Auh njman ie ic valquiça in tlamanjme: in immalhoan, in motlepantlazque, vel mocencaoa, mochichioa, motococauhaltia, mjxtlapalhuja, in qujmaina tlaviztli, papalotl: çan cuecalin in tlachiuhtli: yoã in ichimal tetepontli, aço quauhicxitl, anoço ocelomatetepontli, in vncã chimalpan icujliuhtica, hivitica: ic motenecoa in chimalli, tetepontli:

And so they went dancing with the captives; they
[535] went winding back and forth. Thus they proceeded by twos. The captives, they who were to be cast into the fire, also danced. They covered their bodies with
[30] white clay; they had paper breech cloats and paper
[302] shoulder sashes; then they had their paper wigs, and they decked their heads with feathers. They had
292 feather lip plugs; they were stained bright red about the mouth; they were stained black in the hollows of the eyes.

8. The context suggests a distinction between dismissing and sealing.

given the name Itztlacoliuhqui, "Curved Obsidian Knife."[9] This [Itztlacoliuhqui is god of] frost. [Cintéotl] accompanied [the other]; they came together—not at a run, but at their leisure, approaching and slowly moving toward the temple, where died [she who was Toci's likeness]. Again they took their places there.

And upon the morrow, when dawn had reddened and it was light, then [the wearer of the skin of Toci's likeness] climbed up to place herself upon the edge [of the pyramid]. And the noblemen, [who] already stood awaiting her, then all converged upon her. Then they ministered unto her. One of them applied feathers to her head and her feet—soft eagle down; another painted her face; another offered her her shirt with the eagle design, and her skirt, which was only painted; another decapitated a quail for her; [still] another set incense before her. [All this was done] very swiftly. Then it was quiet; then all departed.

And when they had left, then came forth her rich vestments, called her paper crown and her market place banner. And her paper crown was wide; in the middle was the market place banner. There were five [banners in all]. In the midst was the one market place banner, and four [of them] were on the sides—two on each side. [This headdress] was called *mamalti*.[10]

And when they had attired her, then they brought the first four of the captives before [the other captives]. Then they stretched one [of the four] out upon the offering stone; she herself then slew [the victim] as an offering. She cut open the breasts of [all] four in the same way.

When she had slain these four, then she left [the others] in the hands of the fire priests, that they might slay the rest of the captives. Then she went where [earlier] she had gone to get her son; she went to bring her son, Cintéotl or Itztlacoliuhqui. At a little distance, her Heavens went ahead. They were girt with twisted [paper] breech clouts, and had their mirrors on the mantles of their backs, and she bore her cotton blanket and precious feather spindle [with unspun cotton].

And the medicine [women] and those who sold lime went ranged on both sides, singing. The old priests preceded, intoning the song, striking a small,

[463] 796^x 534

9. This headdress is illustrated in the Tonalamatl of the *Codex Borbonicus* and of the *Aubin Collection*.
10. Cf. contemporaneous Spanish text. Seler (*Einige Kapitel*, p. 177) claims the name is valid; possibly it could as well be related to *mamal*.

X 796 And before she died, she danced. The old men
536 beat the drums for her; the singers sang for her—
they intoned her song. And when she danced, she
[781] wept much, and she sighed; she felt anguish.[4] For
time was but short; the span was but brief before
she would suffer, when she would reach her end on
earth.

X 796 And when the sun was past its zenith, they then
took her up to the top of the temple. All the impersonators of the demons went, laying hold of and accompanying her, proceeding in rows. Yet another, the impersonator [of Ilama tecutli], went leading the people—one whom verily they thought a god[deu] on earth, who was only a man whom they [so] adorned.

And when they reached [the summit], they cut open her breast. And when she was slain, then they severed her head. And her head they gave to him who led. He took it in his right hand, going off with it, going dancing, marking the dance rhythm with the head. He went before them, leading all the likenesses and vicars of the devils. They circled the temple; then they descended, in the same way [as they had come up], ranged in rows, and going in lines. And when they reached the ground, thereupon they dispersed and went to their houses, to their tribal temples, where [the gods' raiment] was guarded.

And the vicar, the likness, of Ilama tecutli, he thus danced: he stepped back, kicking his heels up behind him. And then he went off supporting himself upon his staff, a cane.

●[293] Its head, its upper end, was divided off into three [points], like a three-pronged harpoon. It was called his thorny staff. And when he thus danced, one said: "Ilama tecutli backeth away." And they put upon him a mask looking in two directions. It had huge lips and large eyes. And upon his head stood an array of little banners, arranged in rows. They seemed like a wreath of flowers upon his head.

[417] And when this [took place], it was said: "His grain his burneth." His granary was fashioned[5] of pine branches joined together, like a framework.[6] Then they wrapped paper about it; they caulked it with paper. They placed it upon the eagle vessel.

[4] Torquemada (op. cit., p. 204) writes, however, that "a este Mayor le era permitido llorar, y contristarse mucho (como negado no estar, que [illegible] Dios) y así se contristaba, suspirando, y llorando, con la memoria de la muerte, que de presente, y cerca esperaba."

5. *Chichiua* may be rendered in two ways. We have been guided largely by the context.

6. In the next chapter (fourth) Sahagún states that "hacían la cámara del dios de fuego de ocpalmes, y pedazos atados, como una cerca, que llaman *cuauhxicalli*, que quiere decir *cámara o cuadrilla*."

And a fire priest arrayed himself; he was befight as a young warrior. He imitated a young warrior, with his netting cape, his forked heron feather device, his deer hoof [rattles], his lip pendant. He departed from the temple above, and brought a magwy leaf on which was a small banner.

When he came down to the ground, he then went to the eagle vessel, where stood the grain bin, and there he placed the magwy leaf.

And when he had placed it there, then appeared the priests, hastening greatly, as if [all] strove to be first. This was known as, and called, "The Flower Race." [For] they climbed up to the temple, where the flower was. It was named "Flower of the God."

And upon reaching the summit, then the priests laid fire to, and burned, the grain bin. Once again they descended, rushing down with the flower; they cast the flower upon the eagle vessel, in which the grain bin burned. Then all the priests ran off, in all directions. Enough of this.

And upon the morrow, then began [the sport of] casting bags at people. All made bags for themselves. They carried grass nets, and filled them with the flowers of reeds or with scraps of papers. They shredded paper; they shredded it fine and bound it to the inside [of the nets]. And some carried nets [made] as it were like gloves, also filled with reed flowers; [these] were called hand bags. And some only prepared themselves green maize leaves, which were made into bags; they pressed the leaves into balls.

And now it was commanded that none should pay scorn [in the bags]. Those who were yet small boys played purely in fun when they began the mock-fight with bags; only gradually it quickened. As the mock-fight was fought, as it flared [in intensity], blows were struck, purchance at the heads [of the participants], or their backs, or their breasts, as they dealt blows.

And the older boys cast bags at the maidens—those [yet] with long hair(dress)—whenever these came before them. They cast bags at them, surrounded them, [so that] in truth, they made some of them weep. And when some women took forethought, if she went forth, she carried her staff, or else [carried the branch of] some kind of thorny plant. If anyone came upon her to cast a bag at her, she pursued him; she was thus defended.

And if she carried nothing for her defense, verily

[56L 777]

And during [the month of] Iscalli, in the first, second, and third years, nothing [in addition] was done. But on the fourth year, a great [festival] was observed. At that time died those [adorned as] Iscoçauhqui, the impersonators of Xiuhtecutli—ceremonially bathed ones. Sometimes many died; sometimes not many.

Auh in jpan jn Iscalli: injc ce xivitl, yeuan ic onivitl, yeuan iquexivitl, atle mochiua : auh quiçn ic nauhxivitl in moveichioa, quinjquac mjquia in Iscoçauhqui, in jxiptlaoan Xiuhtecutli: tlaatoltl, in quõmã mjequjntin in mjquia, in quomã amo mjequjnti.

And upon the morrow, on the morning of [the feast of] Iscalli, the bathed ones entered the sand. They brought them into the sand there at Tzonmolco. All the women carried all their womanly array, and the men carried all their array (as hath
● [293] been told elsewhere). And they carried for them their paper adornment; it went upon a wooden globe.

Auh in ie inh mantla, in ie oallavi Iscalli: in tlaaltiki, onxalaqui, quijmoxalaquia in vmpa tzonmolco: in cioa mochi qujtquj, in jxquich inciouatlatquj: yeuan in oquichtin, mochi qujtquj in jxquich intlatlaquj (in juh ompio ceczj): auh in jmamatlatquj, mochi qujmjequjlia: quanhtzontapaiolica ieiztiuh.

And when they brought them there, thereupon they arrayed them, [so that] all were ornamented. They put upon them their paper array. And when all were prepared and arrayed even as Iscoçauhqui was arrayed, and the women adorned also in the same manner, thereupon all climbed up to [the Temple of] Tzonmolco, in rows. And when they came reaching there, they circled about the offering stone. Then, once again all came down, likewise walking in rows.

9. Seler (op. cit., p. 356) refers to the "Nemontemi (nenõtemi Tage) die für nichts gerechnet werden"; *i.e.*, they were dedicated to no god. One meaning of the verb *nemi*, however, is to rule.

And they (instead the new

with a rope about the waist, and [guards] held them tightly [with it] when they [went forth to] urinate. And when it was midnight, then hair was cut from the [crowns of] the heads of all of them; they cut their hair as hath been told and published. And when their hair had been cut, then feathers were pasted [to their heads], and also they pasted feathers [to the heads of] the women. And, as during the night, none of the guards might sleep by day.[10]

And when day began to break and it grew bright, thereupon (as hath been told) were burned the [bathed ones' raiment]; when these were burned, then once more they entered indoors. And some did not burn their belongings, but offered and gave them to others.

And when it dawned [again], then all were once more adorned. Thereupon they went to the place where they were to die; they went ordered in rows. When they reached where they were to die, then they danced and sang spiritedly. It was said that [they sang until] their voices cracked; that they were hoarse.

And when the sun had passed the zenith, then descended [he who was adorned in the likeness of] Papnal. He led and was first among the captives, who would become the fundament [of the ceremonially bathed victims]. When the captives died, then [they slew] the ceremonially bathed ones, who [were adorned in the likeness of] Iztocçauhqui.

And when they had completely ended the slaying, when it was so, [then] all the chiefs and lords, who were men due great reverence, were ready, and stood waiting in complete array. Moctezuma led them. He had put on the turquoise diadem, the royal diadem.

And all put on their turquoise nose plugs and [their] turquoise ear pendants, [made of] fine turquoise. And some [had] only [ear pendants] made of wood and painted like turquoise. And they put on their sleeveless jackets and turquoise [blue] waist bands well ornamented, and the Xolotl jewel which had the form of a dog. [It was] made of paper and painted turquoise [blue]. And [they put on] breech cloths of paper painted with black stripes. And these were painted only with black.

And in their hands were staves, which were small and shaped like weaving sticks and painted in two colors—red above and chalky white below. In either

10. "He equally made equally diligent" seems to be the corresponding Spanish text of the *Florentine Codex*. But, however, Angel Maria Garibay K., "Paralipómenos de Sahagún," *Tlalocan*, Vol. II (1945), p. 171, for a discussion of these in comparison.

796 hand they grasped a paper incense bag. Thereupon
[293] they came down [from the temple], dancing rapidly.

And when they had descended, then they circled [the courtyard], they went around [the courtyard] only four times. And when they had danced, then they dispersed and went away, and thereupon all entered the palace in proper order. And this was known
[535 as the Lordly Dance; [for] all the lords danced the
628] Lordly Dance, [and] it was the privilege exclusively of the chiefs that they should dance the Lordly Dance. This was done every four years.

Thus [was it done].

[304] Early in the morning was begun the boring of ears, when they pierced the ears of the small children. And they pasted them with yellow parrot feathers and with soft, white feathers, which went mixed with the yellow ones.

796 And for a gift they made *pinolli*.[11] And the mothers
608 sought out some master of the youths, seasoned warrior, or leader of young men who might wish to be as a parent, thus to become their [children's] uncle.
[431] Also some sought out a woman who might be an aunt, and they offered her gifts.

To the man they offered perchance a tawny cape or a coyote fur cape. And gifts were also offered—they also offered gifts to—the women.

[304] And when they pierced the ears [of the children], thereupon they took the little ones to singe them; they laid and made a fire, and scattered much incense over the flames.

And hence it was said: "They are singed." The old men of the tribal temple seized all of them. They took the small children and dedicated them over the fire. Then they gave them uncles and aunts. And the small children cried out and whimpered. Then they went to their homes.

796 And when they had gone to their homes, there-
upon all ate and drank.

273 And then, in the temple, began singing and dan-
535 cing at midday. Then once more all went to the temple. The uncles and the aunts carried the small children; carriers took the wine, poured into small gourds which they carried, and [poured] into small earthen jars. And when they arrived there, all sang. Thereupon was quieted the dance; they carried the small children upon their backs. Then they went giving them wine. All gave it to each other.

Temple of Uitzilopochtli
Cuerpo[1] 1.

Uitzilopochtli's feast came three times; they celebrated his feast [three times] in one year.

The first time was [in the month] named Panquetzaliztli. And this was the time when they took up [to the top of the pyramid] this Uitzilopochtli [and] a second [god] named Tlacaxepan Cuexcochtzin.[2] And thus did they take up the image of this Uitzilopochtli: all the priests and youths took it up in their arms. And the image of Uitzilopochtli was [made] only of a dough of amaranth seeds—very large; almost a fathom [tall].

And [the image of] the second [god], whose name was Tlacaxepan Cuexco[ch]tzin, was likewise made of a dough of amaranth seeds.

And the image of Uitzilopochtli was made, and took the form of man, there at a place called Itzpeyoc. And the second [god], Tlacaxepan Cuexco[ch]tzin, was made, and took the shape of man, there at a place known as Uitznaoac calpulco. And during the night they cooked and formed [the images].

And when it dawned, they were already shaped. Thereupon offerings were laid before them. And after noon all then danced; all went in procession. And when the sun entered his house [at sunset], they took [the figures] up [to the top of the pyramid]. And after they had gone to set them in place, all descended. [The images] remained there all night. And the priests who guarded [them] were called Iiopoch.

And in the morning Peynaltzin came forth, who was himself the vicar of Uitzilopochtli. [A priest] carried [the god] in his arms. And the image of Peynal was formed of wood. And he who bore him in his arms was called Topiltzin Quetzalcoatl. He was richly bedight with his feather device.[3] And the image of Peynal was thus adorned: [it had on] its hummingbird diagnier, its arms, its golden banner, and its green stone necklace. And over the small of its back were hanging the mirror device for its back,

3:796 all of fine turquoise. And he who led [the god] carried his serpent staff covered with turquoise.

[243] And when [the priest with] Paynal came to Tlatlachco, then [men] were slain before him. Those who died, who were named Amapantzitzin, were both impersonators [of the god Amapan].[6] And many more captives [also] died.

And when they were slain, then they began the procession of Paynal. They arrived at Tlatlahco, and when they had arrived there, the common folk came out to meet him and offered him incense and beheaded many quail [before him]. And again they started forth, and arrived at Popotlan; and in the same way the common folk came out to meet him and offered him incense, and beheaded many quail [before him]. And again they started forth, and arrived there at Chapulteper, and in like manner the common folk greeted him and burned incense, and beheaded many quail [before him]. Thereupon they continued and arrived at Tepetocan, and also the common folk came out to meet him and offered up incense and also beheaded many quail [before him]. Then they set forth and reached Atzchinanco, and also the common folk came out to receive him, offered him incense, and beheaded many quail [before him].

Thereupon the insignia went forth first, and when the insignia arrived, thereupon they mounted to the top of Costepetl,-where was [the image of] Uitzilopochtli. And when they had gone up, then they laid [778] out the wooden serpent[6] and circled about it many times. Then all came down from there.

6: Sahagún M-5 (1529-1590) 1954 NU7 Aztec NU7

And when he took four, Moctezuma then let his hair be cut like that of a seasoned warrior. He was named a seasoned warrior. And then also he assumed the titles of a seasoned warrior—perchance Mexicatl tequioa, or Tolnauacatl tequioa, or Cinteccpanecatl tequioa: all the titles of a seasoned warrior. And then in truth was when they placed him on the mat and stool of the warriors' house—there where were gathered the great, brave warriors, where were the Tlacochcalcatl, the Tlacateccatl, the Ticociauacatl, the Atzompanecatl—those who were great captains, who had long labrets, who had leather ear plugs, who had head bands with [two] eagle-feather tassels, with which [their hair] was bound.

And if six, or seven, or ten Huaxteca, or barbarians,[3] were taken, he gained thereby no renown. For this his title was only seasoned warrior.

Then if he went to take captives at Atlixco, or Uexotzinco, or Tlilihqui tepec, for the fifth one whom he captured, then he gained great honor. For this his name was that of a great, brave warrior—a great captain. Then Moctezuma gave him a long, blue labret and a head band with [two] tufts of [eagle] feathers,[4] perchance with silver flint knives [between the eagle feathers], and leather ear plugs, and a bright red, rich, netting cape. And also he was then given a cape of two colors divided diagonally, and a leather cape.

And if he went to take two [captives] from Atlixco or[5] Uexotzinco, then already he filled everyone with awe. Then they gave him a long, yellow labret; he required[6] both the blue [and the yellow] long labrets.[7]

3. *Tenitl "Huaxteca, o barbaros [Olmecas, Uixtotin, Mixtecas] estaba hecho el matrimonio del sol, y Moctezuma tendría mujeres, porque habían llegado bárbaros"*—Sahagún, op. cit., III, p. 133. Cf. also corresponding Spanish text.

4. *Pellizzaro dolpiloni*, the *Real Academia de la Historia MS* has *quauhtlalpiloni*—head band with eagle feather pendants. This word is contained in the *Florentine Codex*.

5. *Anoco* should be read *anoqo*.

6. *Quitlitlani*: a marginal gloss in the *Real Academia de la Historia MS* suggests that the verse is unintelligible. Cf. also corresponding Spanish text, and, in Sahagún, op. cit., *ilitlani, ilitoaia, ilitoaiia*.

7. Following *ontlalpiloque*, the *Real Academia de la Historia MS* has *in ueuetz*; these words are contained in the *Florentine Codex*.

A passage lacking in this codex is included in the *Real Academia de la Historia MS*, ending the chapter. It is placed in Appendix C.

[p. 78 has no test material]

Under the time when the captive was to die, then

782 Moctezuma presented the captor a device [with]
293 quetzal feather cups so that possessing it he might
727 slay him as a sacrifice. It did not belong to him; but having it he slew the victim, and he lanced with it. He had his rattle stick with him, or the obsidian butterfly or quetzal feather cup [device] set with gold, which he carried upon his back. Possessing it, he slew him as an offering.

nimã ye ic quimaca in moteccuiçoma in tlaxistli quetzalcomitl inic ypan tlamictia. amo uel ytech ponia çan ipan tlamictia. ypan mitotia ychicauaz yetiuh. anoço itzpapalotl. anoço quetzalcomitl teocuitlayo in q'mama in ipan tlamictia.

796 And the captive he then took there where he was
727 to die, upon the round sacrificial stone; he proceeded to take the captive by the head, and lead him. up there where they would slay him in the gladiatorial sacrifice. The one known as Old Wolf led him by the hand—he in whose care lay the captives, as if they had become his sons. And then he gave [the victim] his four pine cudgels, which he would hurl at his adversaries. And he gave him his shield, and his war club—not edged with obsidian blades but only pasted with feathers.

[793] And those who contended against him in gladiatorial sacrifice were the fire priests and the [other] priests. And the captor remained standing below; he stood regarding his captive. He who died was indeed before [his captor].

Auh y yeuantin in teuauanaya in tletlenamacaqz in tlamacazqz. auh in tlamani çam moquetzticac tlatzintlan quitzticac in imal. uel ispã im miq'.

[273] And after this, when the Old Wolf had arrayed the captive, thereupon he went, and gave him to drink wine which was called the gods' wine. He took it to him [in] a vessel [painted like] reeds and edged with feathers. When [the victim] had drunk, then he raised [the wine] in dedication [toward] where the sun came forth. So [Old Wolf] did with all the shields and war clubs; he raised all of them as offerings which he gave the captive. When Old Wolf had offered the captive [wine] and made him drink it, thereupon the slayer of the sacrificial victim went forth in order to sacrifice him. [He had] his shield and his war club edged with obsidian blades and covered with feathers.

And when he had drunk, then he struck at the captive, who likewise struck back. And if the captive were of stout heart, if he were verily a chieftain, really manly, perhaps three or four men fought him. Then, when he fell, they indeed slew him as a sacrifice. And if he were not manly, not a chieftain, then he cast himself there on the round sacrificial stone, and did not fight. Forthwith was he stretched out upon his back, and then they gashed open his breast, seized his heart, and raised it in dedication there [toward] where the sun came forth.

Appendix C

Continuation of the Twenty-first Chapter[1]

. . . He alternated [his lip plugs] when he fitted them in. And [Moc- zuma gave him] his head band [with two tufts] of eagle feathers [ornamented] with obsidian knives fashioned of gold, and his cape with, perhaps, the serpent mask design, or the earthen vessel fashioned of feathers, or the ocelot cape with a red border; and a breech clout with long ends, having either the eagle claw or the market place design.

At that time he acquired new sandals—not embroidered nor cut according to a pattern, but black, with their thongs of either orange or red leather. And when he went to the palace, he put the sandals on in order to go along the road. He went receiving great honors, because he was Moctezuma's chieftain. He proceeded with much acclaim. And when he reached the Eagle Gate he drew off the sandals which he had put on; he was no longer shod when he entered the royal palace, where were the great men dexterous in arms, the war leaders.

And also at that time he won the title known as general or commanding general. If the general or commanding general were to die, then [another] would be chosen and selected [from among] those who had been made their deputies. They said that they had become lords of the sun.

And all the seasoned warriors, who had entered the field of battle, all these Moctezuma rewarded. When the Feast of Tlacaxipeualiztli was celebrated, he gave each of them four pieces of black cloth, each eight measures broad. And likewise he gave the leaders of the youths the cape of scorpion design with a striped, orange border and the carmine colored breech clout with the wind jewel design at the ends.

And [as for] those whom we knew to be seasoned war leaders and leaders in the fray, then started [the custom] that Moctezuma [had] the hair of those who were chieftains cut as shorn ones or as Otomí [warriors].

When and wheresoever war was preclaimed, always they remained guarding and paying heed to

1. See ending of Chapter 21, above.

with eagle down — with tufts of feathers. It was called *tzoruelli*. And the shield banner was painted like the blood banner. And his four arrows he held together with his shield. And his left arm band was hanging from his arm; it was composed of [stripe of] coyote fur, and from it hung paper cut in strips.

And when dawn broke, when it was now the feast day, early in the morning, then those who had made vows before him unwrapped him. Before him they stood in one row and offered him incense; before him they laid all manner of gifts — feast foods, rolls of amaranth seed dough. And this was when they had not yet taken him up and elevated him to Itepeyoc. And all the men, the young, seasoned warriors, were as if determined and eager to proceed with and observe the feast, and thus show, exhibit proudly, and demonstrate it to the Spaniards.

All hastened and ran, as they made their way toward the temple courtyard, in order there to dance the winding dance. And when all had assembled, then the start was made; then began the chanting and the winding dance. And those who had fasted twenty days, and[9] those who had fasted a year, stood aside facing the others. Those who hemmed in [the dancers had] their pine cudgels; whosoever tried to leave [the dance] they menaced with the pine cudgels. But one who would [leave to] urinate took off his net cape and his forked heron feather ornament. But one who did not at once obey, who would not be excluded, or who was mischievous, they soundly beat his back therefor, [or] his thighs, [or] his shoulders, and thrust him outside. They cast him out by force; they threw him on his face — he went falling on his face; he fell forth on his ear. No one in their hold took his leave.

The elder brothers of Uitzilopochtli — those who had fasted for a year — were much feared, looked upon with terror and awe, and dreaded. And those at the head, the great leaders, the participants, might leave. They did not detain them. Yet all the small boys, those with the lock of hair at the back of the head, with the back lock of hair, and those with the jar-shaped hair dress — they who had taken a captive with others' help, — the leaders, those called leaders of young men, who were unmarried, who had gone [to war] to take one or two [captives], they also held sway. They said to them: "Go along there, knaves! You shall give a good example! Appear not before us!"

9. Yoan is repeated in the MS.

Auh inin tlatquitl in mecec, quipiaia in vevei pipiltin:

796 Then followed after it Tlaxochimaco, which they also celebrated for twenty days. Then came after it
805 Xocotl uetzi, which they also observed for twenty days. And with Ochpaniztli they spent the fourth [period of] twenty [days]. With Teotl eco they spent the fifth [period of] twenty [days]; with Tepeilhuitl, the sixth score; with Quecholli, the seventh score. At this point would have been completed a year — if nothing had happened, and if [the Spaniards] had not gone.[2] With Panquetzaliztli they spent the eighth [period of] twenty [days]; with Atemoztli, the ninth score; with Tititi, the tenth score; with Izcalli tlami, the eleventh score; and here set in the Nemontemi, [lasting] five days. Atlcaualo was twelve — or Quauitl eua; Tlacaxipeualiztli, thirteen; Toçoztontli, fourteen;[3] Uej toçoztli was seventeenth; and Tecuilhuitontli, eighteenth. With this had passed one year since [the Spaniards] died at the Toltecа canal.

1. So the Aztec reads (compatriots are Molina, op. cit., *azteca*, *compatriot*). — Doubtless the twentieth day is meant, as numbers with endings in *-ce* are of four days (personal communication, Rafael García Granados).

2. See various translations in Seler, op. cit., p. 220.

3. The fifteenth and sixteenth months are omitted in the Aztec text.

701 (And this Tzilacatzin was an Otomí [warrior], as a chieftain, because of his Otomí hairdress. For he despised his foes, even the Spaniards. He disdained them; in truth, all were completely terrified. When they saw Tzilacatzin, our foes then cowered. And much did they try to slay him; either to pierce him with iron bolts, or shoot him with a gun. But Tzilacatzin disguised himself, that he might not be [301] recognized. At times he put on a device; he hung his lip pendants and inserted his golden ear plugs, and he put on a neck band of small white shells; but his head went uncovered, so that it was apparent that he was an Otomí. And sometimes [he had] only his heavy cotton shirt and a thin band with which he wrapped his forehead. And at times he ●[293] disguised himself by putting on a feather headdress and wig, a head band with [two] eagle feather tufts which went at the back of the head, used to bind [his hair]. Thus did one go with it bound at the time that men were cast into the fire.[8] He went in the guise of one who cast men into the fire; he went imitating those who cast men into the fire. [He had] his golden arm bands; on both arms he had them — in both places he had them on his arms. And the [301] golden arm bands glistened.[9] And also he had about the calves of his legs, leather bands — gilded leg bands, which shone.)

726 And then, next day, when once again their boats set out, they grounded them at Nonoalco, at Ayauhcaltitlan.[5] And then also came out those who went afoot, as well as all the Tlaxcallans and Otomí. Indeed, in force the Spaniards issued to fall upon [the Mexicans]. And when they came to and arrived at Nonoalco, thereupon there were battle and fighting; in truth there spread strife and war. Death was dealt on both sides. All their foes were shot at with arrows, and also all the Mexicans. On both sides equally was there suffering. Thus all day and all night they all fought.

strong voice." Then they spoke to a seasoned warrior named Tlamayocatl, and then Mayeuatzin commanded and said to him: "Go forth and tell those of Cuitlauac: 'O men of Cuitlauac! Your ruler Mayeuatzin hath sent me! Behold him! There he standeth upon the small pyramid!'" And when those of Cuitlauac had heard him, they answered him: "Nay, ye have slain him!" Then he said unto them: "Nay, he is not dead! Look well upon him! There he now standeth!" And [Mayeuatzin] spoke forth: "I have not died. Let nothing injure my lip rod, my green stone [jewels], my devices!" And when he ended his speech, then a cry arose [among the Indians who were with Spaniards], whereupon there was fighting. Then they pursued [the Mexicans]. But in the market place, there at Copalnamacoyan, the battle, gradually abating, lasted long.

And once our foes of Tlilihuquitepec and Atetemollan[4] together conferred and took note of a narrow road which led between house clusters. It was the path of a nobleman named Tlacatzin. And when our foes had already entered, then the chieftains drove them forth. And a man, a chieftain and a seasoned warrior named Tlapanecatl, whose home was at Atencapan, then engaged them. Our foes then quickly seized him. And the [Mexican] chieftains then rushed and went shooting arrows at our foes. Then they made [the enemy] loose the captured chieftain. But our foes then smote him in the calf of the leg, there where the leg is bled. Then [the enemy] departed; the fighting ceased.

then seized upon a great chieftain named Tlapaltecatl opochtzin, whose home was Coatlan. Thereupon they arrayed him, and put on him the quetzal feather owl[13] which had been the device of Auitzotzin. Quauhtemoc said: "This device was the device of my begetter, of my father Auitzotzin.[14] Let him wear it. Let him die in it. May he gain honor before the people. May he become a portent in it. May our foes see and marvel at him."[15] And when they put it on him, he was indeed terrifying. Truly wonderful he appeared. And [Quauhtemoctzin] commanded four to aid him and be at his side. They gave him the darts[16] [and dart thrower] which were the devil's — the throwing spears with flint points.

And when they had done this, it became like a portent for the lords of the Mexicans. The ruler's vicar Tlacotzin said: "O Mexicans! O Tlatilulcans! Hath Mexico been nothing — that on which Mexican rule was founded? It is said to be with the power of Uitzilopochtli, which he hurled at one. It is none other than the fire serpent, the fire drill, with which he walked, casting it at our foes — which you, O Mexicans, have held as his power of the dart. Forthwith you will aim it against our foes. You will cast it not to the earth; you will hurl it with strength at [the foe]. And if one or two will be struck — if one or two of our enemies will be reached, — it is in truth a token for us [that] yet, for a little, we shall look to favor; [that] yet our lord [the god] may desire it." Thereupon went the quetzal-owl [bedight warrior], with quetzal feathers as if parted.

And when our foes saw him, [it was] as if a mountain had burst. In truth, all the Spaniards took fright; much did he terrify them, as if they had seen in him something [inhuman]. Then the quetzal-owl [warrior] climbed up to the roof terrace. And some of our foes, who could see him, stood up. Then they forced him to turn back, and took after

Temple of Huichilobos, and that he wished to consult the Great Montezuma and have his approval. For this purpose he sent Jerónimo de Aguilar and the Doña Marina as messengers, and with them went our Captain's small page named Orteguilla, who already understood something of the language. When Montezuma knew his wishes he sent to say that we were welcome to go; on the other hand, as he was afraid that we might do some dishonour to his Idols, he determined to go with us himself with many of his chieftains. He came out from his Palace in his rich litter, but when half the distance had been traversed and he was near some oratories, he stepped out of the litter, for he thought it a great affront to his idols to go to their house and temple in that manner. Some of the great chieftains supported him with their arms, and the tribal lords went in front of him carrying two staves like sceptres held on high, which was the sign that the Great Montezuma was coming. (When he went in his litter he carried a wand half of gold and half of wood, which was held up like a wand of justice). So he went on and ascended the great Cue accompanied by many priests, and he began to burn incense and perform other ceremonies to Huichilobos.

Let us leave Montezuma, who had gone ahead as I have said, and return to Cortés and our captains and soldiers, who according to our custom both night and day were armed, and as Montezuma was used to see us so armed when we went to visit him, he did not look upon it as anything new. I say this because our Captain and all those who had horses went to Tlaltelolco on horseback, and nearly all of us soldiers were fully equipped, and many Caciques whom Montezuma had sent for that purpose went in our company. When we arrived at the great market place, called Tlaltelolco, we were astounded at the number of people and the quantity of merchandise

11:Diaz T,H-5 (1519-1520) 1910
NU7 Aztec NU7

for you, and now again your vassals and Captains have become insolent, and hold secret consultations stating that you wish us to be killed. I do not wish to begin a war on this account nor to destroy this city, I am willing to forgive it all, if silently and without raising any disturbance you will come with us to our quarters, where you will be as well served and attended to as though you were in your own house, but if you cry out or make any disturbance you will immediately be killed by these my Captains, whom I brought solely for this purpose." When Montezuma heard this he was terrified and dumfounded, and replied that he had never ordered his people to take arms against us, and that he would at once send to summon his Captains so that the truth should be known, and he would chastise them, and at that very moment he took from his arm and wrist the sign and seal of Huichilobos, which was only done when he gave an important and weighty command which was to be carried out at once. With regard to being taken prisoner and leaving his Palace against his will, he said that he was not the person to whom such an order could be given, and that it was not his wish to go. Cortés replied to him with very good arguments and Montezuma answered him with even better, showing that he ought not to leave his house. In this way more than half an hour was spent over talk, and when Juan Velásquez de Leon and the other Captains saw that they were wasting time over it and could not longer await the moment when they should remove him from his house and hold him a prisoner, they spoke to Cortés somewhat angrily and said, "what is the good of your making so many words, let us either take him prisoner, or stab him, tell him once more that if he cries out or makes an uproar we will kill him, for it is better at once to save our lives or to lose them," and as Juan Velásquez said this

for each one, and they turned out to be as good and fast as though they had taken a month to set up the models, for Martin López was a past master of the art, and it was he who afterwards built the thirteen sloops to aid in capturing Mexico, as I shall relate further on ; he was also a good soldier in war time.

782 Let us leave this and say that Montezuma told Cortés that he wished to go to his temples and make sacrifices, and pay the devotion to his gods that it was his duty to do, so that his Captains and chieftains might observe it, especially certain nephews of his, who came every day to tell him that they wished to free him and to attack us, and he answered them, that it pleased him to be with us, so they should think it was as he had told them, that his God Huichilobos had commanded him to stay with us, as he had made them believe before. Cortés replied that as to this permission he asked for, he should beware not to do anything for which he might lose his life, and so as to prevent any disorders, or commands to his Captains or priests either to release him, or attack us, he would send Captains and soldiers [with him] who would immediately stab him to death, should any change be noticed in his bearing. He might go and welcome, but must not sacrifice any human beings, for that was a great offence against the true God, that was to the God we were preaching to him about, and there stood our altars and the image of Our Lady, before whom he could pray. Montezuma said that he would not sacrifice a single human being, and he set off in his rich litter in great state with many great Caciques in his company as was his custom, and they [293] carried his insignia in front of him in the form of a sort of staff or rod, which was the sign that his royal person was going that way (just as they do [now] to the Viceroys of New Spain). There went with him as a guard four of our Captains, namely, Juan Velásquez de Leon, Pedro de

14:Bandelier E-4 (no date)1880 NU7 Aztec NU7

into wooden forms, intermediate between masks and helmets, imi- 714
tating heads of ferocious beasts like tigers, lions, wolves, also snakes, and covered with the skins of these animals.[61] The principal captains and war-chiefs were distinguished by their wide and long mantles,[62] by the cut and tress of their hair,[63] and by towering bushes of green feathers on the so-called "helmets" protecting the head.[64]

"It was ordained that the King and his coadjutor, Tlacaelel, should alone wear shoes [643
"in the royal house, and that none of the great chiefs might enter the palace with shoes
"on, under penalty of death; and they alone could wear shoes in the city, except those 645]
"who had distinguished themselves in war, which for their merit, and in token of their
"bravery, were permitted to wear light and common sandals, because the gilded and
"painted ones belonged to the great chiefs alone." We would suggest that the "cactli" or "ozaras" were half-moccasins, similar to slippers. It is not devoid of interest to notice here, that even the wearing of these articles depended upon actual merit and reputation achieved in war, and not upon wealth or inheritance. War was, indeed, "the life of the tribe."

[61] Anonymous Conqueror (Col. de Doc., I, p. 373). Clavigero (Lib. VII, cap. XXIII). Drawings are found in Clavigero, in the Mendoza Codex, as published by Lord Kingsborough, and in the frontispiece to the 2d Decade of Herrera (Vol. I). It may be that the honorific titles of "daring lions, tigers, and eagles," which have greatly contributed to the supposition of the existence of "military orders," or "orders of chivalry," were based upon the wearing of such costumes by the braves. As already stated, not all the warriors carried such masks or helmets, but our data are too imperfect to enable us to state positively the class or standing of those who wore them.

[62] Durán (Cap. XXVI, p. 215). "Tambien se determinó que solo el rey pudiese traer "las mantas galanas de labores y pinturas de algodon y hilo de diversas colores y plu-"maria, doradas y labradas con diversas labores y pinturas y diferencialias quando á "él le pareciese, sin aver excepcion en traer y usar las mantas quel quisiese; y los "grandes señores, que eran hasta doce, las mantas de tal y tal labor y hechura, y los "de menos valia, como uviese hecha tal ó tal valencia ó hazaña, otras diferentes; los "soldados, de otra menor labor y hechura, no pudiendo usar de otra preciosa labor ni "diferencia, mas de aquella que alli se le señalaba con sus ceñidores y bragueros, que "aludian y seguian la hechura de la manta que le era permitida. Toda la demas gente, "so pena de la vida, salió determinado que ninguno usase de algodon ni se pusiese "otra manta sino de nequen, y questas mantas no pasasen mas de quantos cubriesen la "rodilla, y si alguno la trujese que llegase á la garganta del pié, fuese muerto, saluo si "no tuviese alguna senal en las piernas de herida que en la guerra le uviesen dado, " . . . .") Also Tezozomoc (Cap. XXXVI, p. 38). Here again we find the kind and cut of the mantle, its ornaments determined by the warlike achievements of its bearer.

[63] Tezozomoc (Cap. XXXVI, p. 37). Humboldt ("Vues des Cordillières," Vol. I, p. 345). The figure of the Atlas in folio is taken from the Codex Anonymous of the Vatican. Says the Anonymous Conqueror: "To him who distinguished himself in war [302]
"they made a mark in the hair, that his prowess might be recognized and seen at once,
"since they never wore the head covered" (p. 371). Braids or tresses of hair as well as of leather, were sometimes given as presents, and worn. Tezozomoc mentions them frequently, under different names.

[64] The head-dress, or "diviss."—"tlauizili," or "quetzalpatzactli," is represented on nearly every Mexican painting or picture-leaf. It is also represented on the stone of [293]
sacrifice, as adorning the victorious warrior of each group. Its size is generally exaggerated. Gomara (p. 322, Vedia, I) includes in his list of objects sent by Cortés to the Emperor: "a helmet of wood, gold-plated, with jewels in front or outside, and twenty-
"five little golden bells, and its crest of a green bird, whose eyes, beak, and feet were

14:Bandelier E-4 (no date) 1880 NU7 Aztec NU7

714 While we shall, further on, have occasion to recur again to the
287 question of military costume and ornaments; when we treat of
237 the different grades of warriors and captains, it remains to be said here that *featherwork*, worn as a *layer* over the "escaupil," played a prominent part in the Mexican armour.[65] It formed an elastic layer on the outside of the quilted jacket, and besides it furnished, through an assemblage of colors peculiar to each sub-division of the force, the "uniform," or, as the Spanish authors call it, the "livery," of that particular sub-division. The Anonymous Conqueror says: "They cover their jackets and breeches "with feathers of various hues, presenting a very good appear-"ance; one company of soldiers has them white and red, others "blue and yellow, and others wear them still different."[66] Bernal-Diez mentions that while fighting on the causeways during the siege of Mexico: "in the morning many captaincies (detach-"ments) would attack us, relieving each other from time to time;
[302] "some had one livery and ensign, others had other ones."[67] Such of the warriors as were but scantily clothed painted their naked bodies.[68]

[293] "of gold." Tezozomoc (Cap. LIV, p. 88) gives the following description of the figure of Axayaca, carved out of the rock of Chapultepec, "with hair of precious feathers, "painted of the colors of the bird tlauhquechol . . . ." The bird whose plumage furnished the material was called "quetzal-tototl." It is "*Trogon resplendens*." (See "San Salvador and Honduras im Jahre 1571," a German translation of the report of Diego Garcia de Palacio, by Dr. A. von Frantzius, of Freiburg, ib.—p. 39, No. 61 note. The notes by the learned translator, as also those of Dr. Berendt, are highly valuable.) The "tlauhquechol" was also used.

[65] Prescott (History of the Conquest of Mexico, 1890, Book I, chap. II, pp. 45, 46, and 47, of Vol. I).

[66] (El Conquistador anónymo) Col. de Doc., Vol. I, p. 372.

[67] "Historia verdadera de la Conquista de Nueva-España" (Cap. CLIII, p. 188, in vol. II, of Vedia).

[68] It is presumable that the colors were those of the detachments to which the warriors belonged. At any rate, it shows that the Mexicans, like the northern Indians, had a special "war-paint." Those of Tepeaca, their allies or subjects, used black and red (Herrera, Dec. II, cap. XXI, p. 287, of Lib. X). Clavigero says (Lib. VII, cap. XXIII): "The common soldiers were naked with the exception of the girdle (maxtlatl), but they "sought to *imitate* the dress which they lacked, by painting their bodies with various "colors." Further on he adds (Cap. XXIV): "Besides the common flag of the army "each company of two or three hundred men had its own banner, and was, besides, "distinguished by the color of the plumage, which the officers and nobles wore over "their armour." Although this is no direct evidence of the fact, still it tends to intimate that the paint used by the common warriors was in *imitation of the featherwork* peculiar to their corps. They also painted their faces previous to an engagement: sometimes black. Tezozomoc relates that, on one occasion, Ahuitzotl painted his face *yellow* ("con un betun amarillo"). His armour was *blue* (Durán, Cap. XLVI, pp. 371 and 372, "tiñéndose las caras con la tinta divina, quellos asi llamauan, y el rey Auit-"zotl vestido de ricas mantas, y debaxo muy bien armado con sus armas azules . ."

14:Bandelier E-4 (no date) 1880 NU7 Aztec NU7

701 posed,[94] as we have seen, of "the able-bodied men (priests ex-
702 cepted) of one particular group of kindred;" said group forming a sub-division of the four principal quarters of Mexico. Besides leading their files in combat, it was their duty when at home, to instruct the youth of their section in the use and practice of arms. They held their office for life, or as long as they gave satisfaction.[95]

[293] As an exterior token of their rank the "captains" wore large ear-rings and lip-pendants of richer material than their predecessors, and carried rods or staffs in their hands when on duty.[96]

701 A certain number of these captains, corresponding to the "mi-
619 nor quarters" or groups of kindred contained in the principal quarter to which they belonged, were under the direction of the *war-chief*, or as the Spanish authors call him, the "captain-general" *of that largest subdivision of the tribe.* There were consequently *four* chiefs of that rank at Mexico,[97] and it is probable that a fifth one was added to them not long before the conquest, to command the warriors of Tlatilulco.[98]

701 Beyond the mere facts of their existence, of their being always elected for life-time, and a strong supposition that their titles are given by all authorities, without stating it positively, however, little is known unfortunately, about these chieftains.[99] They were

[94] Sahagun (Lib. IX, cap. VI. p. 264). "El maestro de campo o capitan es de esta "calidad, que para mostrar su oficio trae coleta cabellos que cuelga atras, y bezote y "oregeras. y trae siempre sus armas consigo." (The latter is doubtful, *at least.*)

[95] Durán (Cap. XXVI, p. 216). In regard to their eligibility, see Ternaux-Compans ("Recueil de Pièces." "De l'ordre de succession," p. 225), "Il n'y avait pas d'autres élections d'officiers." Although untrue in regard to the "other officers." Zurita ("Rapport." p. 61). "The election takes place among themselves."

[96] Durán (Cap. XIX, p. 169), "luego salieron los viejos que tenian oficios de ordenar "la gente de guerra, que eran como maestres de campo, con sus bastones en las manos "y unas cintas apretadas á la caneça y unas oregeras de concha, largas, y unas bezotes "en los labios. muy bien afmados, y empeçaron á componer la gente." Also, Sahagun (Lib. IX, cap. VI. p. 264).

[97] Tezozomoc (Cap. XCI, p. 161): "Cuauhnoctli took charge to assemble together "the four leaders of the four quarters, for that the arms might be ready." The origin of these four titles and dignities dates back to the successful foray against Cuynacan (under Itzcoatl); at least, *then* they are first mentioned (Tezozomoc: Cap. XV, p. 24, and Durán: Cap. XI, p. 97). As members of the council of chiefs, they appear, however, always as "principal chiefs" only. Tezozomoc being the only one who, to our knowledge, speaks of the "leaders of the four quarters" ("cuatro caudillos de los cuatro barrios").

[98] Torquemada (Lib. IV, cap. LXX, p. 499) speaks of "Itzquauhtin, señor de Tlatilulco," as companion of Montezuma during the latter's captivity among the Spaniards. He copies from Sahagun (Lib. XII).

[99] It is a very singular fact that the offices of these four principal war-chiefs should have attracted so little attention, but we may account for it by the prevailing assump-

14:Bandelier E-4 (no date)1880 NU7 Aztec NU7

spection.[111] Therefore, he was always one of the four great war-chiefs of the quarters[112] previous to his election, and his war-dress differed in fact but little from that of the latter. As we have already stated, he wore the hair bound up behind the occiput with red leather, and on his helmet or on the bare head a towering bush of green feathers.[113] A long and wide mantle covered his armour, which was otherwise similar to that of the other chiefs.[114] But his ear-rings of gold,[115] and the green stone-pendant from the bridge of his nose,[116] the golden lip-ring,[117] his wristbands of featherwork and leather,[118] the upper-arm-bands of gold,[119] the

[111] Sahagun (Historia Universal, Lib. II, cap. VI, p. 264): "El capitan general tiene "por su oficio, mandar en la batalla, y dar orden y manera para efectuarla, y concertar "los escuadrones, teniendose por grande aguila y leon, y presumiendo de ser victo-"rioso por los buenos aderezos con que va adornado á la guerra á manera de aguila, y "dando á entender que su oficio es morir en la guerra por los Suyos." Acosta (Lib. VI, cap. XXIV, p. 431): "Ordinarily they elected young men for their kings, because "the kings always went to war, and it was almost the principal object of this office; "therefore they looked to their being proper to military duty, and fond of it, also." Mendieta (Lib. II, cap, XXVII, p. 132): "Tenian estos naturales en mucho cuando su "señor era esforzado y valiente, porque teniendo tal señor capitan, salian con mucho "ánimo á la guerra." (Idem) "Demas de esto, tenian respeto entre los hijos á aquel "que en las guerras se habia mostrado animoso, y á este elegian." Torquemada (Lib. XI, cap. XXVII, p. 357).

[112] Durán (Cap. XI, p. 103): "A estos quatro señores y ditados, despues de eletos "principes los hacian del consejo real como presidentes y oydores del consejo supremo, "sin parecer de los quales ninguna cosa se auia de hacer, y muerto el rey, de aquellos auia de ser electo Rey y no de otros." Acosta (Lib. VII, cap. XXV, p. 441): "Todos "estos ditados eran del consejo supremo, ... ; y muerto el Rey, auia de ser "eligido por Rey, hombre que tuuiesse algun ditado destos quatro."

[113] This distinction was worn by the Indian chiefs of Mexico at least twenty years after the conquest. See, in Vol. II. of Sr. Icazbalceta's "Coleccion de Documentos:" "Relacion de la Jornada que hizo Don Francisco de Sandoval Acazitli, Cacique y Señor "natural que fué del pueblo de Tlalmanalco, Provincia de Chalco, con el Señor Visorey "Don Antonia de Mendoza, etc., etc." (in 1541). "Don Francisco Acazitli llevó por "divisa y armas cuando fué á la guerra de los chichimecas, una calavera de plumeria "con sus penachos verdes, una rodela de lo mismo, y en ella un bezote de oro retor-"cido, con su espada y su ichcahuipil, y vestido con un jubon colorado, y sus zara-"güelles, zapatos y borceguies, y un sombrero blanco, y un pañuelo grande con que "se amarraba la cabeza, y un collar de pedreria con dos cadenas" (p. 307). (Idem, p. 255) "Relacion de la Entrada de Nuño de Guzman," by García del Pilar. "Y viendose "asi los señores destas comarcas, que eran Tapiezuela, señor desta cibdad, y el señor "de Tatelulco, y el de Guaxucingo, y el de Tascaltectle, y otros muchos señores y prin-"cipales destas comarcas, le fueron à rogar y suplicar, ... que se sirviese de "todas sus divisas que eran de oro y de plumas verdes muy galanas, ..." Also (Relacion de Acazitli, p. 311. "con su divisa de quetzalpatzatli de plumeria verde").

[114] Durán (Cap. XXVI, p. 215).

[115] "nacochtli" (Molina, I. p. 91).

[116] "Yacaxiuiti," from "Yacati," nose, "xiuiti," turquoise, or fine green stone in general.

[117] "tenteti," from "tentli," lips, and "teti," stone.

[118] "matzopetzli" (Molina, II. p. 54). "braçalete."

[119] "matemecati," "braçalete de oro, o cosa semejante" (Molina, II, p. 53).

14:Bandelier E-4 (no date) 1880 NU7 Aztec NU7

701 golden tubes enclosing his ankles,[120]—they were all of a more
643 elaborate workmanship, and only he and the "Çihua-cohuatl" were
293 entitled to wear them thus.[121]

But the distinctive mark of either of them on the field of battle
[554] was a long tress or braid of featherwork (the "Quachiatli") hanging down from the occiput to the waist or girdle.[122] Besides, they carried a small drum, on which they gave signals to their men.[123]

000 A very fair representation of this costume, especially of the characteristic headdress, is found at Palenqué, in the beautiful figures on the bas-reliefs of the "altar," and "tablet of the cross." These tablets and figures show, in dress, such a striking analogy with what we know of the military accoutrements of the Mexicans, that it is a strong approach to identity.[124]

[120] "Cozcatl," or "coxcapetlatl," or "cozehuatl." "Cozcatl" is a jewel, or a chain, or a collar, hung with precious stones.

[121] The "king" and the "cihuacohuatl" both wore the same dress and ornaments. Durán (Cap. XXVI, p. 215): "Ordénose que solo el rey y su coadjutor Tlacaclel pudiesen "traer çapatos en la casa Real" (p. 216). "Iten, que solo el rey, y los reyes de las pro-"vincias y grandes señores pudiesen usar de braçaletes de oro y de calcetas de oro en "las gargantas de los piés, y ponerse en los piés cascabeles de oro à piés y guirnaldas "y cintas de oro a' la caueça con plumeria." Every Mexican tribe had this duality of the chief military office, as Tezozomoc distinctly states. Besides, it appears also distinctly in Central America. The "Popol-Vuh" mentions "Hun-Camé" and "Vukub-Camé" as the two chiefs of "Xibalba." (Part II, cap. I, p. 173) "Then they all took "advice together, and these: 'Hun-Camé' and 'Vucub-Camé,' are the chief judges." (Also, Cap. LXII.) See Herrera (Dec. III, lib. IV, cap. XVIII, p. 181.) A similar duality was found among the Itzaes inhabiting Lake Peten, when they were conquered by Ursua, in 1698. "Canek" and "Quincanek" were the titles of the two chiefs. They called each other cousins. ("Historia de la conquista de la provincia de el Itza, re-"duccion y progresos de la de el Lacandon, etc., etc.," by Juan de Villagutierre Sotomayor. Madrid, 1701.)

[122] The term "Quachiatli" is from Torquemada (Lib. XIV, cap. V, p. 543). Molina has no mention of this word. Clavigero describes it, without giving a name, as "a very "subtle piece of featherwork, hanging down the entire back" (Lib. VII, cap. XXII). See, also, Tezozomoc (Cap. LXXVI, p. 129).

[123] Clavigero (Lib. III, cap. XVIII). Tezozomoc (Cap. LXXVI, p. 129). Mendieta (Lib. II, cap. XXVI, p. 130). Durán (Cap. XXXV) p. 277: "y yendo el rey Axayacatl "vitorioso tocando un tambor de oro que à las espaldas llevaba, lo qual se usaba "quando iba en alcance." (Idem, Cap. XLVI, p. 372) "y à las espaldas un atambor de "oro, con que los reyes hazian señal al arremeter y en el retirar, de suerte que los reyes "servian de atambor, o sus generales, los quales tocauan al arma y à recoger de los "exercitos."

[124] Especially the left hand figure of the so-called "altar-piece." The right hand figure *may* be a priest, but we would suggest that both figures are those of *chiefs*, one representing the equivalent to the "Tlaca-tecuhtli," and the other,—the right hand figure,—the equivalent to the "Cihuacohuatl." (See: "Travels in Central America, "Yucatan, and Chiapas," by J. Stephens; also, the plates from Dupaix, in Lord Kingsborough.) Count Minutoli ("Beschreibung einer alten Stadt in Guatimala." Berlin, 1832) has: Tab. I, a fair representation of the "tablet of the cross," also. The left hand figure is evidently a chieftain of the highest grade, as the "Quachiatli" of Torquemada,

16:Bandelier E-4 (no date)1880 NU7 Aztec NU7

appoint his subalterns in the field, and as executor of justice he had the same privilege while at the pueblo. The "teachcauhtin," therefore selected his own assistants and runners. Accompanied by them and carrying his staff of office, whose tuft of white feathers intimated that his coming might threaten death,[164] the "elder brother" circulated through his calpulli, preserving order and quietness in every public place thereof. If he found or heard of any one committing a nuisance or crime, he could seize him forthwith and have him carried to the official house, there to be disposed of as the custom and law of the kin required. But it is doubtful whether, except in extraordinary instances, he was authorized to do justice himself without the council's knowledge and consent.[165]

Ere we pass over now from the functions of the kin to those of the ancient Mexican tribe, we must however dwell at some length on a peculiar institution, yet shared by the Mexicans in common with Indian tribes in general. We refer to the rank and dignity of CHIEF among them. Chieftaincy and office are far from being equivalent. The former is a purely personal, non-hereditary distinction, bestowed in reward of merit only, whereas the latter is a part of the governmental machinery.[166] Hence it follows that a chief might fill an office or not, and still remain a chief, whereas

personnes notables qui portaient le titre de achcacauhtin qui est un nom de charge, comme l'est aujourd'hui celui d'alguazils." *Sahagun* (Lib. VIII, cap. XVII, p. 305) calls the Achcacauhtli "(é verdugos) que tenian cargo de matar á los que condenaba el señor." *Torquemada* (Lib. XI, cap. XXVI, p. 255), "llamabanse Achcauhtli, que quiere decir maiores." There is hardly any doubt as to their functions.

[164] White was the color of death. (Bleaching skulls and bones!) This is amply proven by their mode of declaring, or rather announcing, war. The custom of carrying "staffs of office" is well established.

[165] *Torquemada* (Lib. XI. cap. XXVI, p. 255). *Clavigero* (Lib. VII, cap. XVI, p. 482) calls those "who arrested" delinquents "topilli." But this word means simply "rod, or baton of justice, staff, etc." (*Molina*, II, p. 150), and not office. There is no evidence that these officers might kill, without previous decision of the council, except perhaps in the great market place. *Cortés* ("*Carta Segunda*," Vedia I, p. 32): "Hay en la dicha plaza otras personas que andan continuo entre la gente mirando lo que se vende y las medidas con que miden lo que venden, y se ha visto quebrar alguna que estaba falsa." *Oviedo* (Lib. XXXIII, cap. X, p. 391) copies Cortés, adding, however, "é quiebran lo que está falso, é penan al que usaba dello." *Bernal Diaz de Castillo* (Cap. XCII, p. 89) simply remarks: "y otros como alguaziles ejecutores que miraban las mercadérias," (Vedia, Vol. II). I hardly need any reference in regard to the manner of acting and mode of appearance of the "elder brothers." Their functions of "police" are repeatedly described in the older sources.

[166] *L. H. Morgan* ("*Ancient Society*," p. 71): "Nearly all the American Indian tribes had two grades of chiefs, who may be distinguished as sachems and common chiefs. Of these two primary grades all other grades were varieties. . . . The office of sachem was hereditary in the gens, in the sense that it was filled as often as a vacancy occurred; while the office of chief was non-hereditary, because it was bestowed in reward of per-

16:Bandelier E-4 (no date)1880 NU7 Aztec NU7

earnestness of his manner which eye-witnesses have mistaken for the haughtiness of a tyrant.[245] 643 644

These duties not only necessitated official residence at the "official house," but even permanent stay there, unless important business required the chief's absence.[246] Such absence, however, could only be justified by official duties, and then the "chief of men" had to appear with all the tokens and emblems of his rank.[247] If otherwise, he might indeed, go about, but he lost all claim to official recognition.[248] Hence the statements are true in the main, however exaggerated in detail, that great decorum was observed towards the "chief of men" whenever he appeared in public, that he was addressed with marked deference, and that a certain pomp surrounded him on such occasions.[249] These occasions were, of course, opportunities for the display of Indian

Walter Scott in "Waverley." As to the part played by the "chief of men" see particularly *Bernal Diez* (Cap. XCI, p. 66, Vedia II).

[245] This particularly earnest mien is noticed by all authors. It is strictly Indian, and found among the rudest tribes.

[246] *Durán* (Cap. XXVI. p. 214): "Y asi, lo primero que se ordenó, fué que los reyes nunca saliesen en público, sino á cosas muy necesarias y forçosas." *Codice Ramirez* (p. 76): "De ordinario estaba retirado saliendo muy pocas vezes á vista del pueblo."

[247] *Durán* (Cap. XXVI, p. 214), *Sahagun* (Lib. VIII, cap. X, p. 291). It is distinctly asserted by the former that, what he has called "corona real" could only be worn by the "chief of men" and the "snake-woman." This head-dress, very appropriately termed by the Spaniards, "half mitre" ("media mitra") is figured by many authors of native origin. See *Codex Mendoza* (plates II to XIV, also LXX), *Durán* (Láminas 2 to 14, also 16, 18, to 24 etc.), *Codice Ramirez* (plates 4 and 5). It is called "Xiuhuitzolli" by the Mexicans. See also *Molina* (Parte Ia, p. 30 and IIa, p. 160) from "Xiuitl" turquoise or green stone, and is totally different from the head-dress worn by the "chief of men" in the field. Compare "*Art of War*" (p. 126). [293]

[248] This explains the stories about the "incognito" ramblings of "Fasting Wolf" of Tezcuco, so frequently repeated after the Ixtlilxochitls, as well as that of the arrest of "Wrathy Chief" (the last Montezuma) for appropriating corn out of a field. The latter tale is beautifully told by *H. H. Bancroft* (Vol. II, pp. 451, 452) after the best authorities.

[249] No author has been more prolific in pictures of pomp, regal wealth and magnificence, than *Bernal Diez de Castillo* ("*Historia verdadera*," etc., etc., Cap. LXXXVIII, XCI and XCII, etc.). Most of the later writers have placed undue reliance on his statements, assuming that the truthfulness with which he "gave vent" to his own individual feelings and impressions, was the result of cool, impassionate observation. Anyone who has read attentively (and not merely glanced over at random for the purpose of obtaining quotations) his protracted "Mémoires," will become convinced that he is, in fact, one of the most unreliable eye-witnesses, as far as general principles are concerned. In every detail where his personal feelings are not involved or by which, even at the late date when he wrote, they were not involuntarily aroused, he is much more trustworthy than when he takes special pride or pains to be very explicit. Thus, it is curious to compare his description of "Wrathy Chief's" reception of Cortés with that given subsequently by the "Marquis del Valle" himself, ("*Carta Segunda*," Vedia I, p. 25). It was doubtlessly the greatest effort at pomp and display ever attempted by the Mexicans, since they went to meet and greet the most incom- [114]

1:Vaillant A-5 (1928-1936)1941 NU7 Aztec NU7

leather or woven maguey fiber in cold weather. Women 291
wrapped about their loins a finely woven cloth, which they 554
sustained with a narrow belt. A sleeveless slipover, or *huipil*,
completed their costume. They plaited their hair into braids, [302]
sometimes interlacing them with ribbons, and these they
wrapped around their heads. This woman's costume may
still be seen in many parts of Indian Mexico. (See Plates
33–36.)

The poor made their garments of maguey fiber or coarse cotton. The rich wore the same clothing fashioned from finer textures and decorated with elaborate embroidery. The many names given to the different kinds of mantles show their interest and importance to the wearers. Wool was almost never made into cloth, since dog hair was all they had, but feather cloaks were highly esteemed. Chiefs wore a fillet of leather [292]
from which hung two tassels, and administrative chiefs had a sort of diadem of gold or jade and turquoise as a badge of office.

The warriors frankly gloried in their costumes. Rich man- 292
tles and ornate feather headdresses were not enough for some, who carried on their shoulders a harness of wicker supporting an elaborate structure in feather mosaic. Others wore costumes modeled on the appearance of an ocelot or an eagle. On specified occasions the priests assumed the dress of the gods and goddesses, whose costumes were sumptuous and ornate and defined by exacting ritualistic marks of identification. (See Plate 61.)

Jewelry consisted of ornaments of copper, gold and silver, 301
shell, various-colored stones, like jade, turquoise, emeralds, 304
opals or moonstone, and mosaics laid on a backing of clay, wood or reed. Large plugs were inserted in the ear lobes of

1:Vaillant A-5 (1928-1936)1941 NU7 Aztec NU7

301 men and women alike. Men often wore ornaments passed
[304] through the septum of the nose or suspended from a slit in the lower lip. Elaborate necklaces and pendants, armlets and leg bracelets, gave brilliance to a costume for state occasions.
302 Cosmetics were not used to touch up nature, as with us, but instead a lavish application of face and body paints in red, blue, yellow, green and black enhanced with prismatic richness the softer tones of their brown flesh. (See Plates 46–47.)
105 It is obvious that the Aztecs were no pitiable craven savages. They lived upon variegated and delicious foods and dwelt in houses that were comfortable and airy. Their dress stimulated the exercise of merited self-satisfaction, not to be confused with the compensations of vanity. Their manner of life enabled them to take advantage of their personal aptitudes and exchange the products of their own creation for whatever they lacked. Articles for daily and ceremonial use were made with the loving care of master artisans, and rare indeed was the object that did not have the impress of some little decorative touch that makes a pleasant possession of a drab utensil. Their crafts deserve to themselves a complete chapter.

PLATE 47

AZTEC GOLDWORK

Almost all Aztec goldwork went into the Spanish melting pot. Most surviving examples come from Oaxaca, where the supply was doubled by Caso's discovery of Tomb 7 at Monte Alban, represented by upper left and bottom and opposite-page middle. The lip ornament (*upper right*) has a movable tongue that makes a very lively serpent indeed. These few examples give an idea of the range of form and skill of the Aztec goldsmith.

[p. 144(E)]

1:Vaillant A-5 (1928-1936)1941 NU7 Aztec NU7

row of vendors of implements and tools, such as obsidian 174
blades, carved and burnished pottery, spindle whorls, deer- 438
horn awls, bone bodkins and a few copper axes and needles. A brilliant mass of color characterized the booths of the feather salesmen. Some sold merely bunches of plumes, the lovely green of the quetzal, or trogon, and the multicolored plumage of parrots. At the other stands feather cloaks, mats and shields gave evidence of charming fancy in their design and patient toil in their execution. (See Plates 38–39.)

Jewelers displayed jade ornaments and gold worked into 174
precious rings of filigree or massive beaten gorgets. It was 438
the jade, however, that caught the envious eye and was pro- 301
duced with furtive circumspection as a material of great price. Other merchants sold ornaments of shell, and the pinks, whites and subtle mottled browns of sea shells contrasted with the rich dark sheen of tortoise carapaces. At one booth a rich warrior earnestly bargained with the proprietor for an exquisite pair of earplugs, cunningly inlaid with a mosaic of turquoise and mother-of-pearl.

The smiling whispers and admiring glances of the crowd 174
at the jeweler's abruptly changed in the slave quarters to 438
appraising stares. Some of the chattels wore wooden collars, 567
and their brutish faces had a hopeless expression. These had sunk to servitude long ago as a result of crime or of capture in war. Others were thin and emaciated but did not wear the collar of bondage. They had met with misfortune and were selling themselves for the first time to ensure food and shelter.

A low hum rose from the market place; there was none of 174
the strident shouting of the European fair. The bargaining 438
for goods was carried on slowly, quietly, but, nonetheless,

And [they brought] vases, and incense-burners, and jars made of calabashes, spoons for stirring cacao, and stoppers for jars.

When they entered lands with which they were at war, and went among people who were far distant, they became like their enemies in their garments, their hair-dress, their speech,[104] [that they might] mimic the natives.

And if they came to an evil pass, if they were discovered, then they were slain in ambush and served up with chili sauce.[105] [But if] any—even one, even two—escaped alive, [such an one] informed Moçeçuma.

This one then gave him a gift, and decked him with his amber lip-plug. He did him honor, singling him out as a valiant warrior, thus making him a man of consequence.

And when those who returned arrived home, when they had come back, when they had reached and had contentment in their land, they feasted all, [especially] the merchants and the principal men, that they might make themselves celebrated.

It was called "the washing of the feet."[106] They paid great honor to the cane, to the walking staff, of Yiacatecutli.

In the tribal temple[107] they set it upright. They offered it an offering first, when they laid a feast. And when they summoned people to a banquet, they always offered it an offering when they ate.

And when they ceremonially bathed and slew a man as a sacrifice,[108] he whom they offered was the likeness of their god, Yiacatecutli; or else one of [the following gods], or all of them, whom they worshipped—Chiconquiauitl, or Chalmecaciuatl, Acxomocuil, and Nacaitl, Cochimetl, Yacapitzauac.[109] No one determined, [for] it was of their own free will, whether they should offer up one or two men.

They bought them there at the slave market at Atacapitzalco; they sorted and arranged them, turning them around many times, examining them, buying the good ones—those of good bodies, without blemish, the best men, in good health, sick in no degree, who were marked by no marks on the body.

Such as these they slew on the feast-day, Panquetzaliztli, when the feast of Uitzilopochtli was celebrated.

Thereupon they garbed them in trappings like those of Yiacatecutli, which were assigned to them.

And before they slew them, first they let them be seen by the people. It was said: "They save them up [like

104. Cf. Tezozomoc (op. cit., p. 57): Yacanihchqui "preparamente representa persona, que tiene vivaçe, è habilidad, para mofar graciosamente, è engañar, y ai sabio, y astuto (que es people condition de Mexicanos) . . . ."

105. Cf. Soler (Ensiqe Kapiel, p. 22) citing Hist. Reyn. Colh. Mex. B. II §69.

106. Book IX of the Historia general deals almost entirely with the activities of the merchants. Chapter VI, entitled De las ceremonias que se hacia a los mercaderes cuando llegaban a su casa, que se llama lavatorio de pies, mentions washing mouth and hands.

107. Sahagún defines calpulli as "yglesia del barrio, è parroche" (Spanish version).

108. Sahagún defines the subjunctive in this manner: "Estos ductos que instituhan a estos esclavos."—Historia general, Vol. I, p. 213.

109. According to the Spanish version, they were four brothers and a sister of Yiacatecutli. Soler (Collected Works, Vol. II, pt. 4, p. 92) recognizes Cochimetl and Yacapitzauac as synonyms for Yiacatecutli; "Chiconquiauitl or Chalmecaciuatl is the name of a goddess of water and the earth"; Acxomocuil is Tezcatlipoca; Nacztl is Quetzalcoatl.

The seventh month they named Tecuilhuitontli. On the first day of this month they celebrated a feast to the goddess of salt, whom they called Uixtociuatl. They said that she was elder sister of the Tlaloc gods. In honor of this goddess they slew a woman decked in the ornaments with which they represented the same goddess.

Al septimo mes llamauan Tecujlhujtontli: En el primero dia deste mes: hazian fiesta a la diosa de la sal que llamauan Vixtocioatl: deziã que era hermana mayor, de los dioses tlaloques: matauan a honrra desta diosa vna muger compuesta con los ornamẽtos que pintauã a la mjsma diosa. 796 X [805 776]

Chapter 7
Tecuilhuitontli

On the eve of this feast, all the old women sang and danced, as well as the young women and girls. They went held by some short cords which they carried in their hands, one [taking] one end, another the other [end]. These cords they named *xochimecatl*. They all wore garlands of wormwood [flowers] of this land, which are called *iztauhiatl*. A number of old men led them and ordered the singing. Among them went the woman who was the likeness of this goddess and who was to die arrayed in rich ornaments.

On the night before the feast, the women, with the same one who was to die, kept vigil; and they sang and danced all night long. At break of day, all the priests arrayed themselves and performed a very solemn dance. And all who were present at the dance held in their hands those flowers which are called *cempoalxochitl*. Thus dancing, they took many captives to the Pyramid of Tlaloc, and, with them, the woman who was to die, who was the likeness of the goddess Uixtociuatl. There they slew first the captives and then her.

Many other ceremonies were performed during this feast; and also [there was] great drunkenness, all of which is set forth at length in the account of this feast, *fol.* 76.

1. Marginal notation: Marvellous, poor, says Bus.

785 fasted, [some] for forty days, others for twenty, in
x 796 order to prevail over chance, in order to paint well
463 and to weave textiles well. For this purpose they offered quail and incense, and performed other ceremonies—the men to the god Chicome xochitl, and the women to the goddess Xochiquetzal.

dias, otros veinte por alcançar ventura para pintar bien y para texer bien labores, offrecian a este proposito codornizes y encienso, y haziã otras cerimonjas los hombres al dios Chicome xochitl y las mugeres a la diosa Sochiquetzal.

The Third Movable Feast

x 796 In the third sign, which is called ce maçatl, in the
[776] first house, they celebrated a feast to the goddesses who are named Ciuapipilti, because they said that
[289] then they came down to the earth. They adorned their images with papers and offered them offerings.

La tercera fiesta mouible.

En el tercero signo que se llama ce maçatl: en la primera casa hazian fiesta a las diosas que se llaman cioapipilti porque dezian que entonce decendian a la tierra, ataujauã a sus ymagines con papeles, y ofrecianlas ofrendas.

The Fourth Movable Feast

x 796 In the sign which is called ce maçatl, in the second
273 house, which is called ome tochtli, they celebrated a great feast to the god named Izquitecatl, who is the
[776] second god of wine; and not alone to him but to all the gods of wine, who were many. On this day they adorned his image very well on his pyramid, and offered him things to eat, and they sang and played [musical instruments] before him. And in the court-
[463] yard of his pyramid they set a large open jar of wine, and those who were wine merchants filled it to overflowing, and all who wished went to drink. They had
[415] some canes through which they drank. The wine sellers kept feeding the large jar, so that it was always full. Mostly, those who had newly cut the maguey did this. The first syrup which they took out they took to the house of this god as first fruits.

La quarta fiesta mouible

En el signo que se llama ce maçatl: en la segunda casa que se llama vme tochtli: hazian gran fiesta al dios llamado Yzquitecatl, que es el segundo dios del vino, y no solamente a el: pero a todos los dioses del vino que eran muchos: adereçavan este dia muy bien su ymagen en su cu, y ofrecianle cosas de comjda, y cantauan, y tañjan delante del: y en el patio de su cu, ponjan vn tinajon de pulcre, y hinchianle los que. eran taberneros hasta reberter, y yuan a beuer todos los que querian: tenjan vnas cañas con que beujã: los taberneros yuan ceuando el tinajon: de manera que siempre estaua lleno: principalmente hazian esto los q̃ de nueuo aujan cortado el maguey, la primera agua mjel que sacauan la lleuauan a la casa deste dios como primjcias.

The Fifth Movable Feast

x 796 In the sign called ce xochitl, in the first house, they celebrated a great feast. The leading men and the lords danced and sang in honor of this sign, and they
[301] otherwise made merry. And then they brought forth the richest feathers, with which they adorned themselves for the dance. In this feast the lord gave gifts
[432] to the warriors and to the singers and to the palace folk.

La quinta fiesta moujble

En el signo llamado ce xochitl: en la primera casa, hazian gran fiesta, los principales, y señores, baylauan, y cantauan a honrra deste signo, y hazian otros regozijos: y sacauan entonce los mas ricos plumajes, con que se adereçauan para el areyto: y en esta fiesta, el señor hazia mercedes a los hombres de guerra, y a los cantores y a los del palacio.

The Sixth Movable Feast

In the sign named ce acatl, in the first house, the lords and the leading men celebrated a great festival
[346] to Quetzalcoatl, god of the winds. This feast they observed in the house called *calmecac*, which was the house where dwelt the priests of the idols, and where were trained the boys. In this house, which was like

La sexta fiesta mouible

En el signo llamado ce acatl: en la primera casa, hazian gran fiesta a quetzalcoatl dios de los vientos: los señores y principales: esta fiesta hazian en la casa llamada calmecac, que era la casa donde morauan los satrapas de los ydolos: y donde se criauan los muchachos, en esta casa que era como vn mones-

And they took [the children] to many [different] places.

[First was] Quauhtepec.[6] And the one who died here bore the same name—Quauhtepetl. His paper vestments were brown.[7]

The second place where one died was the top of Mount Yoaltecatl.[8] The human banner [the child to be sacrificed] had the same name—Yoaltecatl. His paper vestment was black striped with red.

The third place was Tepetzinco,[9] where died a girl called Quetzalxoch, a name which they took from Tepetzintli, [also] named Quetzalxoch. Her array was blue.

The fourth place was Poyauhtlan,[10] just at the foot and in front of Mount Tepetzinco. The name of him who died was Poyauhtecatl. Thus he went adorned: he was bedight in rubber, stripes of liquid rubber.

The fifth place, there in the midst of the lake, was a place named Pantitlan. He who died there had the name Epcoatl. The vestments in which he went, having put them on, were set with mussel shells.

The sixth place to which they carried [a victim] was the top of [the hill of] Cocotl,[11] and also he went bearing the name Cocotl. His array was varicolored —part red, part brown.

The seventh place was on the summit of Yiauhqueme, and also the human banner bore the name Yiauhqueme. The clothing which he bore was completely brown.

These were the places where [the children] died, as blood-offerings, as human banners.

And all went with head-bands[12] with sprays and sprigs of quetzal feathers; they had green stone necklaces, and they went provided with green stone bracelets; they provided them with bracelets of green stone. Their faces were painted with liquid rubber, and spotted with a paste of amaranth seeds. And their liquid rubber sandals: they had sandals of liquid rubber. All went in glorious array; they were adorned and ornamented; all had valuable things on them. They gave them paper wings;[13] wings of paper they had. They were carried in litters covered with quetzal

6. Maps of the Valley of Mexico in Colonial times locate most of the places and features mentioned by Sahagún, but the frequent repetition of place-names is at times confusing. Of Quauhtepec, Sahagún's Spanish text says: "*en este sierro enxjuriste que este cerro del Tlaxolaxo.*"

7. *Yiapaltic.* Sahagún (Spanish text) has *encarnado* (deep red, flesh colored); later he has *bermejo* (lion colored, tawny) for *yiapalli.* For *papaltic, tlalor* (*op. cit.*, p. 56) has *pardinegro;* Molina (*op. cit.*), *color tirado de negro;* Simeón (*op. cit.*), brown or black.

8. The Spanish text explains: "*es este sierro enxuriste que este cabo grandalejo.*"

9. *Loc. cit.:* "*es aquel mocarrillo, que este devaxo deste lugaxo, frente del diablejo.*"

10. *Loc. cit.:* "*es es mesmo, que este es los terrajuzes de Tlaxcalla, y allí cabo tepetzinco.*"

11. *Loc. cit.:* "*es es mesmo que este cabo chalco cerraxo.*"

12. Seler (*op. cit.*, p. 57) reads *yemamatlatzon,* which he translates as *ihre eigentümliche Feder.*

13. Sahagún (*loc. cit.*) says "*pusiqueles unos alas de papel como angeles.*"

feathers, and in these [the children] were kept.

"He is as my beloved father." And yet he might eat of someone else's captive.

And the captor kept the [captive's] skin for himself; he lent it to others. For twenty days the skin was carried by one person and another, worn for the entire feast. He who wore it gave everything given him, all that he had collected, to the captor. Afterwards [the captor] divided up [the gifts] among [all of] them. Thus he made use of his skin.

And when this was done, when they had finished with the gladiatorial sacrifice victims, then there was a dance and a procession about the round sacrificial stone, by all the impersonators [of the gods] and those who had fought the victims, all going ceremonially arrayed. In this way did they who did the slaying end [the ceremony]. All severally took with them the head of a captive, a sacrificial victim, and therewith danced. This was called "the dance with severed heads."

And the old wolf man grasped the rope [which had fastened the captives to the offering-stone] and raised it [as an offering] to the four directions. He went weeping and howling, like one bereaved; he wept for those who had suffered and died.

And also from the warring cities, from beyond [the mountains], those with whom there was war, were summoned, in secret, and came within, in secret, as Moctezuma's guests, the Nonoalca, the Cozcateca, the Cempoalteca, the Mecateca. [These ceremonies] were shown to them, and they were confounded. For thus they were undone and disunited.[24]

And when this feast was celebrated, it was when *tortillas* of uncooked maize were eaten.[25] Those who witnessed the ceremony carried *tortillas* of uncooked maize with them, when they went to look on, and they were eaten there.

And upon the next day, the third day of the feast, then began the bringing out [of the skins]. It was very late at night that it began at the great palace. The Tlatelulca began it, and ended it at the time of eating. These the priests replaced, adorned and dancing in a variety of different arrays, with butterfly nets and fish banners; with clusters of ears of

24. Durán (*op. cit.*, pp. 175-80) says that Moctezuma I invited "*los señores de toda la redonda*"—Texcoco, Tlacopan, Chalco, Xochimilco, Cuauitlan, Matlatzinco, the Mixtecapan, and as many more as possible. "*Los señores de las provincias y ciudades*," he continues, "*admirados y asombrados de semejante sacrificio, parecíanse para sus provincias y pueblos llenos de temor y espanto . . . dexó espantados á los forasteros. . . . Donde concurrieron todos los de las provincias y ciudades convocaronse deseosos de tratar tratados ni contratadas con los mexicanos, viendo quien adorar estimar y obrar tratamos á sus enemigos.*"

25. Ulloqui: "*tortillas, como empanadillas, que hacían de masbiz sin cocer,*" according to Sahagún's Spanish text. In Seler (*op. cit.*, p. 74, n. 1) this is defined as the equivalent of *maccaroncelli*—"*das 'Brot in Gestalt einer Armbrustes'. . . . Es ser ein Gebäck in Bogform, das mit eingeflochten, Zusammenhängen Maisfäden, also aus Maismehl, nicht aus Maismasse, hergestellt wurde.*"

maize;[26] with coyote heads made of a paste of amaranth seeds; with S-shaped *tortillas* and thick rolls[27] covered with a paste of amaranth seeds and with toasted maize on top; and red amaranth, which was really red feathers, and maize stalks with ears of green or tender maize.

After midday, the priests rested. Thereupon the Tenochca and the Tlatelulca came together, two rows of Tenochca and two rows of Tlatelulca facing each other. All danced very slowly; the dance proceeded in harmony. Then all emerged, coming out of the palace gate, and all arranged themselves. Moctezuma came forth with them; he came out dancing. At his right and left came two great princes, Neçaualpilli of Texcoco and Totoquiuaztli, ruler of the Tepaneca. Great solemnity reigned as all danced.

And when it was already dark, when it was already night, all dispersed. Then began the singing and dancing [with interlocked hands];[28] there danced the novice warriors, the chief warriors—those who had captured four captives or more, as well as those who had taken one or two. And these were named also young leaders. And also the princes danced. And likewise women danced with them—those known as mothers, but only if they wished; they were not forced. And also immodest women, harlots.

And then all departed, when midnight was nigh, when trumpets had been blown. For twenty days it continued in this manner, until the Feast of Toçoztontli arrived.

7. In *Gesammelte Abhandlungen zur Amerikanischen Sprach- und Alterthumskunde* (Berlin: A. Asher & Co., 1902-23), Vol. II, p. 525, Seler translates *camopalli* as *kamoserfarbene* or as *orange-farbene Decke*. In *Einige Kapitel*, p. 79, he has "*kamoserfarbenen* (*von der braunen Farbe der Knollen der Batatas edulis*)." Molina (*op. cit.*) has *color morado canoro*.

For *nochpalli*, Seler (*loc. cit.*) writes "*karminfarbenen* (*von der Farbe des Nochezli, der Kaktus-Schildlaus*)."

8. Cf. Seler: *Gesammelte Abhandlungen*, *loc. cit.*, and illus., p. 531.

X796 in his discourse, that he might talk graciously, converse well, and greet people agreeably on the road, if he met anyone.

For he was much honored when he appeared as the impersonator; because he was the likeness of Titlacauan; he was acknowledged as our lord, treated like a lord; one begged favors, with sighs; before him the common people bowed in reverence and kissed the earth.

[827] And if they noted that his body became even a little fat, they made him drink brine, so that he became thin; the salt water thinned him, so that he became lean; he became hard; his flesh became firm.

And for one year he [thus] lived; at [the feast of] Toxcatl, he appeared [before the people]. And when the man died who had been impersonator for one year, he who had led the way, he who had cast [the spear] for one year, who had given commands for one year, forthwith was one chosen to be set in his place, from all whom the temple guardians had saved and cared for at the time that [the captives] appeared [before them].

Thereupon he began his office; he went about playing his flute. By day and by night he followed whatever way he wished.

[302 567] His eight young men went following him. Four [of them] had fasted for a year; their hair was shorn like [the hair of] slaves, cut and clipped, not smooth like a gourd, nor cut [too] short, not [made like] growing whiskers on the head.

And four warriors, who instructed youths in the art of war, [were] similarly shorn. Their hairdress lay upright on their foreheads.

Then Moctezuma adorned [the impersonator] well and arrayed him in varied garb; he provided him [his appropriate indumentary]. He ornamented him, he adorned him in great pomp with all costly articles, which he caused to be placed upon him; for verily he took him to be his beloved god. His face was anointed with black; it was said: "He fasteth [302] with blackened face." A thick layer of black was smeared on his cheeks. White feathers were placed upon his head—the soft down of eagles. They placed it on his hair, which fell to his loins.

[301] And when he was attired, he went about with sweet-smelling flowers[7] upon his head, a crown of flowers. And these same were hung over both shoul-

7. *Bouvardia hirsuta Hemsley*, according to Ixtlilxochitl (*Elogio Rapaisel*, p. 97, n. 1, and *Collected Works*, Vol. II, Pt. 4, p. 68). In the former he quotes from Hernández that it is flower resembling poppel corn.

ders, as far down as his armpits. This was called "the flowery garment."

And from both ears hung curved, gold, shell pendants.[8] And they fitted [his ears] with ear plugs made of a mosaic of turquoise. And [he wore] a shell necklace. Moreover, his breast ornament was of white sea shells.

And then his lip plug was a slender snail shell lip plug. And hanging from his shoulders was what was like a cord bag called *icpatoxin*.[9]

Then they placed golden bracelets on both upper arms, and on both wrists they put carved bracelets with precious stones, covering almost all the forearm. And he put on his net cape like a fish-net of wide mesh with a fringe of brown cotton thread.[10] And his costly breech clout reached to the calves of his legs.

And then they placed his bells on both legs, all golden bells, called *oiaalli*. These, as he ran, went jingling and ringing. Thus they resounded. And he had princely sandals with ocelot skin ears. Thus was arrayed he who died after one year.

When [the feast] of Toxcatl was drawing near, when it was approaching him, when it was coming to him, first they married him to [four] women whom they sought out [for him]. He was married in [the month of] Uey toçoztli.

And he left off, scattered in various places, and abandoned the ornaments he had had, in which he had walked about fasting, painted black. His hair was shorn; he was given a tuft of hair tied upon his forehead, like that of a war captain. Thus they bound [his hair], knotting it [with brown cotton thread] called *tochiacatl;* and they tied to his long hair[11] his forked heron feather ornament with single quetzal feathers attached.

Only twenty days he lived, lying with and married to the women. Four women he lived with, who also were cared for, for one year, in the guardian's house.

The first one was named Xochiquetzal; the second, Xilonen; the third, Atlatonan; the fourth, Uixtociuatl.

And still on the eve of [the feast of] Toxcatl, still five days from it, on the fifth day [before it], when

796 301 [306] [292] 796 [584 595] [302 701] [283 301] [833] [551]

8. "Como cerquillos de oro" (Sahagún: *loc. cit.*).
9. "Llevaba a las espaldas, en ornamento como bolsa, de en palmas en quadro de hoyas blancas, con sus borlas y flecadura" (*loc. cit.*).
10. Cf. Sahagún (Robredo edition), Vol. II, p. 310.
11. Cf. *ibid.*, Vol. I, p. 163. The corresponding Spanish text, however, reads: "con una franca cortina, atamada capilla atadora de los cabellos, dos borlas con sus bermejas, borlas de plumas, y oro, y tochiacatl, muy curiosas, que eran llamadas atapalli." Clark (*op. in.*, Vol. I, p. 98) describes "The first load of maxtlas (which) has a design called, by Sahagún, *xpuxtico ximoali*, because of the conches woven in *tochiacatl* or red rabbit's fur; the ground of whirlpools enclosed in a square of dark red, has squares of white feathers. The fringe is also of red *tochiacatl*." From this, it would appear that *tochiacatl* is red string, and *tochiacatl* a red thong of rabbit hide.

796 kept about. And the priests also danced. It was called "the leap in the month of Toxcatl."[17]

[535] There were paper rosettes fastened upon [the priests'] foreheads; they decked their heads with
796 white feathers. And they smeared honey on their lips; their lips were gleaming. They had paper breech
302 cloths. And their black feathered staves had jackdaw
293 feathers in the form of a cup, and a round ball at the
[237] base, also of black feathers. The black feathered staves also were called black rain-bird [staves].[18]

And where they went grasping [the staves] were papers painted with black scroll designs. And these [priests], as they danced, made circles with, and struck, their black feathered staves on the ground.

796 And only in the tribal temples were those who beat the drums for them, seated upon the ground.
[534] They beat the upright drums; they sat beating gourd rattles; they sat rattling gourd rattles and beating turtle shells.

796 And all the masters of the youths, the young
535 seasoned warriors, and the youths were spread out, dancing elsewhere [a dance] called the serpent dance.

And hence [they named what] was danced a serpent dance, because they moved back and forth, and from side to side, and met each other face to face. They went holding each other's hands as they danced.

[30] And also a number of young women danced, having so vowed, a popcorn dance. As thick as tassels of
302 maize were their popcorn garlands. And these they placed upon [the girls'] heads. And they were painted; down to the thighs were they bedecked with feathers. And [these] reached up to their upper arms. And they went mingling with and among those who danced.

796 Of these, it was said that they embraced, they em-
684 braced one; they embraced Uitzilopochtli.
688 And these girls were very well guarded, that none might covet them, nor ravish them.

And all who danced the serpent dance were well watched, that none might fall into covetousness.

And if anyone were seen seducing one [of the girls], then the masters of the youths threw him to the ground. They dragged him; they stepped upon him as he lay stretched out; they trampled upon him.

17. Corresponding Spanish text: "*saltar o bailar de la fiesta de toxcatl*"; Carochy (*op. cit.*, p. 298) translates *toxcachocholoqui* as "*se salta el salto de Toxcatl.*"

18. Sahagún's Spanish text specifies only black feathers; cf., however, Rodrigo edition, Vol. III, pp. 162-3 and 187. The text-mentioned relation to *tzanatl* is: "*Hay una ave que se llama tzanatl; es negra y tiene el pico corvo.*" Seler (*op. cit.*, p. 186, n. 2) calls *tzanatl* jackdaw or daw; cf. (*ibid.*, p. 233) *tzatl* thrush. Of this and cf. *cuitlacuchcho* he says it is "*ein Vogel, der gegen Ende der Regenzeit sich hören läßt und dessen Schrei, nach dem Glauben der Mexikaner, Landregen verkündete sollte. Ich habe den Namen dieses Vogels deshalb mit 'Regenpfeifer' übersetzt. Es wird sonst ein Vogel mit ähnlichem schwarzen Gefieder gewesen sein wie der der tzanatl oder Dohle.*" Sahagún (*loc. cit.*) merely explains: "*y que eran llamadas cuitlacuchtli, por razon de la lluvia, que llamaba chuan, en el verano.*" See also *supra*, p. 44.

handled them and cast them to the ground. If somewhere there was a puddle of water, there they cast them down and slid and rolled them, leaving them to wallow in the mud, covered with mire. Just so they forced them to the banks of the lake, to the place where they dragged people to the water, at a place called Tetzacco.

And when they had arrived there, the [chief] fire priest and the other fire priests thereupon [sacrificially] burned the papers and the gods molded in incense, and those formed of rubber. And the incense they scattered in various directions and spread over each of the reed mats.

And when this was done, it was as if they wounded the water when they cast [their captives] into the water. Like a roaring heat the water seemed and was. And if any tried to come out from under the water, they plunged him under, [so that] he sank deep.

And if any were experienced in water, when [the captives] had submerged them, they fared well.[29] They came out of the water at a distance, and then took off, fleeing and escaping.

And some, in truth, [the captives] caused to faint, and verily they swooned. Indeed, they left them, hurt, truly as if dead, laid out at the water's edge.

And some, who had swallowed much water—this bitter water—[their friends] held head down, that [the water] which they had swallowed might come out through their nose and mouth.

And when all this had come to pass, then all turned back, all returned again, blowing their conch shells as they went.

And those who had been cast into the water went only to their houses; their kinfolk accompanied them. They went ashamed, trembling, shivering, that at home they might recover.

And when [the priests] had reached their houses, again were laid and spread out the mats of green and white reeds. And also were strewn about reeds. Here again began the fast named "the day fast." Also there was fasting for four days. Not now was one dressed [for entertainment]; nor did they now eat [only at midday].

At this time they began the [priest'] vested adornment. The novice priests aided the priests in their escaping. They prepared all the divers paper vestments manj qujnotl, vmpa qujnoctlaça vmpa qujçaçepeztoca, qujmomjqiloa, qujçoçoqujpeztocatinemj, qujçoçoqujpeloztinemj, çan iuh qujnomotitia yn atenco, in teotlan papacholoian, iocaiocan tzecco.

796X

796X 301

[29] Either the conclusion or future tense would be acceptable reading for the Aztec text. Sahagún, in the Spanish column, states that they would usually survive the ordeal.

X 796 [301]

nenta, the paper shoulder rosettes, the semicircular paper neck ornaments, and the bags for incense, which were purchased only [at the market]; and necklaces of wood, [also] sold only at the market place.

And when they had reached [the end of] the four days, when all had fasted, then at early dawn all began to array themselves.

293 X 796 [302]

Then were bedight the fire priests and all [the other] priests. Early in the morning, all put on the shoulder rosettes. And they placed, over them, the paper neck ornament. They all put on the paper neck adornments. And their foreheads were stained blue—they were colored blue—and their bodies were stained. They were painted after the manner of Uitzcioual.[24] And in their hands they carried the incense bags. The fire priests carried with them their ocelot-skin incense bags, provided with small, white, sea shells. In four places shells hung from the incense bags.

And the bags of the [lesser] priests were only of paper, painted like ocelot hide, painted to look like ocelot [skin]. Some [incense bags] represented the *ayaxmicuilotl* bird;[25] some represented ducks. Their bags were filled with incense.

X 796 [302]

And when this was done, then all went [in procession] together, [that] the feast day might be celebrated. The fire priest of the Temple of Tlaloc led the others. He had put on his quetzal and heron feather crown; his face was coated with liquid rubber; [he had] his mist jacket and his rain mask or his Tlaloc mask, which he put on. His long, tangled hair fell to his loins. Behind him followed, chanting, all the [other] priests, and thus they went to the Temple of Tlaloc.

When they reached there, thereupon the fire priest of the Temple of Tlaloc placed himself. He spread out all the white reeds and leaves,[26] and cactus leaves, strewn with the sweet-smelling herbs; provided with the sweet-smelling herbs.

[413]

Then he placed [upon the mats] four round green stones. And when he had placed them there, then they gave him a small wooden hook, stained blue, wherewith he struck each of the green stone balls. As he went striking [each one], he turned around.

---

24. Báez (op. cit., p. 123) has "*uaxo . . . Jamado dos Cavalos to dos dos dos Lamagnos Wgnaos.*"

25. Described in Sahagún, Robredo ed., Vol. III, p. 170. Báez (op. cit., p. 125, n. 1) cites Hernández (op. 18, fol. 32) and defines it as the *chichimeca*. Cf. also Carlos A. Robelo: *Diccionario de Aztequismos* (Cuernavaca: Imprenta del Autor, 1904), pp. 542-3.

26. In a description of the Huauxtec and their region, Sahagún writes: "*Se dice muy bien todos los huauxtecos y mexicos frescos que por ser no se hallan, quando es la que dicen quaquamaqui*" (op. cit., Vol. III, p. 131). Báez (op. cit., p. 126) calls it *Phyllopanthalum*, and cites Hernández's definition as *Inginar plaiman*.

1796 Twenty-sixth Chapter in which are related the feast and ceremonies celebrated upon the feast in the seventh month, which was named Tecuilhuitontli.[1]

Tecuilhuitontli: When this feast arrived, they celebrated the minor feast of the lords for twenty days. And at this time died—[for thus] her fate then befell her—at this time died [in sacrifice], a war captive's death, [she who was the likeness of] Uixtociuatl, god[dess] of those who made salt, the salt-makers.

1796 776 317

This Uixtociuatl, so it was said, was thought to be the elder sister of the rain gods. And it was thought that the rain gods were her brothers. [In] one thing she angered and offended them, that she mocked at her brothers. And then they pursued their elder sister over to the salt beds. There she discovered salt—how it existed, how it was formed, and how were made the salt jars; and also salty sand.

And, on this account, greatly did men who lived where there was salt pay honor to her.

1796 [303] 301

And the array of [the likeness of] Uixtociuatl was [thus]: Her [face] paint and ornamentation were yellow. This was of yellow ochre or the [yellow] of maize blossoms.[2] And [she wore] her paper cap with quetzal feathers in the form of a tassel of maize. It was of many quetzal feathers, full of quetzal feathers, so that it was covered with green, streaming down, glistening like precious green feathers.

And [she had] her golden ear plugs. And the golden ear plugs glittered and flashed and were very yellow, like squash blossoms. And her shirt was embroidered[3] to resemble water [waves].[4] And the border of her shirt was as if painted with green stones, designed to represent billowing clouds on the hem [of her shirt]; the edge was painted in a cloud design. And her shirt was designed in the same fashion.

And on her ankles[5] she had placed bells—golden bells—or rattles. On the calf of her leg she had bound an ocelot skin on which were the bells. And when

1. "Fiesta de los señores," according to Siméon ("Relación breve," p. 300); "der kleine Herrenfest," or "kleiner Herrenfest," in Seler (Einige Kapitel, pp. 130, 131).
Tecuilhuitontli this month and the next literally is the lords' months, in contrast to Hueitecuilhuitl. Cf. Kubler and Gibson, op. cit., p. 26.
2. In op. cit., p. 131 and p. 131, n. 1, Seler refers to "gelber Ziphomarjoran." Siméon, however, is translated by Molina (op. cit.) as "la simiente y la flor de la milla de maiz."
3. Literally, painted; Sahagún, however, writing "labrada."
4. Cf. Sahagún's corresponding Spanish text: also Plate 34.
5. "Las sonajas de los pies," in Sahagún's Spanish. Cf. also Anderson and Dibble, op. cit., p. 1, n. 9.

3 she walked, much did she rattle, clink, jingle, and tinkle.

And her sandals, her foam sandals,[6] [had] side pieces. The side pieces were of loose cotton yarn with flecks of raw cotton woven in, put in by hand. And the tassels on the sandals were similarly of loose cotton yarn. And the sandal thongs also were of the same loose cotton yarn.

And her shield had water lilies [and flowers];[7] it was as if painted with a water lily leaf [and flower] design, [or] as if it had [that design], and was hung [also] with yellow parrot feather pendants.[8]

And the yellow parrot feather pendants were made [into tassels] like locust heads[9] [made of] eagle feathers and eagle down, and cut [pieces of] quetzal feathers and trupial[10] [feathers], and the red [and yellow wing feathers of the parrot] named *tzuzulini*;[11] and the shield [was] rimmed with a circle of yellow parrot feathers.

When she danced, she swung the shield around; it was swung in a circle.

And her reed staff was hung with paper spattered with rubber; it had rubber. In three places it had vase-like flowers, and there in the vase-like flowers was incense. On each of the three were [crossed] feathers; they were provided with [crossed] feathers.

When a dance was held, she walked leaning on it and thrusting it into the ground; she went marking the dance rhythm with it.[12]

And for ten days they sang [and danced] in the manner of women. All gathered together and took their places, the salt people and the salt-makers—the old women, the mature women, the maidens, and maidens recently matured.

While yet there was sun, while it yet shone, then they began to dance. They went arranged in order, each in his place, in rows; they held one another with

6. Cf. *ibid.*, p. 4, n. 22.

7. "Y amarillo," in Ibid., op. cit., p. 132. The shield design is the same as for Mayan tzuzil (cf. Anderson and Dibble, op. cit., p. 21). Sahagún's Spanish reference reads: "Y traía una rodela pintada, como nuestra rajas muchas, de la parte que se llama adonaquyan." In Vol. III of the Bulmarde ed., p. 326, in Dr. Mariano Leal's essay, "Ensayo de interpretación e identificación de las Historias 30 a 138" (Mss. 243 a 245) del libro XI, de la Historia de las Cosas de Nueva España escrita por Fr. Bernardino de Sahagún," adornamentar is defined as "cubrir de negro, blanquear, pintar, blanquear."

8. "Otra manera de papagayos llamaba tzuzil, y eran como colores cuando ya eran grandes y maduros y crecidos; entonces tienen los plumas muy amarillas y resplandecientes; entonces salen unos cuadrados en ellos, que papagayo macho sale en amarillo-blanco, y por eso le llamaron tzuzil, que quiere decir cosa muy amarilla." (Sahagún, Bulmarde ed., Vol. III, p. 146).

9. "Una flores en los cabos, hechas de plumas de aquella" (Sahagún, corresponding Spanish text). *Chapulín*, however, may be an element in Aztec [illegible].

10. Cf. Anderson and Dibble, op. cit., p. 12, n. 103.

11. "Otra manera de papagayos hay que llamaron cuchin (?) es muy semejante al que llamaron tzuzil; tiene el pico amarillo y rayos, la cabeza colorada, y todas las plumas del cuerpo amarillas, las medianas y todo la cabeza de los alas, tiene colorado rayado, semejado con amarillo; las plumas pequeñitas que están sobre la cabeza del ala que llamaron tzuzil, son amarillas semejadas de colorado; el rabo, como pelo malo, que tiene cerca de la cola y cerca de las alas, es colorado semejado de amarillo" (Sahagún, Bulmarde ed., Vol. III, p. 146).

12. Cf. *ibid.* (Bulmarde, op. cit.): "Iba arrimado quando iba bailando"). In Sahagún's corresponding Spanish: "Cuando bailaba era al arrojar, yendo arrimando al llamar, y alrededor [sic] a arrojar del bailar."

1 A [i.e., the god(dess) of the salt-makers, Uixtocihuatl. – Analyst]

his vassals. Because verily there was much hunger; when dried maize was costly, then there was much want, [and] it was hard to gain a livelihood; [and] many then were our dead.

And until the time that the Feast Day of the Lords came, upon every day there was song. When singing and dancing began, [it was] toward evening, when only little sun shone. Thereupon fire was laid in the braziers; flame was put upon the braziers.

And the braziers were arranged and ordered in six rows, and in each row were ten [braziers] and [each] brazier was two fathoms thick; and each was as tall as one's hip.[1]

And thereupon all went forth from the house of song, coming singing and dancing. Between [pairs of men] came the women. Light women, harlots, chosen—picked out, set apart.

And they went together, they went taking by the hands the honored ones—the young chieftains, the leaders of the young men, and those with shorn hair, the Otomí, and the noblemen [not warriors. These last] were not arranged in order; of their own free will they placed themselves near the others.

And richly were the women arrayed and bedight; all good were the skirts and shirts which they had put on. Of their skirts, some had [designs of] hearts, some were [embroidered] with a mat design like birds' gizzards, some were ornamented like coverlets, some had spiral or leaf [designs], some were of plain, fine weave. All had borders and fringes; all [the women] wore skirts with borders.

And of their skirts, some had brown [streamers] hanging, some had smoke symbols, some had black [streamers] hanging, some had house designs, some had fish [patterns], some were of plain, fine weave. And the neck [openings] were all large, and their borders were also deep and wide.

And when they danced, they unbound their hair; their hair covered them like a cloak. But they brought braids of their hair across their foreheads.

And they were not decked with feathers; neither were their faces adorned with paint.

And thus were bedecked the chieftains: their array consisted of the cloak of netting. And the brave warriors, they who had straw lip plugs, they had white net cloaks with shells set in fish patterns. [These] were called their vermilion net cloaks.

1. Cf. [illegible] Spanish text. Literally, [illegible] may be rendered "two arm sides [of] in their [illegible]." For [illegible] Sahagún has "as [illegible]."

X 796 292 And all the men, whether leaders of youths, or youths, had only black net cloaks, all with eyelets on the border, and all had turquoise [ear plugs].

● 301 304 And those who led had only bell-shaped ear plugs.[4] And those who had bell-shaped ear plugs, also had lip plugs. Some were like lizards, some like dogs, some like a broad-leafed water plant, some rectangular.

[729] And the youths who already wore [their] hair long [in token of war exploits] had lip plugs which were rounded.

And all the [others] who were only youths [had] only circular lip plugs, which they set in place.

[701] And the leaders of the youths bore breast plates made of small, white, sea shells. And those with shorn hair, the Otomí, wore their neck bands with round pendants.[5] These were shells.

And the shorn ones were provided with bird-formed lip plugs; and the Otomí were decked with lip plugs formed like the broad leaf of a water plant.

And those who were diligent to be leaders of the youths bought themselves real sea shell neck bands, all clear and limpid. And the lower class bought themselves [common] shell-fish for their neck bands, [which were] only yellow, not hard, and not very costly.

X 796 293 And those who had taken captives, the leaders of the youths, carried their feather shoulder devices in the form of birds. They carried them upright over their heads.

[301 714] And the captains carried upon their shoulders feather devices [formed like] trees, tied in three places with eagle feather clusters bound with ocelot skin. And at the base they were wound in three places with red string.

237 And some raised up quetzal feathers in the form of corn silk; some a forked heron feather ornament; X 796 some set up the head plumage in bird form; some the device made of diverse quetzal feathers.

293 And upon their legs, upon their left legs, they placed hooves, real deer hooves. And the thong was of real deer skin, cut thin, cut into narrow strips.

X 796 302 And thus were they variously painted: Some placed a black stain upon their cheeks, called "black cheek ash vase," and laid pyrites [upon the stain]. And some had a black [stripe] upon their foreheads, [in

4. In the corresponding Spanish text, Sahagún mentions copper, which may have been the material of which the bells were made.
5. Seler (op. cit., p. 144) has done Pedrarias'head for pendants-keeper.

They said unto him:

"Go, my friend! Though thou art a brave man, a warrior, how may we care about thee? Wherever our foes come rising against us, may we die as brave men!"

And these were the words which they said unto him; and much else besides.

And thereafter, when they had cast him out, he slowly crept away, going backwards and on all fours, lamenting as he went. Thus he went off, nevermore to sing and dance with the others.

And the matrons cast out the woman. Nevermore would she take up the song and dance with the others. Nevermore would she clasp hands with the others [in dance]. Thus they dismissed her; the leaders of the maidens cast her out forever.

And the woman who had sinned evermore went alone. Never might she hope once again to sing and to dance with the others.

And the one whom they had punished because of the woman, then married her, and quieted the affair with her.

And before the real feast came which they called Uei tecuilhuitl, on the tenth day, when the woman [who was the likeness of] Xilonen died, her face was painted in two colors. Thus she was stained yellow about her lips, and her forehead *chili*-red. From her paper cap, which had four corners, hung quezzal feathers in the form of maize tassels; and [she wore] a wide neck band. Her neck piece consisted of many strings of turquoise. She wore a golden disc, as breast ornament. Her shirt and skirt had the water lily [flower and leaf design]. She wore princely sandals, carmine-colored sandals. Her shield and her rattle stick were *chili*-red. In the four directions she entered, or went down into, the sand.[7]

For this reason was it said, "She goeth into the sand": in this way she foretold her death—that on the morrow she would die.

She began the feast day when she entered Tetamaçolco. The second place where we went to arrive, we reached [to accomplish the ceremony], and it was a place named Necoquixocan. The third place in which she entered [the sand] was Atenchicalcan, and for this reason was it called Atenchicalcan—that here gushed forth the water, and also here faded away the

7. Bathing the sand was evidently a ceremony literally enacted, and begun in view of the sacrifices of the deities whose festivities were honored by it. The explanation in both Sahagún's Spanish text and the Aztec column is not explicit. The four places in which Xilonen entered the sand may be identified in modern Mexico City and are associated with water and sand. *Aquja* is probably an assimilation of *aquja*.—Angel Maria Garibay, personal communication.

1796 wind. And the fourth place which she entered was over there at Xolloco. [And] there she stopped.

1805 [For] these were a part of, and carried together, the four year-bearers—Reed, Flint, House, and Rabbit. Thus do the year-bearers go describing circles, whirling around [as a measure of time].

1796 When, at early dawn, Xilonen was to die, all during the night songs were sung after the manner of the women. Vigil was kept. Everyone passed the [533] night watching; they slept not; the women remained sleepless. They sang the songs [of Xilonen].

And when day broke, then began the dancing. Verily, everyone—the leaders of the youths, the leading [532] warriors, and the valiant warriors bore maize stalks. These were named "bird banners."

1796 Likewise the women danced—those who were with Xilonen. They were pasted with red feathers.
535 And their faces were painted with yellow ochre. Also
793 they colored their faces in two colors: about their lips they were yellow with ochre, and their fore-
[302] heads were stained with the red of anatta seeds.[9] [They bore] their wreaths of flowers upon their
● [301] heads, and the leaders had garlands of the yellow flowers of the *Caryophyllus mexicanus* [about their necks].[9]

These women were known as priestesses. They mingled not with the men, but remained at one side. They were describing circles, and enclosing Xilonen. They sang for her after the manner of women. These women were called "the hanging gourd."

And the warriors danced before [Xilonen], following a serpentine course.

1796 And for this reason were [the women] known as "the hanging gourd": the two-toned wooden drum,
793 which they beat as they went, had tied to it a gourd,
[534] which was under the drum, which looked as if it were hanging beneath. They who struck the two-toned drum went carrying a little drum under their arms, which they beat, as they went, with rubber-tipped drum sticks.[10]

[534] And the priests, [who] attended them, went blowing horns; they blew shell trumpets as they went. And they went strewing, scattering, and casting incense as they went to meet Xilonen.

And the fire priest, who was to slay [Xilonen] as

8. *Bixa orellana L.*, the annatto shrub (Clark, op. cit., Vol. I, p. 6). Cf. also Seler, op. cit., p. 151.

9. "*Estas flores que se llamaban compañalchitl, son semejantes y de buen olor*" (Kohler ed., Vol. III, p. 271). Tagetes, in Seler, loc. cit. See also p. 88, n. 17.

10. Clark (op. cit., Vol. I, p. 93, n. 2), writing of the *chimamaquer* ceremony (chanting priests), says "The player is called the *teyoquer*, and the drum, *teponaztli*. Made from the hollowed-out trunk of the *Lonnerera sonolente* Bonth. this drum has two notes; the rubber-headed drum-sticks are of elder." Cf. also Sahagún's description of the tenguat on the between (corresponding Spanish text).

an offering, was richly arrayed and adorned. He bore an eagle claw device upon his back, which was surrounded by quetzal feathers. His holder was of eagle down in which were quetzal feathers. His flint knife was of gold. He carried a rosette on his back, which was made of paper, etc.

A man [priest] carried the mist rattle board upon his shoulder; he rattled it in three places. And when they had come to the place where Xilonen was to die, then the fire priest came to receive her. Before her he set up the rattle board, and rattled it, and with incense went forth to receive her, and cast it toward her.

And then they took her up to the Temple of Cinteotl. First they laid her upon the back [of a priest] —not upon the offering stone, but rather she died upon [a priest's] back. And those who died upon [a priest's] back, they called "those who have backs."

Thereupon she met her fate and [the sacrificing priest] severed her head. When she had [thus] suffered, when he had slain her, then he grasped her heart and planted it in the blue vessel. They who were well experienced knew where they cast it, where they required it.

And then all ate, for the first time, *tortillas* of green maize. For the first time the cane of green corn was o[illegible]ered and for the first time chewed, and likewise amaranth greens were newly cooked and once more the sweetness of flowers—the *Cacophyllus mexicanus* and tobacco flowers [—was smelled].

And at the Feast of the Great Lords, there was a dance which was the particular function of the women—old women, young women, mature women, little girls. The maidens, who had looked upon no man, were adorned with feathers and their faces were stained with paint.

Everyone made plain *tamales* and fruit *tamales* for themselves; they offered them as gifts to their gods.

And of the old men and the old women it was the exclusive privilege that they should drink wine. Never did a youth, a maiden, or a priest drink wine.

And if anyone was noted, great pains were taken that he be seized and put in jail, in the granary.[11] They all held council what might be done about it, and whether, perchance, they would punish him. [Evidence] was weighed; all discussed [his crime]. They determined whether [they would] show mercy; and if [they would] not show mercy, he was

X 796 And after that it was quickly lifted upright. Much
778 did the earth stir, move, and swirl. Upon this, they cast stones in [the hole]—all these round rocks—throwing in large stones, pouring them in. And when [the space] was filled with stones, then it was covered with earth. Thereupon each went to his house; all was quiet and calm.

X 796 And thereafter came out the captors [with] their captives, who were to be cast into the fire. [The captors] were well arrayed and adorned. They were
[302] painted with yellow ochre; their faces were stained
[237] red. They bore upon their backs butterfly devices made of red arara feathers. And their shields [were
[293] decorated with] lower legs[7]—those of either eagles or ocelots. These were designed on this shield in feathers. Hence were these named "shields with legs."

[535] And so they went dancing with the captives; they went winding back and forth. Thus they proceeded by twos. The captives, they who were to be cast into the fire, also danced. They covered their bodies with
[30] white clay; they had paper breech clouts and paper
[302] shoulder sashes; then they had their paper wigs, and
292] they decked their heads with feathers. They had feather lip plugs; they were stained bright red about the mouth; they were stained black in the hollows of the eyes.

And when the sun set, then it all ceased, and they shut the captives in. And the captors departed. There in the same place reposed those who owned the captives. They guarded their captives.[8]

And then they started holding a vigil for them. It was already far into the night when the old men, those of the tribal temple, to which they belonged, departed. And when they ended the vigil, it was midnight, in the deep of night, when night divided in half.

[302] After that the captors then took [some of the captives'] hair; they took hair from the crowns of the captives' heads—a little of the captives' hair, [which] they cut from the crowns of their heads. They bound the ends [of the locks of hair] with bright red thread, to which were attached two heron feathers, forked.
[413] And the obsidian knife with which they cut the hair they named the "Iztoon nail."

[415] After they had taken [the hair], then they put it into a small, woven reed basket, called the "hair basket." This hair basket the captor carried to his

7. Literally, lame. Blind Hawkes, however, renders respondi as this.
8. The context suggests a distinction between dismissive and analogous.

at [the village of] Uitzilopochco. It was there at the [spring called] Uitzilatl, in a cave. With cypress[4] branches they stopped [the mouths of the jars] as they went. They proceeded bearing [the water] with them.

When they had taken [the water] hence, they thereupon sprinkled it upon [the victims], there at the foot [of the Temple of] Uitzilopochtli. And there they gave [the victims] their paper vestments, their paper adornment, in which they were to die. And they painted them with stripes, in blue, from their feet up to their knees; and from their hands up to their elbows. And their faces they stained in horizontal stripes of alternate colors, light blue and yellow.[5] And they inserted nose plugs made of an arrow and a half disc.

And when it was so done, when they had adorned them, when they had prepared them, then [the barbers, they who owned the slaves,] took them to the tribal temple, but they came hence quickly. Thereupon each [owner of a victim] went to his house [with his slaves]. There they took apart and set down [the victims'] array, placing [their ornaments] in palm leaf baskets for them. And there, together, [the owners] began the singing and dancing, going in company with their women.

And when they had come to the fifth day [before the feast], then they who owned the slaves[6] and the old men of the tribal temple began a fast. They ate only at midday,[7] and bathed themselves at midnight. Having bathed there at the cloud house, they then departed from the tribal temple.

And the woman who was to bathe [the slaves] bathed herself at the water's edge. She set up one thorn, stained with blood, on the bank. And when the four days of fasting ended, then at nightfall the serpent dance was danced. The bathed victims danced the serpent dance, as well as their owners, who had bathed them, and those who were to seize them, and those who were to bring them down [from the temple, when they were slain], and those who

The *Real Palacio* MS (Quiñones, op. cit., p. 317) reads: "*Auh inic onioa tenhiuhca: yohiuc in tlamanili tonatiqo cuitlaxcoa ayocuitlaxcoa in ixquich cuah cuauhtlaxilli*"—"y es dicir el que hacía grande porque a su cuitlaxcoa después la hubiese como aquel cuitlaxcoa, cada uno de los veinte días."

4. Sahagún (Collected Works, Vol. II, Pt. 4, p. 39) calls *ahuehuetl* cypress (an emblem of kingly power). In Sahagún (Bustamante ed., Vol. III, p. 332) it is defined as Tenochtitlan *ocoxocuauhtli*. The corresponding Spanish text has "*hoyas de cedro*," but J. Ignacio Dávila Garibi, *Diccionario de voces nahuas* (México: Editorial Cultura, T. G. G. A., 1949), Vol. I, pp. 1368, has some notes on the etymology of *ahuehuetl*.

5. Sahagún, in Codex Florentino *Ms.* 577.1 (Codex Florentino *B*) (Berlin: Druck von Gebr. Unger, 1982), p. 8, describes this face painting (Codex *Mendoza*) as similar to Quetzalcóatl. The colors, although of different color, are characteristic of Tezcatlipoca.

6. Corresponding Spanish text: "*Amiles de los cuidados*."

7. "*Cuando el medio día*" (Ibid., ob.): "*Ho como (por almuerzo) con Tuya (por Mitiaq)*"—Sahagún, *Biblia Rapida*, p. 384; "*comida a medio*" (Garibay, op. cit., p. 102).

work which they made.[5] They put upon it a mask made of [a mosaic of bits of] shell. The lower part of the face was blackened, made black with black stones called *teoxtl*. And they striped the face horizontally with black mirror stones.

And upon his head they fitted a ball of yellow parrot feathers; the device for the back of his head, made of precious feathers, served as the lock of hair of the back of his head. And they set upon him his flame headdress, made of feathers from the neck of an eagle.[6] This glowed, and [it had] plucked [single] arara feathers set in order.[7] When he put it on, it appeared in truth to flare up. And his vestments were made only of arara feathers—a red arara feather cape, which trailed long.

And they laid before him *tortillas* made of uncooked, ground maize,[8] or small *tortillas*. They ground the maize. And when it was [ground to a] flour, then they mixed hot water with it, and afterwards it was sweetened. Then, they offered the *tortillas*, some [of which] had shelled beans, cooked, not raw.

And when they had set Milintoc in place, then severally all the common folk made offerings before him, coming together each with five [*tortillas*]. A great quantity of small *tortillas* were heaped up before him.

Similarly the youths and small boys were ranged in order; they hung on sticks the serpents and all the small animals, as hath been said. They offered them to the old men, and the old men cast them into the fire. And the quite small serpents and the other quite small animals burned up and charred. And the well-grown serpents, when they had been roasted, they went to take out, casting them forth upon the hearth. There they were piled up. Later, the old men of the tribal temple ate them.

And the youths and small boys then came forth, and they offered each of them a small *tortilla*. Then they departed. And after this the small *tortillas* were eaten.

Thereupon [all] were refreshed [with wine]; the old men refreshed themselves there at the Temple, the tribal shrine, of Milintoc. And the wine makers, those whose office it was to make wine, left with

And they fastened the new

with a rope about the waist, and [guards] held them tightly [with it] when they [went forth to] urinate. And when it was midnight, then hair was cut from the [crowns of] the heads of all of them; they cut their hair as hath been told and published. And when their hair had been cut, then feathers were pasted [to their heads], and also they pasted feathers [to the heads of] the women. And, as during the night, none of the guards might sleep by day.[10]

And when day began to break and it grew bright, thereupon (as hath been told) were burned the [bathed ones' raiment]; when these were burned, then once more they entered indoors. And some did not burn their belongings, but offered and gave them to others.

And when it dawned [again], then all were once more adorned. Thereupon they went to the place where they were to die; they went ordered in rows. When they reached where they were to die, then they danced and sang spiritedly. It was said that [they sang until] their voices cracked; that they were hoarse.

And when the sun had passed the zenith, then descended [he who was adorned in the likeness of] Paynal. He led and was first among the captives, who would become the fundament [of the ceremonially bathed victims]. When the captives died, then [they slew] the ceremonially bathed ones, who [were adorned in the likeness of] Ixcoçauhqui.

And when they had completely ended the slaying, when it was so, [then] all the chiefs and lords, who were men due great reverence, were ready, and stood waiting in complete array. Moctezuma led them. He had put on the turquoise diadem, the royal diadem.

And all put on their turquoise nose plugs and [their] turquoise ear pendants, [made of] fine turquoise. And some [had] only [ear pendants] made of wood and painted like turquoise. And they put on their sleeveless jackets and turquoise [blue] waist bands well ornamented, and the Xolotl jewel which had the form of a dog. [It was] made of paper and painted turquoise [blue]. And [they put on] breech clouts of paper painted with black stripes. And these were painted only with black.

And in their hands were staves, which were small and shaped like weaving sticks and painted in two colors—red above and chalky white below. In either

10. "The aguilla made made through" seems to be the corresponding Spanish text of the *Florentine Codex*. But, however, Angel Maria Garibay K.: "Paralipomenos de Sahagún," *Tlalocan*, Vol. II (1949), p. 171, for a discussion of these in comparison.

x796 when he had been living in the likeness of another,
[548] had walked with head high, had lived as a captive, had been drunk, and had gone in high esteem.

And for this reason was [the month] named "Izcalli hath ended": all the small children, all of them they took up and lifted by the neck. For it was said,
[827] they [thus] grasped them that they might grow; thus they would speedily grow tall; they would wax great and strong.

And they divided the heart of the *magney* plants;
[824] they broke, peeled, and opened it. And they cleaned the cactus and pruned its branches, because thus it would quickly be given new life and growth.

x796 And at this [feast of] Izcalli, there also came to
852 pass, every four years, the bringing out of the children and the drinking of wine by the children. And then the chiefs danced a lordly dance, along with their courtiers. And they put on their wigs of hair; in truth they were head pieces made of long hair and
[301] covered with green stone. [The hair] fell, verily, to the chiefs' waists.

And for this reason one said that the children were brought forth: the fathers and mothers of all the small children first sought out those who would bring them to the priests' dwelling, a place named Tezcacoac—a woman and a man whom they invited.
[608] It was said that they were to be uncles and aunts [of the children]; they became uncles and aunts [for them].

And not their kin did they take; they secured only their friends, whom they chose and to whom they
[431] gave gifts. They laid out capes and breech clouts for us men. Likewise, for a woman they laid out her skirt and shirt.

At midnight they took [the children] to the priests'
[304] dwelling. There they pierced and drilled their ears. [And the children] cried out [as] the pointed bone pierced their ears. They drew through a thread of unspun cotton, and bound it to them, as the little ones cried out and squirmed, and shed tears. And
[302 they pasted upon their heads yellow macaw feathers
237] and soft down.

And the women who became aunts were pasted
[608 with red feathers, but only upon the legs and arms,
302] and they covered themselves with their paper flowers, which were called their noble flowers.

When they had pierced [the children's] ears, then they took them to their homes. Here they sat attending them; they sat in vigil, awake, [thus] remaining

874 The [valiant] men and chiefs put on neck bands of large sea shells, or of gold; they put on netted capes and leather corselets.[8] Then they painted their faces [with black stripes]. It was said, they applied black sweat to themselves. And they pasted on iron pyrites. As one's adornment, ear plugs were set in; turquoise ear plugs were worn. Heron feathers were applied; netted capes were worn. This netted cape [was made of] twisted maguey fiber, knotted like a net with small shells [attached]. The chiefs had golden shells in their netted capes. Of the net capes of the shorn ones, it was said, "They are provided with fruit." For this reason it was said, "They are provided with fruit"—[that] very large fiber balls hung from them by strings.

7. The word *pohlli*, as used elsewhere in Sahagún, appears to mean to make adobes.

8. In *Manuscrito Tlatelolco* (p. 344, n. 1), Seler offers a variant for [illegible] and [illegible]. Cuechli and cuel, however, may be [illegible] garments, or have [illegible].

4: Sahagún M-5 (1529-1590) 1952 NU7 Aztec NU7

Then they bore the child to the temple. The parents carried paper and incense. Chiefs or noblemen [took] breech cloths, capes, precious neck bands, quetzal feathers, and green stones, which they offered as gifts. The poor took only [their] paltry papers and incense, or sweet smelling herbs, which they used as their gifts.

When they had taken [the children] there, they then anointed them with black; they covered their faces well with a black paste. They then gave them neck bands of the roots of the birthwort.[4] A poor [child] they only provided a neck band of loose cotton. Then they cut his ears and cast the child's blood before the image of the devil. If he was yet a small child, then the parents took him [away]. If he was a chief's son, they left his neck band there at the temple; the priest took it away.

Then [the priests] taught him all the manner of living and rules by which they lived in the priests' house.

A finely wrought feather arm band with various [other] costly feathers and with gold; — quetzalmachoncotl tlaçotlanquj nepapan tlaçoiujtica, ioan coztic teucujtlaio,

A golden band for the calf of the leg; — coztic teucujtlacotzeoatl,

[237] A quetzal feather banner held in the hand; — quetzalmacpanjtl,

A quetzal bird as headdress; — quetzalxotoicpacxuchitl,

Quetzal feather horns; — quetzalquaquauitl,

A quetzal feather fan [set] with gold; — quetzalecaceoaztli coztic teucujtlaio

A turquoise [mosaic] wrist band with a conical extension; — xiuhmacopilli,

A necklace of gold [beads] and small sea shells; — coztic teucujtlachipulcoxcatl,

A necklace of gold [beads] and snail shells; — teucujtlacoztic acuechcoxcatl,

643 Flowers and tobacco, [which were] exclusively the ruler's; a mirror in which the ruler looked at himself when he adorned himself. All these were the charge of the artisans[9] when the ruler danced. — xuchitl, ietl, ineiscaujl tlatoanj, teiacatl injc motta tlatoanj, injc muchichioa amanteca impial, in isqujch imaçeoaia tlatoanj,

[276] 416]

Sandals of ocelot skin; cured leather sandals with embroidery—embroidered sandals. — oçeloeoacactli, cuetlaxcactli tlamachio, tlamachcactli,

[298 281] [There were] two-toned drums and supports for two-toned drums, ground drums, golden turtle shells, and golden bells; — teponaztli, teponaztzatzaztli, veuetl xiacachtli coztic teucujtlatl, tetzilacatl coztic teucujtlatl,

[534] 533 Singers, a dancer, a player of two-toned drums and one of ground drums, a drum beater, a singer who intoned the chant. — cujcanjme, mjtotianj, teponaçoanj, uruetzonanj, tlatzotzonquj, cujcaitoanj,

415 [There were] chests for the devices, in which were kept all which have been described: a large basket-case in which were kept the green stone lip plugs, the gold ear plugs, the golden necklaces, the wigs, the masks, the golden reed serpent. — tlaujzpetlacalli, in vncan mopiaia, in ixqujch omjto. Veuej topcanatli, in vncan mopia, in chalchiuhtenteti, in teucujtlanacochtli, in teucujtlacoxcatl, tzoncalli, xaiacatl, teucujtlaacaçoatl coztic teucujtlatl,

351 There were flowering trees, which were to be seen in the palace courtyard; for it was the ruler who was to dance. — xuchiquaujtl momanaia, in tecpan itoulco, inezca catca: ca maçeoaz in tlatoanj,

415 314 534 [There were] a basket for the mirror, a basket for the comb; and a rubber hammer with which the two-toned drum was sounded. — tezcatanatli, tziquaoaztanatli, olmaitl injc motzotzona teponaztli.

8. Cf. Seler, *Gesammelte Abhandlungen*, II, p. 543; also corresponding Spanish text.
9. Cf. Sahagún, op. cit., II, pp. 1096f., on etymology of *amanteca*.

Tenth Chapter, in which is told how the rulers took their pleasure.

Injc matlactli cẹpitulo, ipan mjtoa injc meellelquixtiaia tlạtoque. 643

When the ruler went forth, in his hand rested his reed stalk which he went moving in rhythm with his words. His chamberlains and his elders went before him; on both sides, on either hand, they proceeded as they went clearing the way for him. None might cross in front of him; none might come forth before him; none might look up at him; none might come face to face with him.

In jcoac quịça tlatoanj, imac onociuh, iacạpitzac, injc mạpilotiuh, injc matlatotiuh quịiacana in jtechiuhcaoan, in jtaoan, necoc vmac in mantiuj, in quịtlạpcuịlitiuj: ỉiac vel quịiacauịltequj, ỉiac uel ixpan quịça, ỉiac vel acopa quịtta, ỉiac uel quịxnepanoa, [481] 643 644

He sang; songs were learned; chants were intoned. They told him proverbs and pleasantries to pass the time.

cuịca, mecuịcamachtia, cuịcachcoa, quịtlatlaquechilia, quịçạçanjlhuịa, [521]

They played ball. There were his ball-catchers and his ball-players. They wagered [in this game] all [manner of] costly goods—gold, golden necklaces, green stone, fine turquoise, shows,[1] precious capes, valuable breech cloths, cultivated fields, houses, leather leg bands, gold bracelets, arm bands of quetzal feathers, duck feather capes, bales of cacao—[these] were wagered there in the game called *tlachtli*.

vllama, vncatca imolpixcaoa, ioan inmolancaoan, quịtlanjtoa in jxquịch tlạçotli in teucuịtlatl, in teocuịtlaconcatl, in chalchiuịtl, in teuxiuịtl, in tlạçotli, in tlạçotilmatli, in tlạçomaxtlatl, in mịlli, in callj, cozcahoatl, teucuịtlamatemecatl, quetzalmachoncotl, xonoiuịtilmatli, cacaoapetlatl in vncan netlanjoa, inoca tlachtli: [525 526] [301 576 314]

On the two sides, on either hand, it was limited by walls, very well made, in that the walls and floor were smoothed. And there, in the very center of the ball court, was a line, drawn upon the ground. And on the walls were two stone, ball court rings. He who played caused [the ball] to enter there; he caused it to go in. Then he won all the costly goods, and he won everything from all who watched there in the ball court. His equipment was the rubber ball, the leather gloves, girdles, and leather hip guards.

necocampa imac tlatepanxectli, cenca tlaiecchiuhtli injc xipetzric in tlachmatl, ioan in tlalmantli: auh in vncan vel inepantla tlachtli, onoca tlecod tlaxotlalli in tlalli, auh in jtech tlachmatl, vntetl in tlachtemalacatl manca, in aquịa ollimanj vncan tlacalaquịa, vncan quịçalaquịa olli: njman ic quịtlanj in jxquịch tlạçotli tlaequịtl, auh muchiotin quịntlanj, in jxquịchtin tetlatlattaque, in vncan tlachco: itlauịcallo in olli, maiecatl, oclpilonj, quẹçoatl. 345 526

Patolli was played with large beans—four large beans with holes bored into the surfaces. The game was won when from their hands they scattered the four beans on a mat painted in widely spaced black [lines], with which the *patolli* mat was designed. There went to be added the counters—twelve [of them], six the property of each, the counters of each of the contenders. He who won in playing *patolli*,

Patoa ica siccotli, vevej etl nauhtetl in tlaixcoionjlli injc motlanj innatica in quịchtiaoa in nauhtetl etl, quịcuịlloa ce petlatl, tlilica, papatlacsic in tlilli, injc mịcuịlloa patolpetlatl, in vncan mopouhtiuh tlapoaltetl matlacetl omome chichiquacentetl imaxca intlapoaltech ioccomme in jxnamjquj in motlanj in patoa, quịtlanjlia in jxquịch tlạçotli, cozric teucuịtlacoacatl, chalchiuịtl, teuxiuịtl, matzopetzali ipan ca chalchiuịtl 524 524 525

1. Tlajolli: the corresponding Spanish has dance (*danza*). See also below, description of *patolli*.

524 were* all the costly goods: golden necklaces, green
525 stones, fine turquoise, bracelets on which were sewed,
green stones or fine turquoise, spotted feathers,
shows, houses, fields, precious copper, stone, large copper,
green stone lip plugs, golden ear plugs, duck feather
copper. And he who played pottle, who cast the beans,
if then he made use [of them] sound, if the beans
stood up there on its thicker end, it was taken as a
[787] great omen; it was regarded as a great marvel. Then
he wore all the costly goods. [The other] lost even
though he had not yet attained the specified number
of throws. Then were all agreed; then all came to the
end [of the game].

526 They shot with bow and arrow—with a bow, with
411 a shaft, with bird arrows, with darts. With this be-
longed a bracelet on which were large, sewed, green
● [301] stones or fine turquoise. The ruler placed it above
[343] his wrist.

They used a sling, and cast stones with the sling.
With these belonged a net for the small stones,
provided so that the small stones were polished. With
[223] these they cast stones at small birds. They hunted
with a bird net; with it they captured various birds.

351 Flower gardens were laid out; flower beds were
laid out. They put in them all the various flowers.

522 There were their jesters who provided them solace
524 and gave them pleasure. And [there were those] who
rolled a log with their feet thus bringing pleasure in
many ways. Their deeds were laughable and mar-
velous; for with the soles of his feet one man [lying]
below this did—he made a thick, round log dance
with the soles of his feet [while] he lay upon his
back and cast the log upward. With only the soles of
his feet he did this.

517 Many things they did to bring men pleasure. There
[132] were their servants, their pages who attended them
and gave them solace; dwarfs, cripples, hunchbacks,
[231] servants. They kept eagles, condors, vultures, mountain
cats, and various birds.

adultery. They accused him before Moctezuma, who then condemned him to be stoned before the people.

FOURTH PARAGRAPH, in which is discussed the council chamber of the brave warriors devoted to war.

Tequiuacacalli or Quauhcalli: there were the brave warriors, the generals, and the commanding generals,[9] whose personal charge was command war.

Achcauhcalli: there were the constables, the brave warriors who were the ruler's executioners. These who brought to an end [the life of] any upon whom sentence had fallen [were] the Quauhxochtli, Atempanecatl, and Tezcacoacatl. And if they erred in something, they exacted the penalty of them and they died.

Cuicacalli: there were the masters of the youths and the rulers of the youths, there established in order to oversee what was by way of work. And every day, when the sun had already set, they turned their attention to dances. They went quite naked. So they went to the house of songs; so they danced with song, proceeding with, about their necks, only [a cape] made like a net. They set in place and proceeded with their forked heron feather ornaments and the red cord with which they bound their hair; and [they had] their turquoise ear plugs and sea shell lip pendants. All the youths, when they danced and sang, ceased when it was well into the night, when for the first time the fire priests and [other] priests blew the shell trumpets. None of [the youths] entered their homes; none slept at home. Rather, they went straight to the young men's houses, which were everywhere. There they slept, stretched out quite naked. Only little did they sleep. On the morrow, when it was still dark, they set forth, to lodge in the house of the ruler.

And when the ruler knew something ill of them—either drunkenness or concubinage;[10] or that they wrought something to their advantage behind the back of the ruler; [or] that without his command they levied tribute on the town, perchance of chocolate, or of food, which became a tribute, and it was done without leave, and [that] they exacted as tribute whenever they wished, then the ruler commanded that they be jailed in wooden cages. He condemned them to pay the penalty; perchance they strangled

1. In Hernández, op. cit., I, p. 34, *cempoalxóchitl* is identified as *Dahlia coccinea*, Cav. Sahagún (op. cit., I, p. 33), however, says of *cempoal*: "Es hierba, cuadrada de cabelinas crecidas, hediyente del pelo, crecenle cuadrillos por cabeza. (Lagunería vulgarmente, ver.)." Manuel Urbina, in "Plantas curiosas de las antiguas civilizaciones," *Anales del Museo Nacional de México*, segunda época, Tomo I, pp. 515-pp. 519, mentions two kinds of *cempoalxóchitl* (*cuauxochi*, *quilitl*), of one of which Hernández is quoted to the effect that it has "*flores coronadas purpúreas*." Dr. Oliver le cita (*Bot. de Hernández*, II, p. 276), giving *Pentanchipta atropurpurea* D. C. for *cuauxochi*; Urbina thinks it is *Artemisia atropurpurea* Bentham.

2. After *in jxtzon*, the *Real Academia de la Historia* MS has *mitzquatzopilloa*—they left a tuft of hair over the forehead.

643 drums, the rubber drum hammers, and the ground
533 drums, and all the properties used in the dance. And
534 [he appointed the kind of] dance, him who would give the pitch, those who would lead, him who would beat the two-toned drum, him who would play the ground drum. All was first arranged, so that nothing would be left out.

veuetl: ioan in ixquich maçeoallatequjtl, ioan netotiliztli, aquin cujcaitoz, aquiquc in teiacanazque, aquin teponaçoz, aquin veuetzonaz, mochi achto mocencaoaia injc atle itlacaujz.

643 And when there was a dance, the ruler [decided]
535 the day. At this time, he adorned and arrayed himself, [in his] head band with sprays of quetzal
292 feathers and gold, with which he bound his hair; a
301 yellow labret, or a green stone lip plug, which he inserted in his [lower] lip; golden ear plugs, which he inserted in [the lobes of] his ears; and he laid on a neck band, either a neck band of green stone or a collar with turquoise inserted; he placed on his wrist a bracelet with a large green stone upon it, or a large turquoise; or a golden arm band; and a quetzal feather fan. With [these] costly goods he went in procession and danced. With a priceless cape he covered and wrapped himself, and in a costly breech clout he girt himself.

Auh in ie iconac maçeoa tlatoanj, in tlein ilhujtl ipan mocencaoa, mochichioa quetzallalpilonj coztic teucujtlaio, injc qujlpia itzon, coztic teçacatl, anoço chalchiuhtentetl in conaquja itenco, coztic teucujtlanacochtli, in caquja inacazco: auh in cozcatl conteca, aço chalchiuhcozcatl, anoço cozcapetlatl, teuxiujtl itlaactoc, macuextli imac qujtlalia vei chalchiujtl ipan ca anoço vej teuxiujtl, anoço coztic teucujtlamatemecatl, quetzalecaceozztli, tlaçotlanquj injc mjtotia injc maceoa, tlaçotilmatli in qujmololoa, in qujmoquentia, tlaçomaxtlatl in qujmomaxtlatia,

565 Then also they arrayed and accorded favors to all
535 the lords, and noblemen, the men [at arms], brave warriors, and the high judges, and the [lesser] judges, and brave warriors, men [at arms], and masters of the youths, and singers. And the ruler gave them drink and food, all the things which have been mentioned.

njman ic no qujcencaoa qujntlauhtia: in ixquichtin tlatoque, ioan pipilti, in oquichti, tiiacaoan, ioan tecutlatoque, ioan achcacauhti, ioan tiiacaoan oquichtin, ioan tiachcaoan, ioan cujcanjme, ioan qujnmaca in jiauh, in jtlaqual tlatoanj in jzqujtlamantin omoteneuhque.

687 And if the singers did something amiss—perchance a two-toned drum was out of tune, or a ground drum; or he who intoned, marred the song; or the leader marred the dance—then the ruler commanded that they place in jail whoever had done the wrong; they imprisoned him, and he died.

643 FOURTH PARAGRAPH, in which is told how
726 he who was the ruler kept vigil; how he kept guard at night and all day, because of war.

The ruler was especially concerned with the keeping of watch against enemies and the guarding of the city, all day and all night. Hence he gave stern commands that guard should be kept faithfully. For at times, suddenly, the City of Mexico was circled by foes; perchance somewhere for this they were gathered together, and were laying a snare. Therefore the ruler kept careful vigil. He did not become besotted. He himself sometimes set forth by night, circled the city, and beheld what was done: perhaps the priest

6: Sahagún M-5 (1529-1590) 1954 NU7 Aztec NU7

And when he took four, Moctezuma then let his hair be cut like that of a seasoned warrior. He was named a seasoned warrior. And then also he assumed the titles of a seasoned warrior—perchance Mexicatl tequiua, or Tolnauacatl tequiua, or Cinnatecpanecatl tequiua: all the titles of a seasoned warrior. And then in truth was when they placed him on the mat and stool of the warriors' house—there where were gathered the great, brave warriors, where were the Tlacochcalcatl, the Tlacateccatl, the Ticociauacatl, the Atempanecatl—those who were great captains, who had long labrets, who had leather ear plugs, who had head bands with [two] eagle-feather tufts, with which [their hair] was bound.

And if six, or seven, or ten Huaxteca, or barbarians,[3] were taken, he gained thereby no renown. For this his title was only seasoned warrior.

Then if he went to take captives at Atlixco, or Uexotzinco, or Tliliuhquitepec, for the fifth one whom he captured, then he gained great honor. For this his name was that of a great, brave warrior—a great captain. Then Moctezuma gave him a long, blue labret and a head band with [two] tufts of [eagle] feathers,[4] perchance with silver flint knives [between the eagle feathers], and leather ear plugs, and a bright red, rich, netting cape. And also he was then given a cape of two colors divided diagonally, and a leather cape.

And if he went to take two [captives] from Atlixco or[5] Uexotzinco, then already he filled everyone with awe. Then they gave him a long, yellow labret; he required[6] both the blue [and the yellow] long labrets.[7]

3. *Tenitl:* "Hace sabe así Sahagún [Olmecas, Uixtecas, Mixtecas] *cada hacia el mediodia del sol, y Sahagún también tenidos, porque hablan lengua bárbara*"—Sahagún, op. cit., III, p. 133. Cf. the corresponding Spanish text.

4. Following *tlalpiloni*, the *Real Academia de la Historia* MS has *quauhtlalpiloni*—head band with eagle feather pendants. This word is omitted in the *Florentine Codex*.

5. *Anoco* should be read *ynoqui*.

6. *Quititlani:* a marginal gloss in the *Real Academia de la Historia* MS suggests that the term is translated *auer*. Cf. the corresponding Spanish text, and, in Simeon, op. cit., *tener*, *tener*, *tilmatlis*.

7. Following *cuauhqui*, the *Real Academia de la Historia* MS has *in centic*; these words are omitted in the *Florentine Codex*.

A passage left out of this codex is included in the *Real Academia de la Historia* MS, ending the chapter. It is placed in Appendix C.

[p. 78 has no test material]

Fourth Chapter. Here is told what Moctezuma then commanded[1] when he knew that the Spaniards had come back: the second time [that] they came, [they did so under] Don Hernando Cortés.

He said to them: "Come, O ye intrepid warriors; come! It is said that our lord hath at last arrived. Receive him. Listen sharply; lend your ears well to what he will say. You will bring back what is well heard. Behold wherewith you will arrive [before] our lord."

[First was] the array of Quetzalcoatl:[2] a serpent mask made of turquoise [mosaic];[3] a quetzal feather head fan;[4] a plaited neckband of precious green stone beads, in the midst of which lay a golden disc;[5] and a shield with [bands of] gold crossing each other,[6] or with [bands of] gold crossing [other bands of] sea shells, [with] spread quetzal feathers about the [lower] edge and with a quetzal feather flag; and a mirror upon the small of the back,[7] with quetzal feathers, and this mirror for the small of the back [was] like a turquoise shield, of turquoise mosaic — encrusted with turquoise, glued with turquoise; and green stone neck bands, on which were golden shells; and then the turquoise spear thrower, which had on it only turquoise with a sort of serpent's head; it had the head of a serpent;[8] and obsidian sandals.

And when they had gone to reach the coast, they ferried them across, they took them by boat across to Xicalanco. Then once again they departed from there by boat; the water folk took them. Everything was placed and heaped in the boat; they filled the boat with the goods. And when the boat was filled, thereupon they departed. They betook themselves into the water and left to reach the boats [of the Spaniards], they approached their boats.

Auh in oacito atenco, qujmõpanavique, acaltica qujmonvicaque in xicalanco: ic no ceppa vncan oncoaq̃ acaltica qujnvicaque in atlaca, moch onmacalaquj, onmacalten, conacaltenque in tlatqujtl. Twelfth Chapter. Here is told how Moctezuma sent a lord, a great nobleman, and still many other noblemen, in order that they go to meet the Spaniards; and that with which each gave salutations as they greeted the Captain between Iztactepetl and Popocatepetl.

And Moctezuma thereupon sent and charged the noblemen, whom Tziuacpopocatzin led, and many others besides of his henchmen, to go to meet [Cortés] between Iztactepetl and Popocatepetl, there in Quauhtechcac. They laid before them golden streamers, quetzal feather streamers, and golden necklaces.

And when they had given them the gift, they appeared to smile, to rejoice exceedingly, and to take great pleasure. Like monkeys they seized upon the gold. It was as if then they were satisfied, sated, and gladdened. For in truth they thirsted mightily for gold; they stuffed themselves with it, and starved and lusted for it like pigs.

And they went about moving the golden streamer back and forth, and showed it to one another, all the while babbling; what they said was gibberish.

And when they saw Tziuacpopocatzin, they said: "Is this one perchance Moctezuma?" They spoke to those who came with them, their spies, those of Tlaxcalla and Cempoalla. Thus in secret they questioned them. [These] said: "Not this one, O our Lords." This one was Tziuacpopocatzin, who was appearing in place of Moctezuma.

[The Spaniards] said to him: "Art thou perchance Moctezuma?" He replied: "I am your henchman; I am Moctezuma."

And these said to him: "Go thou hence. Why dost thou lie to us? Whom dost thou take us to be? Thou canst not fool us; thou canst not mock us. Thou canst not make us stupid, nor flatter us, nor become our eyes, nor trick us, nor misdirect our gaze, nor turn us back, nor destroy us, nor dazzle us, nor cast mud into our eyes, nor place a muddy hand over our faces. Thou art not he. Now Moctezuma cannot hide from us. He cannot take refuge. Where can he go? [Is he] perchance a bird that he can fly? Or can he set out on his way under the earth? Is

[312]

1. Xoloco or Xoluco served to identify the canal which ran along the Calzada de Chimalpopoca; this canal was crossed by a bridge given the same name. In times past they have been named Canal and Bridge of San Antón. Its exact location is the intersection of the Calzadas of San Antonio Abad and Chimalpopoca, the place of the first meeting of Cortés and Moctezuma (personal communication, Rafael García Granados). See map. Alfonso Caso, in *Los barrios antiguos de Tenochtitlan y Tlatelolco* (México, D. F.: 6ª Mesa Redonda, Sociedad Mexicana de Antropología, Sept. 1954; mimeographed), identifies Xoloco as a *barrio* bounded N. by a line S. of Calle de José Ma. Izazaga; E., Pino Suárez and S. Antonio Abad; S., Lucas Alamán; and W., extension of 20 de Noviembre.

2. Near the Church of S. Pablo, according to Sahagún's Spanish text of the *Florentine Codex*, Chapter 30.

3. Corresponding Spanish text: "*En llegando los españoles a aquel río que esta sobre las casas de alvarado que se llama Xoloco.*"

4. *Chimalxochitl. Chimalxoxochitl* is mentioned in Hernández, *op. cit.*, I, pp. 101-102 (fig., p. 102). Chimalxicatl (*ibid.*, p. 100), "*tiene . . . flores redondas mayores (parece prodigio) de un palmo, amarillo rojizas con algo de amarillo más fuerte en su parte media*"; *Helianthus annuus* L. Linn.; *girasol, chimalxochitl, maíz de sejas. Chimalxoxochitl* is classified as "*compuesta!*"

5. *Yolloxochitl. Yoloxóchil* (*Talauma mexicana*, Don?), according to Santamaría, *op. cit.*, III, p. 299. According to Emily Walcott Emmart: *The Badianus Manuscript* (*Codex Barberini, Latin 241*), *Vatican Library — an Aztec Herbal of 1552* (Baltimore: Johns Hopkins Press, 1940), p. 310 and Pl. 98, it is the Mexican magnolia and (citing Sahagún), "was reserved solely for the nobility, especially a kind known as *tlacoilloxochitl.*"

6. *Izquixochitl. Izquixóchil*: in Chiapas, *jasmín del inmo — Bourreria formosa; B. huanita; B. litoralis* (Santamaría, *op. cit.*, I, p. 626). Popcorn flower (*Bourreria huanita* [La Llave and Lex] Hemsl.), according to Emmart, *op. cit.*, p. 276 and Pl. 69 — a rare and covered plant whose flowers were used to flavor cacao. In Sahagún (Jourdanet and Simeón ed.), p. 97, n. 2, it is noted that "*Como flor sirve sur l'arbre izquixochiquauitl, membrillos huanita, de la familia des styracinées.*"

7. *Yeuxochitl.* Nardo Antonio Recho (*Rerum medicarum novae Hispaniae thesaurus seu plantarum animalium mineralium mexicanorum historia ex Francisci Hernandez* [Rome: Ex Typographia Vitalis Mascardi, 1651], p. 258) gives *elocxochitl* as an alternative (*quam alij* Elocxochitl, *seu* Flaveus Elisi, *alij verò* Cuxuhquixochitl [*cuxuhquxi?*] *seu* Yeuxochitl pallidum, *seuque*"), a cold climate plant ("*provenit regionibus frigidis, & montosis loris*"). There is a confusion of terminology. Santamaría (*op. cit.*, I, p. 588) identifies it *elocxóchil*) as *Magnolia dealbata* Zucc. Emmart (*op. cit.*, p. 275) points out that, while according to Hernández it is a *p* magnolia, in the *Badianus MS* the flower "appears to belong to the Compositae."

8. *Cacaoxochitl. Cacahuaxóchil*, according to Santamaría, *op. cit.*, I, p. 250 (*Quararibea funebris* Llave). In Sahagún (Robredo ed.), III, p. 348, it is identified as "*Rosita de cacao. Myrodia funebris. Bonl. Esmeraldanus.*" Emmart (*op. cit.*, p. 311 and Pl. 98) has *Theobroma angustifolium* DC, one of the important cacao plants.

Eighteenth Chapter. Here is told how the Spaniards entered Moctezuma's princely home, and what happened there.

Inje caxtolli omei capitulo: vncan mjtoa, in quenjn Españoles calaqujto in jpilchan Motecuçoma: auh in tlein vmpa muchiuh.

After this they went to Moctezuma's own store house, where were kept Moctezuma's own goods, a place called Totocalco.[1] [They acted] eager and content; they clapped one another on the back, as if happy. And on arriving, when they entered the store house, they scattered, bustling everywhere, as if greedy and covetous.[2] Thereupon were taken out the goods which were in truth [Moctezuma's] own, his exclusively, his portion, precious items all: neck bands with pendants, arm bands with tufts of quetzal feathers, golden arm bands; and bracelets, golden bands with shells to fasten at the knee, and turquoise mosaic crowns with triangular forehead pieces — the rulers' attire; and turquoise nose rods; and all the rest of his array, without number. They took it all. They possessed themselves of all, appropriated all to themselves, and took all to themselves as their own.

Niman ie ic vi in vel itlatlatiaia Motecuçoma in vmpa mopia in vel itech iaxca in motecuçoma: itocaiocan Totocalco iuhqujn mocecenquetza, iuhqujn yioiolipan, iuhqujn moquequetzotzona, iuhqujn iiztaia iniollo. Auh in onacito, in oncalacque tlatlatiloian, iuhqujn tlacecẽmana, novian zactivetzi, iuhqujn mjhicultia, mjhicolia: njmã ie ic oallaqujxtilo in vel ixcoian yiaxca, in vel ineixcavil, in vel itonal, mochi tlaçotlanquj, in chaiaoac cozcatl, in machoncotl, in teucujtlamatemecatl, yoan in matzopetztli, teucujtlaicxitecuecuextli, yoan in xiuvitzolli tlatocatlatqujtl, yoã in iacazivitl, yoan in jxqujch in oc cequj in jtlatquj in amo çan tlapoalli muchi qujcujque, moch intech compachoq̃ moch cõmotechtique, moch cõmotonaltique.

And after they had removed all the gold [from the raiment], when it had been torn off, they then piled up in the courtyard, in the middle of the area, all the precious feathers. And when this had been done, when all the gold had been gathered, then Marina summoned, and ordered called, all the noblemen. She got upon the roof-top, on a parapet. She said: "O Mexicans, come hither!"[3] The Spaniards have suffered great fatigue. Bring here food, fresh water, and all which is needed. For they are already tired and exhausted; they are in need; they are spent and in want. Why do you not wish to come? It appeareth that you are angered."

Auh in ocõcocoleuhque in jxqujch in teucujtlatl: in ontlacocoleoaloc, njman ie ic qujcentlalia itoalco, itoalnepantla in jxqujch in tlaçohivitl. Auh in ie iuhquj in omochi munechico in teucujtlatl. 1. See Anderson and Dibble, op. cit., VIII — *Kings and Lords*, p. 43.

2. Seler, op. cit., p. 494, translates thus: "Man aß sie sehr aufgeräumt gehen, wie Harpyen (oder wie Tiere), gleichsam einander aufgebracht, hochaufgeladen."

3. *Xiqualnojcuer*: this should probably be read *xiqualnicuer*.

4. *Momauc*: the word is blurred in the MS.

701 (And this Tzilacatzin was an Otomí [warrior], as a chieftain, because of his Otomí hairdress. For he despised his foes, even the Spaniards. He disdained them; in truth, all were completely terrified. When they saw Tzilacatzin, our foes then cowered. And much did they try to slay him; either to pierce him with iron bolts, or shoot him with a gun. But Tzilacatzin disguised himself, that he might not be [301] recognized. At times he put on a device; he hung his lip pendants and inserted his golden ear plugs, and he put on a neck band of small white shells; but his head went uncovered, so that it was apparent that he was an Otomí. And sometimes [he had] only his heavy cotton shirt and a thin band with which he wrapped his forehead. And at times he [293] disguised himself by putting on a feather headdress and wig, a head band with [two] eagle feather tufts which went at the back of the head, used to bind [his hair]. Thus did one go with it bound at the time that men were cast into the fire.[3] He went in the guise of one who cast men into the fire; he went imitating those who cast men into the fire. [He had] his golden arm bands; on both arms he had them — in both places he had them on his arms. And the [301] golden arm bands glistened.[4] And also he had about the calves of his legs, leather bands — gilded leg bands, which shone.)

(Auh inin Tzilacatzin otomjtl catca injc tiacauh, ipampa in tlootonxintli, ichica amo imjxco tlachiaia in iniaovan in manel Españoles, amo tle inpan qujmjttaia, vel tlacenmamauhtiaia: in jquac in qujttaia in Tzilacatzin, njman mocototztlaliaia in toiaovan: auh cenca qujtemoaia, injc qujmjctizque, in aço qujtepuzmjvizque, in anoço qujtlequjqujzvizque. 726 And then, next day, when once again their boats set out, they grounded them at Nonoalco, at Ayauh-caltitlan.[5] And then also came out those who went afoot, as well as all the Tlaxcallans and Otomí. Indeed, in force the Spaniards issued to fall upon [the Mexicans]. And when they came to and arrived at Nonoalco, thereupon there were battle and fighting; in truth there spread strife and war. Death was dealt on both sides. All their foes were shot at with arrows, and also all the Mexicans. On both sides equally was there suffering. Thus all day and all night they all fought.

Auh njmã imuztlaioc in ie no cuel ceppa qujçaco in jmacal connacanaco nonoalco, aiauhcaltitlã: auh njman no qujçaco in tlaxipanvia yoan in ie ixujch tlaxcaltecatl yoan otomjtl, vel tonac in qujntepevi-vitze in Españoles. OTHER GOODS

5 strings of *chalchiuites*[*]
8,000 pellets of unrefined copal and burners (quarterly)
400 baskets of refined copal (quarterly)
1,200 yellow-colored clay vessels (quarterly)
100 little copper hatchets (quarterly)

Tribute of the component towns.—Some idea of the way in which this burden was shared may be gathered from the following details. 651 632

Alahuiztlan "davan de trebuto mantas, maiz, chian."[73]

Cueçalan gave chalchiuites annually (the string listed above?), besides mantles and other things.[74]

Chilapan gave maize, chile, and animals important for religious reasons (ocelots and eagles).[75]

Otlatlan gave cotton mantles, delivering them directly to Mexico,[76] instead of to a local depot.

Oztoma, being obliged to support the local Mexican garrison, seems to have given nothing more.

Teloloapan gave clothing of various sorts and a mineral dyestuff called "tlalcozahuitl."[77] [386]

Tepequacuilco—as might be expected of the eponymous town—was the presidio from which most of this tribute was gathered.[78] In colonial times, Tepequacuilco became a famous mining center, and indeed, it lost its importance only when the railroad reached Iguala.

Totoltepec is said to have been another nontributary, like Oztoma, because of the garrison, but it still thought it expedient to send its overlords "gifts" of mantles, chalchiuites, and copper.[79]

---

[73] *PNE*, 6: 102.

[74] "Cada vn año vna esmeralda berde que llaman ellos chalchihuitl, dauanle mantas y otras cosas que tenyan" (*PNE*, 6: 140).

[75] "A Moteçcuma ... le servia de llevalle algunos tigres y aguilas, algun mahiz y chile en recognoçimiento" (*PNE*, 5: 178). Eagles were the sole tribute of the northern frontier province of Oxitipan.

[76] "Era de Moteçuma ... y le trebutavan mantas de algodon, y ellos mysmos se las llevavan a Mexico" (*PNE*, 6: 128).

[77] "Trebutavan ... mantas y guaipiles y naguas y mantillas delgadas, y tlalcozahuitl que es una arenilla para hazer color amarilla, y otros colores, las quales buscaban para llevar a Mexico con el tributo, por sus tercios" (*PNE*, 6: 146).

[78] "Tenian los señores de Mexico en este pueblo en tiempo de su gentilidad presidio de gente de guarnicion que cobravan los tributos: y recojian de toda la cuisca que eran mantas y algodon y otras cosas" (*Relación de Iguala* [1931], p. 223).

[79] "No llevava trebuto por questavan en frontera con los de Mechoacan y sustentaban los soldados que alli tenian, mexicanos, y en el fuerte de Oztuma, y ... algunas vezes del año enbiaban presente a mexico de mantas y piedras verdes y 'hierro colorado' ques cobre" (*PNE*, 6: 149).

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

[65] 816 bundles[*] of orange-striped mantles, 8 brazas long[**]
[291] 408 bundles[*] of large white mantles, 8 brazas long[**]
402 bundles[*] of mantles striped red and yellow[**]
400 bundles of women's skirts and blouses[**]
240 bundles of rich mantles in three styles[**]
[714] 2 warriors' costumes with shields[*]

FOOD[*]

[26] 800 loads of dried chili peppers

OTHER GOODS[*]

[23] 20 bags of small white feathers for decorating mantles
301 2 strings of chalchiuites
1 string of turquoises
2 disks of turquoise mosaic

Another source, which magnifies the seven towns into seven prov-
[114] inces in the "gran provincia de Tochpan"[*] (seventy-eight pueblos in all), gives the following version:

CLOTHING

[291] 1,580 bundles of mantles
25 mantles and *huipiles*
400½ bundles of "twisted" mantles, 8 brazas long
400½ bundles of thin "twisted" mantles, 4 brazas long

This is summed up as 47,645 articles of clothing, a smaller figure
[357] than that given by the *Mendocino*.[*] Perhaps we have here the tribute of the cabecera alone. Servants were also supplied, we are told.[*]

Still other sources give more details concerning items included in the opulent tribute of Tuchpa Province, among them a kind of mantle called "Tuchpanecayotl."[*]

---

[*] Corrected from 800.
[**] Corrected from 400.
[**] Corrected from 400.
[*] Ixtlilxochitl, *Obras históricas* (1892), II: 197. It is interesting that the number seven is given, which corresponds to the number of towns known to us from the *Mendocino*.
[*] The total number of pieces of clothing from Tuchpa Province specified in the *Mendocino* is 85,480.
[*] Ixtlilxochitl, *Obras históricas* (1892), II: 197: "En la gran provincia de Tochpan puso por su mayordomo á Huehutli, que cobraba en cada un año de las mantas del género atrás referido, mil quinientos y ochenta fardos, y mas veinticinco mantas y huepiles, sin más cuatrocientos fardos, y más diez mantas de ilacatziuhqui [Molina: cosa torcida] de a ocho brazas, y otros tantos fardos de mantas de ilacatziuhqui delgado de a cuatro brazas, que por todo venían á ser cuarenta y siete mil seiscientos cuarenta y cinco mantas, enaguas y huepiles, piezas de ilacatziuhqui y pañetes sin más las amas de palacio y criadas que eran necesarias para el servicio. La gran provincia de Tochpan se dividía en siete provincias, que contenian todas ellas sesenta y ocho pueblos a ellas sujetos."

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

632 *Teoçiocan* is called "Teocinyocan" by another native source.[26] It is perhaps an estancia of Zongolica (a), "en tierra fria," called San Juan de Teoyxuacan, two leagues from the cabecera.[27]

NATURE OF THE PROVINCE

175 *Inhabitants and languages.*—Cuetlaxtlan, we are told by a Texcocan
197 chronicler, was conquered by that power,[28] a statement confirmed by the "Relación de Cempoalla."[29] The pre-Hispanic language was Náhuatl.

635 *Provincial borders in 1519.*—Cuetlaxtlan lay between Quauhtochco
131 and Tochtepec, which were on the northwest and on the southeast respectively. Northeastward was the sea, and to the southwest was a doubtful region embracing at least one free city-state of the Mazateca.

TRIBUTE

651 *Tribute of the whole province.*—The tribute of Cuetlaxtlan, in contrast with that of adjacent Quauhtochco, was variegated:

CLOTHING

[291]
400 women's blouses and skirts**
400 small mantles, borders black and white**
400 half-quilted mantles**
400 mantles of 4 brazas each**
400 large white mantles, 4 brazas each**
160 very rich mantles for lords and caciques**
1,200 black-and-white striped mantles**

[714 317 237 301]
2 warriors' costumes with shields*
1 string of chalchiuites*
400 bunches of quetzal feathers*
2 lip plugs of crystal, with blue and gold mountings*
20 lip plugs, light amber, mounted in gold*
1 hair adornment of quetzal feathers*

FOOD

[262]
200 loads of cacao*

Cuetlaxtlan paid cacao and cotton mantles, both white and decorated.[30]

[26] Sahagún, *Historia general de las cosas de Nueva España* (1938), IV: 134.
[27] *PNE*, 5: 230.
[28] Ixtlilxochitl, *Obras históricas* (1892), I: 320 and II: 196.
[29] RHE, 1: 131.
[30] *PNE*, 5: 9: "tributavanle cacao y mantas de algodón blancas e pintadas."

8: Barlow E-4 (no date)1949 NU7 Aztec NU7

province was Náhuatl, but along the southwest both Chinantec and Mazatec were spoken.

Provincial borders in 1519.—To the northwest of Tochtepec Province lay Cuetlaxtlan and its fortress; to the southwest was the doubtful zone of the independent Mazatec. Southward, Coayxtlahuacan and Coyolapan provided another strong link with the Empire, but somewhere along the southeast the province of Tochtepec gave on enemy regions, through which a thin line of fortresses must have led to Xoconochco.

TRIBUTE

Tribute of the whole province.—The wealth of Tochtepec was phenomenal. Of the several lists of tribute which we have, the *Matricula* shows the following items:

CLOTHING

1,600 rich mantles, of the kind the lords and caciques wore**
800 red-and-white striped mantles**
400 women's blouses and skirts**
1 warrior's costume and shield, with a birdlike standard*
1 gold shield*
1 feather standard like a bird's wing—yellow feathers*
1 gold diadem*
1 gold headband, a hand's width and thick as vellum*
2 strings of gold beads*
3 large chalchiuites*
4 strings of chalchiuites*
20 lip plugs of light amber mounted in gold*
20 lip plugs of crystal with blue smalt and gold setting*

FOOD

20 loads of cacao

la mar del Norte hasta otra provincia que se dice Teochtepec [*sic*] que asimismo la ganó y sojuzgó, y puso en ella por su mayordomo y cobrador de tributos (de más de la gente de guarnición que en cada una de ellas dejaba) á Toyectzin, que cobraba en cada un año cuarenta fardos de mantas ricas y viente de unas camisetas asimismo ricamente tejidas de finos colores, que montan ciento y viente piezas: igualmente le sembraban y cultivaban en cada un año una sementera de cacao, que tenía de longitud cuatrocientas medidas y de latitud doscientas, sin más treinta y tres cargas de cacao que se cobraban de tributo, dos mil pelotas de hule y cuatrocientos paños de grana, sin más muchas piezas de plumería, como eran rodelas, penachos y otras divisas que los reyes usaban cuando salían a las guerras, hechas de la plumería rica que llaman quetzali. Esta provincia contenía doce pueblos, asimismo sujetos, y daban de tributo cierta cantidad de amas y criadas para el servicio de palacio."

REMARKS ON TOWNS

632 *Xoconochco* has now become Soconusco San Benito.[a] It appears as one
712 of the garrison towns (*Mendocino,* fol. 18′) with two governors, named "2. Quauhtli Tezcacouacatl" and "Atzin Tlilancalqui," according to their glyphs (cf. chap. viii, no. 37).

NATURE OF THE PROVINCE

197 *Inhabitants and languages.*—The Mayence language Mame and Náhuatl were the native languages of Xoconochco Province.

635 *Provincial borders in 1519.*—The province of Xoconochco was one
131 of the terminals of the Empire, and doubtless warred constantly on the east and west. The links which bound Xoconochco Province to the Empire and to remote Tochtepec are not clearly known, but it seems likely that they consisted in isolated fortresses.

TRIBUTE

651 *Tribute of the whole province.*—The tribute of Xoconochco Province comprised the following:

CLOTHING**

[301] 2 lip plugs of light amber, gold setting
2 long strings of chalchiuites

FOOD**

[262] 200 loads of cacao

OTHER GOODS**

[237] 1,400 bunches of feathers, blue, red, and green
160 whole skins of birds[a]
800 handfuls of yellow parrot feathers
800 handfuls of quetzal feathers
[415] 40 ocelot skins
800 rich tecomates for drinking cacao
[317] 2 brick-sized chunks of clear amber

632 *Tribute of the component towns.*—Xoconochco gave, in the early
651 colonial period, three annual tributes of goldpieces, each tribute being comprised of eight gold disks worth twenty-five pesos apiece.[a]

[a] Nuttall, "Chalchihuitl in Ancient Mexico," *American Anthropologist* (1901), 3: 232.
[a] Cooper Clark, ed., *Códice Mendocino* (1938), 1: 8v identifies it as *Cotinga amabilis* Gould.
[a] *PNE,* 1: No. 501: "Dan tres tributos cada ano y en cada vno ocho tejuelos de oro de a veynte e çinco pesos cada vno, de nueue quilates: pagando en tostones al Respeto."

into such a city; and for the many times He has saved me from danger of death, as will be seen later on, I give Him sincere thanks, and in that He has preserved me to write about it, although I cannot do it as fully as is fitting or the subject needs. Let us make no words about it, for deeds are the best witnesses to what I say here and elsewhere.

Let us return to our entry to Mexico. They took us to lodge in some large houses, where there were apartments for all of us, for they had belonged to the father of the Great Montezuma, who was named Axayaca, and at that time Montezuma kept there the great oratories for his idols, and a secret chamber where he kept bars and jewels of gold, which was the treasure that he had inherited from his father Axayaca, and he never disturbed it. They took us to lodge in that house, because they called us Teules, and took us for such, so that we should be with the Idols or Teules which were kept there. However, for one reason or another, it was there they took us, where there were great halls and chambers canopied with the cloth of the country for our Captain, and for every one of us beds of matting with canopies above, and no better bed is given, however great the chief may be, for they are not used. And all these palaces were [coated] with shining cement and swept and garlanded.

As soon as we arrived and entered into the great court, the Great Montezuma took our Captain by the hand, for he was there awaiting him, and led him to the apartment and saloon where he was to lodge, which was very richly adorned according to their usage, and he had at hand a very rich necklace made of golden crabs, a marvellous piece of work, and Montezuma himself placed it round the neck of our Captain Cortés, and greatly astonished his [own] Captains by the great honour that he was bestowing on him. When the necklace had been

NU7 Aztec NU7
Tarasco NU34
Zapotec NU44

The Aztec people had, however, some knowledge of metallurgy, for they melted the copper and cast it in moulds, an art which the aborigines in the United States never seem to have acquired. Cortez tells us that in the markets of the City of Mexico A 325

> "hatchets were sold made of copper alloyed with tin and that this alloy was used with a silicious powder with which they cut the hardest stones." A [324]

The Spanish historians speak of Cholula, a very ancient City of Mexico, founded before the arrival of the Aztec, which excelled in metal working, and that the Tarascans living west of the valley of Mexico were familiar with copper found in the mountains in that district, which they worked into defensive armor, body plates of wood covered with sheet copper. They also state that the Zapotec made ornaments of copper obtained from the mines in Oaxaca. A T Z 325 171

Copper implements, however, were not common near the City of Mexico but were plentiful in Oaxaca, Michoacan, and the Jalisco region. The T-shaped implements were found at Mitla, Central America, being abundant in the Zapotec country. The objects, some made of very thin sheet copper, others heavier, possibly cast, are of uncertain use; those too thin to be used as tools for wood or stone, are thought to be instruments used in their feather work or pottery, others regard them as a money currency or exacted as tribute paid to the City of Mexico by the neighboring cities, this latter being the general opinion. A T Z [651]

The number as well as the variety of copper objects from Mexico found in our Museum collections, is rather limited, consisting of a few copper ax heads, chisels, large and small, little bells, finger rings, beads and pins. The peculiar T-shaped objects are the most abundant, differing somewhat in shape and size. An analysis of one of them in the Peabody Museum at Cambridge, proved it to be simply copper. It was doubtful if the ancient Aztec had a knowledge of bronze or knew how to obtain it until shown by the Spanish invaders, and such analyses of Mexican metal objects, giving a percent of tin to indicate a true bronze, may have been implements made after the instruction by the Spaniards. Some copper tools from Mexico when analyzed showed a small amount of tin believed to have been an impurity in the A 325 [412 301]

13: Phillips U-4 (no date) 1925
NU7 Aztec NU7

325 copper ore. A chisel reported in the "Anales del Museo de Mexico" quoted by Sir John Evans, in his *Ancient Mexican Implements* when analyzed gave copper 97.87%, tin 2.13%, not sufficient to make a true bronze. Copper axes from Oaxaca, some heavy metal, apparently cast in a mould, others thin, shaped from sheet copper, have been analyzed and yielded only copper, showing they were *not* bronze.

A recent analysis was made for the writer of a portion of a metal chisel of Aztec origin from the village of Acatlan, in the State of Guerrero, Mexico. It was doubtless authentic being sent by Dr. Manuel Gamio, Direccion Anthropologia, Mexico, for analysis, which was made by Dr. D. L. Wallace of the University of Pennsylvania, Analytical Department. The piece of metal apparently broken from the middle of the chisel weighed 88 gms. It was 30 mm. long, 20 mm. wide and 15 mm. thick. It had a brown patina of oxidation, gave clean metal borings (used in the analysis) of dark red bronze color, and had the appearance of having been cast in an open mould. The specific gravity of the metal was 8.00 compared with Lake Superior native copper 7.50. The analyses yielded results as follows:

Copper	91.40%
Tin	3.07%
Lead	0.82%
Iron	0.53%
Cobalt	0.09%
Sulphur	0.82%
	96.73%
Thallium	?

Other metals often associated with Copper were tested for and not found, but tests indicated Thallium. This element Thallium occurs in some copper ores in Mexico as the mineral Crookesite, a copper Thallium selenite sulphide; and it is believed the portion unaccounted for in the analysis was due to the Thallium. [317]

325 The little copper bells in the Museum collections seem to have been found in Mexican sites as well as in Central America, and are quite abundant in some localities. Some of these bells were about one half to three-quarters of an inch long, others of more than two inches and of different shape. ●301

S. G. Morley in his description of Copan says:

"The discovery of copper bells of Mexican origin at a number of archeaological sites in Arizona and New Mexico clearly point to trade relations between the Pueblo Indians and the tribes of Central America in pre-Columbian times; these bells very closely resemble the copper bells found in the sacred Cenates of Chichen Itza, Yucatan, which can hardly have been carried there before 1200 A. D. [439]

Analysis has proved these metal bells to be copper with some little impurities; and it is believed they were cast by what is known as the *cire perdue* process. This method consists in using a wax model, or a core of clay covered with a wax pattern, the mould being heated, the wax melted and ran out, leaving the shape of the object to be cast, which was then filled with the melted metal. This is interesting because this process was well known to the makers of bronze ornaments in Europe, and it is a question if these little bells found in the Aztec or Maya burials were made by the *cire perdue* process; was it a discovery by the American race independent of foreign knowledge? 171 321

This might suggest a greater antiquity for this art of casting than that in Europe and would show a considerable amount of experience in metallurgy for the aborigines, and it is surprising that more elaborate objects were not made by them. Judging from the character and variety of cast objects of bronze from South America, the ancient Peruvians were familiar with the *cire perdue* method. Did the Inca discover it? They were certainly the earliest users of the alloy bronze in America with the exception of the unknown builders of Tiahuanaco, among whose ruins have been found bronze tools. With regard to the knowledge the Aztecs had of bronze, it is difficult to establish their claim until more analyses are made of specimens of undoubted Mexican origin, indicating an alloy with a composition of about 90% copper and 10% tin. The following analyses by P. Rivet, taken from his contribution in the *Journal de la Société des Américanistes de Paris* show to what extent tin was used by the Aztecs in their metal objects. 325

346 Each temple usually had a chamber and an antechamber, and in some cases two or even three shrines rested on the same platform. This platform or substructure gave height and mass to the temple. The usual practice was to lay up rough stone, set in adobe or lime, into a truncated pyramid, the sides of which were broken up by three narrow setbacks and by a steep ramp leading to the top. The surface was of veneered cut-stone slabs, and additional blocks were laid along the ramp to make the stair. Wide balustrades bordered the staircase and often ended in gigantic serpent heads. Aztec construction was the simplest type of engineering, but imposing architectural effects were gained by the consummate artistic sense and superb craftsmanship of the builders.[29] (See Plates 50–51.)

291 554 The adequate, even imposing, housing of the Aztecs and their gods by no means eclipsed their dress. Clothing, besides protecting man from the weather, has an important social function. It is a guide to the sex, age, group, occupation, rank and even character of its wearer. The simple and standardized clothing of our modern society performs the same service, and with a moment's observation one can tell much about a stranger from his clothes. The Aztecs, like many peoples of the world, strove by their dress to accentuate the social differences between people, and pomp and panoply dominated their costume. Or the barbaric splendor of high civilian dress superimposed the fantastic garb of the priests and priestesses in their impersonation of the complex and ornately represented divinities in their pantheon.[30]

[302] The *macehual*, or ordinary tribesman, left his head uncovered, his hair long, and customarily wore a *maxtli*, or loincloth, a mantle knotted over one shoulder, and sandals of

1:Vaillant A-5 (1928-1936)1941 NU7 Aztec NU7

leather or woven maguey fiber in cold weather. Women 291
wrapped about their loins a finely woven cloth, which they 554
sustained with a narrow belt. A sleeveless slipover, or *huipil*,
completed their costume. They plaited their hair into braids, [302]
sometimes interlacing them with ribbons, and these they
wrapped around their heads. This woman's costume may
still be seen in many parts of Indian Mexico. (See Plates
33–36.)

The poor made their garments of maguey fiber or coarse cotton. The rich wore the same clothing fashioned from finer textures and decorated with elaborate embroidery. The many names given to the different kinds of mantles show their interest and importance to the wearers. Wool was almost never made into cloth, since dog hair was all they had, but feather cloaks were highly esteemed. Chiefs wore a fillet of leather [292]
from which hung two tassels, and administrative chiefs had a sort of diadem of gold or jade and turquoise as a badge of office.

The warriors frankly gloried in their costumes. Rich man- 292
tles and ornate feather headdresses were not enough for some, who carried on their shoulders a harness of wicker supporting an elaborate structure in feather mosaic. Others wore costumes modeled on the appearance of an ocelot or an eagle. On specified occasions the priests assumed the dress of the gods and goddesses, whose costumes were sumptuous and ornate and defined by exacting ritualistic marks of identification. (See Plate 61.)

Jewelry consisted of ornaments of copper, gold and silver, 301
shell, various-colored stones, like jade, turquoise, emeralds, 304
opals or moonstone, and mosaics laid on a backing of clay, wood or reed. Large plugs were inserted in the ear lobes of

1:Vaillant A-5 (1928-1936)1941 NU7 Aztec NU7

301 men and women alike. Men often wore ornaments passed
[304] through the septum of the nose or suspended from a slit in the lower lip. Elaborate necklaces and pendants, armlets and leg bracelets, gave brilliance to a costume for state occasions.
302 Cosmetics were not used to touch up nature, as with us, but instead a lavish application of face and body paints in red, blue, yellow, green and black enhanced with prismatic richness the softer tones of their brown flesh. (See Plates 46–47.)
105 It is obvious that the Aztecs were no pitiable craven savages. They lived upon variegated and delicious foods and dwelt in houses that were comfortable and airy. Their dress stimulated the exercise of merited self-satisfaction, not to be confused with the compensations of vanity. Their manner of life enabled them to take advantage of their personal aptitudes and exchange the products of their own creation for whatever they lacked. Articles for daily and ceremonial use were made with the loving care of master artisans, and rare indeed was the object that did not have the impress of some little decorative touch that makes a pleasant possession of a drab utensil. Their crafts deserve to themselves a complete chapter.

Doors into sacred enclosure. *Right:* Gold ornament representing the vertical universe; at top gods play ball, symbolizing the sky and the movement of the planets, next the sun disk, then a flint knife, representing the moon, and finally the earth monster.

[p. 176(A)]

They were painted with white chalk, and with [marks like] hawk scratches. They wore sandals, with a rope for a breech-cloth. They carried on their backs a paper mitre-shaped cap, which had a protruding spindle, cotton flowers, and quetzal feathers.[36]

They brought him to Tezcl's temple where they had placed [the impersonator's] skin upon a wooden bench.[37]

And the costume [of Tezcatlipoca impersonator] was as follows: there was liquid rubber on her lips and a circle [of rubber] on each cheek. She had cotton flowers.[38] She had a ball with palm strips. She had a shell-covered skirt, called a star-skirt. She had the star-skirt. Eagle feathers were strewn over her skirt—it was strewn with eagle [feathers]; it had white eagle feathers, painted eagle feathers. Her shield had a golden disc in the center. She carried the medicinal herb, xocoxóchil. She used a broom; she carried a broom.

Ninth Chapter, in which one heareth of the goddess named the Goddess of Zapotlan (Tzapotlan tenan).

[She was] represented as a woman. From her substance was made turpentine.

She healed men's bodies; those with itch of the head;[39] they who were hoarse used the turpentine unguent on the throat; [they used it] who had sores or pimples on the head;[40] or cracks in the skin of the feet, lips, face, hands, or legs; and when it was cotton, [it was used for] the tortilla-sickness.[41]

In all and in best were used to advantage in indeed many places.

And when the feast day was celebrated, they who sold the turpentine unguent brought shows and show them. They fashioned her image of a dough of amaranth [seeds] and maize.[42] Her old men sang for her; they beat the two-toned wooden drum, and the turtle-shell drum; they rattled rattles shaped like dried poppy-seed pods,[43] and they rattled bone rattles.

Then was she arrayed: two spots were painted on her face; she had a paper crown; large drops of liquid rubber and small drops were sprinkled over her paper crown, and it had quetzal feathers arranged to resemble corn-tassels. She carried the rain-rattlebowl.[44]

88. The corresponding Spanish text describes the scene thus: "*En esta fiesta, hacian como un juego de cañas: de manera que el un vando, era de la parte deste dios, o venagen del dios totec: y estos todos, eran vestidos de pellejos de hombres que eran muertos, y desollados, en aquella fiesta. . . . Los del bando contrario, eran los soldados valientes, y usados, y personas valientes, y esforçados: que no tenian en nada la muerte: andan, arremeten, que de su voluntad salian, a combatirse, con los otros. Alli los vnos, con los otros, se exercitaui, en el exercicio de la guerra: pasauagian los vnos, a los otros: hasta su puesto, y de alli, bolujan buyendo, hasta su proprio puesto.*" Cf. also the description in Sahagún, *op. cit.*, Vol. I, p. 124. The game of cañas in the *Enciclopedia Universal Ilustrada*, Vol. II, pp. 299-300, is described as "*Antiqua fiesta, juego ó ejercicio caballeresco en que tomaban parte dos bandos ó cuadrillas corriendo á caballo, cavaleando gallardamente y arrojándose cañas de las que se empuñaban con la adarga.*" A Moorish exercise, in Medieval times adopted also by the Spaniards, it was reserved to the nobility. It took the form of a picturesque war-game requiring considerable skill in horsemanship and spear-throwing.

89. *MS Biblioteca del Palacio*, Sahagún, *Einige Kapitel*, has *vncan* in the Aztec text, instead of *aiac*, which is in the *Florentine Codex*. Sahagún translates the passage as "they stopped, rested, at the place called Tonecca."

87. Cf. Sahagún, *op. cit.*, Vol. I, p. 124: "*Todos los pellejos de los desollados se vestian muchos mancebos, a los cuales llamaban Totecuti.*" Cf. also *ibid.*, p. 123, defining Tonecca as "*lo mesmo, o honra del dios Totec.*"

90. In the *MS Biblioteca del Palacio* text (Sahagún, *op. cit.*), the word is *mixpolchichiuhcac*, translated as "*er hat im Gesicht die Wachtelbemalung.*" Sahagún also (*Vocabulario of the Aztec Collection*, p. 182) uses the term *mixpolchichiuhcac* (quail face painting).

91. Sahagún (*Gesamtausgabe Abhandlungen*, Vol. II, p. 466) translates *yopi* as "the red people" (Tlapanecs), and gives two illustrations to indicate that they were painted caps.

92. The word *chimauali* means 'whatever anything is made strong.' Word and symbol obviously refer to the strengthening of the reproductive function, to fertilizing, hence we also see the *chimauali* with the four sign projecting between the human couples in sexual union." Seler: *Vocabulary of the Aztec Collection*, p. 180.

93. Seler suggests that the form of the name should be *yacatecuhtli* or *yacatecuhtli* ("the lord, the prince, the leader") (*Collected Works*, Vol. II, pt. 3, p. 57). Torquemada (*op. cit.*, Vol. II, p. 57) says he also was named *Yacatecuhqui* ("*el que tiene la nariz equivoca*"); Francisco Javier Clavigero, in *Historia antigua de México* (México: Editorial Porrúa, S. A., 1949), Vol. II, p. 87, n. 17, adds the name Xiacatecutli.

In *op. cit.*, Vol. II, pt. 4, p. 91, Seler refers to Yacatecutli as meaning "lord of the nose," and to the form Iyacatecutli, which Sahagún uses in the *Florentine Codex*, as "lord of the departed," explaining the connection of the cult of this god with that of Tezcatlipoca, and linking Yacatecutli with Iztapalotqui. Both the latter were among the "old gods."

92. Cut in four pieces and covered with liquid rubber. (Seler: *op. cit.*, p. 92).

93. The corresponding Spanish text states: ". . . *era una cosa, marqueta, que pilar llaman velaci. Y tambien vsan de otra manera de bastón,*

The fifth month they called Tozcatl. On the first day of this month they celebrated a great feast in honor of the god named Titlacauan, and for another name, Tezcatlipoca. This one they held to be god of the gods. In his honor, they slew, in this feast, a chosen youth who might have no blemishes upon his body, [who was] reared in all luxuries for the space of a year, [and] trained in the playing [of musical instruments], and in singing, and in speaking.

Al quinto mes llamauan Tozcatl: el primero dia deste mes: hazian gran fiesta a honrra del dios llamado Titlacaoe, y por otro nombre Tezcatlibuca: a este tenjan por dios de los dioses: a su honrra matauan en esta fiesta vn mancebo escogido, q̃ ninguna tacha tuujesse en su cuerpo: criado en todos deleytes, por espacio de vn año, instruto en tañer, y en cantar, y en hablar.

796 X [305 776] [533]

Chapter 5
Tozcatl

This feast was the most important of all the feasts. It was like Easter, and fell near Easter Sunday—a few days after. This youth, reared as hath been said, was very comely, and chosen from many. He had long hair—down to the waist.

When, on this feast, they slew the young man who had been reared for [the rôle], they at once produced another, who was to die after one year. He walked everywhere in the town finely arrayed with flowers in his hand, and with people who accompanied him. He greeted with good grace those whom he met. All knew that this one was the likeness of Tezcatlipoca, and they bowed before him and worshiped him whenever they met him.

Twenty days before this feast came, they gave this young man four comely young women reared for [the part], with whom for all the twenty days, he had carnal relations. And they changed his array when they gave him these young women: [they] clipped his hair like a war captain and gave him more finery [even] braver [than what he had had].

Five days before he was to die, they celebrated feasts for him and banquets, in cool and pleasant places. Many of the leading men accompanied him. On the arrival of the day he was to die, they took him to a pyramid or sanctuary which they called

X 796 **The eighth month** they called Uei tecuilhuitl. On the first day of this month they observed a feast to [805] the goddess named Xilonen (goddess of the tender 776 maize). On this feast they gave food to all the poor men and women—old men, old women, boys, girls— [735] in honor of the goddess. They slew a woman, on the tenth day of this month, arrayed in the ornaments with which they represented the same goddess.

Al octauo mes llamauã Vei tecujlhujtl: En el primero dia deste mes, haziã fiesta a la diosa llamada Xilonen (diosa de los xilotes) en esta fiesta dauã de comer a todos los pobres hombres y mugeres, viejos y viejas, njños y njñas, a honrra desta diosa: matauã a vna muger a diez dias deste mes, compuesta cõ lós ornamẽtos con que pintauã a la mjsma diosa.

Chapter 8
Uei tecuilhuitl

X 796 For eight uninterrupted days before the feast, they fed men and women, young and old. Then, very 735 early in the morning they gave them to drink a kind of gruel which they call *chienpinolli*. Each one drank 262 as much as he wished. And at noon they placed all in order, seated in their rows, and they gave them *tamales*. He who gave them [out], gave each one as many as he could hold in one hand. And if one of them exceeded the bounds of custom so much as to take [*tamales*] twice, they mishandled him and took from him those which he had, and he went with nothing. This [feasting] the lords brought about in order to give comfort to the poor; for at this time, ordinarily, there is a want of the necessities of life.

X 796 All these eight days they danced and moved in rhythm, men and women together performing the ceremonious movement, all heavily adorned with 536 rich vestments and jewels. The women wore their ● [302] hair unbound; they went with hair down, dancing and singing with the men. This dance began at sundown, and they continued in it until nine o'clock. [373] They carried many lights (like great torches) of resinous wood, and there were many braziers or bonfires which burned in the same courtyard in which they danced. In this dance or solemn movement they went with hands joined [to those of other dancers], or embraced—the arm of one grasping the body of another as in an embrace, and the other likewise [holding still] another, men and women [alike].

Chapter 10
Xocotl uetzi

During the feast of Tlaxochimaco, they went forth into the forest [and] cut a tree of twenty-five fathoms' height and brought it, dragging it, to the courtyard of this god. There they pruned off all its branches and raised it upright, and it remained thus standing until the eve of the feast. Then they again laid it upon the earth with much caution and [using] many devices that it might not bump [the ground]. On the day before this feast, early in the morning, many carpenters came with their tools, and they trimmed it and made it very smooth. After having trimmed it and decorated it with many kinds of papers, they tied ropes and other cords to it and raised it up with much shouting and din, and they made it firm.

As soon as the beam or tree was raised and adorned with all of its finery, then those who had slaves to cast alive into the flames adorned themselves with their plumage and rich ornaments, and they stained their bodies yellow, which was the livery of fire; and, taking their captives with them, they performed a dance all that day, until nightfall.

After the captives had kept vigil all that night on the pyramid, and after having performed many ceremonies with them, they cast into their faces some powder which they call *yiauhtli*, that they might lose their sense of feeling and not suffer so greatly [the

pains of] their death

The fifteenth month they named Panquetzaliztli. In this month they celebrated a feast to the god of war, Uitzilopochtli. Before this feast, the priests of the idols fasted for forty days and performed other severe penances, like going naked at midnight to carry branches to the mountains. Etc.

Chapter 15
Panquetzaliztli

On the second day of this month all began to perform a dance and to sing the canticles of Uitzilopochtli in the the courtyard of his pyramid. Men and women danced, all together. They began these canticles in the afternoon, and they ended at nearly ten o'clock. These dances and songs lasted twenty days.

On the ninth day of this month, they adorned, with great ceremonies, those whom they were to slay. They painted them in various colors; they decked them in many papers. Finally they performed a dance with them, in which went a woman paired with a man, singing and dancing.

On the sixteenth day of this month, the owners of the slaves began a fast; and on the nineteenth day, they began to perform a number of dances in which all, men and women, went grasping hands, and they danced winding back and forth in the courtyard of the aforementioned pyramid. A number of old men sang, and played [instruments] while the others danced.

After those who were to die had performed many ceremonies, there came down from the pyramid of Uitzilopochtli one attired in the ornaments of the god Paynal, and he slew four of those slaves in the ball court which was found in the courtyard which they called Teotlachtli. From there he departed and circled all the city, running; and in certain places he slew, in each one, a slave. And from that point [onward], two factions began a mock battle. Some died in the skirmishing.

Despues de auer hecho muchas cerimonjas los que avian de morir decendian del cu de Vitzilobuchtli, vno vestido con los ornamẽtos del dios Paynal, y matauа quatro de aquellos esclauos en el juego de pelota que estaua en el patio que llamauã teutlachtli: de alli yva y cercaua toda la ciudad corriendo, y en ciertas partes matauа en cada vno vn esclauo: y de alli començauan a escaramuçar dos partialidades, morian algunos en la escaramuça.

[346]

[726]

And Afterwards, at night,

X 796 they ate and drank, and held flowers and those canes of perfume. And they sat in their seats. And each one [302] began to boast of what he had gained; and of the [521] distant parts which he had reached. And he belittled the others for their counting for little; [for] neither did they have as much as he, nor had they gone to distant places, as he had. In this the ones made a great mock of the others for a long space of the night.

manuan flores: y aquellas cañas de perfumes, y assentauanse en sus asientos: y començaua cada vno a jactarse, de lo que auja ganado, y de las partes remotas, donde auja llegado: y valdonaua a los otros de que eran para poco, nj tenjan tanto, como el, nj aujan ydo a partes remotas como el: en esto tenjan gran chacota, los vnos con los otros, por gran rato de la noche.

The Tenth Movable Feast

In the sign which they named ce malinalli, in the second house, named ome acatl, they celebrated a great festival; for they said that this was Tezcatl-
[778] ipoca's sign. In this feast they fashioned the image of Omacatl, and one who felt devotion took it to his house that it might bless him and cause his goods to increase. And when this took place, he kept it and preferred not to let it go. He who would let this image go, waited until the next time when the same sign reigned. Then he returned it whence he had taken it.

La decima fiesta mouible

En el signo que llamauan ce malinalli: en las segunda casa llamada vme acatl, hazian gran fiesta: porque dezian que esto sino era de Tezcatlibuca: en esta fiesta hazian la ymagen de Omacatl, y alguno que tenja deuocion, lleuauala a su casa: para que le bendixesse, y le hiziesse multiplicar su hazienda, y quando esto aconteçja tenjala, y no la queria dexar: el que queria dexar esta ymagen esperaua, hasta que otra vez, reynasse el mjsmo signo: entonce la lleuaua adonde la auja tomado.

The Eleventh Movable Feast

In the sign called ce tecpatl, in the first house, they brought forth all the ornaments of Uitzilopochtli; they cleaned them and shook them out; and they put [them] in the sun. They said that this was his sign and that of Camaxtli. This they did at Tlacatecco. Here they set out, on this day, many kinds of food, very well cooked, like that which the lords eat. They presented all of them before his image. After they had remained there a while, the officials of Uitzilopochtli took them up and divided them among themselves, and ate them. And they also incensed the image and offered it quail. They struck off their heads before it, so the blood should be shed before the image. And the lord offered all the precious flowers which the lords used, before the image.

La onzena fiesta mouible.

En el signo llamado ce tecpatl. En la primera casa sacauan todos los ornamentos de Vitzilobuchtli, los linpiauan, y sacudian, y ponjan al sol: dezian que este era su signo, y el de camaxtle: esto hazian tlacatecco: aquj ponjan, en este dia, muchas maneras de comjdas, muy bien gujsadas, como las comen los señores: todas las presentauan, delante de su ymagen, despues de auer estado vn rato alli, tomauanlas los officiales, de Vitzilobuchtli, y repartianlas entre si, y comjanlas, y incensauan tambien a la ymagen, y ofrecianla codornizes, descabeçandolas delante della: para que se derramasse la sangre delante la ymagen: y ofrecia el señor todas las preciosas flores, que vsan los señores, delante la ymagen.

The Twelfth Movable Feast

[753 774] In the sign named ce oçomatli they said that the goddesses called Ciuapipilti came down to the earth and [that] they harmed the boys and girls, afflicting them with palsy. And if anyone, at this time, sickened, they said that [the Ciuapipilti] had caused it: that he had come upon them. And the fathers and mothers
[784] on these days did not let their children go outside the houses, so that they might not come upon these goddesses, whom they held in great dread.

La dozena fiesta mouible.

En el signo llamado ce Oçumatli: dezian que decendian las diosas llamadas cioapipilti, a la tierra: y dañauan a los njños, y njñas, hiriendolos con perlesia. Y si alguno en este tiempo enfermaua, dezian que ellas lo aujan hecho, que se auja encontrado con ellas: y los padres, y las madres, estos dias no dexauan salir a sus hijos, fuera de casa: porque no se encontrassen, con estas diosas, de las quales tenjan gran temor.

Then the mother of the young man

placed a very fine shift upon her daughter-in-law, and put for her, by her feet, a richly embroidered skirt. And the mother of the young woman covered her son-in-law with a very fine cape, and tied it over his shoulder, and laid a very richly embroidered breech clout at his feet. This done, a number of old women, who are called *tiici*, tied the corner of the young man's cape to the lower part of the young woman's shift. In this way was concluded the marriage, with many other ceremonies, and dinings, and drinking, and dances, which were given thereafter, as is contained in the account of the marriages.

matrimonjo, con otras muchas cerimonjas, y comeres, y beueres, y bayles, que despues se hazian, como se contiene, en la historia del matrimonjo. 585 302 292

They observed two other feasts which in part were fixed and in part were movable. They were movable because they were celebrated in interpolated years. One was observed every four years, and the other every eight years. They were fixed because they had year, month, and day assigned. In the one which was celebrated every four years, they pierced the ears of the boys and the girls, and they performed for them ceremonies for good growth, and they purified them over the fire. In the one which they celebrated every eight years, they fasted before it for eight days on bread and water, and enacted a dance in which they assumed the forms or characters of various birds and animals. And they said that they sought good fortune, as is set forth in the appendix of the Second Book.

Otras dos fiestas tenjan, que en parte eran fixas, y en parte eran moujbles: eran moujbles, porque se hazian por años interpolados. La vna se hazia, de quatro en quatro años, y la otra de ocho en ocho años: eran fixas porque tenjan año, mes, y dia señalados. En la que se hazia, de quatro en quatro años, horadauan las orejas a los njños o njñas: y hazianlos, las cerimonjas, de crezca para bien, y lustrauanlos por el fuego. En la que hazian, de ocho en ocho años: ayunauan antes della, ocho dias a pan y agua, y hazian vn areyto, en que tomauan figuras, o personajes, de diuersas aues y animales: y dezian que buscauan ventura, como esta escrito, en el apendiz del segundo libro. 796^ [304 854] [535 785]

These movable feasts, in some years, displace the feasts of the calendar, as also happeneth in our calendar.

Estas fiestas mouibles en algunos años echan de su lugar a las fiestas del kalendario: como tambien acontece, en nuestro kalendario.

X 796 266 he summoned his blood relations, he assembled them, that they might go to eat at the house of him who had taken the captive.

[262] And here they cooked each one a bowl of a stew of dried maize, called *tlacatlaolli*, which they set before each, and in each was a piece of the flesh of the captive.

[302] They named [the captor] the sun, white earth, the feather, because [he was] as one whitened with chalk and decked with feathers.

X 796 The pasting on of feathers was done to the captor because he had not died there in the war, but was yet to die, and would pay his debt [in war or by sacrifice]. Hence his blood relations greeted him with tears and encouraged him.

And on the morrow, the gladiatorial sacrifice[11] was made. Until early morning, until dawn, they made them hold vigil, all night, until the night was ended. Thus did the captives, those to be sacrificed, pass the whole night until dawn.

From those whom they would offer as sacrifices, once more they took hair [from the crown of their heads], at midnight.

This was called "the sending upward of the eagle man":[12] because he who died in war went into the presence of [the sun]; he went before and rested in the presence of the sun. That is, he did not go to the land of the dead.

And therefore he who took hair [from the crown of a captive's head] kept his hair safely.

[276] Because thus he attained honors, flowers, tobacco prepared for smoking, and [rich] cloaks.

Thus the captive's valor would not in vain perish; thus he took from the captive his renown.

[340] And he who took the captive was adorned, there at [the Temple of] Tecanman, in Tenochtitlan, with white turkey down, the feathers being pasted upon him as hath been set forth in [the Feast] of Quauitl eua.

And the place where, arranged in order, the *tototeeti* remained, was upon white earth or upon grass; for there was white earth in the place where they waited.[13]

And wherever in the city grass was shaken out, upon it they placed, set forth, and exhibited them—

11. See p. 44. Seler, in op. cit., Vol. II, Pt. 4, p. 71, says, in the discussion of agricultural ceremonies of the ceremony, that "The preparation of the ground and the making it fruitful was represented to the people, who flocked together from all directions, by the 'stretching' [illegible]."
12. See note 9; also Seler (*Einige Kapitel*), p. 65.
13. In the corresponding Spanish, Sahagún states: "*pusieron todos arenales, sobre unas hierbas de heno, o de tiçatl, o grama estando allí arenales.*"

X 796 when it was cold, when it thickened and lay in place, it contracted and remained at rest.

And when day broke, the young men and the priests walked everywhere, to all the houses, from one dwelling to another; they went along the roads to all the houses. And also the priests [did likewise].

But when [the householders] made offerings, [the priests] remained quiet. They might not take part when offerings were made, or when they asked alms.

[578] And if [the priests] were met, if they took part, then there was ill-feeling and anger; there was strife.

[431] The youths took [their gifts] to the young bachelors' house and sampled them there.

And the priests carried [theirs] to the priests' house.

Then they departed to their fields, to get the maize god[dess]. In as many places as lay fields, from each field they got a stalk of green maize.[6]

[24] And in the harvested fields, they took only large *maguey* roots[7] and carried them hence to their houses.

[178] They decked their maize god[desses] with flowers and set them up in the tribal temples; then they arrayed them and laid offerings for them.

[262] As fast foods they made, before them, five *tortillas;* they laid them in a basket. And upon it went a hard-baked frog, hard and stiff, its face stained blue, a woman's skirt about its hind-quarters. And they set down a large basket of *pinolli;*[8] and toasted maize [mixed] with beans.

And they cut a section of maize stalk and filled it and crammed it with everything laid out before Cinteotl. They took a very little from every [basket] and let the frog carry it on its back.

And when this was done, it was called *calonooac,* "it resteth in all the houses"; because only in houses, only in the homes, were honors paid to the maize god[desses].

And after sundown, they took [the ears of maize] to Cinteopan, the Temple of Chicome coatl. There they pilfered them and made merry with them; there was skirmishing, blows were struck; all whacked [each other] with them. It was said: "It is scattered."

And furthermore, they bore to Cinteopan, the Temple of Chicome coatl, the maize which was to be seed. Young girls carried it upon their backs.

[302] Some [of the girls] had a long lock of hair on one

9. "*Amamacuelli, sol, ahamacuelli, cabello largo que dexan a un lado dele cabeça ahor cosque quando los sacquilan*" (Molina, op. cit.). *Amamacuelli* (op. cit., Spanish-Nahuatl section) is translated as "*Cabellos cortados y redondos ala cabeça de la cosque.*"

10. Chapopotli. See Sahagún, *Historia general*, Vol. III, pp. 72, 128.

11. In view of the double meanings which make this passage difficult to put into English, reference to later passages in Sahagún's *Historia* is helpful. A sentence in the Bulcodio edition (Vol. I, p. 173) mentions "*los muchachos y muchachas: todos aquellos que tenian cosillas de cabellos en el cosque, que llamaban cuexpalaquas.*" Further on (Vol. II, pp. 331-2): "*Los grandes y ancianos por donde subian los que habian de llegar a los mayores dignidades, eran estos que se siguen: cuando eran pequeñuelos andaban mentidos o remendados la cabeza, y llegando a los diez años dejaban crecer una cosilla de cabellos en el cosque, a la cual ellos llamaban mocuexpaltia; a los quinces años tenian ya aquella cosilla larga, y llamaban mamaquelchiquipil, porque esta ninguna cosa notable habian hecho en la guerra; y a en la guerra sucedia que él y otro, o él y otros iban a ver, o nada, encontraban a alguno de los enemigos, quitabanle la cosilla de los cabellos, y aquella era señal de honra. . . .*

"*Y cuando quitaban la cosilla del cabellillo, dejábanle una cosilla sobre la oreja derecha, que le cubria la oreja a esta sus lado que era el derecho, y esta era porque todo esto provenia nada honrado, que era señal que en compañia de otros habia cometido o alguno; y por haber cometido esto sus compañeros, y haber dejádole la cosilla en señal de honra, le subalternan sus ahuelos o sus tios diciéndole: Niño mentiro, hace honda la cara al cielo, y la tierra; ya tienes otra cara; porque te hiciste y te informaste a cometer en compañia de otros; mira que te subiste nada perdiste y que te cometieron tus compañeros, que no que otro esto cometiesse en compañia de otros, porque si esto fuese pondriaste otra cosilla de la parte de la otra oreja, que pusieron muchacha, y nada te subiste nada que acontecisteis esto.*"

See also Lib. VIII, cap. xxi.

X 796 in his discourse, that he might talk graciously, converse well, and greet people agreeably on the road, if he met anyone.

For he was much honored when he appeared as the impersonator; because he was the likeness of Titlacauan; he was acknowledged as our lord, treated like a lord; one begged favors, with sighs; before him the common people bowed in reverence and kissed the earth.

[827] And if they noted that his body became even a little fat, they made him drink brine, so that he became thin; the salt water thinned him, so that he became lean; he became hard; his flesh became firm.

And for one year he [thus] lived; at [the feast of] Toxcatl, he appeared [before the people]. And when the man died who had been impersonator for one year, he who had led the way, he who had cast [the spear] for one year, who had given commands for one year, forthwith was one chosen to be set in his place, from all whom the temple guardians had saved and cared for at the time that [the captives] appeared [before them].

Thereupon he began his office; he went about playing his flute. By day and by night he followed whatever way he wished.

● [302 567] His eight young men went following him. Four [of them] had fasted for a year; their hair was shorn like [the hair of] slaves, cut and clipped, not smooth like a gourd, nor cut [too] short, not [made like] growing whiskers on the head.

And four warriors, who instructed youths in the art of war, [were] similarly shorn. Their hairdress lay upright on their foreheads.

Then Moctezuma adorned [the impersonator] well and arrayed him in varied garb; he provided him [his appropriate indumentary]. He ornamented him, he adorned him in great pomp with all costly articles, which he caused to be placed upon him; for verily he took him to be his beloved god. His face was anointed with black; it was said: "He fasteth [302] with blackened face." A thick layer of black was smeared on his cheeks. White feathers were placed upon his head—the soft down of eagles. They placed it on his hair, which fell to his loins.

[301] And when he was attired, he went about with sweet-smelling flowers[7] upon his head, a crown of flowers. And these same were hung over both shoul-

7. *Beverris humris Hernandez*, according to Seler (*Einige Kapitel*, p. 97, n. 1, and *Collected Works*, Vol. II, Pt. 4, p. 68). In the former he quotes from Hernández that the flower resembled poppy corn.

ders, as far down as his armpits. This was called "the flowery garment."

And from both ears hung curved, gold, shell pendants.[8] And they fitted [his ears] with ear plugs made of a mosaic of turquoise. And [he wore] a shell necklace. Moreover, his breast ornament was of white sea shells.

And then his lip plug was a slender snail shell lip plug. And hanging from his shoulders was what was like a cord bag called *icpatozin*.[9]

Then they placed golden bracelets on both upper arms, and on both wrists they put carved bracelets with precious stones, covering almost all the forearm. And he put on his net cape like a fish-net of wide mesh with a fringe of brown cotton thread.[10] And his costly breech clout reached to the calves of his legs.

And then they placed his bells on both legs, all golden bells, called *eioalli*. These, as he ran, went jingling and ringing. Thus they resounded. And he had princely sandals with ocelot skin ears. Thus was arrayed he who died after one year.

When [the feast] of Toxcatl was drawing near, when it was approaching him, when it was coming to him, first they married him to [four] women whom they sought out [for him]. He was married in [the month of] Uey toçoztli.

And he left off, scattered in various places, and abandoned the ornaments he had had, in which he had walked about fasting, painted black. His hair was shorn; he was given a tuft of hair tied upon his forehead, like that of a war captain. Thus they bound [his hair], knotting it [with brown cotton thread] called *tochiacatl;* and they tied to his long hair[11] his forked heron feather ornament with single quetzal feathers attached.

Only twenty days he lived, lying with and married to the women. Four women he lived with, who also were cared for, for one year, in the guardian's house.

The first one was named Xochiquetzal; the second, Xilonen; the third, Atlatonan; the fourth, Uixtociuatl.

And still on the eve of [the feast of] Toxcatl, still five days from it, on the fifth day [before it], when

8. "Como arpillas de oro" (Sahagún: loc. cit.).
9. "Llamaua a las arpillas, en ornamento como hoja, de un palmo en quadro de lengo blanco, con sus borlas y flecadura" (loc. cit.).
10. Cf. Sahagún (Bustamante edition), Vol. II, p. 310.
11. Cf. ibid., Vol. I, p. 163. The corresponding Spanish text, however, reads: "con una pluma cortina, semejante aquella ambara de los caballos, dos borlas con sus hazecuelas, hechas de plumas, y oro, y turquesas, muy curiosas, que eran llamadas xiuitoli." Clark (op. cit., Vol. I, p. 80) describes "The first kind of ornaments [which] has a design called, by Sahagún, xiuitoli, because of the ornaments worn in turquoise or red soldier's hair; the ground of which[sic] embossed in a square of dark red, has figures of white feathers. The fringe is also of red turquoise." From this, it would appear that turquoise a red string, and turquoise a red thong of rabbit hide.

And when they were beheaded, they cast and threw theiff toward [the figure of] Uitzilopochtli.

And the quail, when their necks were wrung, went fluttering away, thrashing and striking the earth.

And the masters of the youths took them and gathered them up, stripped off the feathers, and roasted and salted them, seasoning them with salt.

Some they laid aside for Moctezuma, and the rest they assigned to his chiefs, only to the princes. And also to the masters of the youths, who marched in front, and also those [who were] priests.

And all took their large braziers—not their polished braziers. In them were coals and shavings of wood. They heaped it up, raised it, and made a hearth, and fired it with pine branches. And it burned exceedingly.

And they took white incense and coarse incense.[14] And when it was the proper time to offer incense, they laid coals in the incense burner and on it cast the white incense, and raised it as an offering to Uitzilopochtli.

Thus they offered him fire, they incensed him, not only here in the great temple but in their houses, and the tribal temples. Incense was offered all the gods whom they acknowledged.

And after they had dedicated the fire [and incense to the gods], then they cast the coals into the hearth [in the courtyard].

And the young women had painted their faces and were arrayed in red feathers.

And they fastened their sacrificial paper banners to canes. [The banners] were painted in black in what was called a scroll design.

And the rich [women and girls had] narrow cotton blankets thus fastened [to canes], likewise similarly painted with a scroll design.

And two masters of youths, with black paint spread on their faces, stood above and before the round fire vessel. Occupying the leading position, they carried on their backs pine wood cages with small paper banners; they carried them with tump lines which passed only across the chest.

They caused the women to begin the dance; they danced leaping, dancing in the fashion of women. And the women were in the middle, holding their sacrificial banners in both hands. They danced and

14. Thus identified in Seler, op. cit., p. 105.

leaps about. And the priests also danced. It was called "the leap in the month of Toxcatl."[17]

There were paper rosettes fastened upon [the priests'] foreheads; they decked their heads with white feathers. And they smeared honey on their lips; their lips were gleaming. They had paper breech clouts. And their black feathered staves had jackdaw feathers in the form of a cup, and a round ball at the base, also of black feathers. The black feathered staves also were called black rain-bird [staves].[18]

And where they went grasping [the staves] were papers painted with black scroll designs. And these [priests], as they danced, made circles with, and struck, their black feathered staves on the ground.

And only in the tribal temples were those who beat the drums for them, seated upon the ground. They beat the upright drums; they sat beating gourd rattles; they sat rattling gourd rattles and beating turtle shells.

And all the masters of the youths, the young seasoned warriors, and the youths were spread out, dancing elsewhere [a dance] called the serpent dance.

And hence [they named what] was danced a serpent dance, because they moved back and forth, and from side to side, and met each other face to face. They went holding each other's hands as they danced.

And also a number of young women danced, having so vowed, a popcorn dance. As thick as tassels of maize were their popcorn garlands. And these they placed upon [the girls'] heads. And they were painted; down to the thighs were they bedecked with feathers. And [these] reached up to their upper arms. And they went mingling with and among those who danced.

Of these, it was said that they embraced, they embraced one; they embraced Uitzilopochtli.

And these girls were very well guarded, that none might covet them, nor ravish them.

And all who danced the serpent dance were well watched, that none might fall into covetousness.

And if anyone were seen seducing one [of the girls], then the masters of the youths threw him to the ground. They dragged him; they stepped upon him as he lay stretched out; they trampled upon him.

14. "*Vna manta delgada transparente, que se llama tlaxilquemitl*" (*Ibe. cit.*). Elsewhere he mentions "*manta delgada que llaman xquel*" (Bobrado ed., Vol. IV, p. 66).

17. "*Vna flor de papel grande rizada, redonda a manera de rodela*" (corresponding Spanish text). Later, in the same chapter, he describes the chapeau, [illegible] as "*arracimado, que es sobre el parecer.*"

18. "*El cabelleillo, vna flores de papel, sembrea [illegible], que sobresaen a ambos parres de la cabeça a manera de orejas de papel, como medias cimaches,*" and, later in the same chapter, "*vna arracimada, que es parecer vna el cabelleillo, como vna flor hecha de papel*" (*Ibe. cit.*).

[714] 19. "*Almazaron vermeion (arpendimento) colorad the whole of their bodies black except the face, as may be seen from the drawings, but they also painted the hair with a few black stripes on which they sprinkled iron pyrites (aquitiel)*" (Clark, *op. cit.*, Vol. I, p. 91n.).

20. "*Hay otra que se llama yauhchi. Es muy verde, tiene muchas ramas y crecen redor pocos hoyos arriba; (y) siempre hueli; se mezclaba mediciual para los que tienen almorrar, mezclada y batida con el cacao; bate de mezcar, y derramale mezclada y mezclada con el cacao. Aprovecha mezclada para los que tienen ampos; y para los que tienen enbrasos*" (Sahagún, Bobrado ed., Vol. III, p. 279).

[793] 21. Probably the singular of *quacujtiuetzi* is meant by *quacujlli*. Sahagún, however, defines *quacujlli* as the priest charged with the training of young girls dedicated to live in the temple. Cf. *op. cit.*, Vol. I, p. 253.

22. Following our edition, the *Real Palacio* MS contains a few lines which are missing from the *Florentine Codex*; such discordant passages [illegible] *xquel, xuel, in tlachichiualli xuel xuper y yuanuel xuel, xuel yuel yuhcuich, yuel tlacuilolli yuel, yuel yuhcuich, yuel tlacuilolli yuel, yuel yuhcuich, yuel tlacuilolli yuel*—and in the midst of them were what is called a reed cast, made of reeds, with two feathers [upright] upon it. Paper went hanging from it, spreading out from it, painted bagdevisa with stripes. They went carrying it with much reverence.

X 796 [301] mants, the paper shoulder rosettes, the semicircular paper neck ornaments, and the bags for incense, which were purchased only [at the market]; and necklaces of wood, [also] sold only at the market place.

And when they had reached [the end of] the four days, when all had fasted, then at early dawn all began to array themselves.

293 X 796 [302] Then were bedight the fire priests and all [the other] priests. Early in the morning, all put on the shoulder rosettes. And they placed, over them, the paper neck ornament. They all put on the paper neck adornments. And their foreheads were stained blue—they were colored blue—and their bodies were stained. They were painted after the manner of Uitzocuitzal.[24] And in their hands they carried the incense bags. The fire priests carried with them their ocelot-skin incense bags, provided with small, white, sea shells. In four places shells hung from the incense bags.

And the bags of the [lesser] priests were only of paper, painted like ocelot hide, painted to look like ocelot [skin]. Some [incense bags] represented the *uitzitzicuilotl* bird;[25] some represented ducks. Their bags were filled with incense.

X 796 [302] And when this was done, then all went [in procession] together, [that] the feast day might be celebrated. The fire priest of the Temple of Tlaloc led the others. He had put on his quetzal and heron feather crown; his face was coated with liquid rubber; [he had] his mist jacket and his rain mask or his Tlaloc mask, which he put on. His long, tangled hair fell to his loins. Behind him followed, chanting, all the [other] priests, and thus they went to the Temple of Tlaloc.

When they reached there, thereupon the fire priest of the Temple of Tlaloc placed himself. He spread out all the white reeds and leaves,[26] and cactus leaves, strewn with the sweet-smelling herbs; provided with the sweet-smelling herbs.

[413] Then he placed [upon the mats] four round green stones. And when he had placed them there, then they gave him a small wooden hook, stained blue, wherewith he struck each of the green stone balls. As he went striking [each one], he turned around.

24. Seler (*op. cit.*, p. 125) has "*wenn . . . beende das Gesicht in der Art der Huitzocuitzal.*"

25. Dorothéal in Sahagún, Robredo ed., Vol. III, p. 170. Seler (*op. cit.*, p. 125, n. 1) cites Hernández (cap. 18, fol. 32) and defines it as the chichinclane. Cf. also Carlos A. Robelo: *Diccionario de demonimos* (Cuernavaca: Imprenta del Autor, 1904), pp. 542-3.

26. In a description of the Heavens and their regions, Sahagún writes: "*Se dice como hierba todas las hortalizas y cosas que por sí no se hallan, como es la que dicen quauquauqui*" (*op. cit.*, Vol. III, p. 131). Seler (*op. cit.*, p. 126) calls it *Phytolacca*, and cites Hernández's definition in Sagún's *paraiso*.

X 796 **Twenty-sixth Chapter** in which are related the feast and ceremonies celebrated upon the feast in the seventh month, which was named Tecuilhuitontli.[1]

Tecuilhuitontli: When this feast arrived, they celebrated the minor feast of the lords for twenty days. And at this time died—[for thus] her fate then befell her—at this time died [in sacrifice], a war captive's death, [she who was the likeness of] Uixtociuatl, god[dess] of those who made salt, the salt-makers.

X 796 776 317

This Uixtociuatl, so it was said, was thought to be the elder sister of the rain gods. And it was thought that the rain gods were her brothers. [In] one thing she angered and offended them, that she mocked at her brothers. And then they pursued their elder sister over to the salt beds. There she discovered salt—how it existed, how it was formed, and how were made the salt jars; and also salty sand.

And, on this account, greatly did men who lived where there was salt pay honor to her.

X 796 [303 301

And the array of [the likeness of] Uixtociuatl was [thus]: Her [face] paint and ornamentation were yellow. This was of yellow ochre or the [yellow] of maize blossoms.[2] And [she wore] her paper cap with quetzal feathers in the form of a tassel of maize. It was of many quetzal feathers, full of quetzal feathers, so that it was covered with green, streaming down, glistening like precious green feathers.

And [she had] her golden ear plugs. And the golden ear plugs glittered and flashed and were very yellow, like squash blossoms. And her shirt was embroidered[3] to resemble water [waves].[4] And the border of her shirt was as if painted with green stones, designed to represent billowing clouds on the hem [of her shirt]; the edge was painted in a cloud design. And her shirt was designed in the same fashion.

And on her ankles[5] she had placed bells—golden bells—or rattles. On the calf of her leg she had bound an ocelot skin on which were the bells. And when

1. "Fiesta de los señores," according to Garibay ("Relación breve," p. 300); "der kleine Herrenfest," or "kleiner Herrenfest," in Seler (*Einige Kapitel*, pp. 130, 131).
Tower describes this month and the next basically as the lords' months, in contrast to Xilonquilitzli. Cf. Kubler and Gibson, *op. cit.*, p. 26.
2. In *op. cit.*, p. 131 and p. 131, n. 1, Seler refers to "*gelber Ophiomorphe*." Mixcoatl, however, is translated by Molina (*op. cit.*) as "*la cepoja y la flor de la caña de maiz*."
3. Literally, *pentaed*; Sahagún, however, writes "*labrado*."
4. Cf. Sahagún's corresponding Spanish text: also Plate 24.
5. "*Las empulseras de los pies*," in Sahagún's Spanish. Cf. also Anderson and Dibble, *op. cit.*, p. 1, n. 9.

his vassals. Because verily there was much hunger; when dried maize was costly, then there was much want, [and] it was hard to gain a livelihood; [and] many then were our dead.

And until the time that the Feast Day of the Lords came, upon every day there was song. When singing and dancing began, [it was] toward evening, when only little sun shone. Thereupon fire was laid in the braziers; flame was put upon the braziers.

And the braziers were arranged and ordered in six rows, and in each row were ten [braziers] and [each] brazier was two fathoms thick; and each was as tall as one's hip.[3]

And thereupon all went forth from the house of song, coming singing and dancing. Between [pairs of men] came the women. Light women, harlots, chosen —picked out, set apart.

And they went together, they went taking by the hands the honored ones—the young chieftains, the leaders of the young men, and those with shorn hair, the Otomí, and the noblemen [not warriors. These last] were not arranged in order; of their own free will they placed themselves near the others.

And richly were the women arrayed and bedight; all good were the skirts and shirts which they had put on. Of their skirts, some had [designs of] hearts, some were [embroidered] with a mat design like birds' gizzards, some were ornamented like coverlets, some had spiral or leaf [designs], some were of plain, fine weave. All had borders and fringes; all [the women] wore skirts with borders.

And of their skirts, some had brown [streamers] hanging, some had smoke symbols, some had black [streamers] hanging, some had house designs, some had fish [patterns], some were of plain, fine weave. And the neck [openings] were all large, and their borders were also deep and wide.

And when they danced, they unbound their hair; their hair covered them like a cloak. But they brought braids of their hair across their foreheads.

And they were not decked with feathers; neither were their faces adorned with paint.

And thus were bedecked the chieftains: their array consisted of the cloak of netting. And the brave warriors, they who had straw lip plugs, they had white net cloaks with shells set in fish patterns. [These] were called their vermillion net cloaks.

3. Cf. corresponding Spanish text. Literally, [illegible] may be rendered "two ten tube [s] in their embrace." For [illegible], Sahagún has "six rows."

x 796 And all the men, whether leaders of youths, or
292 youths, had only black net cloaks, all with eyelets
on the border, and all had turquoise [ear plugs].
301 And those who led had only bell-shaped ear plugs.[4]
304 And those who had bell-shaped ear plugs, also had
lip plugs. Some were like lizards, some like dogs,
some like a broad-leafed water plant, some rectangu-
lar.

[729] And the youths who already wore [their] hair
long [in token of war exploits] had lip plugs which
were rounded.

And all the [others] who were only youths [had]
only circular lip plugs, which they set in place.

[701] And the leaders of the youths bore breast plates
made of small, white, sea shells. And those with
shorn hair, the Otomí, wore their neck bands with
round pendants.[5] These were shells.

And the shorn ones were provided with bird-
formed lip plugs; and the Otomí were decked with
lip plugs formed like the broad leaf of a water plant.

And those who were diligent to be leaders of the
youths bought themselves real sea shell neck bands,
all clear and limpid. And the lower class bought
themselves [common] shell-fish for their neck bands,
[which were] only yellow, not hard, and not very
costly.

x 796 And those who had taken captives, the leaders of
the youths, carried their feather shoulder devices in
293 the form of birds. They carried them upright over
their heads.

[301 And the captains carried upon their shoulders
714] feather devices [formed like] trees, tied in three
places with eagle feather clusters bound with ocelot
skin. And at the base they were wound in three
places with red string.

And some raised up quetzal feathers in the form
237 of corn silk; some a forked heron feather ornament;
x 796 some set up the head plumage in bird form; some
the device made of diverse quetzal feathers.

293 And upon their legs, upon their left legs, they
placed hooves, real deer hooves. And the thong
was of real deer skin, cut thin, cut into narrow strips.

x 796 And thus were they variously painted: Some placed
● 302 a black stain upon their cheeks, called "black cheek
ash vase," and laid pyrites [upon the stain]. And
some had a black [stripe] upon their foreheads, [in

5. Seler (op. cit., p. 144) has drawn Perlenkleidung for pendants-for-hair.

a hand] from ear to ear, which was called "black sweat," and they also applied pyrites [to it]. And some extended a black [stripe], called "a plaster of rubber," to their faces, and also it was sprinkled with pyrites.

And thus was their hair shorn: All were shorn like young warriors; together, all were shorn alike in the manner of young warriors. And those who had their temples closely cropped, were well shaven down, well scraped clean with a sharp piece of turtle shell. And they applied yellow ochre to their [remaining] hair; they colored it the color of maize flowers.

And thereupon, when they danced, they carried before them torches, pine fire brands, which flamed with much crackling and hissing. And as they carried them, the leaders of the youths [went] squatting because of the burden, as if running with thighs bent. And the resin, as it were, fell in large drops, and the live coals scattered and fell one by one. And the [charred] pine wood fell bit by bit to the ground.

And along the sides the lighting was only from fire ladles held in the hand. They who gave light were youths who had fasted twenty days. They were spread out in a circle, ranged on the sides. On one side were those of Tenochtitlan, and on the other side were those of Tlatilulco.

And they did not dance; they did only one thing—they only provided light. And they were on guard and kept close watch on people; their office was to be attentive that none might dishonor a woman; that none might look upon a woman, lest one might jest [with a woman].

If anyone was seen even only intending it, or trying it, maybe later—next day or two days hence—they punished him. They beat him with flaming pine boughs.[6] Verily, they left him for dead.

And when all were dancing, sometimes Moctezuma emerged and came forth to dance, and sometimes he came not forth. Only if he wished he did so.

And that they might go in line when they danced, they held one another by the hand or about the waist.

And some they grasped by the hand; all grasped hands. And thus they kept on with their feet, that they might take the dance steps all together with their feet. And they whirled about repeatedly; and they passed by the braziers, proceeding among [them]. They went back and forth among the rows of braziers. When they had reached the end [of the

6. See Plate 28.

They said unto him:

"Go, my friend! Though thou art a brave man, a warrior, how may we care about thee? Wherever our foes come rising against us, may we die as brave men!"

And these were the words which they said unto him; and much else besides.

And thereafter, when they had cast him out, he slowly crept away, going backwards and on all fours, lamenting as he went. Thus he went off, nevermore to sing and dance with the others.

And the matrons cast out the woman. Nevermore would she take up the song and dance with the others. Nevermore would she clap hands with the others [in dance]. Thus they dismissed her; the leaders of the maidens cast her out forever.

And the woman who had sinned evermore went alone. Never might she hope once again to sing and to dance with the others.

And the one whom they had punished because of the woman, then married her, and quieted the affair with her.

And before the real feast came which they called Uei tecuilhuitl, on the tenth day, when the woman [who was the likeness of] Xilonen died, her face was painted in two colors. Thus she was stained yellow about her lips, and her forehead *chili*-red. From her paper cap, which had four corners, hung quetzal feathers in the form of maize tassels; and [she wore] a wide neck band. Her neck piece consisted of many strings of turquoise. She wore a golden disc, as breast ornament. Her shirt and skirt had the water lily [flower and leaf design]. She wore princely sandals, carmine-colored sandals. Her shield and her rattle stick were *chili*-red. In the four directions she entered, or went down into, the sand.[7]

For this reason was it said, "She goeth into the sand": in this way she foretold her death—that on the morrow she would die.

She began the feast day when she entered Tetamaçolco. The second place where we went to arrive, we reached [to accomplish the ceremony], and it was a place named Necoquixecan. The third place in which she entered [the sand] was Atenchicalcan, and for this reason was it called Atenchicalcan—that here gushed forth the water, and also here faded away the

7. Entering the sand was evidently a ceremony literally enacted, and logical in view of the attributes of the deities whose festivities were honored by it. The explanation in both Sahagún's Spanish text and the Aztec column is not explicit. The four places in which Xilonen entered the sand may be identified in modern Mexico City and are associated with water and sand. *Apaxio* is probably an assimilation of *aapaxio*.—Angel María Garibay, personal communication.

wind. And the fourth place which she entered was over there at Xolloco. [And] there she stopped.

[For] these were a part of, and carried together, the four year-bearers—Reed, Flint, House, and Rabbit. Thus do the year-bearers go describing circles, whirling around [as a measure of time].

When, at early dawn, Xilonen was to die, all during the night songs were sung after the manner of the women. Vigil was kept. Everyone passed the night watching; they slept not; the women remained sleepless. They sang the songs [of Xilonen].

And when day broke, then began the dancing. Verily, everyone—the leaders of the youths, the leading warriors, and the valiant warriors bore maize stalks. These were named "bird banners."

Likewise the women danced—those who were with Xilonen. They were pasted with red feathers. And their faces were painted with yellow ochre. Also they colored their faces in two colors: about their lips they were yellow with ochre, and their foreheads were stained with the red of anatta seeds.[9] [They bore] their wreaths of flowers upon their heads, and the leaders had garlands of the yellow flowers of the *Carophyllus mexicanus* [about their necks].[9]

These women were known as priestesses. They mingled not with the men, but remained at one side. They were describing circles, and enclosing Xilonen. They sang for her after the manner of women. These women were called "the hanging gourd."

And the warriors danced before [Xilonen], following a serpentine course.

And for this reason were [the women] known as "the hanging gourd": the two-toned wooden drum, which they beat as they went, had tied to it a gourd, which was under the drum, which looked as if it were hanging beneath. They who struck the two-toned drum went carrying a little drum under their arms, which they beat, as they went, with rubber-tipped drum sticks.[10]

And the priests, [who] attended them, went blowing horns; they blew shell trumpets as they went. And they went strewing, scattering, and casting incense as they went to meet Xilonen.

And the fire priest, who was to slay [Xilonen] as

given the name Itztlacoliuhqui, "Curved Obsidian Knife."[9] This [Itztlacoliuhqui is god of] frost. [Cinteotl] accompanied [the other]; they came together—not at a run, but at their leisure, approaching and slowly moving toward the temple, where died [she who was Toci's likeness]. Again they took their places there.

And upon the morrow, when dawn had reddened and it was light, then [the wearer of the skin of Toci's likeness] climbed up to place herself upon the edge [of the pyramid]. And the noblemen, [who] already stood awaiting her, then all converged upon her. Then they ministered unto her. One of them applied feathers to her head and her feet—soft eagle down; another painted her face; another offered her her shirt with the eagle design, and her skirt, which was only painted; another decapitated a quail for her; [still] another set incense before her. [All this was done] very swiftly. Then it was quiet; then all departed.

And when they had left, then came forth her rich vestments, called her paper crown and her market place banner. And her paper crown was wide; in the middle was the market place banner. There were five [banners in all]. In the midst was the one market place banner, and four [of them] were on the sides—two on each side. [This headdress] was called *meiotli*.[10]

And when they had attired her, then they brought the first four of the captives before [the other captives]. Then they stretched one [of the four] out upon the offering stone; she herself then slew [the victim] as an offering. She cut open the breasts of [all] four in the same way.

When she had slain these four, then she left [the others] in the hands of the fire priests, that they might slay the rest of the captives. Then she went where [earlier] she had gone to get her son; she went to bring her son, Cinteotl or Itztlacoliuhqui. At a little distance, her Huixtocs went ahead. They were girt with twisted [paper] breech clouts, and had their mirrors on the smalls of their backs, and she bore her cotton blossom and precious feather spindle [with unspun cotton].

And the medicine [women] and those who sold lime went ranged on both sides, singing. The old priests proceeded, intoning the song, striking a small,

9. This headdress is illustrated in the *Tonalamatl of the Codex Borbonicus* and of the *Aubin Collection*.
10. Cf. corresponding Spanish text. Seler (*Einige Kapitel*, p. 177) relates the term to *mitl*; possibly it could as well be related to *meiatl*.

X 796 714 richly adorned, with much gold, covered with gold, and with many quetzal feathers, covered with quetzal feathers.

And when they had been given these devices, then they went to perform the hand-waving dance. Moctezuma led it, wonderful [to look upon] as he moved. Before all they displayed the arms and insignia, glistening far like the sun's rays, glittering greatly—these devices.

X 796 And after this, when it had ceased, when the sun was near setting, then came forth [the priests of] Chicome coatl,[12] representatives of those wearing the skins of flayed sacrificial victims who, when [the likeness of] Toci died, also died at the same time.

Then these issued from their temples, to strew seeds [of maize] here at the banquet table of the devil [Uitzilopochtli, which is a pyramid] not very high.[13] And when they had climbed up [the pyramid], then [241] they flung, sowed, and scattered the seed among the onlookers—white maize grains, yellow, black, red;[14] and squash seeds. All scrambled for them, as if stealing or snatching them, and in truth fought over them.

And the maidens who belonged among [the priests of] Chicome coatl were known as priestesses. They [314 289] bore upon their backs the ears of dried maize, seven ears each, striped, painted well with liquid rubber, well girt in paper and wrapped in costly capes. And [302] the priestesses who carried them upon their backs had their faces painted and [their arms and legs] pasted with feathers. And also they proceeded singing as they went; the priests of Chicome coatl intoned the chant for them.

And when this was done, when they had scattered the seed, thereupon [the priests] went back whence they had come. Then were brought down the [white] [317 237] chalk and [white] feathers, which lay in a wooden vessel, from above, [in the Temple of] Uitzilopochtli. And he who brought down the chalk was the *fire* priest. When he had come down to reach the base of the pyramid, then he placed it there on the landing.[15]

And when he had placed it, then set forth the chiefs, running hard and fast. In truth then were beheld the fast and light runners. He who came first quickly took for himself a handful of feathers. Then

18. "*Pusiaronle delante, en un lugar que se llamaba cuauxalpa, que era un espacio, que unos eran los grados del cu, y el patio abajo, al qual espacio subia por cinco, o seys, grados*" (corresponding Spanish text).

at [the village of] Uitzilopochco. It was there at the [spring called] Uitzilatl, in a cave. With cypress[4] branches they stopped [the mouths of the jars] as they went. They proceeded bearing [the water] with them.

vmpan ca vitzilatl, oztoc, avevetica in qujoaltzatzacutivi, intlan qujoalaantivi: 796x 778

When they had taken [the water] hence, they thereupon sprinkled it upon [the victims], there at the foot [of the Temple of] Uitzilopochtli. And there they gave [the victims] their paper vestments, their paper adornment, in which they were to die. And they painted them with stripes, in blue, from their feet up to their knees; and from their hands up to their elbows. And their faces they stained in horizontal stripes of alternate colors, light blue and yellow.[5] And they inserted nose plugs made of an arrow and a half disc.

que quiere decir, lavadas, porque las lavaban y regaladas para que engordaran, para que no corran fuera cabrones cuando las hubieren de matar y comer; entonces estas cabrones en Atzompanaco, porque allí había farra de cibas y allí las revolían las que traían en cabrones."

The *Real Palacio* MS (Garibay, op. cit., p. 317) reads: "*Auh inic mococo cuahcoai yehica in ichanah mochipa cahiyaqui ontetlaiz in iaquich cuah ommaltilitl*"—"y se dice el que hacía gente porque a su cabrera siempre la hacía con agua caliente, cada uno de los veinte días."

4. Sahagún (Codexel Wurdig, Vol. II, Pt. 6, p. 59) calls *ahuehuetl* evening cypress (an emblem of kingly power). In Sahagún (Robredo ed., Vol. III, p. 332) it is defined as *Tamalhuan ennamanaoan Tua*; the corresponding Spanish text has "*hojas de cedro.*" See J. Ignacio Dávila Garibi, *Epítome de raíces nahuas* (México: Editorial Cultura, T. G., S. A., 1949), Vol I, pp. 154ff., for some notes on the etymology of *ahuehuetl*.

5. Sahagún, in *Codex Vaticanus Mr. 3773* (*Codex Vaticanus B*) (Berlin: Druck von Gebr. Unger, 1902), p. 8, describes this face painting (*ixtlan chalaua*) as *Geschr in Querstreifen*. The stripes, although of different color, are characteristic of Tezcatlipoca.

6. Corresponding Spanish text: "*dueños de los cautivos.*"

7. "*Comian al medio dia*" (*loc. cit.*); "*Ho ueno (ueu ainouil) ou Tage (ou Mittag)*"—Seler, *Einige Kapitel*, p. 204; "*comido a medio*" (Garibay, op. cit., p. 312).

Thirty-sixth Chapter, where are related the feasts and sacrifices which were made in the days of the seventeenth month, which was called Tititl.[1]

Seventeenth feast: this was known by the name of Tititl.

Upon [this] feast died a person named Ilama tecutli—[one in] her likeness, a ceremonially bathed [slave].[2] The majordomos procured her.

And the adornment of [the likeness of] Ilama tecutli was [as followeth: she had] her white skirt, her white shift—completely white. And over this she was girt with [what was] named the star skirt. This was bedight with small sea shells, on cured skin cut into long, thin strips, [with] shells set at the end of each [strip]. She wore it about her hips over [the other skirt]. When she walked, much did [the shells] jingle, the pleasant sound [carrying] far. And her sandals had white toes, woven with cotton threads.

And her shield was covered over with white clay and pasted with eagle feathers. Its center was made of eagle feathers, sewn to the middle [of the shield], and it had pendants at the edges, of heron feathers, and [tassels shaped like] grasshopper heads, of eagle feathers, hung at the point. And in [the other] hand she bore her weaving stick.[3]

And her face painting was in diverse colors. About the lower part of her face, they spread black. It was said, the lower part of her face was blackened. And upon her nose and forehead, they laid yellow ochre.

And her eagle feather headpiece, a headdress with eagle feathers arrayed upon it, consisted only of hair, twisted, arranged and well disposed, braided and intertwined with itself. The headdress was called *tzompilinalli*.

1. "Entronizamiento." Caulley suggests (*op. cit.*, p. 314). Orozco y Berra (*op. cit.*, Vol. II, p. 39) writes: "Tititl. *Tempestades grandes, aguaceros espantosos; Rayorial, relámpago y truenos terribles.* Como recientes como fueron las interpretaciones de Rayorial, y como la carga del verbo titiria, redoblar dinamos de la campana." Tezozomoc (*op. cit.*, p. 380) amplifies his version thus: "porque en este de frío, y helados, los quales acaecían muchos, por la poca ropa de que vestían, y porque por este mesmo tiempo, embebían aguardiente, con Guayavas, y Ciruelas, que tenían las cosas Provisiones contra los calores, y se embebían, y desmayaban muchos de ellos."

Durán (*op. cit.*, Vol. II, pp. 191-2) writes: "*quiere decir calzar . . . imaginaban en el cielo dos niños embrazados el uno al otro. . . . hablo hablar de temporal y huracanes cuando eran cuatro de los mesmos.*"

The Tonar Calendar refers to the gods stretching and then supporting "the machine of the world" because of the violent winds. Kubler and Gibson, *op. cit.*, p. 34.

2. Cf. Anderson and Dibble, *op. cit.*, p. 1, n. 5; also supra, pp. 130-31 and n. 3.

3. The shield and the weaving implements of the goddess are clearly illustrated several times in the *Codex Borbonicus*. Paso y Troncoso (*op. cit.*, p. 273) then describes the shield: "*la rodela, que se acostumbraba usar hasta de los descapitados que hacen despues los indios, es blanca; tiene un cuero de pelaxaxe de aquellos pagados en el centro; y tiene cuatro rapacejos atras y cinco de pelaxaxe: unos pequeños de garzotas, colmadas (que algunos han*

work which they made.[6] They put upon it a mask made of [a mosaic of bits of] shell. The lower part of the face was blackened, made black with black stones called *tezozti*. And they striped the face horizontally with black mirror stones.

And upon his head they fitted a ball of yellow parrot feathers; the device for the back of his head, made of precious feathers, served as the lock of hair of the back of his head. And they set upon him his flame headdress, made of feathers from the neck of an eagle.[6] This glowed, and [it had] plucked [single] arara feathers set in order.[7] When he put it on, it appeared in truth to flare up. And his vestments were made only of arara feathers—a red arara feather cape, which trailed long.

And they laid before him *tortillas* made of uncooked, ground maize,[8] or small *tortillas*. They ground the maize. And when it was [ground to a] flour, then they mixed hot water with it, and afterwards it was sweetened. Then, they offered the *tortillas*, some [of which] had shelled beans, cooked, not raw.

And when they had set Milintoc in place, then severally all the common folk made offerings before him, coming together each with five [*tortillas*]. A great quantity of small *tortillas* were heaped up before him.

Similarly the youths and small boys were ranged in order; they hung on sticks the serpents and all the small animals, as hath been said. They offered them to the old men, and the old men cast them into the fire. And the quite small serpents and the other quite small animals burned up and charred. And the well-grown serpents, when they had been roasted, they went to take out, casting them forth upon the hearth. There they were piled up. Later, the old men of the tribal temple ate them.

And the youths and small boys then came forth, and they offered each of them a small *tortilla*. Then they departed. And after this the small *tortillas* were eaten.

Thereupon [all] were refreshed [with wine]; the old men refreshed themselves there at the Temple, the tribal shrine, of Milintoc. And the wine makers, those whose office it was to make wine, left with

x 796 when he had been living in the likeness of another,
[548] had walked with head high, had lived as a captive, had been drunk, and had gone in high esteem.

And for this reason was [the month] named "Izcalli hath ended": all the small children, all of them they took up and lifted by the neck. For it was said,
[827] they [thus] grasped them that they might grow; thus they would speedily grow tall; they would waxx great and strong.

And they divided the heart of the *maguey* plants;
[828] they broke, peeled, and opened it. And they cleaned the cactus and pruned its branches, because thus it would quickly be given new life and growth.

x 796 And at this [feast of] Izcalli, there also came to
852 pass, every four years, the bringing out of the children and the drinking of wine by the children. And then the chiefs danced a lordly dance, along with their courtiers. And they put on their wigs of hair; in truth they were head pieces made of long hair and
[301] covered with green stone. [The hair] fell, verily, to the chiefs' waists.

And for this reason one said that the children were brought forth: the fathers and mothers of all the small children first sought out those who would bring them to the priests' dwelling, a place named Tezcacoac—a woman and a man whom they invited.
[608] It was said that they were to be uncles and aunts [of the children]; they became uncles and aunts [for them].

And not their kin did they take; they secured only their friends, whom they chose and to whom they
[431] gave gifts. They laid out capes and breech clouts for us men. Likewise, for a woman they laid out her skirt and shirt.

At midnight they took [the children] to the priests'
[304] dwelling. There they pierced and drilled their ears. [And the children] cried out [as] the pointed bone pierced their ears. They drew through a thread of unspun cotton, and bound it to them, as the little ones cried out and squirmed, and shed tears. And
● [302 they pasted upon their heads yellow macaw feathers
237] and soft down.

And the women who became aunts were pasted
[608 with red feathers, but only upon the legs and arms,
302] and they covered themselves with their paper flowers, which were called their noble flowers.

When they had pierced [the children's] ears, then they took them to their homes. Here they sat attending them; they sat in vigil, awake, [thus] remaining

A True [Relation] of Still Other Offerings with Which Similarly They Paid Honor to the Devil.

Hanging [an Object] over the Breast.

Thus was done the hanging [of objects] over the breast; thus was the tying with loose cotton thread: they tied [them] about the wrists and the necks of small children and [suspended on the cords], in small bags, *tortillas* made of green maize. Here [in the *calpulli*] they set forth these, on small jar-stands, and small earthen jars, and lifted the jars up by the ears, and with their hands went filling their bags with water. And when they had reached the twentieth day, when [it was the feast] known as Teotl eco, [that was] when they untied the feathered threads which they had about the small children.

[For] Pain.

[308] And [for] pain, thus was done upon the feast of [the god] Acolmiztli: the small children were ornamented in feathers [applied to them]; in colored feathers, [set] everywhere on their bodies. And the old people similarly applied feathers on their stomachs, over their hearts, and upon their backs. Thus they set feathers upon them—so it was said—because then Acolmiztli would not bewitch them.

[p. 36(H) is blank]

SEVENTH PARAGRAPH, in which is told how the singers bedizened themselves when the ruler would dance; and of that in which they would dance.

Mixcocalli: there were established all the kinds of singer-dancers of Tenochtitlan and Tlatilulco. There they awaited the word of the ruler, that he would dance, or try some song, or learn some new song. All this the singers prepared, all that was necessary—two-toned drums, rubber drum hammers, ground drums, rattles shaped like dried poppy heads, copper bells, flutes; players of two-toned drums and ground drums, intoners of chants, leaders of the dance; and all the properties used in the dance.

If the song were to be intoned after the manner of Uexotzinco, they were adorned like men of Uexotzinco, and spoke even as they did; they were imitated with the song and in their adornment and their equipement. Likewise if a song were to be intoned after the manner of Anauac, the speech of the men of Anauac was imitated, and their adornment as well as their equipment. Likewise, if a song were to be intoned after the manner of the Huaxteca, their speech was imitated, and their headdresses were taken, with which to imitate them in coloring their hair yellow; and the masks [had] arrow marks [painted] on the face, noses pierced like jug handles, teeth filed [to a point], and conical heads. And they [were clad] only in their capes. Likewise [they did] other songs.

1. In Hernández, op. cit., I, p. 34, *cozcaxochitl* is identified as *Dahlia coccinea*, Cav. Sahagún (op. cit., I, p. 33), however, says of *cozcaxochitl*: "Es Bálsico, *cozcaxochitl* de colorado encendido, *indígena del país, cultivada también por ahora.* (Lagunería vulgarea, vez.)." Manuel Urbina, in "Plantas mencionadas de los antiguos mexicanos," *Anales del Museo Nacional de México*, segunda época, Tomo I, pp. 515sqq., 519, mentions two kinds of *cozcaxochitl* (*cozcatl*, *xochitl*), of one of which Hernández is quoted to the effect that it has "*flores coloradas purpúreas*". Dr. Olivo le citaba (Bot. de Fernandéz, II, p. 276), giving *Pennisetum atropurpureum* D. C. for *cozcatl*; Urbina claims it is *Amaranthus atropurpureus* Hamb. or Hook.

2. After its pattern, the *Real Academia de la Historia* 383 has *mixquauxpilitic*—they left a tuft of hair over the forehead.

302 tuner upon their heads; it was dyed with indigo,[3] so
386 that their hair shone. The teeth were stained with cochineal; the hands and neck were painted with designs—the necks were covered [with painting]. The stomach and breasts were [also] painted with designs.

515 They bathed in the sweat house and with [soap
562 and] water. They were held in esteem. They were modest, good, and of noble [mien]. Thus did they
[343] speak—attentively, and respectfully of others; they were diligent and considerate.

Twenty-first Chapter, in which is told how all arose through the ranks until they became judges.

And behold how began the life of the young boy. At first, while still a small boy, his hair was shorn. And when he was already ten years old, they then let a tuft of hair grow on the back of his head. And when he was fifteen years old, then the tuft of hair became long. [This was] when he had nowhere taken captives.

And if he took a captive with the help of others —perchance doing so with the aid of two, or of three, or of four, or of five, or of six, at which point came to an end [the reckoning] that a captive was taken with others' help—then the lock of hair was removed. And thus was the division of their captive: in six parts it came. The first, who was the real captor, took his body and one of his thighs—the one with the right foot. And the second who took part [in the capture] took the left thigh. And the third took the right upper arm. The fourth took the left upper arm. The fifth took the right forearm. And as for the sixth, he took the left forearm.

And when the tuft on the back of his head was removed, he was shorn so that he was left [another] lock: his hair dress kept, on the right side, the hair hanging low, reaching the bottom of his ear; to one side [only] was his lock of hair set. When this [was done], he assumed another face, he appeared otherwise, so that it might be seen that he had made a captive with the help of others [and that] the tuft of hair on the back of his head had been removed.

And then his grandfather, or his beloved uncle, addressed him. He said to him: "My beloved grandson, the sun, the lord of the earth, hath washed thy face. Thou hast taken another face; and thou hast gone to throw thyself against the foe. Let them take thee if, without profit, once more thou takest a captive with the aid of others. What wouldst thou be? Wouldst thou have a young girl's lock of hair? Take care lest thou again take a captive with others' help. Cast thyself against our foes."

Appendix B

Continuation of the Twentieth Chapter[1]

. . . Then were rewarded the seasoned warriors who had brought word of the great veracity of the four-hundred count.[2]

And in this wise the messengers entered; if the flesh of men had been taken captive, it was thus soon made known—all came tying and binding their hair, for the flesh of men had been taken and they thus made it evident. And much did the common folk rejoice when the saw them [and noted] that they came binding [their hair]. They said: "And so the flesh of men hath been taken captive; for all the messengers go with bound [hair]!" And if some came separate [from the others], and came no more with their hair tied and bound, but went with it quite loose, thus they made it known that [our men] had been made captive and that there had been losses in the war. And when the common folk saw them, then a cry of grief arose. Then they said: "And so there have been losses!"

And the noblemen, when they had taken some captives, did not anoint themselves with yellow but rather stained themselves with red ochre, which they put on all over; and they were passed with eagle down. And Moctezuma rewarded them all with princely capes and breech clouts of great value and high honor, and with preciously wrought quetzal feather devices [ornamented] with gold, and with shields with, perhaps, quetzal feather garlands—very rich shields.

And if one's captives came alive, then he had towards guard them, and they took great care of them lest they take sick; perhaps it might be twenty or forty that they would guard.

And at the time when the captive was to die, then

Appendix C

Continuation of the Twenty-first Chapter[1]

. . . He alternated [his lip plugs] when he fitted them in. And [Moctezuma gave him] his head bind [with two tufts] of eagle feathers [ornamented] with obsidian knives fashioned of gold, and his cape with, perhaps, the serpent mask design, or the earthen vessel fashioned of feathers, or the ocelot cape with a red border; and a breech clout with long ends, having either the eagle claw or the market place design.

At that time he acquired new sandals—not embroidered nor cut according to a pattern, but black, with their thongs of either orange or red leather. And when he went to the palace, he put the sandals on in order to go along the road. He went receiving great honors, because he was Moctezuma's chieftain. He proceeded with much acclaim. And when he reached the Eagle Gate he drew off the sandals which he had put on; he was no longer shod when he entered the royal palace, where were the great men dexterous in arms, the war leaders.

And also at that time he won the title known as general or commanding general. If the general or commanding general were to die, then [another] would be chosen and selected [from among] those who had been made their deputies. They said that they had become lords of the sun.

And all the seasoned warriors, who had entered the field of battle, all these Moctezuma rewarded. When the Feast of Tlacaxipeualiztli was celebrated, he gave each of them four pieces of black cloth, each eight measures broad. And likewise he gave the leaders of the youths the cape of scorpion design with a striped, orange border and the carmine colored breech clout with the wind jewel design at the ends.

And [as for] those whom we knew to be seasoned war leaders and leaders in the fray, then started [the custom] that Moctezuma [had] the hair of those who were chieftains cut as shorn ones or as Otomí [warriors].

When and wherever war was proclaimed, always they remained guarding and paying heed to

with eagle down — with tufts of feathers. It was called *tewarilli*. And the shield banner was painted like the blood banner. And his four arrows he held together with his shield. And his left arm band was hanging from his arm; it was composed of [strips of] coyote fur, and from it hung paper cut in strips.

And when dawn broke, when it was now the feast day, early in the morning, then those who had made vows before him unwrapped him. Before him they stood in one row and offered him incense; before him they laid all manner of gifts — feast foods, rolls of amaranth seed dough. And this was when they had not yet taken him up and elevated him to Itepeioc. And all the men, the young, seasoned warriors, were as if determined and eager to proceed with and observe the feast, and then show, exhibit proudly, and demonstrate it to the Spaniards.

All hastened and ran, as they made their way toward the temple courtyard, in order there to dance the winding dance. And when all had assembled, then the start was made; then began the chanting and the winding dance. And those who had fasted twenty days, and[9] those who had fasted a year, stood aside facing the others. Those who hemmed in [the dancers had] their pine cudgels; whosoever tried to leave [the dance] they menaced with the pine cudgels. But one who would [leave to] urinate took off his net cape and his forked heron feather ornament. But one who did not at once obey, who would not be excluded, or who was mischievous, they soundly beat his back therefor, [or] his thighs, [or] his shoulders, and thrust him outside. They cast him out by force; they threw him on his face — he went falling on his face; he fell forth on his ear. No one in their hold took his leave.

The elder brothers of Uitzilopochtli — those who had fasted for a year — were much feared, looked upon with terror and awe, and dreaded. And those at the head, the great leaders, the participants, might leave. They did not detain them. Yet all the small boys, those with the lock of hair at the back of the head, with the back lock of hair, and those with the jar-shaped hair dress — they who had taken a captive with others' help, — the leaders, those called leaders of young men, who were unmarried, who had gone [to war] to take one or two [captives], they also held away. They said to them: "Go along there, knaves! You shall give a good example! Appear not before us!"

648 **Twenty-fifth Chapter, in which is related how the people of Teocalhueyacan quietly and peacefully came to meet the Spaniards and offered them food when they fled from Mexico.**

Tlacatecutli was the name, and Otoncoatl the lordly title, of the one who led them away. There he came to leave food. White tortillas; birds, baked [262] and boiled; eggs; and some live birds; and some tuna cactus fruit he spread out before the Captain.

He said: "You have suffered fatigue. Our lords the gods have tired themselves. Let them rest. Let them find a resting place. Let them recover their breath."

Then Marina answered them and said: "My master, the Captain, sairh: 'Whence have they come? Where [is] their home?'" Then they said to him: "May our lord hear: we have come from his home at Teocalhueyacan; we are the people of Teocalhueyacan." Then Marina answered: "It is well. They have shown us kindness. We shall go there tomorrow; there we shall sleep."

727 And meanwhile, just as dawn broke, when the earth was visible, then [the Mexicans] carried away — there were carried out — all the men of Tlaxcalla and of Cempoalla, and the Spaniards, who had plunged into the Tolteca canal and [at] Petlacalco or Mictlantonco. In boats they carried them all away. In patches of rushes, among the rushes; in patches of reeds, among the reeds, they went to cast each one and lay them out. They went to throw out each one. And they went to cast out each woman; ●[302] naked, yellow[-skinned], anointed with yellow, painted yellow, were the women. All and each of them they stripped and despoiled. They removed all from them and left them bare.

And the Spaniards they placed, each one, apart, in rows; [like] white reed shoots, or white maguey shoots, or white maize ears, or white reed shoots were their bodies. And they removed each of the deer which bore men on their backs, called horses.

And all the goods [of the Spaniards and their allies], carried in their back packs — all was stolen,

000 And as we went along we spoke of the good manners and breeding which he showed in everything, and that we should show him in all ways the greatest respect, doffing our quilted caps when we passed before him, and this we always did, but let us leave this subject here, and pass on.

CHAPTER XCI.

Of the manner and appearance of the Great Montezuma and what a great Prince he was.

643 THE Great Montezuma was about forty years old, of good height and well proportioned, slender, and spare of flesh, not very swarthy, but of the natural colour and shade of an Indian. He did not wear his hair long, but so as just [302] to cover his ears, his scanty black beard was well shaped and thin. His face was somewhat long, but cheerful, and he had good eyes and showed in his appearance and manner both tenderness and, when necessary, gravity. He [515] was very neat and clean and bathed once every day in the afternoon.[1] He had many women as mistresses, [595 837] daughters of Chieftains, and he had two great Cacicas as his legitimate wives, and when he had intercourse with them it was so secretly that no one knew anything about it, except some of his servants. He was free [515] from unnatural offences. The clothes that he wore one day, he did not put on again until four days later. He 643 had over two hundred chieftains in his guard, in other 644 rooms close to his own, not that all were meant to converse with him, but only one or another, and when they went to speak to him they were obliged to take off their rich mantles and put on others of little worth, but they had

11:Diaz T,H-5 (1519-1520) 1910
NU7 Aztec NU7

793 The hair
[302] of these priests was very long and so matted that it could not be separated or disentangled, and most of them had
[304] their ears scarified, and their hair was clotted with blood. Let us go on; there were other Cues, a little way from
346 where the skulls were, which contained other Idols and places of sacrifice [decorated] with other evil paintings.
[585] And they said that those idols were intercessors in the marriages of men. I do not want to delay any longer
[342] telling about idols, but will only add that all round that great court there were many houses, not lofty, used and occupied by the priests and other Indians who had charge of the Idols. On one side of the great Cue there was another much larger pond or tank of very clear water dedicated solely to the service of Huichilobos and Tezcatepuca, and the water entered that pond through covered
[883] pipes which came from Chapultepec. Near to this were other large buildings such as a sort of nunnery where many of the daughters of the inhabitants of Mexico were sheltered like nuns up to the time they were married, and
[585] there stood two Idols with the figures of women, which were the intercessors in the marriages of women, and women made sacrifices to them and held festivals so that they should give them good husbands.

I have spent a long time talking about this great Cue of Tlaltelolco and its Courts, but I say that it was the greatest temple in the whole of Mexico although there were many others, very splendid. Four or five parishes or districts possessed, between them, an oratory with its Idols, and as they were very numerous I have not kept count of them all. I will go on and say that the great oratory that they had in Cholula was higher than that of Mexico, for it had one hundred and twenty steps, and according to what they say they held the Idol of Cholula to be good, and they went to it on pilgrimages from all parts of New Spain to obtain absolution, and for this reason they built for it such

14:Bandelier E-4 (no date)1880 NU7 Aztec NU7

into wooden forms, intermediate between masks and helmets, imitating heads of ferocious beasts like tigers, lions, wolves, also snakes, and covered with the skins of these animals.[61] The principal captains and war-chiefs were distinguished by their wide and long mantles,[62] by the cut and tress of their hair,[63] and by towering bushes of green feathers on the so-called "helmets" protecting the head.[64] 714

"It was ordained that the King and his coadjutor, Tlacaelel, should alone wear shoes "in the royal house, and that none of the great chiefs might enter the palace with shoes "on, under penalty of death; and they alone could wear shoes in the city, except those "who had distinguished themselves in war, which for their merit, and in token of their "bravery, were permitted to wear light and common sandals, because the gilded and "painted ones belonged to the great chiefs alone." We would suggest that the "cactli" or "cotaras" were half-moccasins, similar to slippers. It is not devoid of interest to notice here, that even the wearing of these articles depended upon actual merit and reputation *achieved in war*, and not upon wealth or inheritance. War was, indeed, "the life of the tribe." [643 645]

[61] Anonymous Conqueror (Col. de Doc., I, p. 372). Clavigero (Lib. VII, cap. XXIII). Drawings are found in Clavigero, in the Mendoza Codex, as published by Lord Kingsborough, and in the frontispiece to the 2d Decade of Herrera (Vol. I). It may be that the honorific titles of "daring lions, tigers, and eagles," which have greatly contributed to the supposition of the existence of "military orders," or "orders of chivalry," were based upon the wearing of such costumes by the braves. As already stated, not all the warriors carried such masks or helmets, but our data are too imperfect to enable us to state positively the class or standing of those who wore them.

[62] Durán (Cap. XXVI, p. 215). "Tambien se determinó que solo el rey pudiese traer "las mantas galanas de labores y pinturas de algodon y hilo de diversas colores y plu-"meria, doradas y labradas con diuersas labores y pinturas y diferencialias quando á "él le paréciese, sin aver excepcion en traer y usar las mantas quel quisiese; y los "grandes señores, que eran hasta doce, las mantas de tal y tal labor y hechura, y los "de menos valia, como uviese hecha tal ó tal valencia ó haçaña, otras diferentes; los "soldados, de otra menor labor y hechura, no pudiendo usar de otra preciosa labor ni "diferencia, mas de aquella que allí se le señalaba con sus ceñidores y bragueros, que "aludian y seguian la hechura de la manta que le era permitida. Toda la demas gente, "so pena de la vida, salió determinado que nenguno usase de algodon ni se pusiese "otra manta sino de neguen, y questas mantas no pasasen mas de quantos cubriesen la "rodilla, y si alguno la trujese que llegase á la garganta del pié, fuese muerto, saluo si "no tuviese alguna sennal en las piernas de herida que en la guerra le uviesen dado, " . . . .") Also Tezozomoc (Cap. XXXVI, p. 58). Here again we find the kind and cut of the mantle, its ornaments determined by the warlike achievements of its bearer.

[63] Tezozomoc (Cap. XXXVI, p. 57). Humboldt ("Vues des Cordillères," Vol. I, p. 345). The figure of the Atlas in folio is taken from the Codex Anonymous of the Vatican. Says the Anonymous Conqueror: "To him who distinguished himself in war "they made a mark in the hair, that his prowess might be recognized and seen at once, "since they never wore the head covered" (p. 371). Braids or tresses of hair as well as of leather, were sometimes given as presents, and worn. Tezozomoc mentions them frequently, under different names. [302]

[64] The head-dress, or "diviss."—"tlauiztli," or "quetzalpatzactli," is represented on nearly every Mexican painting or picture-leaf. It is also represented on the stone of sacrifice, as adorning the victorious warrior of each group. Its size is generally exaggerated. Gomara (p. 322, Vedia, I) includes in his list of objects sent by Cortés to the Emperor: "a helmet of wood, gold-plated, with jewels in front or outside, and twenty-"five little golden bells, and its crest of a green bird, whose eyes, beak, and feet were [293]

14:Bandelier E-4 (no date) 1880 NU7 Aztec NU7

714 While we shall, further on, have occasion to recur again to the
287 question of military costume and ornaments; when we treat of
237 the different grades of warriors and captains, it remains to be said here that *featherwork*, worn as a *layer* over the "escaupil," played a prominent part in the Mexican armour.[65] It formed an elastic layer on the outside of the quilted jacket, and besides it furnished, through an assemblage of colors peculiar to each sub-division of the force, the "uniform," or, as the Spanish authors call it, the "livery," of that particular sub-division. The Anonymous Conqueror says: "They cover their jackets and breeches "with feathers of various hues, presenting a very good appear-"ance; one company of soldiers has them white and red, others "blue and yellow, and others wear them still different."[66] Bernal-Diez mentions that while fighting on the causeways during the siege of Mexico: "in the morning many captaincies (detach-"ments) would attack us, relieving each other from time to time; [302] "some had one livery and ensign, others had other ones."[67] Such of the warriors as were but scantily clothed painted their naked bodies.[68]

[293] "of gold." Tezozomoc (Cap. LIV, p. 88) gives the following description of the figure of Axayaca, carved out of the rock of Chapultepec, "with hair of precious feathers, "painted of the colors of the bird tlauhquechol . . . ." The bird whose plumage furnished the material was called "quetzal-tototl." It is "*Trogon resplendens*." (See "San Salvador and Honduras im Jahre 1571," a German translation of the report of Diego Garcia de Palacio, by Dr. A. von Frantzius, of Freiburg, ib.—p. 39, No. 61 note. The notes by the learned translator, as also those of Dr. Berendt, are highly valuable.) The "tlauhquecho!" was also used.

[65] Prescott (History of the Conquest of Mexico, 1869, Book I, chap. II, pp. 45, 46, and 47, of Vol. 1).

[66] (El Conquistador anónymo) Col. de Doc., Vol. I, p. 372.

[67] "Historia verdadera de la Conquista de Nueva-España" (Cap. CLIII, p. 188, in vol. II. of Vedia).

[68] It is presumable that the colors were those of the detachments to which the warriors belonged. At any rate, it shows that the Mexicans, like the northern Indians, had a special "war-paint." Those of Tepeaca, their allies or subjects, used black and red (Herrera, Dec. II, cap. XXI, p. 297, of Lib. X). Clavigero says (Lib. VII, cap. XXIII): "The common soldiers were naked with the exception of the girdle (maxtlati), but they "sought to *imitate* the dress which they lacked, by painting their bodies with various "colors." Further on he adds (Cap. XXIV): "Besides the common flag of the army "each company of two or three hundred men had its own banner, and was, besides, "distinguished by the color of the plumage, which the officers and nobles wore over "their armour." Although this is no direct evidence of the fact, still it tends to intimate that the paint used by the common warriors was in *imitation of the featherwork* peculiar to their corps. They also painted their faces previous to an engagement: sometimes black. Tezozomoc relates that, on one occasion, Ahuitzotl painted his face *yellow* ("con un betun amarillo"). His armour was *blue* (Durán, Cap. XLVI, pp. 371 and 372, "tiznándose las caras con la tiane divina, quellos asi llamauan, y el rey Auit-"zotl vestido de riesa mantas, y debaxo muy bien armado con sus armas açules . ."

1:Vaillant A-5 (1928-1936)1941 NU7 Aztec NU7

317 Obsidian must have had important economic value for the
439 Valley peoples, and since volcanic glass is portable and very
324 useful for its sharp cutting edge, it was widely traded to the tribes of nonvolcanic regions. Techniques were established early in the Middle Culture, and the art of polishing this stone was known to the Teotihuacan Toltecs, who utilized it as eyes for the idols of the Temple of Quetzalcoatl. Ceremonial
[788] bloodletting called for a constant supply of thin blades (made by pressure flaking), some of which are exquisitely long and narrow. Yet scalpels of comparable fineness were made in Toltec and Mazapan times as well. Indeed, the principal
[415] innovation of the Aztecs was in fashioning vases from obsidian, a formidable task, owing to its hardness.[8]

● 303 The making of mirrors called much ingenuity into play.
789 They are so rare that they must have been used solely for ritualistic magic. Blocks of obsidian were sometimes polished to produce an eerie and mysterious reflection. However, iron pyrites, burnished and shaped, were more common; and rarer examples had thin pyrite flakes laid in a mosaic and glued to a background of wood or shell. In another technique used on the coast the artisan detached a surface of pyrites in its matrix of slate, burnishing one side and carving
[395] the other to fashion a mirror with a carved back. One example, at least, is known of a mirror of marcasite with its surface so ground as to produce a magnified reflection.[9]

324 Stone sculpture we shall consider more conveniently under art, but the mass production of dressed stone for building must have required patience and skill to accomplish. Stoneworking throughout Middle America was achieved without metal tools. Flaking and chipping for the hard stones, pecking and hammering for the softer ones, were the preliminary

1:Vaillant A-5 (1928-1936)1941 NU7 Aztec NU7

648 when the Tenochcas reached the field of battle
175 they rushed to the attack and took no less than thirty pris-
[304] oners, from each of whom they detached an ear with their obsidian knives before sending him to the rear. After the
175 battle Coxcox made a speech praising the valor of his forces
727 in taking so many prisoners but denigrating the Tenochcas who came back empty handed. The vassals waited until their lord had finished speaking and then inquired of him why each captive was short an ear. The attention of the Culhuas being riveted to this extraordinary circumstance, the Tenochcas opened their pouches and displayed the missing ears, proving beyond cavil the measure of their prowess. Clearly
[721] the war-sacrifice cult had reached the Valley by this time, for the emphasis set on the taking of prisoners indicates that this was one of the chief purposes of war. Furthermore, a drawing shows the later sacrifice of the prisoners, a cult practice the accomplishment of which was to make the Aztecs dreaded by other tribes throughout the length and breadth of Mexico.

175 So great had the prestige of the Tenochcas become that they went to their lord, Coxcox, and asked for his daughter as a wife for their chief so that they might found a dynasty. Coxcox granted their request, and the Tenochcas were so overcome with gratitude that they sacrificed the luckless girl and draped her skin on a priest to impersonate a nature goddess, Toci. Then with somewhat less than tact they invited the father to the ceremony. He, expecting a marriage celebration, was utterly horrified and summoned his warriors, to exterminate the Tenochcas who forthwith fled to the lake, rejoining their brethren already there.

There were two communities on the islands at the middle of the fourteenth century: Tenochtitlan, which seems to

1:Vaillant A-5 (1928-1936)1941 NU7 Aztec NU7

tated against the social advantages of the gathering. To steal 685
corn, the staple of life, when growing in the field, was a
serious offense, demanding the death penalty or slavery, but
a wayfarer might with impunity satisfy his hunger by pluck-
ing ears from rows adjacent to the road. To filch gold, silver
and jade, precious substances reserved for religious orna-
ments, was also a mortal crime.

Murder, even of a slave, brought the death penalty. Rebels 682
and traitors received the same fate, but kidnapers were sold [683
into slavery. Drunkenness was a serious crime except at pre- 687]
scribed ceremonial occasions. Social disapproval, public dis-
grace, even death by stoning or beating, were penalties 689
suffered by the intemperate. However, the old of both sexes,
who had fulfilled their tribal obligations, were allowed great [672]
latitude in their potations.

The witch or practicer of black magic was sacrificed, and 683
death was likewise the lot of him who impersonated a high 687
official. A slanderer had his lips cut off and sometimes his [304]
ears as well. Brawling and fighting in the market place were
dealt with severely, but in an ordinary case of assault the 689
assailant paid for the cure of the assailed and for any damage
done. Adultery was punished with great severity, even death,
when committed outside the pale of the divorce laws. Hang- 684
ing was the usual penalty for violation of the incest laws,
and sodomy was punished with revolting brutality.

Thus reduced to cited instances, Aztec law was brutal. 421
Actually, from childhood on, the individual grew up into [671]
correct social behavior; the violator of the code met with
serious consequences. All people had some kind of personal
property, but land belonged to the tribe and only its pro-
duce to the individual. Therefore, the elaborate legislation

1:Vaillant A-5 (1928-1936)1941 NU7 Aztec NU7

leather or woven maguey fiber in cold weather. Women 291
wrapped about their loins a finely woven cloth, which they 554
sustained with a narrow belt. A sleeveless slipover, or *huipil*,
completed their costume. They plaited their hair into braids, [302]
sometimes interlacing them with ribbons, and these they
wrapped around their heads. This woman's costume may
still be seen in many parts of Indian Mexico. (See Plates
33–36.)

The poor made their garments of maguey fiber or coarse
cotton. The rich wore the same clothing fashioned from finer
textures and decorated with elaborate embroidery. The many
names given to the different kinds of mantles show their in-
terest and importance to the wearers. Wool was almost never
made into cloth, since dog hair was all they had, but feather
cloaks were highly esteemed. Chiefs wore a fillet of leather [292]
from which hung two tassels, and administrative chiefs
had a sort of diadem of gold or jade and turquoise as a badge
of office.

The warriors frankly gloried in their costumes. Rich man- 292
tles and ornate feather headdresses were not enough for some,
who carried on their shoulders a harness of wicker support-
ing an elaborate structure in feather mosaic. Others wore
costumes modeled on the appearance of an ocelot or an eagle.
On specified occasions the priests assumed the dress of the
gods and goddesses, whose costumes were sumptuous and
ornate and defined by exacting ritualistic marks of identi-
fication. (See Plate 61.)

Jewelry consisted of ornaments of copper, gold and silver, 301
shell, various-colored stones, like jade, turquoise, emeralds, 304
opals or moonstone, and mosaics laid on a backing of clay,
wood or reed. Large plugs were inserted in the ear lobes of

1:Vaillant A-5 (1928-1936)1941 NU7 Aztec NU7

301 men and women alike. Men often wore ornaments passed
[304] through the septum of the nose or suspended from a slit in the lower lip. Elaborate necklaces and pendants, armlets and leg bracelets, gave brilliance to a costume for state occasions.
302 Cosmetics were not used to touch up nature, as with us, but instead a lavish application of face and body paints in red, blue, yellow, green and black enhanced with prismatic richness the softer tones of their brown flesh. (See Plates 46–47.)
105 It is obvious that the Aztecs were no pitiable craven savages. They lived upon variegated and delicious foods and dwelt in houses that were comfortable and airy. Their dress stimulated the exercise of merited self-satisfaction, not to be confused with the compensations of vanity. Their manner of life enabled them to take advantage of their personal aptitudes and exchange the products of their own creation for whatever they lacked. Articles for daily and ceremonial use were made with the loving care of master artisans, and rare indeed was the object that did not have the impress of some little decorative touch that makes a pleasant possession of a drab utensil. Their crafts deserve to themselves a complete chapter.

1:Vaillant A-5 (1928-1936)1941 NU7 Aztec NU7

782 growth in plants by the powers of sympathetic magic. Cere-
[266] monial cannibalism was sometimes practiced, in the belief that the eater can absorb the virtues of the eaten, but this rite cannot be considered a vice. The letting of one's own blood
[785 was another way to ensure divine favor, and people did hor-
304] rible self-penances such as mutilating themselves with knives or drawing through their tongues a string on which were threaded maguey spines. The higher the social position of the individual and the more he consequently knew of ritualistic observance, the more arduously he performed the fasts, penances and tortures imposed by the religion. The priests, therefore, were strongly cognizant of their social responsibility and by the rigor of their own lives strove to ensure the well-being of the tribe.[17] (See Plate 61, bottom right.)

212 The picture writings of the Aztecs take human sacrifice
782 and penance as a matter of course but seldom indicate the quantity of victims. Indeed, only one such manuscript records the monthly ceremonies, and a post-Conquest copy of another reveals a sacrifice of twenty thousand people at the dedication of the enlarged great temple of Mexico.[17] The Spanish accounts and those of the educated Indians agree, but whether Christian piety induced exaggeration, and how much, it is difficult to ascertain at this time and age. The Conquistador who counted thousands of skulls on the skull rack in Tenochtitlan apparently confirms these other statements, which the great humanitarian and Indian lover, Las Casas, discounted in his special pleading for decent treatment of the indigenous population of New Spain.[18]

793 The priesthood, beside performing these bloodcurdling
212 acts, had other more pacific duties; they also instructed youth
[871] in the mysteries of writing and keeping records. Aztec writ-

776 cooked, and roasted in a pot; one roasted [on the fire]; sweat-houses were heated, unguents were melted, things were cleansed.

776 And when his feast day was celebrated, once a year, at
796 the end of the month of Izcalli, they made an image of Moctezuma; before it quail were sacrificed and incense was set forth.

[262] *Tamales* [stuffed] with greens[66] were prepared in each dwelling. First they were placed before the fire. Then they were eaten.

[534] And all day his old men sang, blew trumpet-shaped shells, beat drums, and sounded rattles for him.

And no one might reach his arm to the bowl, which was forbidden; nothing might be cooked. Because first were eaten the *tamales* [stuffed] with greens which had been brought as offerings.

And, in live coals, the children[67] roasted some snakes, frogs, small white fish, water lizards, [and] birds—whatever kind of small animal they hunted, they dropped in the hearth. Thus, they said: "Or father roasteth [something] for himself."

And when night fell, the old men, the old women, drinking wine, made libations in all [four] directions. [And] they said thus: "They give a taste of it to the fire; they refresh themselves."[68]

[535] And every four years a festival most greatly honored him—when Moctezuma danced a princely dance before the temple of Xiuhtecuhtli, which was called Tozzumulco.[69]

[273] And at this time everyone [including] all the children, every one of them, tasted the wine. Thus it was called [the time when] the children drink wine.

[608 431] And then they gave the children uncles and aunts, a man [and] a woman, whom those with children sought out and gave gifts. These took [the children] upon their backs, and carried them then to the temple of Iztocçauhqui. There [the
● [304 852] persons] pierced their ears; thus they placed a sign upon them, while their uncles and aunts[70] looked on. Afterwards all feasted.

776 [Iztocçauhqui's] ornament was [thus]: black was smeared about the lower part of his face. About his head he bore a circle set with green stones; he wore a paper crown with blue cotinga feathers and a spray of quetzal feathers; he had a crown of arrowshafts; a crown of spear-shafts;[71] he had

[439]

"And [they brought] vases, and incense-burners, and jars made of calabashes, spoons for stirring cacao, and stoppers for jars.

When they entered lands with which they were at war, and went among people who were for dinner, they became like their enemies in their garments, their hair-dress, their speech,[104] [that they might] mimic the natives.

And if they came to an evil year, if they were discovered, then they were slain in ambush and served up with chili sauce.[105] [But if] any—even one, even two—escaped alive, [such an one] informed Moctezuma.

This one then gave him a gift, and decked him with his amber lip-plug. He did him honor, singling him out as a valiant warrior, then making him a man of consequence.

And when those who returned arrived home, when they had come back, when they had reached and had commenced in their land, they feasted all, [especially] the merchants and the principal men, that they might make themselves celebrated.

It was called "the washing of the face."[106] They paid great honor to the cane, to the walking staff, of Yacatecuhtli.

In the tribal temple[107] they set it upright. They offered it an offering fowl, when they held a feast. And when they entertained people to a banquet, they always offered it an offering when they ate.

And when they communally herded and slew a man as a sacrifice,[108] he whom they offered was the likeness of their god, Yacatecuhtli; or else one of [the following gods], or all of them, whom they worshipped—Chicomecóatl, or Chalmecatécuhtli, Acxoteccatl, and Nacxitl, Cochinxcui, Yacapitzinca.[109] No one determined, [for] it was of their own free will, whether they should offer up one or two men.

They brought them there to the show market at Atzaqualco; they served and arranged them, turning them around many times, examining them, buying the good ones—those of good bodies, without blemish, the best ones, in good health, sick in no degree, who were marked by no marks on the body.

Such as these they slew on the feast-day, Panquetzaliztli, when the feast of Uitzilopochtli was celebrated.

Thereupon they garbed them in trappings like those of Yacatecuhtli, which were assigned to them.

And before they slew them, first they let them be seen by the people. It was said: "They now have up [like

105. Cf. Ixtlilxochitl (Obras Históricas, p. 111) citing Nat. Rept. Coll. Mex. B. II [illegible].

106. Book IX of the Historia general deals almost entirely with the activities of the merchants. Chapter VI, entitled De los ceremonias que se hacía a los mercaderes cuando llegaban a su casa, que se llama lavatorio de pies, aparentemente washing towels and hands.

107. Sahagún defines calpulli as "iglesia del barrio, é parroquia" (Spanish version).

108. Sahagún defines the ceremony in this sentence: "Entre diversas que tenían, é usaban ordinario."—Historia general, Vol. I, p. 213.

109. According to the Spanish version, they were four brothers and a sister of Yacatecuhtli. Ixtlilxochitl (Collected Works, Vol. II, pp. 4, p. 60) recognizes Cochinxcui and Yacapitzinca as synonyms for Yacatecuhtli. "Chicomequitl or Chalmecatecuhtl is the name of a goddess of water and the earth"; Acxoteccatl is Tlazolteotl; Nacxitl is Quetzalcoatl.

The eighteenth month they named Izcalli. In this month they celebrated a feast to the god of fire, whom they called Xiuhtecutli, or Ixcoçauhqui. They made an image in his honor, with great artifice, which appeared to throw off flames of its own accord. And every four years, in this same feast, they slew slaves and captives in honor of this god. And they pierced the ears of all the children who had been born in those years, and they gave them godfathers and godmothers.

Al mes decimo octauo llamauan Izcalli: en este mes hazian fiesta al dios del fuego que llamauan Xiuhtecutli, o Jxcoçauhquj: hazian vna ymagen a su hõrra de grã artificio que parecia que echaua llamas de fuego de si: y de quatro en quatro años en esta mesma fiesta esclauos y captiuos mataua a honrra deste dios: y agujeriauan las orejas a todos los njños que auian nacido en aquellos años y dauanlos padrinos, y madrinas.

Chapter 18
Izcalli

On the tenth day of this month they made a new fire at midnight, before the image of Xiuhtecutli, [which was] very curiously adorned. And, the fire having been lit, then, in the morning, the young men and boys came, and they brought various animals which they had hunted in the ten preceding days—some water [animals] and some land [animals]. And they offered them to the old men who were charged with safeguarding this god. And these cast into the fire all of those animals, so that they would cook. And they gave each one of these young men and boys a *tamal* made with amaranth, which they called *vauhquitamalli*, which everyone in the city offered upon that day. All ate of these in honor of the feast day. They ate them very hot, and they drank and made merry.

On this feast, in ordinary years, they slew no one. But in the bisextile year, which was every four years, they slew, during this feast, captives and slaves and the impersonator of Xiuhtecutli, decorated in the manner which hath been told above, with many precious and curious adornments; they performed many great ceremonies upon the death of these [victims]—many more than on the other feasts already described. This is set forth at length in the account of this feast.

After they had slain these slaves and captives and the impersonator of Ixcoçauhqui, who is the god of fire, all the leading men and lords, the illustrious, and

En esta fiesta los años comunes no mataua a nadie: pero el año del biexto que era de quatro en quatro años: mataua en esta fiesta captiuos y esclauos, y la ymagen de Xiuhtecutli, compuesta de la manera que arriba se dizo cõ muchos y preciosos y curiosos atauios: hazian grandes y muchas ceremonjas en la muerte destos, muchas mas que en las otras fiestas ya dichas. Esto esta puesto a la larga en la historia desta fiesta.

Despues que auian muerto a estos esclauos y captiuos, y a la ymagen de Jxcoçauhquj que es el dios del fuego: estauan aparejados y adereçados muy rica-

535

X796 [535] the emperor himself were decked and arrayed very richly in costly adornments, and they began a dance of great solemnity and gravity which they called *necuzmoilizti*, which meaneth "Dance of the Lords." This was performed only every four years, during this feast. On this same day, very early in the morning, before dawn, they began to pierce the ears of the boys and girls, and they applied to their heads a wig of parrot feathers, pasted on with *ocotzotl*, which is pine resin. Etc.

[304 291 825 314]

mente con ricos adereços todos los principales y señores y personas yllustres, y el mesmo Emperador: y començauan vn areyto de gran solemnydad y grauedad: al qual llamauan Netecujuotilizti, quiere dezir: areyto de los señores: Este solamente se hazia de quatro en quatro años en esta fiesta. Este mesmo dia muy de mañana ante que amaneciese començauã a agujerar las orejas a los niños y niñas: y echauãlos vn casquete en la cabeça de pluma de papagayos, pegado con ocutzotl que es resina de pino. Etc.

The five remaining days of the year, which are the four last of January and the first of February, they named Nemontemi, which means barren days. And they regarded them as unlucky and of evil fortune. There is conjecture that when they pierced the boys' and girls' ears, which was every four years, they set aside six days of Nemontemi, and it is the same as the bissextile which we observe every four years.

A los cinco dias restantes del año que son los quatro vltimos de Enero y el primero de Febrero llamauan Nemontemi, que quiere decir dias vãdios: y tenjanlos por ansiosos y de mala fortuna: oy conjectura que quando agujeraban las orejas a los niños y niñas que era de quatro en quatro años, echauan seys dias de Nemontemi y es lo mismo del bizesto que nosotros hazemos de quatro en quatro años.

796x 777 [805] [304]

Chapter 19

These five days they held as of evil fortune and unlucky. They said that those who were born in them had evil successes in all their affairs, and were poor and wretched. They named them Nemo. If they were men, they named them Nemoquich; if it was a woman, they named her Nencioual. They dared do nothing in these days, because they were unlucky. Especially did they abstain from quarreling, because they said that those who quarreled in these days always remained with that custom. They held as a bad omen stumbling in these days.

These abovementioned feasts were fixed, and were always observed within the month, or a day or two ahead. Other feasts they had [which were] movable, which were celebrated during the course of the twenty signs, which made a round in two hundred and sixty days. And hence these movable feasts, in a year, fell one in one month, and another in another, and always varied.

Cap. 19.

A 28 b 29 c 30 d 31

[551] [578] [787]

Estas fiestas dichas eran fixas que siempre se hazil dentro del mes o vn dia o dos adelante: Otras fiestas tenjan mouibles que se hazien por el curso de los veinte signos: los quales hazian vn circulo en dozientos y sesenta dias: y por tanto estas fiestas mouibles vn año cayan en vn mes y otro en otro y siempre variauan.

Of the Movable Feasts

The first movable feast was celebrated in honor of the sun, in the sign which is named ce ocelotl, in the fourth house, which is named naui ollin. On this feast they offered, to the image of the sun, quail, and they offered incense. And at noon they drew captives before it in honor of the sun. On this same day, all drew blood from their ears—children and those who were grown—in honor of the sun, and they offered it that blood.

De las fiestas mouibles.

La primera fiesta mouible se celebraua a honrra del sol en el signo que se llama ce ocelotl, en la quarta casa que se llama nauiliz: en esta fiesta ofrecian a la ymagen del sol codornjces y incienso: y en el medio mezcaui capiuos delante della a honrra del sol. En este mesmo dia se sangraua todos de las orejas chicos y grãdes a hõrra del sol y le ofrecian aquella sangre.

796x [776] [785]

The Second Movable Feast

In this same sign, in the seventh house, all the primeros and the ouemeyoan celebrated a feast. They

La segunda fiesta mouible.

En este mismo signo en la septima casa hazil fiesta todos los primeros, y los labradores ayuntauã quarlos

785 796x 463

Then the mother of the young man

placed a very fine shift upon her daughter-in-law, and put for her, by her feet, a richly embroidered skirt. And the mother of the young woman covered her son-in-law with a very fine cape, and tied it over his shoulder, and laid a very richly embroidered breech clout at his feet. This done, a number of old women, who are called *ainíci*, tied the corner of the young man's cape to the lower part of the young woman's shift. In this way was concluded the marriage, with many other ceremonies, and dinings, and drinking, and dances, which were given thereafter, as is contained in the account of the marriages.

matrimonjo, con otras muchas cerimonjas, y conseres, y beueres, y bayles, que despues se hazian, como se contiene, en la historia del matrimonjo. 585 302 292

They observed two other feasts which in part were fixed and in part were movable. They were movable because they were celebrated in interpolated years. One was observed every four years, and the other every eight years. They were fixed because they had year, month, and day assigned. In the one which was celebrated every four years, they pierced the ears of the boys and the girls, and they performed for them ceremonies for good growth, and they purified them over the fire. In the one which they celebrated every eight years, they fasted before it for eight days on bread and water, and enacted a dance in which they assumed the forms or characters of various birds and animals. And they said that they sought good fortune, as is set forth in the appendix of the Second Book.

These movable feasts, in some years, displace the feasts of the calendar, as also happeneth in our calendar.

Otras dos fiestas tenjan, que en parte eran fixas, y en parte eran moujbles: eran moujbles, porque se hazian por años interpolados. La vna se hazia, de quatro en quatro años, y la otra de ocho en ocho años: eran fixas porque tenjan año, mes, y dia señalados. En la que se hazia, de quatro en quatro años, horadauan las orejas a los njños o njñas: y hazianlos, las cerimonjas, de crezca para bien, y lustrauanlos por el fuego. En la que hazian, de ocho en ocho años: ayunauan antes della, ocho dias a pan y agua, y hazian vn areyto, en que tomauan figuras, o personajes, de diuersas aues y animales: y dezian que buscauan ventura, como esta escrito, en el apendiz del segundo libro. 796^ [304 854] [535 785]

Estas fiestas mouibles en algunos años echan de su lugar a las fiestas del kalendario: como tambien acontece, en nuestro kalendario.

For he had committed a crime in the temple; for he had done a wrong. They said to him: "Verily, here penitence is done; here a feast is held."

And as night fell during the dance, so closed the day of feasting when the day ended.

And next morning, when [the feast] was over, again there was dancing. Again all danced the serpent dance.

And [this day] died Izteucale,[19] he who had lived together with Titlacauan. And him they also named Tlacaxepan,[20] and Teicauhtzin.

And his paper raiment was painted with black discs. On his paper crown were eagle feathers. His headdress hung in disorder. Upon the crown of his head rested a flint knife made of red feathers.

And also he had his network cape; over it hung a small net bag; and his [ornament like a priest's] maniple hung from his arm. It was of the skin of a wild beast. He fastened shells [to his legs]. He danced with the others; he danced the serpent dance. He went first in line guiding the others.

And purely of his free will, when he wished, he would die. When he wished, then he delivered himself to the place where he would die.

Priests called *tlatlacatecatlti* seized him, stretched him out [on the sacrificial stone], held him, and cut open his breast. His heart they lifted up as an offering to the sun.

And his head also they strung on the skull rack. So he came to his end, even as Titlacauan, [whose head was] strung [on the skull rack].

And at this time, the priests cut the skin: with a stone knife they cut the skin of youths, young boys, and even small children yet lying in their cradles. Thus they cut the skin of their stomachs, their breasts, both upper arms, and [both] forearms.

This was done only at the time of [the feast of] Teucatl, when it ended, each year; [and] thus ended [the feast].

---

19. Izteucale, ". . . que quiere decir: Otro del Señor de la Casa Divina, ó del Señor Divino de la Casa; y por otro nombre Tlacaxepan (sic), que es nombre del otro Dios, compañero de este Huitzilopochtli, cada tiempo con este Centéotl, llamado nombre Teicauhtzin, que quiere decir: Hermano menor, por quanto venían por orden á Huitzilopochtli. Este dos hermanos . . . el dedicado á Tezcatlipoca, y este consagrado á Huitzilopochtli, andaban juntos todo el año de su adoratorio, para el beneficio de este Dios; para este nombre diferenciado entre los dos; porque el que representaba á Tezcatlipoca, á Tlaloc, adoraban, y reverenciaban como á Dios, á como á compañero del mayor Dios . . . y á entrambos, llamaban Huitzilopochtli, que es adoratorio, el adoraban con este respecto. . . ."—Juan de Torquemada: Segunda parte de los veinticinco libros rituales y monarquía indiana (Madrid: Nuevo Reino-Galeón Fernández, 1723), p. 305.

20. Tlacaxepan Quetzalcóatl: "Otro nombre de la pluma, hermano menor y compañero de Huitzilopochtli. . . . Donde nace este nombre más cabe fuel en la cuenta de Tlaxcala" (Chavero, op. cit., Vol. II, p. 90).

his vassals. Because verily there was much hunger; when dried maize was costly, then there was much want, [and] it was hard to gain a livelihood; [and] many then were our dead.

And until the time that the Feast Day of the Lords came, upon every day there was song. When singing and dancing began, [it was] toward evening, when only little sun alone. Thereupon fire was laid in the braziers; flame was put upon the braziers.

And the braziers were arranged and ordered in six rows, and in each row were ten [braziers] and [each] brazier was two fathoms thick; and each was as tall as one's hip.[3]

And thereupon all went forth from the house of song, coming singing and dancing. Between [pairs of men] came the women. Light women, harlots, chosen—picked out, set apart.

And they went together, they went taking by the hands the honored ones—the young chieftains, the leaders of the young men, and those with shorn hair, the Otomí, and the noblemen [not warriors. These last] were not arranged in order; of their own free will they placed themselves near the others.

And richly were the women arrayed and bedight; all good were the skirts and shirts which they had put on. Of their skirts, some had [designs of] hearts, some were [embroidered] with a mat design like birds' gizzards, some were ornamented like coverlets, some had spiral or leaf [designs], some were of plain, fine weave. All had borders and fringes; all [the women] wore skirts with borders.

And of their skirts, some had brown [streamers] hanging, some had smoke symbols, some had black [streamers] hanging, some had house designs, some had fish [patterns], some were of plain, fine weave. And the neck [openings] were all large, and their borders were also deep and wide.

And when they danced, they unbound their hair; their hair covered them like a cloak. But they brought braids of their hair across their foreheads.

And they were not decked with feathers; neither were their faces adorned with paint.

And thus were bedecked the chieftains: their array consisted of the cloak of netting. And the brave warriors, they who had straw lip plugs, they had white net cloaks with shells set in fish patterns. [These] were called their vermillion net cloaks.

4. In the corresponding Spanish text, Sahagún mentions copper, which may have been the material of which the bells were made.
5. Seler (op. cit., p. 144) has *dense Perlenhalsband* for *pancuxcachachapac*.

x 796 hand they grasped a paper incense bag. Thereupon
[293] they came down [from the temple], dancing rapidly.

And when they had descended, then they circled [the courtyard], they went around [the courtyard] only four times. And when they had danced, then they dispersed and went away, and thereupon all entered the palace in proper order. And this was known
[535 as the Lordly Dance; [for] all the lords danced the
628] Lordly Dance, [and] it was the privilege exclusively of the chiefs that they should dance the Lordly Dance. This was done every four years.

Thus [was it done].

[304] Early in the morning was begun the boring of ears, when they pierced the ears of the small children. And they pasted them with yellow parrot feathers and with soft, white feathers, which went mixed with the yellow ones.

x 796 And for a gift they made *pinolli*.[11] And the mothers
608 sought out some master of the youths, seasoned war-
[431] rior, or leader of young men who might wish to be as a parent, thus to become their [children's] uncle. Also some sought out a woman who might be an aunt, and they offered her gifts.

To the man they offered perchance a tawny cape or a coyote fur cape. And gifts were also offered—they also offered gifts to—the women.

● [304] And when they pierced the ears [of the children], thereupon they took the little ones to singe them; they laid and made a fire, and scattered much incense over the flames.

And hence it was said: "They are singed." The old men of the tribal temple seized all of them. They took the small children and dedicated them over the fire. Then they gave them uncles and aunts. And the small children cried out and whimpered. Then they went to their homes.

x 796 And when they had gone to their homes, there-
273 upon all ate and drank.
535 And then, in the temple, began singing and dancing at midday. Then once more all went to the temple. The uncles and the aunts carried the small children; carriers took the wine, poured into small gourds which they carried, and [poured] into small earthen jars. And when they arrived there, all sang. Thereupon was quieted the dance; they carried the small children upon their backs. Then they went giving them wine. All gave it to each other.

11. The Real Palacio MS here contains the line pinol ye chimaquiztli, which probably identifies the pinolli as ground dried maize and chile seeds.

when he had been living in the likeness of another, had walked with head high, had lived as a captive, had been drunk, and had gone in high esteem.

And for this reason was [the month] named "Izcalli hath ended": all the small children, all of them they took up and lifted by the neck. For it was said, they [thus] grasped them that they might grow; thus they would speedily grow tall; they would wax great and strong.

And they divided the heart of the maguey plants; they broke, peeled, and opened it. And they cleaned the cactus and pruned its branches, because thus it would quickly be given new life and growth.

And at this [feast of] Izcalli, there also came to pass, every four years, the bringing out of the children and the drinking of wine by the children. And then the chiefs danced a lordly dance, along with their courtiers. And they put on their wigs of hair; in truth they were head pieces made of long hair and covered with green stone. [The hair] fell, verily, to the chiefs' waists.

And for this reason one said that the children were brought forth: the fathers and mothers of all the small children first sought out those who would bring them to the priests' dwelling, a place named Tescacoac—a woman and a man whom they invited. It was said that they were to be uncles and aunts [of the children]; they became uncles and aunts [for them].

And not their kin did they take; they secured only their friends, whom they chose and to whom they gave gifts. They laid out capes and breech cloths for us men. Likewise, for a woman they laid out her skirt and shirt.

At midnight they took [the children] to the priests' dwelling. There they pierced and drilled their ears. [And the children] cried out [as] the pointed bone pierced their ears. They drew through a thread of unspun cotton, and bound it to them, as the little ones cried out and squirmed, and shed tears. And they pasted upon their heads yellow macaw feathers and soft down.

And the women who became aunts were pasted with red feathers, but only upon the legs and arms, and they covered themselves with their paper flowers, which were called their noble flowers.

When they had pierced [the children's] ears, then they took them to their homes. Here they sat attending them; they sat in vigil, awake, [thus] remaining

6: Sahagún M-5 (1529-1590) 1954 NU7 Aztec NU7

SEVENTH PARAGRAPH, in which is told how the singers bedizened themselves when the ruler would dance; and of that in which they would dance.

Mixcocalli: there were established all the kinds of singer-dancers of Tenochtitlan and Tlatilulco. There they awaited the word of the ruler, that he would dance, or try some song, or learn some new song. All this the singers prepared, all that was necessary—two-toned drums, rubber drum hammers, ground drums, rattles shaped like dried poppy heads, copper bells, flutes; players of two-toned drums and ground drums, intoners of chants, leaders of the dance; and all the properties used in the dance.

If the song were to be intoned after the manner of Uexotzinco, they were adorned like men of Uexotzinco, and spoke even as they did; they were imitated with the song and in their adornment and their equipment. Likewise if a song were to be intoned after the manner of Anauac, the speech of the men of Anauac was imitated, and their adornment as well as their equipment. Likewise, if a song were to be intoned after the manner of the Huaxteca, their speech was imitated, and their headdresses were taken, with which to imitate them in coloring their hair yellow; and the marks [had] arrow marks [painted] on the face, noses pierced like jug handles, teeth filed [to a point], and conical heads. And they [were clad] only in their capes. Likewise [they did] other songs.

EIGHTH PARAGRAPH, which telleth of the houses in which were the slaves.

Malcalli: the majordomos guarded[18a] the captives. They took great care of them as to food and drink. That which they needed, they gave all to the captives.

Totocalli: there majordomos kept all the various birds—eagles, red spoonbills, trupials, yellow parrots, parakeets, large parrots, pheasants. And there all the various artisans did their work: the gold and silversmiths, the copper-smiths, the feather workers,[14] painters, cutters of stones, workers in green stone mosaic, carvers of wood. Caretakers of wild animals,[19] majordomos, there guarded all the wild animals: ocelots, wolves, mountain lions, and mountain cats.

793 The hair
[302] of these priests was very long and so matted that it could
not be separated or disentangled, and most of them had
[304] their ears scarified, and their hair was clotted with blood.
Let us go on; there were other Cues, a little way from
346 where the skulls were, which contained other Idols and
places of sacrifice [decorated] with other evil paintings.
[585] And they said that those idols were intercessors in the
marriages of men. I do not want to delay any longer
[342] telling about idols, but will only add that all round that
great court there were many houses, not lofty, used and
occupied by the priests and other Indians who had charge
of the Idols. On one side of the great Cue there was
another much larger pond or tank of very clear water
dedicated solely to the service of Huichilobos and Tez-
catepuca, and the water entered that pond through covered
[883] pipes which came from Chapultepec. Near to this were
other large buildings such as a sort of nunnery where
many of the daughters of the inhabitants of Mexico were
sheltered like nuns up to the time they were married, and
[585] there stood two Idols with the figures of women, which
were the intercessors in the marriages of women, and
women made sacrifices to them and held festivals so that
they should give them good husbands.

I have spent a long time talking about this great Cue of Tlaltelolco and its Courts, but I say that it was the greatest temple in the whole of Mexico although there were many others, very splendid. Four or five parishes or districts possessed, between them, an oratory with its Idols, and as they were very numerous I have not kept count of them all. I will go on and say that the great oratory that they had in Cholula was higher than that of Mexico, for it had one hundred and twenty steps, and according to what they say they held the Idol of Cholula to be good, and they went to it on pilgrimages from all parts of New Spain to obtain absolution, and for this reason they built for it such

796 mountains. Those who were there watching then raised a cry which rose to the heavens with joy that
372 the world was not ending and that they had another fifty-two years assured.

The last ceremony of new fire which they held was in the year 1507. They held it with full solemnity, because the Spaniards had not come to this land. In the year 1559 ended the next bundle of years, which they call Toximmolpilia. On this occasion they held no public ceremony, because the Spaniards and members of the religious Orders were now in this land. So that this year, 1576, is the fifteenth of the current bundle of years.

796 When they made the new fire and held this cere-
778 mony, they renewed their covenant with the devil to serve him, and they renovated all the statues of the devil which they had in his house, and all the ornaments for his service, and those of their houses. And they rejoiced greatly to know that now they held the world to be secure and that it would not come to an end for fifty-two years. It is clear that this device of counting years was an invention of the devil to make them renew the covenant which they made with him every fifty-two years — [the devil] terrifying them with [the threat of] the end of the world and making them think that he lengthened the time and favored them thereby, letting the world move on.

796 Besides this they held, every eight years, a fast on
785 bread and water, for eight days; and at its conclusion they celebrated a feast in which they held a solemn dance by various personages, in which they said that they revealed what would come to pass or what fortune they merited; and they called it Atamalqualiztli.

796 They observed another feast every four years, in
● 304 honor of the fire [god], during which they pierced the ears of all the boys and girls; and they called it
805 Pillauanaliztli. And during this feast it is likely, and there are conjectures, that they held their leapyear, reckoning six [days] of Nemontemi.

805 The remaining time-count is of the year, which they divided into eighteen months, to each of which
796 they assigned twenty days. And each of these months was dedicated to one god, or to two, and
443 during it they held their feast. Each of these months they divided into five-day periods, and held the fairs on the last day of these five in one town, and five days later in another, and another five days later in

y los que estauan alli a la mira, leuantauan luego vn alarido que le poojan en el cielo de alegria que el mundo no se acabaua y que tenjan otros cincuenta y dos años por ciertos.

La vltima solemnjdad, que hizieron deste fuego nueuo: fue el año de mill y quinjentos, y siete: hiziéronle, con toda solemnjdad, porque no avian venjdo los españoles, a esta tierra: el año de mjll y quinjentos y cincuenta y nueue, se acabo la otra gabilla de años: que ellos llaman Toximmolpilia. En esta, no hizieron solemnjdad publica: porque ya los españoles, y religiosos estauan en esta tierra. De manera que este año de mjll y quinjentos y setenta y seis, anda en quinze años, de la gabilla de años que corre.

Quando sacauan fuego nueuo, y hazian esta solemnjdad, renouauan el pacto que tenjan con el demonjo de servjrle: y renouauan todas las estatuas del demonjo, que en su casa tenjan, y todas las alhajas de su serujcio, y las de sus casas: y hazian grandes alegrias, por saber, que ya tenjan el mundo seguro, que no se acabaria por cincuenta y dos años. Claramente consta, que este artificio de contar, fue invencion del diablo, para hazerlos renouar el pacto que con el tenjan de cincuenta, en cincuenta y dos años: y amedrentandolos con la fin del mundo, y haziendolos entender, que el alargaua el tiempo y les hazian merced del passando el mundo adelite.

Demas desta cuenta tenjan que de ocho en ocho años, hazian vn ayuno de pan y agua, por espacio de ocho dias, y hazian al cabo, vna fiesta donde hazian solemne areito de diuersos personajes; donde dezian, que descubrian ventura o que la merecian, y llamauanla Atamalcualiztli.

Otra fiesta hazian, de quatro en quatro años, a honrra del fuego, donde agujerauan las orejas a todos los njños, y njñas, y la llamauan pillauanaliztli. Y en esta fiesta es verisimjle, y ay conjecturas que haziá su bisexto, contando seis de nemontemj.

la otra cuenta del tiempo, es de vn año: el qual repartian en dezjocho meses, y a cada mes le dauan veinte dias: y cada vno destos meses, era dedicado a vno, o a dos dioses: y hazian en el sus fiestas, cada vno destos meses, le repartian de cinco in cinco dias, y hazian las ferias el vltimo dia, destos cinco, en vn pueblo: y dende a cinco dias en otro, y dende a otros cinco dias en otro. De manera que el quarto quin-

ders, as far down as his armpits. This was called "the flowery garment."

And from both ears hung curved, gold, shell pendants.[8] And they fitted [his ears] with ear plugs made of a mosaic of turquoise. And [he wore] a shell necklace. Moreover, his breast ornament was of white sea shells.

And then his lip plug was a slender snail shell lip plug. And hanging from his shoulders was what was like a cord bag called *icpatzaxis*.[9]

Then they placed golden bracelets on both upper arms, and on both wrists they put carved bracelets with precious stones, covering almost all the forearm. And he put on his net cape like a fish-net of wide mesh with a fringe of brown cotton thread.[10] And his costly breech clout reached to the calves of his legs.

And then they placed his bells on both legs, all golden bells, called *ciocalli*. These, as he ran, went jingling and ringing. Thus they resounded. And he had princely sandals with ocelot skin ears. Thus was arrayed he who died after one year.

When [the feast] of Toxcatl was drawing near, when it was approaching him, when it was coming to him, first they married him to [four] women whom they sought out [for him]. He was married in [the month of] Uey tocoztli.

And he left off, scattered in various places, and abandoned the ornaments he had had, in which he had walked about fasting, painted black. His hair was shorn; he was given a tuft of hair tied upon his forehead, like that of a war captain. Thus they bound [his hair], knotting it [with brown cotton thread] called *tochiacatl*; and they tied to his long hair[11] his forked heron feather ornament with single quetzal feathers attached.

Only twenty days he lived, lying with and married to the women. Four women he lived with, who also were cared for, for one year, in the guardian's house.

The first one was named Xochiquetzal; the second, Xilonen; the third, Atlaxman; the fourth, Uixtocioatl.

And still on the eve of [the feast of] Toxcatl, still five days from it, on the fifth day [before it], when

Ninetenth Chapter, in which is described the ordering of the market place, and [how] the ruler took great care of it.

The ruler took care of the directing of the market place and all things sold, for the good of the common folk, the vassals, and all dwellers in the city, the poor, the unfortunate, so that [these] might not be abused, nor suffer harm, nor be deceived nor disdained. Thus were things bought, or sold: they arranged them in order so that each thing sold would be placed separately—in its own place or station. They were not spread about in confusion.

Market place directors were appointed to office. They cared for, and attended to, the market place and all and each of the things sold—the merchandise which was there. Each of the directors took care, and was charged, that no one might deceive another, and how [articles] might be priced and sold.

[306] Separate were those who sold gold and silver, and green stone, and turquoise, and emeralds, and quetzal feathers, and [those of] the blue cotinga, and the red spoonbill, and all the various precious feathers of birds, which were needed for devices and shields.

[291 278] Separate were those who sold chocolate, aromatic herbs,[1] and vanilla. Apart were those who sold great capes, costly capes, embroidered capes, costly breech cloths, embroidered skirts and shifts, large common capes, maguey fiber capes, and thin maguey fiber capes.

[262] And all food necessary to them also was sold separately: dried grains of maize, white, black, red, and yellow; yellow beans, white ones, black, red; pinto beans; large beans; gray amaranth seed, red amaranth seed, and fish amaranth; white chía,[2] black chía, and the wrinkled variety;[3] salt; fowl; turkey cocks and hens; quail; rabbits, hares, and deer; ducks

471 the leaders of each, in turn, apportioned its share among the
421 heads of families justly and equitably. Sections were also reserved for the maintenance of the chief and the temple staff, for war supplies and the payment of tribute; these were worked communally, with some amount, no doubt, of slave
[428] labor. At the death of a tenant the land passed to his sons. If he died without issue the holding reverted to the clan for redivision, as was also the case if a tenant failed to cultivate his plot for a period of two years. Such a system could work equitably and profitably for all concerned so long as a society was relatively static and plenty of arable land was at hand. However, in the Valley of Mexico inequalities developed in the system.

174 The growing population of the Valley tribes used up all the available land, and families or clans had no way of adding to their farm holdings. A plot which produced ample supplies for a small family might yield a bare subsistence or less for a larger one. Normal variation in the richness of soil would result in similar injustices. Under such conditions the chiefs and priests who lived off the public lands would be far better off than the ordinary citizen whose holding, generation by generation, tended to diminish. Thus friction leading to foreign war and internal revolt was bound to result whenever a tribe could not expand its territorial limits to meet the needs of its population. The considerable mi-
[167] grations, like those of the Culhuas to Texcoco and Tenochtitlan or the Mixtec people to Texcoco years earlier, had their basis in a pressing economic necessity.[8]

241 The Tenochcas, who came late to the Valley, at a time
311 when land was at a premium, had, we have seen, a difficult time in withstanding their hungry neighbors. Forced to re-

1:Vaillant A-5 (1928-1936)1941 NU7 Aztec NU7

treat to islands in the lake, they met the land problem in the same ingenious way as did the Chalcas, Xochimilcas and the tribes to the northwest, in Lake Zumpango. 241 311

This method was to create *chinampas*, the so-called "floating gardens." The *chinampa* was, in reality, a small artificial island, made by scooping up mud from the marshy borders of the lakes and at first holding it in place by a revetment of reeds and later by trees whose roots bound the earth solidly together. Water flowed into the narrow pits, making them into canals. Fresh mud was always added before planting, so that the fertility of the earth was constantly renewed. The Tenochcas and their neighbors thus converted great sections of otherwise unproductive marsh, flooded in the rainy season, into a grid of canals and fields, the fertility of which is equaled only by the river-flooded lands of the Nile Delta. *Chinampa* agriculture continues today in the districts of Xochimilco and Chalco, where most of the vegetables are grown for the modern metropolis of Mexico City. The inhabitants still use the Aztec language and occupy the same land as did their ancestors, renewing them each year by the same methods used in Aztec times. The outlines of former beds may be seen for a considerable distance round about, since the modern draining of Lake Texcoco has dried up much of the lake area of the Valley of Mexico.[4] (See Plate 37, bottom.)

When the Tenochcas moved into the lake they achieved living room. As the city grew it could incorporate the adjacent garden beds for house foundations, while the increase in population could be fed by building new *chinampas* on the outskirts of the farming area. Thus much of their success may be attributed to the freedom from internal strife 311 578

1:Vaillant A-5 (1928-1936)1941 NU7 Aztec NU7

311 578 achieved by the relatively unlimited possibilities of *chinampa* agriculture.

729 The Tenochcas supplemented their land hunger by an-
728 other means. In conquered territories successful warriors
471 received grants of land which were worked by members of the defeated tribe. Small colonies sometimes lived off this
[428] land to guard against revolt in the subjugated area. Such property passed from father to son, but if there were no heir it reverted to the tribal authority, not the clan in which the tenant had membership. Other such land must have been held for the benefit of the religious organization. Thus the central authority of Tenochtitlan, and presumably Texcoco as well, held considerable property to support the elaborate pomp of Church and State without straining the resources of the tribesmen. The relative fluidity of such real estate gave the tribal authority a wherewithal to adjust inequalities and dissatisfactions among the more ambitious tribal members. Naturally, as the Aztec peoples were less highly developed socially than ourselves, they did not attain our own elaborate system of rewards and adjustments by means of federal, state and municipal appointments.*

651 A powerful Aztec tribe had another source of support: tribute. The levies often consisted of foodstuffs and raw materials, both native and foreign to the Valley, and also included warriors' and priests' costumes, mantles, pottery and other articles of craftsmanship. Distributed throughout the community these goods enriched both communal enterprise and private convenience.* (See Plates 62, bottom right; 64.)

436 Manufacture and trade were beginning to play an im-
438 portant part in Aztec economy, although not to the extent
32 of societies which have developed media of exchange, like

1:Vaillant A-5 (1928-1936)1941 NU7 Aztec NU7

361 174 Approaching along the causeway, the traveler of that time passed first between expanses of open water. Then gradually tiny islands of green appeared, made of masses of mud dredged up from the bottom of the shallow lake and held [241] in place by wickerwork. White-clad farmers dexterously [311] [301] poled their tiny dugouts through the maze as they went about the cultivation of their gardens. These irregular islets merged gradually into a more orderly grouping where the accumulation of soil had become stabilized as the roots, striking downward, had established anchorage in the lake bottom and created solid ground. This artificially made land reduced the open water of the lake to mere canals. (See Plate 37, bottom.)

[363 505] Save for the broad causeways, roads there were none; and along the canals the traveler saw, in increasing numbers, boatloads of produce headed toward the city. Here and there among the green of the crops and trees he caught glimpses of thatched roofs and wattled walls, the huts of the farmers. Then adobe walls of more substantial dwellings began to encroach on the gardens, and the waters of the lake shrank to a canal following the roadway. The adobe walls gave way to the fronts of more pretentious houses plastered white or washed with powdered pumice, a dull, rich red. Now the visitor could realize how the city expanded through the successive creation of artificial islands which bore first a crop, then a modest hut and finally became integral with the masonry of the city proper.

363 174 The causeway had now changed from a simple means of communication into a principal street with all its social complexity. Since canals took the place of roads, space for a saunter was so rare that the causeways were as much recrea-

REMARKS ON TOWNS

632 An extensive zone to the south of Lake Chalco is rendered uninhabit-
[133 able by the lava flow, or "Pedregal," emitted by the Ajusco Mountains,
311] which form the valley rim. If any small settlements existed in this area, their tribute was probably reckoned as a part of that collected from some major town in the region of Xochimilco or Tepoztlan.

Auchpanco is identified by Acosta with Ayapango.

Colhuacacinco,[8] later San Cristobal, lay on the shore of Lake Xaltocan, east of Tzonpanco (2).

Olac is a barrio of Xochimilco.[9]

632 *Petlacalcatl* is the inscription under the glyph of a house made of
114 grass mats, in the *Mendocino*. It occupies the usual place of the cabecera in the manuscript, and like all the other towns was originally followed by the word "pu[ebl]o." A later hand has struck this out and has replaced it with the word "gobernador," perhaps under the influence of the double (and doubtful) annotation about "Acolhuacâ" and "Acolmecatl calpixqui" (tribute collector) which heads Acolhuacan Province.

That something is wrong is evident from the form of the original annotation. It is probably a place glyph, but the annotation takes the form of a personal glyph. I have chosen to read it as Petlacalco. The result is the same, for the Petlacalcatl, on the facing *Mendocino* page, was a head tribute collector, and the Petlacalco[10] was the "audiencia" building in the Tenochtitlan palace, which also housed a majordomo in charge of the granaries.[11]

632 *Tezcacoac*[12] is a barrio of Tepotzotlan, and consequently we should judge that it lay north of Tecoloapan (7).

[8] Located after the printing of the map, "dista del pueblo de Tiçayuca vna legua hazia el oeste" (*PNE*, 3: 44 and n. 2).

might occasionally have raised, as well as upon the chase. But |105
during this very period also, their chief divinity and subsequent
principal idol, Huitzilopochtli, god of war, is reported to have ut- 776
tered these prophetic words: "And I was sent on this journey, and 787
"my office it is to carry arms, bows, arrows, and shields; war is my
"chief duty, and the object of my coming. I have to look out in
"all directions, and with my body, head and arms, have to do my
"duty in many tribes, being on the borders and lying in wait for
"many nations, to maintain and to gather them, although not gra-
"ciously." Proceeding to state a number of objects, *subsequently*
given to the Mexicans in tribute, he closes as follows: "All this I
"shall own and hold, for I am sent after it, it being my office, and
"I came for this purpose."[4] Imbued with a spirit of which this |74
utterance is merely a legendary form, the Mexicans made their
appearance among the agricultural tribes of the valley of Mexico
as a crowd of famished, but desperate, intruders, were received as
such, and, after a brave resistance, compelled to take refuge in a
naturally isolated spot of dry land, surrounded by swamps and
marshes.[5]

In this defensive position, which the Mexicans subsequently |61
converted into the strongest one ever occupied by Indians up to
the 16th century,[6] they carefully nursed and developed their war-

[4] Tezozomoc (Cap. I, p. 6). Joseph de Acosta (Historia natural y moral de las Indias, 1608. Lib. VII, chap. IV, p. 459). M. Brasseur de Bourbourg ("Popol-vuh, "Intr., p. 187 and p. 149.") intimates Huitzilopochtli to be a myth common to all the aborigines of Central America in general.

[5] The spot to which the Mexicans fled, and which subsequently became the nucleus of Tenuchtitlan, and of Tlatilulco, was *dry land*, in the midst of canes and reeds. (Tezozomoc, cap. I, p. 5, "porque el dia que llegaron a esta laguna Mexicana, en medio "de ella estava, y tenia un sitio de tierra, y en el una peña.") Fray Géronimo de Mendieta (Historia ecclesiastica Indiana," published by my most esteemed friend, Señor J. G. Icazbalceta, the learned Mexican scholar, in 1870. Lib. II, cap. XXXIV, p. 148. "Y luego se hicieron fuertes, en este sitio, tomando por muralla y cerca las aguas y "embocadas de la juncia y carrizales y matorrales de que estaba entonces poblada y "llena toda la laguna, que no hallaron el agua descubierta sino en sola una encrucijada "de agua limpia desocupada de los matorrales y carrizales, formada a' manera de una "aspa de San Andrés. Y casi al medio de la encrucijada hallaron un peñasco"). Torquemada (Lib. II, cap. X, pp. 91 and 92. "En este lugar se ranchearon (como decimos "en el libro de las Poblaciones) haciendo unas pobres, y pequeñas choças, rodeados "de carrizo, y Espadañas, que ellos llamas Xacalli," etc., etc. (Acosta, Lib. VII, cap. VII, p. 455. " . . . . y dividiendóse una parte y otra, por toda aquella espesura "de espadañas, y carrizales, y juncia de la laguna, commençaron á buscar por las señas "de la revelacion el lugar tan deseado.") [311]

[6] There was, to my knowledge, but one similar position: that of Atitlan, in Guatemala. (See: Segunda Relacion por Pedro de Alvarado á Hernando Cortes, 28 July, 1524, pp. 449, 451 and 452, of Vol. I. of "Historiadores primitivos de Indias," by Don Enrique de Vedia, Madrid, 1852.) The tribe was regarded as very fierce, also. [17]

15:Bandelier E-4 (no date)1880 NU7 Aztec NU7

of the tribe, and it remained always public ground, reserved for the same purposes.[78] 651 423

Both of these kinds were often comprised in one, and it is even not improbable that the first one may have been but a variety of the general tribute-lands devoted to the benefit of the conquering confederates. Still, the evidence on this point is too indefinite to warrant such an assumption.

While the crops raised on the "tecpan-tlalli," as well as on the "tlatoca-tlalli," were consumed exclusively by the official houses and households of the tribe, the soil itself which produced these crops was neither claimed nor possessed by the chiefs themselves, or their descendants. It was simply, as far as its products were concerned, official soil.[79]

The establishing and maintaining of these areal subdivisions was very simple with the tribes of the mainland, since they all possessed ample territories for their wants and for the requirements of their organizations. *Their* soil formed a contiguous unit. It was not so, however, with the Mexicans proper. With all their industry in adding artificial sod to the patch on which 423 311

spending it in the house of the King.") Ixtlilxochitl (Ibid. cap. XXXV, p. 242. "In the best location of the territory there was set off a field, which held exactly *four* hundred measures in length and breadth. This was called Tlatocatlali or Tlatocamilli that is: land or plantation of the Lord, and also Itonal Yutlacal, or lands on which the inhabitants are compelled to work.") Oviedo (Lib. XXXIII, cap. II, p. 537). Veytia, (Lib. III, cap. VI, p. 195, confirms Ixtlilxochitl almost verbally, adding: "For the sowing and cultivation of these the calpixque, which was an officer of the community in each pueblo, daily designated those who had to attend to it, out of the plebeians and tributaries, and all the crops went to the Lord for the maintenance of his house ('casa' family)." Zurita does not use the term which we have adopted, because he is chiefly struck by the communal tenure, as exhibited in the "calpulalli." The fact of their being communal land, though set off for a special purpose, and *not owned* by the chiefs, is plain.

[78] Veytia (Lib. III, cap. VI, p. 195). It is superfluous to revert to the erroneous impression, that the chiefs might dispose of it.

[79] "Patrimonial Estates" are mentioned frequently, but the point is, where are they to be found. Neither the "tecpantlalli" nor the "tlatoca-tlalli," still less the "calpulalli," show any trace of individual ownership. "Eredad" (heirloom) is called indiscriminately "milli" and "cuemiti" (Molina Parte Ia. p. 57). The latter is also rendered as "tierra labrada, ó camellon" (Molina. Parte IIa. p. 26). It thus reminds us of the "chinamitl" or garden-bed (as the name "camellon" also implies), and reduces it to the proportion of an ordinary cultivated lot among the others contained within the area of the calpulli. It is also called "tlalli," but that is the general name for soil or ground. "Tierras o eredades de particulares, juntas en alguna vega," is called "tlalmilli." This decomposes into "tlalli" soil, and "milli." But "vega" signifies a fertile tract or field, and thus we have again the conception of communal lands, divided into lots improved by particular families, as the idea of communal tenure necessarily implies.

15:Bandelier E-4 (no date)1880 NU7 Aztec NU7

423 they had originally settled, the solid surface was eventually much
311 too small for their numbers, and they themselves put an efficient stop to further growth thereof by converting, as we have seen elsewhere, for the purpose of defence, their marshy surroundings into water-sheets, through the construction of extensive causeways.[80] While the remnants of the original "tecpantlalli" and of the "tlatocatlalli" still remained visible in the gardens, represented to us as purely ornamental, which dotted the pueblo of Mexico,[81] the substantial elements wherewith to fulfil a purpose for which they were no longer adequate had, in course of time, to be drawn from the mainland. But it was not feasible, from the nature of tribal condition, to extend thither by colonization. The soil was held there by other tribes, whom the Mexicans might well overpower and render tributary, but whom they could not incorporate, since the kinships composing these tribes could not be fused with their own. Outposts, however, were established on the shores, at the outlets of the dykes, at Tepeyacac on the north, at Iztapalapan, Mexicaltzinco, and at Huitzilopochco to the south, but these were only military positions, and beyond them the territory proper of the Mexicans never extended.[82] *Tribute*, therefore, had to furnish the
651 means for sustaining their governmental requirements in the matter
423 of food, and the *tribute lands* had to be distributed and divided, so as to correspond minutely to the details of their home organization. For this reason we see, after the overthrow of the Tecpanecas, lands assigned apparently to the head war-chiefs, to the military chiefs of the quarters, "from which to derive some revenue, for their maintenance and that of their children."[83] These

[80] "Art of War" (pp. 150 and 151). L. H. Morgan ("Ancient Society," Part II, cap. VII, pp. 190 and 191).

[81] Humboldt ("Essai politique sur la Nouvelle Espagne," vol. II, lib. III, cap. VIII,
[35] p. 50). Nearly all the old authors describe the public buildings as surrounded by pleasure-grounds, or ornamental gardens. It is very striking that, the pueblo having been founded in 1325, and nearly a century having been spent in adding sufficient artificial sod to the originally small solid expanse settled,—the Mexicans could have been ready so soon to establish purely decorative parks within an area, every inch of which was valuable to them for subsistence alone!

[82] The Mexican tribe proper clustered exclusively within the pueblo of Tenuchtitlan. The settlements at Iztapalapan, Huitzilopochco and Mexicaltzinco were but military stations—outworks, guarding the issues of the causeways to the South. Tepeyacac (Guadalupe Hidalgo) was a similar position,—unimportant as to population,—in the
[312] North. Chapultepec was a sacred spot, not inhabited by any number of people, and
764 only held by the Mexicans for burial purposes, and on account of the springs furnishing fresh water to their pueblo.

[83] Tezozomoc (Cap. XV, p. 21). See note 57.

1:Vaillant A-5 (1928-1936)1941 NU7 Aztec NU7

The streets of Tenochtitlan were the canals bordered by 363
footpaths, and frequent bridges allowed easy access to all
parts of the town. Three great causeways led north, west [491]
and south to the mainland, touching it respectively at Te-
peyac, now Guadalupe, Tlacopan, now Tacuba, and Coyoa-
can. Canals paralleled these main roadways where they en-
tered the city proper, following them as far as their terminus
at the main plaza. Two aqueducts also joined the city to the 312
mainland. The one to Chapultepec seems to have been con-
structed exclusively to carry water and had two channels, so
that when one was being cleaned or repaired the other could
remain in use. The Coyoacan aqueduct, built later by
Ahuitzotl, may well have followed the great southern cause-
way. The problem of sanitation must have been serious, but 364
boats were tied up at strategic points for public use, and when [241
filled their contents were sold to fertilize the fields. Pottery 432]
vessels were kept in the houses to preserve urine, which the [415
Aztecs used as a mordant in dyeing cloth. Hence sunlight 386]
and these simple methods for getting fresh water and dis-
posing of offal kept down the pestilence that beset the city in
Spanish times when the ancient methods of sanitation were
abandoned.[18]

A city so advantageously situated had no need of fortifi- 712
cations, and formal military architecture was rare. The tem- 212
ples, which dominated the city, were natural strong points;
indeed, the hieroglyph for the capture of a town was the
burning of a temple, an indignity to which no people would
submit unless driven from this last rallying point.

The temples had stone or rubble walls surmounted by a 346
high roof, the construction of which consisted of a cribwork
of logs, either thatched with straw or covered with plaster.

1:Vaillant A-5 (1928-1936)1941 NU7 Aztec NU7

174 keenly. The Aztecs had no money, so that barter was the
438 usual means of purchase. The cacao bean, however, had a standard value, and this, in equalizing exchanges, performed the nearest approach to the function of currency. Passing
[625] through the crowd were warriors who acted as police and, should a disagreement arise, haled disputants into a court where a tribal elder settled the question in his capacity as judge.

174 Beyond the market was a double line of walls which
346 divided the market from the temple precinct of Tlaltelolco.
361 Rectangular buildings, with patios in their centers, housed the priests and the various schools and councils of the central organization of the community. Farther on were grouped the principal shrines. In their midst the great temple to the War God shouldered its bulk into the sky. There was a skull rack here, like the one in Tenochtitlan, and another heap was made of the bones of the victims. Near the great pyramid stood a circular temple, the door of which was built to resemble the mouth of a serpent, the place of worship of the god Quetzalcoatl. The sacrificial block in front was black with the smoke of incense and the blood of victims. A pile of stone knives and axes gave a sinister indication of what rites were practiced there.

[312] Pools fed by the pipes of an aqueduct leading from the mainland gave an impression of quiet peace. The reflections of the temples, distorted occasionally by the breeze, intensified the brooding mysticism of the sacred enclosure. In contrast to the austerity of the priests, young girls, their eyes virtuously downcast, slipped back and forth, carrying out the various errands of their training school within the enclosure. The great pyramid and the temple of the War God

The eighth ruler of Tenochtitlan.

[312] Auitzotl was the eighth, and he ruled Tenochtitlan for eighteen years. When he was ruler, Mexico was flooded. By his command it was done; five springs were opened, known as Acuecuexatl, Tlillatl, Uitzillatl, Xochcatl, and Coatl, which were in the territory of Coyoacan and Uitzilopochco.[1] When Mexico was flooded, four years were still to pass before Auitzotl died. And when the Spaniards came here, it was already twenty-two years before that Mexico had been flooded.

And it came to pass in his time that the sun was eclipsed, at midday. For about five hours the darkness was overspread; the stars appeared. All were much terrified. It was said: "The demons of darkness will descend; they will eat people."

And he conquered those of Tzinhcoac, and Mollenco, Tlapan, Chiapan, Xaltepec, Izoatlan, Xochtlan, Amaxtlan, Mapachtepec, Xoconochco, Ayotlan, Maçatlan, and Coyoacan.

[312] 1. Xoloco or Xoluco served to identify the canal which ran along the Calzada de Chimalpopoca; this canal was crossed by a bridge given the same name. In times past they have been named Canal and Bridge of San Antón. Its exact location is the intersection of the Calzadas of San Antonio Abad and Chimalpopoca, the place of the first meeting of Cortés and Moctezuma (personal communication, Rafael García Granados). See map. Alfonso Caso, in *Los barrios aztecas de Tenochtitlan y Tlatelolco* (México, D. F.: 6° Mesa Redonda, Sociedad Mexicana de Antropología, Sept. 1956; mimeographed), identifies Xoloco as a *barrio* bounded N. by a line S. of Calle de José Ma. Iturbide, E., Pino Suárez and S. Antonio Abad; S., Lerdo Alcalde; and W., extension of 20 de Noviembre.

2. Near the Church of S. Pablo, according to Lehmann's Spanish text of the *Florentine Codex*, Chapter 20.

3. Corresponding Spanish text: "*En Segundo lugar capítulo a aquel rio que era cabe las casas de alvarado que se llama Xoloco.*"

4. *Chimalxochitl. Chimalxoxouchitl* is mentioned in Hernández, *op. cit.*, I, pp. 101-102 (Eg., p. 102). Chimalxoxouchitl (*ibid.*, p. 100), "*nace . . . flores redondas amarillas (parece prodigio) de un palmo, encerrillo rojizo con algo de amarillo más fuerte en su parte media*"; *Molina* (*Vocabulario*) I. Lima.: *girasol, chimalitl, escudo de sujeto. Chimalxoxouchitl* is identified as "*compuesta*."

5. *Yolloxochitl. Yoloxochitl* (*Talauma mexicana*, Dun?), according to Santamaría, *op. cit.*, III, p. 299. According to Emily Walcott Emmart, *The Badianus Manuscript* (*Codex Barberini, Latin 241*), *Vatican Library — an Aztec Herbal of 1552* (Baltimore: Johns Hopkins Press, 1940), p. 310 and Pl. 96, it is the Mexican magnolia and (citing Sahagún), "was reserved solely for the nobility, especially a kind known as *chimalli-xochitl*."

6. *Izquixochitl. Izquixóchitl*: in Chiapas, *pasmite del inicio — Bourreria ferreana*; S. Amatán; S. Ixtacomitán (Santamaría, *op. cit.*, I, p. 626). Popcorn flower (*Bourreria huanita* [La Llave and Lex] Hemsl.), according to Emmart, *op. cit.*, p. 276 and Pl. 69 — a rare and coveted plant whose flowers were used to flavor cocoa. In Sahagún (Anderson and Dibble ed.), p. 97, n. 2, it is noted that "*Este flor sirve sur l'arbre izquixochitzquixtl, ocuxiflum huanita, de la famille des ayapanides.*"

7. *Teuxochitl. Nicolás Antonio Rocha* (*Novae medicorum omnes Hispaniae observatos sive plantarum aromatica, odoriferarum historia ex Francisci Hernandez* [Rome: Ex Typographia Vitale Mascardi, 1651], p. 258) gives *elocuchitl* as an alternative (*quam alij Elocochitl, seu Florem Elocochitl, alij verò Cocoxochipatochitl* [*cocoxochipatochitl*] *seu Teuxochitl publicam, nuncupant*"), a cold climate plant ("*provenit reptantibus frigidis, & nonnunquam hiemi*"). There is a confusion of terminology. Santamaría (*op. cit.*, I, p. 588) identifies it *elocochitl* as Magnolia *acuminata* Linn. Emmart (*op. cit.*, p. 279) points out that, while according to Hernández it is a *p* magnolia, in the *Badianus MS* the flower "appears to belong to the Compositae."

8. *Cacaoxochitl. Cacahuaxóchitl*, according to Santamaría, *op. cit.*, I, p. 279 (*Quararibea funebris Llave*). In Sahagún (Bolaños ed.), III, p. 348, it is identified as "*Rosita de cacao. Myrodia funebris. Bonl. Kunth-Humboldt.*" Emmart (*op. cit.*, p. 311 and Pl. 98) has *Theobroma angustifolium* DC, one of the important cacao plants.

7: Sahagún M-5 (1529-1590) 1955 NU7 Aztec NU7

Twenty-fourth Chapter. Here is told how the Spaniards and those of Tlaxcalla set out and fled from Mexico by night.

And after dark, when midnight came, thereupon came out the Spaniards, crowded together, and all of the men of Tlaxcalla. The Spaniards took the lead, and the Tlaxcallans followed behind, covering the rear, like their walls, their rear guard. They went carrying a wooden bridge, which they proceeded to lay across the canal over which they passed.[1]

At the time, it was drizzling; there was a fine sprinkle, a gentle spray, of rain. They crossed easily some of the canals, at Tecpantzinco, Tzaputlan, and Atenchicalco. But when they went to attain Mixcoatechialtitlan,[2] the fourth canal, then it was seen that they were leaving. A woman fetching water spied them, whereupon she cried out and said: "Mexicans! Come here quickly! Already they leave! Your foes are already slinking away!" Then also a man cried out from the top of the [pyramid] temple of Uitzilopochtli. His cries spread well out over the people; everyone heard him. He said: "O chieftains, O Mexicans! Your foes are already setting out! Hasten here by war boat and along the roads!"

And when it was heard, then there was an outcry. On this, the war boatmen broke forth. They rushed; they plied the poles furiously; the boats struck and bumped one another. They came to [a place called] Mictlantonco Macuilcuitlapilco.[3] And from two sides the war boats came upon them. They pressed upon them, the war boats of those of Tenochtitlan and the war boats of those of Tlatiluco. And a number went afoot, direct to Nonoalco, making their way toward Tlacopan, intending to cut off their advance.

1. The Aztec would permit crossing "bridges" and "canals." — According to all other accounts, they carried only one wooden bridge, which was extend in the first canal (that is, at Tenpantzinco, before the present site of the Post Office) and could not be used for the rest of the canals (personal communication, Roland Gareis Grimshaw).

2. Mixcoac is represented by the Mixhuca hill.

Three places were all on canals near the main temple square, on the road to Tlacopan. Cano (op. cit.) says of Atenchicalco and Mixcoatechialtitlan that they were on the Calzada de Tacuba between S. Juan de Letrán and Guerrero; Tlacopan was on the same calzada in the barrio of Tlacopan.

3. The corresponding Spanish text refers to "un lugar que se llamaba mictlantonco, macuilquitlapilco"; Cano (op. cit.) mentions a Macuilquitlapilco, "que pertenece a la. Pobl. y mencionan Sahagún (IV-187)."

823 neighbors demonstrated practical control over the lacustrine as well as other components of their environment.

127 133 At the time of the Conquest, according to extensive researches summarized by Orozco y Berra (1864), Maudslay (1908, 1910, in the 2nd and 3rd volumes of the Hakluyt Society edition of Bernal Diaz del Castillo), and especially by Schilling (1939) and Linné (1948), the Valley lakes were more or less one continuous sheet of water. Schilling's series of sketch maps is reproduced in Figure 1. Cortés, in his second letter to Charles V (MacNutt edition, 1908, vol. 1), speaks of two [312] lakes, because Lake Texcoco, the lowest-lying and most saline body of water, was separated from the freshwater portions by a great dike, the *albarradón* of Nezahualcóyotl. The Valley lakes of course were without outlet to the sea, and the drainage operations that began in the late 16th century and were made effective only in 1900 were devoted to the northward diversion of Lake Zumpango, regarded as the source of the most dangerous floods, to the Río Tula. The 16th-century historians believed that Texcoco had a subterranean outlet to the sea by way of a spring in the valley of Tula. Pomar (García Icazbalceta's edition, 1891, p. 58) claimed to have seen it, while Sahagún (Robredo edition, vol. 3, [782] p. 298) described the "whirlpool" in the center of the lake as the scene where small boys were sacrificed every year. It is reasonable to suppose that the legend of the outlet was believed by the acculturated Indians, but it does not follow that the educated Aztecs believed it.

127 133 312 The "Lake of Mexico" of the historical sources is usually the freshwater part that surrounded the Aztec capital, Tenochtitlán. This part is now dry, as is the southernmost lake of Chalco. Dikes that served as causeways connected Tenochtitlán with the mainland, but the most important dike from the hydrographic standpoint was that of Nezahualcóyotl, which lay to the east of the city. According to tradition, the dike was built by the king of Texcoco in 1446, during the reign of Montezuma I. It was 16 km long, and required the labor of 20,000 men. The reason given for its construction was to protect the Aztec capital from floods, though it is not clear why a Texcocan king should have contributed so generously to his rival's advantage. Of the advan- [241] tage, however, there can be no doubt. All of the southern valley floor, from Chalco to Tenochtitlán, was doubtless covered with *chinampas*, 127 the artificial islands that have been called "floating gardens" since the 133 days of the imaginative 18th century historian Clavijero. Floods along 731 the course of this drainage would on the whole have been beneficial, though inconvenient; the real danger threatened from the Texcoco side, whence salt water, driven by freshets or seiches,[2] might disastrously drown the *chinampas*. Freshets, that brought large river fish through

[2] [i.e., an oscillation of the surface of a lake lasting from a few minutes to several hours, thought to be due to inequalities of atmospheric pressure. — Analyst]

127 the wind did not stir it up. It was as welled up .... and it reached the
133 lower parts of the houses" (1954 edition, p. 18). There appear to
731 be no modern observations of seiches, but the extraordinary Gómara remarks (1940 edition, pp. 195–196) that "the salte water ebbeth and floweth, accordyng to the wynde that bloweth".

127 Whether irrigation was practiced in Middle America is a question
312 that has never been adequately considered (Millon, 1954; Palerm, 1955). Clearly it would not have been necessary in Aztec times in the Valley of Mexico; *chinampa* agriculture, which substituted for irrigation, has an ancient history in the Valley (Apenes, 1943), but it is not known elsewhere nearer than the Vale of Kashmir (West and Armillas, 1950). At other times and in other places it seems certain that the dense population could not have been maintained without irrigation. The great ceremonial center of Teotihuacán lies in a subdivision of the Valley that receives less precipitation than Mexico City, and some irrigation is practiced there today. We know from the work of Apenes (1943) and Sears (1952) that just prior to Teotihuacán times (about 500 B. C.) the Valley lakes were appreciably lower than today, and the conclusion is inescapable that Teotihuacán culture was founded on high ground and flourished during a dry time when irrigation must have been essential. Deforestation (Vaillant, 1941) complicates the hydrographic picture for Teotihuacán times but it is evident that the rise and spread of Aztec culture was related to increased moisture, reflected in high lake levels during the 14th to 16th centuries. The high levels would doubtless have continued through the 18th century, in agreement with climatic oscillations elsewhere, if sporadic attempts to drain the Valley had not been partially successful in the early 17th century (they were not completely successful until 1900).

Aztec control of hydrography, then, did not include irrigation where it was unnecessary, but was devoted, in the last centuries before the Conquest, to regulating the levels of the lakes. Before the Aztecs entered the Valley, however, they lived in many places, not all of
127 which were lacustrine. So far archaeology has made little progress in reconstructing the details of their history during the migration period. The problem is exceedingly complicated, and four centuries of scholarship have not made it less so. The Aztecs were interested in their own history, and attempted to draw it together in pictorial manuscripts. These have been lost, and what have come down to us are copies, made, probably from memory, by hispanicized Indians under the prodding of the 16th-century friars. In the interpretation and verbalization of these pictorial histories we have to contend with ideas implanted by the friars, and the result is a picture of the migration period that is strongly reminiscent of the wandering of the Israelites, joined to a

10:Deevey N-4 (no date)1957 NU7 Aztec NU7

127 212 *Historia de las indias de Nueva-España y islas de Tierra Firme*, 1579 (Mexico, 1867–80). In this scene the most important glyphic element is the hill with a snake (Coatepec, the hill near Tula). It stands in the middle of lake beset by cattails, in which are swimming a bird, a fish, and a seal, while pollarded trees stand around, each with a bird on top. Two dignitaries are seated at either side, the male with a glyphic name representing a bird and a cactus, while the female is provided with a standard on which is seen an axolotl, rampant, with enormous external gills.

Fig. 2. Contaminated glyph for Tula, as it appears in the *Tira de la peregrinación México* (Codex Boturini) (Anon., 1944).

The implication of this curious inconography is clear and disheartening. The details about the lake of Tula were concocted by native informants to explain the glyph, probably in a manuscript now lost. Later, the pictures were drawn to illustrate the story. The glyph that provoked the story need not have been that of Tollán, for any place with *tules* in its etymology would have sufficed. We must conclude that we do not know whether Tula was situated on an artificial lake, or even whether its name was Tollán.

127 The hydrographic knowledge of the Aztecs, then, must not be judged by what was told to credulous friars by acculturated Indians fifty years after the Conquest. Cortés' account, though doubtless somewhat colored, has more of the ring of truth. In the famous Second Letter to Charles V, he said:

127 231 312 "Along one of the causeways which lead into the city, there are two conduits of masonry each two paces broad, and five feet deep, through one of which a volume of very good fresh water, the bulk of a man's body, flows into the heart of the city, from which all supply themselves, and drink. The other which is empty brings the water, when they wish to clean the first conduit, for, while one is being cleaned, the water flows through the other" (MacNutt edition, vol. I, p. 262). Again, describing one of Montezuma's lesser palaces, he said: "It had ten pools of water, in which were kept all the many and divers breeds of waterfowl found in these parts, all domesticated; for the sea-birds, too, there were pools of salt water, and, for those of the rivers and lakes, there was fresh water, which for the sake of cleanliness, they renewed at certain times by means of pipes. To each kind of bird they gave the food which suited its habits in its free state, so that to those which ate fish they gave it; and likewise, worms, maize, and smaller

10:Deevey N-4 (no date)1957 NU7 Aztec NU7

seeds were supplied as required by the different birds. I assure Your Highness that all those birds which ate only fish received each day two hundred and fifty pounds, caught in the salt lakes." (*ibid.*, pp. 265–266).

Such a people could surely have dammed a stream to make an artificial lake, and if they cannot be proved to have done so at Tula, the point is probably not very important.
